I. REPORTS

I.1. CITY COUNCIL REPORTS

March Joint Powers Commission (JPC)

Mayor Pro Tem Delgado reported the following:

March JPC heard an update by Sheriff Bianco about plans to relocate the aviation unit to March Inland Port.

March JPC approved withdrawing the sale of Green Acres, to support the military housing needs at March.

Finally, the Commission approved the JPA's Legislative Platform for 2023.

Riverside County Habitat Conservation Agency (RCHCA)

None.

Riverside County Transportation Commission (RCTC)

None.

Riverside Transit Agency (RTA)

Council Member Marquez reported the following:

The Board authorized staff to join the Alliance for Renewable Clean Hydrogen Energy Systems and to apply to the Regional Clean Hydrogen Hubs Funding Opportunity.

Minutes Acceptance: Minutes of Apr 4, 2023 6:00 PM (CONSENT CALENDAR-CITY COUNCIL)

The Board also approved and adopted Amendments to the Agency's Conflict of Interest Code.

Western Riverside Council of Governments (WRCOG)

Council Member Baca-Santa Cruz reported the following:

Items covered at the WRCOG Executive Committee meeting on March 6, 2023, included a presentation from the California Air Resources Board (CARB) on their recently adopted 2022 Scoping Plan for Achieving Carbon Neutrality for the State of California.

Western Riverside County Regional Conservation Authority (RCA)

Council Member Marquez reported the following:

Items covered at the RCA Board of Directors meeting on April 3, 2023, included a status report on acquisitions made by RCA. In the first month of the new 2023 calendar year, one parcel was acquired through donation, adding approximately 19 acres to the reserve.

School District/City Joint Task Force

None.

I.2. EMPLOYEE ASSOCIATION REPORTS

None.

I.3. CITY MANAGER'S REPORT

1. Free dump day.
2. Free household hazardous and electronic waste pick up.
3. Award from American Planning Association for Kaiser Master Plan project.

CLOSING COMMENTS AND/OR REPORTS OF THE CITY COUNCIL, COMMUNITY SERVICES DISTRICT, CITY AS SUCCESSOR AGENCY FOR THE COMMUNITY REDEVELOPMENT AGENCY, HOUSING AUTHORITY, PUBLIC FINANCING AUTHORITY, AND THE BOARD OF LIBRARY TRUSTEES.

Report to City Council

TO:	Mayor and City Council
FROM:	Jane Halstead, CMC, City Clerk
AGENDA DATE:	April 18, 2023
TITLE:	COUNCIL DISCRETIONARY EXPENDITURE REPORTS FOR FISCAL YEAR 2022/2023 FROM JULY 1, 2022 THROUGH MARCH, 31, 2023.

RECOMMENDED ACTION

Recommendation:

1. Receive and file the Fiscal Year 2022/2023 Council Discretionary Expenditure Report for July 1, 2022, through March 31, 2023.

SUMMARY

This staff report is prepared at the request of the City Council to provide transparency with respect to the expenditure of City funds from City Council Discretionary Expenditure Accounts. These reports are for each Council Member's year to date expenditures for Fiscal Year 2022/2023, for July 1, 2022 through March, 31, 2023. Each Council District receives an annual budget allocation of $3,000 and the Mayor receives an annual budget allocation of $6,000.

With the adoption of the current fiscal year budget and pursuant to Resolution No. 2021-31, unused monies from Fiscal Year 2021/2022 has been carried over to the current Fiscal Year as approved by the City Manager.

The expenditure reports are included routinely in the City Council agenda as an additional means of distributing reports on activities to the Council and public. The reports are to be posted to the City's website following Council approval. The monthly reports provide unaudited information and are reconciled to the City's general ledger. Following the end of the Fiscal Year, the financial information shall be reviewed as part of the City's independent financial audit.

NOTIFICATION

Posting of the agenda as required by the Brown Act.

Report to City Council

TO: Mayor and City Council

FROM: Brian Mohan, Assistant City Manager

AGENDA DATE: April 18, 2023

TITLE: PAYMENT REGISTER - FEBRUARY 2023

RECOMMENDED ACTION

Recommendation:

1. Receive and file the Payment Register.

SUMMARY

The Payment Register is an important report providing transparency of financial transactions and payments for City activity for review by the City Council and the residents and businesses in Moreno Valley. The report is posted to the City's website as soon as it is available. The report is included in the City Council agenda as an additional means of distributing the report.

The payment register lists in alphabetical order all checks and wires in the amount of $25,000 or greater, followed by a listing in alphabetical order of all checks and wires less than $25,000. The payment register also includes the fiscal year-to-date (FYTD) amount paid to each vendor.

Report to City Council

TO: Mayor and City Council

FROM: Brian Mohan, Assistant City Manager

AGENDA DATE: April 18, 2023

TITLE: LIST OF PERSONNEL CHANGES

RECOMMENDED ACTION

Recommendation:

1. Ratify the list of personnel changes as described.

DISCUSSION

The attached list of personnel changes scheduled since the last City Council meeting is presented for City Council ratification.

Staffing of City positions ensures assignment of highly qualified and trained personnel to achieve Momentum MoVal priorities, objectives and initiatives.

FISCAL IMPACT

All position changes are consistent with appropriations previously approved by the City Council.

PREPARATION OF STAFF REPORT

Prepared By:
Serina Astorga
Executive Assistant

Report to City Council

TO:	Mayor and City Council
FROM:	Brian Mohan, Assistant City Manager
AGENDA DATE:	April 18, 2023
TITLE:	APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT BETWEEN THE WESTERN RIVERSIDE COUNCIL OF GOVERNMENTS AND THE CITY OF MORENO VALLEY TO PARTICIPATE IN THE WESTERN RIVERSIDE REGIONAL FOOD RECOVERY PROGRAM

RECOMMENDED ACTION

Recommendations:

1. Approve the City of Moreno Valley entering into a 3-year agreement with Western Riverside Council of Governments (WRCOG) for the City of Moreno Valley to participate in the Western Riverside Regional Food Recovery Program for $117,329 for FY2022/23.

2. Authorize the City Manager or designee to execute the Memorandum of Agreement (MOA) and any subsequent related extensions or amendments with the Western Riverside Council of Governments (WRCOG) subject to the approval of the City Attorney.

3. Authorize the Chief Financial Officer to appropriate budget as set forth in the Fiscal Impact section of this report.

SUMMARY

Staff is requesting City Council's approval for the City of Moreno Valley to enter into a 3-year agreement with Western Riverside Council of Governments (WRCOG) to participate in the Western Riverside Regional Food Recovery Program for $117,329; authorize the City Manager or designee to execute the Memorandum of Agreement (MOA) and any subsequent related extensions or amendments with WRCOG, subject to the approval of the City Attorney and authorize the Chief Financial Officer to appropriate budget as set forth in the Fiscal Impact section.

DISCUSSION

In September 2016, Governor Brown signed SB 1383 into law. SB 1383 establishes methane reduction targets as part of a larger strategy to combat climate change and reduce greenhouse gas (GHG) emissions. Methane is the second most abundant human-caused GHG and is a short-lived climate pollutant (SLCP) that degrades in the atmosphere in approximately 12 years. The goal of SB 1383 is to reduce SLCPs, namely methane emissions created by landfills, dairies, and livestock, as well as organic waste2. About 20 percent of methane emissions in California come from landfills. Diverting organic waste to compost facilities can reduce methane production and improve local air quality.

SB 1383 is the most significant waste reduction mandate to be adopted in California in the last 30 years. The law establishes a mandated target to achieve a 75 percent reduction in statewide disposal of organic waste by 2025. It requires the state to increase edible food recovery by 20% for human consumption by 2025. SB 1383 stipulates the implementation of organic waste recycling programs and makes local jurisdictions directly responsible for the following actions, starting on January 1, 2022:

- Provide organic waste collection to all organic waste generators, including residents, businesses, City facilities, and large events and venues;
- Procure recycled content paper and recovered organic waste products (i.e., compost, mulch, biomass, and renewable natural gas) at levels prescribed by the state annually. Such procurement standards must also be incorporated into an ordinance;
- Establish (via ordinance and otherwise) all required enforcement protocols that include a schedule of fines for non-compliant entities. This ordinance must match state-developed standards;
- Conduct education and outreach to all affected parties, including generators, haulers, facilities, and edible food recovery organizations; and
- Perform capacity planning covering 15 years for organic waste diversion from landfills;
- Implement an edible food recovery program that recovers edible food from the waste stream for human consumption.

To address food waste and its link to food insecurity, SB 1383 requires California to recover 20% of edible food, that would have otherwise been sent to landfills, and donate or redistribute it to those in need by 2025. Jurisdictions must establish edible food recovery outreach and inspection programs to assist in connecting food recovery organizations and services with edible food generators so that food can be redistributed or donated to those in need. Jurisdictions are responsible for ensuring there is the sufficient county-wide capacity to recover and redistribute all edible food. Specific edible food generators must arrange to recover the maximum amount of their edible food that would otherwise go to landfills, by establishing contracts with food recovery organizations and services and keeping up-to-date records of all edible food donated. Food recovery organizations and services that work with edible food generators must

maintain and submit records of donated edible food they have collected.

In January 2023, WRCOG approached its member cities about participating in this regional-wide program. The City of Moreno Valley has over 200 Tier 1 and Tier 2 businesses classified as Edible Food Generators (EFGs) and over twenty Food Recovery Organizations (FROs) that would need to be inspected and provided educational material on the new mandate and what is needed to comply. This new requirement would pull current resources away from the other recycling programs and efforts to ensure proper compliance is achieved. City staff has identified that it would be beneficial to contract with WRCOG and participate in the Regional Food Recovery program to help push unified messaging out to all the participating cities' EFGs and FROs that may operate throughout the County. Utilizing WRCOG and their consultant would assist staff with being able to continue working on the other important recycling programs run by the city.

WRCOG posted a request for proposal in December 2022, requesting for consultants to submit proposals for a Regional Food Recovery and Local Assistance program. WRCOG received two proposals with MSW Consultants being the awarded vendor. WRCOG notified its participating Cities of the selected vendor in January and hosted two presentations with the vendor so that those cities can review the provided information to determine if the program would be a good fit. Cities that participate in this program will be considered in compliance with the edible food recovery component required by SB 1383. The program will be administered and managed by WRCOG, including managing the contract with MSW Consultants, reviewing deliverables for accuracy, and coordinating meetings between the cities and MSW Consultants. Participating cities will be expected to engage with WRCOG and the MSW Consultants during the development and implementation of the program. The total cost to participate in this program will be an amount not to exceed $117,329 for the first year, including both consultant and WRCOG administrative fees. The program will include project management, compliance, capacity assessments, public outreach, education, and the development of the final report.

Inspection and enforcement of food recovery programs are included in the SB 1383 requirements. For those participating cities that need assistance with this aspect of SB 1383 requirements. This program will be conducted by MSW Consultants and will also be administered by WRCOG staff. The City of Moreno Valley received grant funding from CalRecycle last fiscal year, under the SB 1383 Local Assistance Grant and the remaining balance available is $277,398. Since this program falls within the guidelines of eligible use of SB 1383 funds, staff is requesting approval to use this grant funding to cover the costs associated with this agreement.

Participating in this regional program will help Moreno Valley satisfy the State requirement on the recycling of edible foods, a program that if the City were to take on its own, would be very difficult and more costly. The City's participation in this program and subsequent inspection program alleviates the City from one of the mandates of SB 1383 that are outside of the scope of the City's waste-hauling franchise agreement. Staff recommends participation in the program.

ALTERNATIVES

1. Approve the City of Moreno Valley entering into a 3-year agreement with the Western Riverside Council of Governments (WRCOG) for the City of Moreno Valley to participate in the Western Riverside Regional Food Recovery Program for $117,329. Authorize the City Manager or designee to execute the Memorandum of Agreement (MOA) and any subsequent related extensions or amendments with the Western Riverside Council of Governments (WRCOG) subject to the approval of the City Attorney. Authorize the Chief Financial Officer to appropriate the budget as set forth in the Fiscal Impact section of this report. ***Staff recommends this alternative as it would allow the City to become in compliance the food recovery program requirement of SB 1383.***

2. Elect not to Approve the City of Moreno Valley entering into a 3-year agreement with the Western Riverside Council of Governments (WRCOG) for the City of Moreno Valley to participate in the Western Riverside Regional Food Recovery Program for $117,329. Authorize the City Manager or designee to execute the Memorandum of Agreement (MOA) and any subsequent related extensions or amendments with the Western Riverside Council of Governments (WRCOG) subject to the approval of the City Attorney. Authorize the Chief Financial Officer to appropriate the budget as set forth in the Fiscal Impact section of this report. ***Staff does not recommend this alternative as this would deter compliance with SB 1383 mandate.***

FISCAL IMPACT

Staff is requesting City Council approval the use of the SB 1383 Local Assistance Program grant award to fund (2300-30-34-72208-625099) the first-year payment of $117,329 to WRCOG in FY 2022/23. Subsequent budget appropriation needed for FY2023/24 and FY2024/25, will be requested during the City's 2-year budget process. **There is no impact to the General Fund.** The following budget adjustment will be needed:

Description	Fund	GL Account No.	Type (Rev/Exp)	FY 22/23 Approved Budget	FY 22/23 Proposed Amendment	FY 22/23 Amended Budget
SB 1383 Grant - Oper Suppl - Other	2300	30-34-72208-630299	Exp	$168,000	($117,329)	$50,671
SB 1383 Grant - Oper Suppl - Other	2300	30-34-72208-625099	Exp	$12,042	$117,329	$129,371

JANUARY 26, 2023

DEAR MR. DAILEY,

MSW Consultants, along with DeGrave Communications, and Mariposa Eco Consulting, are pleased to submit this proposal to perform Regional Food Recovery & Local Assistance to the Western Riverside Council of Governments (WRCOG). We believe our experienced staff and our breadth of knowledge in the solid waste and communications industries enables us to successfully perform this project. The following characteristics of our team set us apart from our competitors.

Team with extensive experience in assisting local governments comply with AB 341, AB 1826 and SB 1383

3 **Top Team Members with Accreditations in Public Relations (DeGrave Com)**

75+ **Collective Years in Marketing, Communications and Branding (DeGrave Com)**

15+ **Industry awards (DeGrave Com)**

Founded in 2000, MSW Consultants has provided solid waste and recycling consulting services exclusively to local governments in the areas of finance, economics, and public policy. With over 30 years experience in the solid waste industry, our organization has provided a broad range of solid waste consulting services to over 80 cities, counties and special districts in the areas of auditing, contract negotiation, rate setting, competitive service procurement, contract compliance, waste diversion, and regulatory compliance.

With DeGrave Communications' in-depth experience in developing award-winning communications, marketing and branding strategies for dozens of public-sector agencies, and first-hand knowledge of Southern California, we believe our team is the perfect fit and will bring a unique understanding to this project. For this project, MSW Consultants will serve as prime contractor. As president of MSW Consultants, I have the authority to bind the firm in a contract with WRCOG. I acknowledge that the proposal will be valid for at least 90 days and will become part of MSW Consultants' professional service agreement with WRCOG.

Collectively, the MSW Consultants/DeGrave/Mariposa Eco Consulting team have an unmatched understanding of the Riverside County region and have worked with several WRCOG member jurisdictions. Our firms will work side-by-side to achieve the objectives, and tasks set forth in this proposal. MSW Consultants will take the lead on the overall project management, and execution of Tasks 1, 2, 4, 5, 6, 7. The DeGrave team will oversee the execution of Task 3, and collaborate with MSW Consultants in Task 7. Mariposa Eco Consulting will support Tasks 4, 5 and 6.

Thank you for the opportunity to submit our proposal. Our team would welcome the opportunity to interview with WRCOG staff and member agencies.

Sincerely yours,

DAVID DAVIS, CMA

D. Firm Capabilities (A & B)

MSW CONSULTANTS

A. MSW Consultants has provided solid waste consulting services to over 80 local governments in the areas of finance, economics, and public policy. We have over 30 years of experience providing consulting service over the full range of integrated waste management including collection, recycling, material processing, and disposal. We are continually helping our clients navigate the myriad of federal, state, and local rules that govern the solid waste management industry.

DEGRAVE COMMUNICATIONS

A. DeGrave Communications has a proven track record of working on dozens of similar projects to those listed in the scope of work. From developing large-scale agency-wide strategic communications plans to smaller waste-specific campaign communication outreach plans, our team has tackled them all. We understand the value of creating plans that are agency-specific, not cookie cutter. Specifically, our team has worked with City of Folsom, City of Newport Beach, City of Agoura Hills and City of Downey to develop communication plans for their unique SB 1383 outreach efforts. We assist our statewide public agencies with social media outreach, website copy and material development daily. As we have transitioned into a digital world, we have been able to help our clients with townhall meetings both in-person and virtually. More recently, we worked with SAWPA to develop a three-county outreach effort for a Trust the Tap campaign in English, Spanish and Chinese. Providing educational materials and resources to SAWPA's member agencies in Orange, Riverside and San Bernardino Counties.

MARIPOSA ECO CONSULTING, INC.

A. Mariposa Eco Consulting integrates all aspects of an environmental management firm, including air, water, solid waste, sustainable program management, energy, greenhouse gas reduction and measurement, hazardous waste and universal waste management, and resource conservation. We assist our clients with seeing the benefits of a sustainable earth; complying with and improving upon environmental laws, while generating profits and growth.

MSW CONSULTANTS

B. The MSW team consists of professional accountants and outreach specialists with extensive experience with designing and implementing solid waste programs.

DEGRAVE COMMUNICATIONS

B. Our team specializes in working with public agencies. We understand government and we understand WRCOG. Our team has worked internally and externally for public agencies; We understand the unique challenges that government agencies face. Some of our clients include: City of Agoura Hills, City of Folsom, City of Murrieta, City of Eastvale, City of Lake Elsinore, Elsinore Valley Municipal Water District, Western Municipal Water District and Lake Elsinore & San Jacinto Watersheds Authority (SAWPA).

MARIPOSA ECO CONSULTING, INC.

B. Mariposa Eco Consulting works with all aspects of businesses, local government, and communities to design, develop, and implement sustainable programs that work. We take the time to understand the specific circumstances of our clients, including demographics, economics, and environmental factors, allowing our clients to realize profits and compliance.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

D. Firm Capabilities (C)

MSW CONSULTANTS

DAVID DAVIS, CMA · PROJECT DIRECTOR

Mr. David Davis is a Certified Management Accountant (CMA) with over 30 years of experience in the field of solid waste management. Mr. Davis' expertise lies in working with municipal managers to maximize the value of the solid waste services provided to their ratepayers. He has held executive management positions in both the private and public sectors and has extensive experience in providing business advisory services to local government in the field of solid waste management.

ROLE: Mr. Davis will serve as the Project Director for this project. He will be the main point of contact and have overall responsibility for the project. He will direct the planning of the project and attend all meetings.

LUCAS ARIAS · PROJECT MANAGER

Lucas is a highly effective project manager. He has substantial experience in the waste industry and has served multiple cities across Los Angeles, Orange, Riverside, and Ventura counties. He graduated from California State University, Northridge with a BA in Jazz Studies. Before entering the waste industry, Mr. Arias has performed as a trumpet player and drummer with multiple artists across the country.

Role: Mr. Arias will serve as Project Manager. He will oversee the day-to-day operation to ensure all milestone and deadlines are met and review all reports for each task on this project. He will serve as task lead for facilitating meetings, assessing capacity and compliance, and developing and implementing the inspection program.

GIRARD MOBLEY · PROJECT ANALYST

Mr. Mobley is a skilled financial and project analyst. He has extensive experience in conducting audits on waste haulers for municipalities, and in providing recycling outreach and education to commercial waste generators. He graduated from San Diego State University with a BS in Business Administration with a focus on Finance and a minor in Economics. He is also a certified practitioner in the zero waste principles and practices.

Role: Mr. Mobley will serve as Project Analyst. He will serve as task lead for developing the food recovery program, drafting the final report and assisting as needed for all other tasks.

ALYSON SCHILL · CEO, CAREIT

Alyson brings an intimate knowledge of zero food waste to powerfully move initiatives forward. She continues to thrive at the heart of shaping and advocating for city, county, and statewide policies and support for food waste prevention. With a background in volunteer management, gleaning, sustainable event production, environmental service-learning leadership in educational institutions, and restaurant management, Alyson combines experiences from across the food waste chain to create meaningful and comprehensive waste reduction programs. Alyson is the CEO of the food donation app, Careit.

Role: Alyson will assist with onboarding jurisdictions into the Careit app and training. She will also provide technical support during inspections to tier generators.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

D. Firm Capabilities (C)

KAYLA FRIEDERICH · OUTREACH TECHNICIAN

Ms. Kayla Friederich is a diligent project analyst new to the solid waste industry. She has high standards for reporting quality data and providing effective outreach. Before joining MSW Consultants, Ms. Friederich has customer service experience in food service and retail. She has also gained further communication experience through social media creation by interning with The Water Conservation Garden and by assisting her family's small business.

Role: Ms. Friederich will serve as Outreach Technician. She will assist with capacity and compliance, implementing public outreach, and implementing the inspection program.

DEGRAVE COMMUNICATIONS, INC.

LISELLE DEGRAVE, APR · DIRECTOR

A veteran communicator, Liselle has nearly 20 years of experience and her expertise includes spearheading communications, marketing and outreach projects for public-sector, and non-profit clients throughout California. Her background blends both in-house communications and agency expertise to ensure impactful communications strategies for the clients she serves. She will serve as the principal-in-charge.

Role: Will be involved in Task 3 - overseeing the project management for all outreach efforts as well as strategy.

RACHEL MCGUIRE, MBA, APR · PROJECT MANAGER

Rachel is a recognized leader in the field of public relations and communications and brings nearly 20 years of experience working in-house and in an agency setting to this project along with a proven track record of award-winning communications, marketing, outreach and branding strategies. For this engagement, Rachel will serve as the director leading DeGrave Communication's fully integrated team of communications, marketing and outreach professionals.

Role: Will be involved in Task 3 – serving as project manager for all outreach efforts as well as strategy and developing copy.

JESSICA WINN · ACCOUNT EXECUTIVE

Jessica is a leader in the areas of organization administration and marketing. She has a proven track record of effectively supporting the DeGrave Communications team with community engagement, managing project organization and research. For this endeavor she will serve DeGrave Communication's fully integrated team of communications, marketing and outreach professionals to support research efforts.

Role: Will be involved in Task 3 – serving the team with any member agency requests, scheduling agency workshops and needed organizational support.

ASHLEY RINGGER · STRATEGIC VISUAL DESIGNER

Ashley is an accomplished professional in the fields of communications and public affairs. She brings nearly 15 years of experience in community outreach and engagement as well as graphic and website design to RMG

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

D. Firm Capabilities (C)

Communications. With a passion for public service and working in water, Ashley has designed communications campaigns and collateral for our clients, including program websites, social media content and graphics, fact sheets, water quality reports and Prop. 218 notifications. A gifted storyteller, graphic artist and web designer she will assist with crafting dynamic visuals together with meaningful content for this project.

Role: Will be involved in Task 3 – designing all needed campaign design elements including, but not limited to e-blasts, social media posts and campaign materials.

MARIPOSA ECO CONSULTING, INC.

CYNTHIA LOZANO VANT HUL · PROJECT MANAGER

Cynthia Lozano Vant Hul (President/Project Manager) is qualified by reasons of education, training background and over 25 years' experience in the solid waste and recycling industry. Cynthia has 14 years' experience providing subcontracting contract services. Cynthia holds a Master of Public Administration degree, from California State University San Bernardino. Since 2003, Cynthia has been a Director with the Southern California Waste Management Forum (SCWMF). In 2022, Cynthia was appointed as the President of the SCWMF. In 2019, she was appointed as a Director to the Women in Solid Waste & Recycling (WISR), new LA Chapter and since 2000 a member in good standings with the California Resource Recovery Association (CRRA).

Role: Cynthia will assist with the design of the inspection plan and edible food recovery program.

KYLE VANT HUL · PROJECT ANALYST

Kyle Vant Hul (Project Analyst) has 14 years' experience in the solid waste and recycling industry. He is a certified resource, recovery, and recycling consultant. Since 2011, Kyle was the lead recycling trainer for the LAUSD Expanded Recycling program. Kyle have led numerous comprehensive City audits in the Los Angeles, Orange, and Imperial Counties and in the Los Angeles County Garbage Districts. In 2017/2018 Kyle led sixteen Zero Waste Representatives in the Northeast Valley (NEV) City of Los Angeles, recycLA program. Today, Kyle provides the "On the Ground" daily assistance with the Recycling Coordinator staff within the LA Market in completing site assessments, program implementation and training.

ROLE: Kyle will assist with the implementation of the inspection program.

D. Firm Capabilities (G)

MSW Consultants is 50% women-owned. We are an SB (Micro) certified firm, CID#: 2001476.

DeGrave Communications is a 51% women-owned, minority-owned, business. We are a WOSB, DBE and SBE certified firm. CUCP 49193 Metro 8782

Mariposa Eco Consulting, Inc. is a Women Business Enterprise (Women-Owned), small and disadvantage certificated company.

D. Firm Capabilities (H)

Experts in municipal waste and outreach make our team one-of-a-kind

WRCOG will benefit from the knowledge and expertise of our handpicked, fully integrated team of municipal waste and outreach professionals. Our proposed team of industry leaders combines MSW Consultants, veteran municipal solid waste management specialists, with DeGrave Communications' award-winning team of seasoned communications professionals along with and Mariposa's added "boots on the ground" grassroots efforts.

Together our seasoned team will provide WRCOG's member jurisdictions with a no-hassle, all-inclusive approach to a Regional Food Recovery & Local Assistance. Our team's streamlined proven strategy combines our firms' efforts and minimizes administrative costs for WRCOG to be able to complete the project with only one consultant to manage.

In addition, all three firms are based in Riverside County and have worked for many WRCOG jurisdictions.

MSW Consultants specializes in providing consulting service exclusively to local governments in the areas of waste contract procurement and negotiation, education and outreach, regulatory compliance, waste contract compliance audits, and customer rate-setting. To avoid any real or apparent conflicts of interest, we choose to not work for private waste companies. As a result, we bring a high level of independence and objectivity to our client engagements. MSW Consultants is currently providing solid waste consulting services to WRCOG members in the cities of Corona and Jurupa Valley and has provided services to the City of Norco.

DeGrave Communications has extensive knowledge of working with WRCOG member agencies, including the cities of Eastvale, Lake Elsinore, Murrieta, Menifee, along with Western Municipal Water District and Eastern Municipal Water District. We are well versed in SB 1383 and proven communication techniques to drive behavior change. We have developed personalized SB 1383 campaigns for the cities Agoura Hills, Newport Beach (award-winning), Folsom and Downey. These unique campaigns consider each agencies needs and goals to ensure long-term success. Our tailored approach to each agency is never cookie cutter and ensures each outreach program is successfully implemented at each agency.

Mariposa Eco Consulting's expertise as an environmental management consulting firm will complement the MSW Consultants team as they serve as a connection point with businesses in the WRCOG area.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

PROJECT UNDERSTANDING

A key goal of SB 1383 is to collect edible food that would otherwise go to waste, and redistribute it to feed people in need.

To achieve this goal, SB 1383 requires local jurisdictions to promote relationships between certain businesses that generate excess edible food (Tier 1 and Tier 2 generators), and food recovery organizations (e.g., food banks, food runners, etc.). Jurisdictions are required to: 1) conduct education and outreach to businesses, 2) monitor and keep records regarding each business' compliance, and, 3) enforce the regulations.

The approach of SB 1383 is to build upon existing food recovery networks. Moreover, jurisdictions are required to identify any shortfalls in existing capacity, and submit plans to CalRecycle on how they intend to fill any capacity gaps. The regulations require each individual jurisdiction to implement their own edible food recovery program.

However, because existing food recovery networks often cross over individual city boundaries, a regional approach often results in greater efficiency. Instead of throwing good food in the trash, businesses are required to donate that food (and keep a record of their donations). As a result, there is a double benefit. Edible food that would have otherwise been landfilled (and contribute to climate change), is used to reduce food insecurity.

OBJECTIVES

The objectives of this project are to assist WRCOG member jurisdictions by:

- Educating Tier 1 and Tier 2 businesses about their food donation obligations
- Increasing Tier 1 and Tier 2 businesses access to food recovery organizations, and food recovery services
- Monitoring Tier 1 and Tier 2 businesses' compliance with food recovery program requirements
- Identify any gaps in edible food recovery capacity, and help plan to fill those gaps, if needed.

APPROACH

Our approach to this project will be to apply our extensive experience in SB 1383 program implementation, to WRCOG'S specific requirements. We will be fully committed to the overall mission of WRCOG solid waste and recycling strategic goals.

In our proposed scope of work, we have highlighted several specialized approaches that enable us to efficiently accomplish the program objectives. We believe that our experience, and our specialized approaches, uniquely qualify us to perform this work for WRCOG.

DETAILED SCOPE OF WORK AND BUDGET

To accomplish WRCOG's objectives, we propose to perform the tasks detailed below.

Task 1 · Project Management

The purpose of this task is to keep the project on schedule and on task.

SUBTASK 1.1: KICKOFF MEETING/ANNUAL PROJECT STATUS MEETING

We will conduct an initial project kickoff meeting with WRCOG staff and representatives of member jurisdictions. We will also conduct annual project status meetings at the beginning of each year of the project. All meetings will be conducted via video conference call. At these meetings, we will discuss the overall status of the project. This will include, but not be limited to, a review of: 1) project objectives, 2) the scope of work, 3) key issues, 4) work products, and, 5) project schedule.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

Deliverables:

- Meeting notes
- Materials for kickoff meeting and annual project status meetings

SUBTASK 1.2: PROJECT TEAM COORDINATION

In addition to our kickoff meeting and annual project status meetings, we will conduct biweekly meetings, make regular phone calls, send and respond to e-mails, and participate in other communications with WRCOG to keep the project on schedule and within budget.

Deliverables:

- Meeting notifications
- Meeting agendas and notes

TASK 1.3: PROJECT MANAGEMENT UPDATE MEETINGS

We will schedule up to eight (8) meetings with WRCOG staff and representatives of participating cities to provide information and obtain feedback on draft deliverables.

Deliverables:

- Meeting notifications
- Meeting agendas and notes
- Other relevant drafts and documents

Task 2 · Capacity and Compliance

The purpose of this task is to review and determine the capacity of food recovery organizations, and confirm which Tier 1 and Tier 2 generators have written agreements. To accomplish this task, we will build on the information we gathered in the organic waste capacity study that we performed for WRCOG in 2022.

We will review and determine the capacity of food recovery organizations in Subtask 2.1.

We will confirm which commercial edible food generators have written agreements in Subtask 2.2.

SUBTASK 2.1: FOOD RECOVERY AGENCIES AND ORGANIZATIONS

To review and determine the capacity of food recovery organizations, we will:

- Compile the FROs from participating cities into a Regional Detailed Report
- Review and report the FRO available capacity of each participating city
- Determine whether the FROs have a food recovery agreement, if they do not, we will provide them a sample agreement
- Update the list of food recovery organizations and services to update participating jurisdictions' websites to reflect their:
  - Name and physical address
  - Contact information
  - Collection service area
  - Types of recoverable food accepted

Deliverables:

- Regional Detailed Report containing a list of FRO formatted by each participating city

SUBTASK 2.2: TIER 1 AND TIER 2 EDIBLE FOOD WASTE GENERATORS COMPLIANCE

To confirm which commercial edible food generators have written agreements, we will:

- Compile the existing lists of CEFGs from participating cities into the

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

Regional Detailed Report from task 2.1

- Review the list to determine if they qualify as Tier 1 or Tier 2 generators
- Review the generators access to capacity via food recovery agreements
- Update the list of Tier 1 and Tier 2 commercial edible food generators by jurisdiction to reflect:
  - Customer name and address
  - Primary contact information
  - Compliance status, including whether they have written agreements with food recovery organizations and donations logs
- Compile this information into the Regional Detailed Report, which will be in the form of one regional document with the information on each participating city formatted by sections.

Deliverables:

- Regional Detailed Report containing a list of CEFGs formatted by participating city

Task 3 · Public Outreach

The purpose of this task is to design and implement a targeted public outreach and education campaign that will increase awareness about food rescue among commercial edible food generators in Western Riverside County. The following approach and methodology has been created especially for WRCOG to successfully roll out edible food recovery to its member jurisdictions. Our goal will be to not only promote compliance with SB 1383, but to develop a strategy that will actually 'move the needle' toward the 20% Statewide food rescue goal in Western Riverside County.

TASK 3.1: DEVELOP COMMUNICATIONS AND EDUCATION PLAN

DeGrave will develop **multilingual outreach and education materials, and a detailed plan on comprehensive outreach and education efforts,** for member jurisdiction's Tier 1 and Tier 2 edible food generators. Our multi-pronged, strategic communications approach for this task includes the following four phases:

PHASE 1 RESEARCH

Effective Communication, Outreach and Education Strategies are Created – Not Copied. Research is the foundation for effective impactful communication, outreach and education projects and programs. At the start of Task 3.1 our team will embark upon a research and discovery process for this project. Our team will use information gathered in the research phase to solidify objectives, strategies, tactics, timelines and measure results. Here are our team's recommended steps for this task:

KICK-OFF MEETING

We will commence with a kick-off meeting, which can be held virtually or in-person, and will include key WRCOG, MSW and DeGrave team members. WRCOG will provide an overview of key public outreach deliverables, identify key milestones, project timeline, identify roles and responsibilities of WRCOG and agree on Task 3 deliverables. This meeting will also give us the opportunity to consult with WRCOG on behaviors participating WRCOG cities could participate in to meet Tier 1 and Tier 2 edible food waste mandates as well as determine any barriers to motivation that may be specific to the participating cities. We will also go over commonly asked questions that WRCOG's participating cities are receiving. This information will help us refine messaging and identify opportunities to further clarify SB 1383 details.

SURVEY

We recommend developing an online survey that is sent out to key stakeholders. This survey will be used to glean qualitative and quantitative

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

data on key stakeholders' understanding of SB 1383, how they like to receive information, barriers to participation and motivations for recycling. This data will help us further refine messaging and outreach and education methods. It will also serve as a baseline to measure success.

AUDIENCE IDENTIFICATION AND MAPPING

DeGrave Communications team members have worked with and for many WRCOG agencies. As part of our initial research efforts, we will identify key audiences. Identifying these audiences is important as it will help guide our plan rollout on how to reach these audiences. These key audiences will be gathered into a database for WRCOG.

COMMUNICATIONS AND MEDIA AUDIT

Our audit will focus on a review of what is currently being done throughout WRCOG cities and Tier 1 and 2 edible food waste generators to communicate SB 1383 requirements. We will make recommendations on how, to leverage education and outreach materials from CalRecyle in order to amplify the message.

PHASE 2: PLANNING

We will use the data and insights uncovered in Phase 1 to develop the overall Outreach and Education Plan. Prior to moving to Phase 3: Development of Outreach Materials, we will present our recommended Outreach and Education Plan to the WRCOG team to provide an opportunity for feedback and ensure a mutually agreed upon direction.

PHASE 3: IMPLEMENTATION

Based on the research and suggested strategies and tactics these efforts may include the following items noted below. All collateral items developed will follow WRCOG and/or participating cities' brand and writing style standards. It will also provide clear and effective messaging on edible food recovery and comply with Article 4. In addition, the materials developed will be multi-lingual and based on resources provided by CalRecycle.

Five Regional Educational Workshops will be organized in-person and/or virtual (with recording).

Possible suggestions for multilingual outreach items for Tier One and Tier Two Edible Food Generators:

- Flyers
- Multilingual Stickers
- Presentation/slide templates
- Social media
- Website content
- Newsletter content
- Fact sheets
- Brochures
- PSAs
- Ads
- News Release templates
- Signage
- Workshops

PHASE 4: EVALUATION

During this entire engagement, our team will continually evaluate the progress and refine the approach. If needed. It is recommended that six months after the program is implemented that WRCOG sends out a follow-up survey to gauge the success of the outreach program.

Deliverables:

- Outreach and Education Plan
- Multilingual Outreach and Education Materials

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

TASK 3.2: IMPLEMENT OUTREACH AND EDUCATION PLAN

Upon the approval of the Outreach and Education Plan, DeGrave Communications **will implement the plan.** This task will include the DeGrave team providing records of:

- All outreach and education efforts
- Copies of the utilized marketing materials
- The date and to whom the information was disseminated or if direct contact was made
- Recorded workshops (up to 5)

Deliverables:

- Weekly reports and updates on conducted outreach and education efforts, including emails, presentations, individuals/entities outreached, outcomes/relevant documents;
- Copies of the utilized marketing materials.
- Five-workshops (in-person or virtual)

Task 4 · Develop Inspection Schedule and Plan

The purpose of this task is to develop a written plan to conduct and document inspections and enforcement of commercial edible food generators. This plan will consist of:

1) written procedures to conduct outreach and inspections to individual Tier 1 and Tier 2 generators;

2) an electronic mechanism (e.g., Zendesk, etc.) and written procedures for member jurisdictions to receive and monitor complaints; and,

3) a timeline showing key start and completion dates of inspections of Tier 1 and Tier 2 generators by jurisdiction.

The written procedures will address inspections, complaints, and enforcement. They will be customized to work within each City's existing circumstances. The written inspection procedures will meet the requirements of Section 18995.1 (Jurisdiction Inspection Requirements). The written complaint procedures will include instructions how to use the electronic mechanism (e.g., Zendesk, etc.), and meet the requirements outlined in Sections 18995.3 (Jurisdiction Investigation of Complaints of Alleged Violations). The written enforcement procedures will meet the requirements of Section 18995.4 (Enforcement by a Jurisdiction) and Section 18997.2 (Penalty Amounts).

Deliverables:

- A written implementation plan and schedule to implement and manage an inspection program in participating cities.
- Electronic mechanism to receive, monitor, and manage complaints

Task 5 · Implement Inspection Schedule and Plan

The purpose of this task is to **implement the inspection program planned in Task 4.** This task will include conducting inspections, managing complaints, and documenting enforcement activities.

Onboarding to Careit

We propose to use Careit to aid in the performance of inspections. Careit is a food donation and rescue program management tool. Careit makes it easy for businesses and institutions to donate surplus food. Careit also enables municipalities to monitor, manage and report on their edible food recovery activities. More information about Careit can be found here: https://careitapp.com/

We will take the individual Tier generator and food recovery organization information compiled in Task 2, and upload it into Careit.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

Conducting Inspections

We proposed to use Careit to inspect all Tier 1 generators, and all food recovery organizations. We will start inspections on or about April 1, 2023, and complete these inspections by December 31, 2023. We propose to use Careit to inspect all Tier 2 generators beginning January 1, 2024, and complete these inspections by June 30, 2024. Thereafter, we propose to inspect every Tier 1 and Tier 2 generator, and inspect every food recovery organization, once every fiscal year. This will ensure that all participating member jurisdictions will be in compliance with Section 18995.1 (2) (Jurisdiction Inspection Requirements). Our inspection work will consist of:

- Contacting, and visiting the locations of all commercial edible food generators, and food recovery organizations.
- Interviewing owners and employees to answer any questions, and ensure they understand the State's edible food donation requirements.
- Confirming the existence of written agreements.
- For edible food generators, reviewing written logs of food donations, and recording the types of food recovered into Careit.
- For food recovery organizations, reviewing food donation records, and recording the types and amounts of food recovered into Careit.
- Documenting the inspections we perform in Careit.

Managing Complaints

We propose to manage the food recovery complaints received by WRCOG and each member jurisdiction. We propose to use an electronic mechanism (e.g., Zendesk, etc.) by which member cities can accept and resolve complaints received from the general public. We will provide a web link that each member jurisdiction can include on their website, which will lead to the online complaint management system. The complaint management system will enable users to enter:

- The name and contact information of the complainant (If the complaint is not anonymous)
- The identity of the alleged violator, if known.
- A description of the alleged violation including location(s) and all other relevant facts known to the complainant.
- Any relevant photographic or documentary evidence to support the allegations in the complaint.
- The identity of any witnesses, if known.

For each of the complaints received by member jurisdictions, we will:

- Start an investigation within 90 days (if we determine that the alleged facts as presented would constitute a violation of SB 1383)
- Possibly decline to investigate the complaint if we determine (with concurrence from the member jurisdiction) the investigation is unwarranted
- Contact, visit, and interview the alleged violator, and obtain their response
- Resolve the complaint; either by either by 1) confirming that the complaint is unwarranted, 2) helping to bring the violator into compliance, or, 3) conducting enforcement upon the violator.
- Inform the complainant of the resolution of the complaint
- Maintain records of all complaints and responses for the member jurisdiction's Implementation Record. These records will include the complaint as received, and its resolution.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

Documenting Enforcement Actions

We propose to document the results of enforcement activities for each member jurisdiction into Careit. We will document the number of NOVs, penalty orders, and enforcement actions that were resolved, and categorize them by type pursuant to Section 1895.2 (12) (Implementation Record and Recordkeeping Requirements).

Deliverables:

- Documentation of the number of inspections conducted by type for commercial edible food generators and food recovery organizations, the number of complaints pursuant to Section 18995.3 of the adopted guidelines that were received and investigated, and the number of Notices of Violations issued (in partnership with participating cities) based on investigation of those complaints.
- In partnership with member jurisdictions, provide documentation of the number of Notices of Violation, penalty orders, and enforcement actions that were resolved, categorized by type of entity subject to the adopted guidelines. These documents will be provided monthly.

Task 6 · Draft Regional Food Recovery Program Plan

The purpose of this task is to **prepare a Regional Food Recovery Plan.** The Regional Food Recovery Plan will consist of two components:

1) an online real-time peer-to-peer database that will enable food recovery organizations to better connect with Tier 1 and Tier 2 generators (Careit); and,

2) a written plan that quantifies the amount of existing recoverable food by Tier 1 and Tier 2 generators, and by member jurisdiction. This written plan will enable WRCOG to compare how its efforts relate to the State's 20% food rescue goal.

Online Peer-to-Peer Database (Careit)

The online peer-to-peer database of the Regional Food Recovery Plan will include the Tier 1 and Tier 2 generator information collected in Task 2. We propose to provide this information on a real-time basis in Careit, that will be continually accessible to WRCOG, member jurisdictions, and food recovery organizations.

We will provide training, workshops, and access to this online database to all food recovery organizations in and around Western Riverside County. We will work with WRCOG staff, and staff from member jurisdictions, and food service organizations in the use of this online tool. We will review the use of Careit with WRCOG and member jurisdiction staff prior to its approval and implementation.

The online peer-to-peer database will enable food recovery organizations to:

- Receive real-time notifications of edible food available for donations by Tier generators;
- Coordinate the pick-up of the donations;
- Track the status of each donation; and,
- Auto-generate written agreements with generators.

Written Plan

The written plan will calculate how much additional edible food will need to be recovered by generator and by jurisdictions and help WRCOG and its member jurisdictions understand how their efforts will support the 20% state-wide food recovery diversion goal.

We will use the CalRecycle statistics to calculate the potentially recoverable food for each generator (based on our work in Task 2). We will provide insight into targets set by these statistics and create a plan for each generator to increase their donation capacity.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

E. Approach and Understanding of the Scope of Work Plan

We will create a detailed report describing each Tier generators donation progress by jurisdiction. This report will enable member jurisdictions to monitor food recovery program participation and direct resources and outreach to increase program participation.

Deliverables:

- Report detailing the program, methodology, tactics to connect food rescue organizations with food waste generators, marketing / outreach, and implementation timeline.

Task 7 · Final Report

The purpose of this task is to provide WRCOG with a summary of the work performed, and an analysis on the status of the food recovery program in a Final Report. The summary will include the information gathered in Task 2, and the total number and detail of outreach activities and inspections performed, organized by member jurisdiction. The analysis will detail the participation of Tier 1 and 2 generators, the food recovery needs and operations of food recovery agencies, and the necessary steps, if any, that member jurisdictions should consider to ensure SB 1383 compliance.

Deliverables:

- Final report

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

Budget

Budget and Timeline

We have included our proposed annual non-to-exceed budget for the first contract year of this project in Schedule 1 on the following page. Our budget shows the hours by task and by staff member extended by their hourly rate. This is the proposed cost for Contract Year 1.

We will perform the same scope of work during Contract Year 2, Contract Year 3, and any subsequent Contract Years at hourly rates that are increased by no more than the annual change in the Consumer Price Index. Further, if the level of effort decreases after Contract Year 1, we will negotiate a revised scope of work in good faith with WRCOG and the member jurisdictions.

In Schedule 2, we have included a breakdown of our budget by member jurisdiction. Because of their fixed nature, the total proposed budget amounts for Task 1 (Project Management) and Task 3 (Public Outreach) do not change based on the number of participating jurisdictions.

We propose to bill for this project on a time and material, not-to-exceed basis. Therefore, we will only bill for the hours we work. If our project tasks require less time than anticipated, we will pass the savings on to WRCOG. If WRCOG requests that we perform any additional work outside the scope of work, we will do so at the same hourly rates. We will obtain WRCOG's written approval prior to performing any additional work. We will invoice WRCOG monthly. Our invoices will describe the work performed by each staff member with the hours worked each day extended by the hourly billing rate.

We have included our proposed project timeline in Schedule 3.

E. Approach and Understanding of the Scope of Work Plan

Quality Control Methods

Our team uses the following tools and best practices to ensure exceptional quality control as well as budget and schedule control throughout the project.

REGULAR CLIENT CHECK-IN

These regular meetings will allow the WRCOG and our team to share progress updates and next steps to ensure all team members are aligned and that the project continues to move forward and meet all deadlines. Meetings can be held in person or will be held via Zoom calls.

WEEKLY INTERNAL TEAM STRATEGY MEETINGS

These meetings allow the internal team to touch base on project deliverables and timelines.

PROPOSED WORK SCHEDULE

Our team uses Smartsheet for day-to-day project management, timelines, approvals and follow-ups. This system helps us stay on track and accomplish all the required tasks within your desired timeline. We will give your team access to the project management sheets upon project kick-off. Not a fan of Smartsheet? We're happy to use what works best for you.

CITY OF STANTON

CESAR RANGEL

DIRECTOR OF PUBLIC WORKS

(714) 890-4203 · CRANGEL@STANTONCA.GOV

PROJECT: Solid Waste Management Consulting Services

We have been providing solid waste management consulting services to the City since 2021. Our services include providing municipal code revision for solid waste, updating the franchise agreement to conform with SB 1383, negotiate and calculate compensation for any new program from the waste hauler, implementing an edible food recovery program, assist with CalRecycle EAR reporting requirements, assist with applying for any new grant funding opportunities, and develop and implement an inspection and compliance program.

CITY OF RANCHO PALOS VERDES

RAMZI AWWAD

PUBLIC WORKS DIRECTOR – PUBLIC WORKS

(310) 544-5245 · RAWWAD@RPVCA.GOV

PROJECT: Solid Waste and Recycling Consulting Services

In 2020, we conducted a performance review of EDCO Disposal Corporation. Our work included reviewing the hauler's residential operations, customer service, and financial requirements of the franchise agreement. This was our fourth review of EDCO for the City of Rancho Palos Verdes. We have also reviewed the franchise fee payments and AB 341/ AB 1826 compliance of the City's non-exclusive commercial haulers (Republic Services and Waste Management).

As part of our review of the commercial waste haulers, we categorized each hauler's commercial customers, and we confirmed their compliance with AB 341 and AB 1826

CITY OF ORANGE

JOSH SOLIZ

SOLID WASTE PROGRAM MANAGER

(714) 744-5588 · JSOLIZ@CITYOFORANGE.ORG

PROJECT: Franchise Agreement Negotiation with CR&R Hauler

In 2019, we assisted the City in renegotiating its solid waste franchise agreement with CR&R. We are currently assisting the City in managing its solid waste franchise agreement with CR&R Incorporated. Our work includes assisting the City with CalRecycle compliance, and preparing for compliance with SB 1383 including updating the City's solid waste ordinance. MSW Consultants uses a proprietary web-based application Minerva® to assist the City in monitoring the AB 341 and AB 1826 compliance of its commercial and multi-family waste generators.

Certified Management Accountant (CMA)

Affiliations

Solid Waste Association of North America

Southern California Waste Management Forum (Chair)

Zero Waste Practitioner

David Davis, CMA

Project Director

Mr. David Davis is a Certified Management Accountant (CMA) with over 30 years of experience in the field of solid waste management. Mr. Davis' expertise lies in working with municipal managers to maximize the value of the solid waste services provided to their ratepayers. He has held executive management positions in both the private and public sectors and has extensive experience in providing business advisory services to local government in the field of solid waste management.

As a chief financial executive for local hauling and landfill divisions of a national solid waste management company, Mr. Davis was responsible for financial reporting, budgeting, cost analysis, billing, and collections. He also managed the accounting and rate analysis sections of the City of Riverside's Department of Public Utilities.

Mr. Davis has specific experience in: 1) analysis and design of customer rates for refuse collection, transfer, processing and disposal operations; 2) development and evaluation of competitive proposals for waste collection, recycling, and transfer service; 3) feasibility studies for waste processing, waste transfer, and landfill gas projects; 4) verification of the proper payment of solid waste fees; 5) management reviews of solid waste operations; 6) evaluation of alternative waste diversion programs; 7) solid waste program planning and funding; and, 8) evaluating internal management controls.

ROLE: Mr. Davis will serve as the Project Director for this project. He will be the main point of contact and have overall responsibility for the project. He will direct the planning of the project and attend all meetings.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

Lucas Arias

Project Manager

Lucas is a highly effective project manager. He has substantial experience in the waste industry and has served multiple cities across Los Angeles, Orange, Riverside, and Ventura counties. He graduated from California State University, Northridge with a BA in Jazz Studies. Before entering the waste industry, Mr. Arias has performed as a trumpet player and drummer with multiple artists across the country.

Mr. Arias has been with MSW Consultants since January 2022. In that time, he has worked on solid waste consulting engagements for Western Riverside City of Governments (WROCG) and the cities of Corona, Del Mar, La Habra, Lomita, Orange, Rancho Palos Verdes, San Clemente, and Stanton.

Mr. Arias has conducted over 1,500 waste assessments, trained dozens of recycling coordinators, worked on sustainability grants for multiple cities and has conducted several waste characterizations. In addition, he has developed outreach performance internal audit protocols, created diversion reports, and played a key role in SB 1383 roll out and strategic planning for the city of Los Angeles including edible food capacity planning and organics outreach. As an outreach coordinator, Mr. Arias designed creative solutions to unique and complex waste compliance issues.

ROLE: Mr. Arias will serve as Project Manager. He will oversee the day-to-day operation to ensure all milestone and deadlines are met and review all reports for each task on this project. He will serve as task lead for facilitating meetings, assessing capacity and compliance, and developing and implementing the inspection program.

Girard Mobley

Project Analyst

Mr. Mobley is a skilled financial and project analyst. He has extensive experience in conducting audits on waste haulers for municipalities, and in providing recycling outreach and education to commercial waste generators. He graduated from San Diego State University with a BS in Business Administration with a focus on Finance and a minor in Economics. He is also a certified practitioner in the zero waste principles and practices.

Mr. Mobley has been with MSW Consultants since March 2019. In that time, he has worked on solid waste consulting engagements for the County of Santa Barbara, and the cities of Corona, Chula Vista, Del Mar, La Habra, La Palma, Lomita, Norco, Orange, Rolling Hills, San Clemente, South Pasadena, Stanton, Signal Hill, Vernon, Whittier, and Rancho Palos Verdes.

Mr. Mobley has audited the accounting records of over 20 waste haulers to include franchise fees verification, tonnage reports, and gross receipts. He prepared hauler franchise agreements to incorporate SB 1383 requirements.

He also oversees the recycling survey program in the city of Vernon providing outreach and educational resources to over 400 commercial waste generators. He regularly educates commercial waste generators about the requirements of AB 341 and AB 1826. Prior to joining MSW Consultants, he served for 20 in the United States Marine Corps.

ROLE: Mr. Mobley will serve as Project Analyst. He will serve as task lead for developing the food recovery program, drafting the final report and assisting as needed for all other tasks.

Alyson Schill

CEO, Careit App; Outreach Technician

Alyson brings an intimate knowledge of zero food waste to powerfully move initiatives forward. She continues to thrive at the heart of shaping and advocating for city, county, and statewide policies and support for food waste prevention. With a background in volunteer management, gleaning, sustainable event production, environmental service-learning leadership in educational institutions, and restaurant management, Alyson combines experiences from across the food waste chain to create meaningful and comprehensive waste reduction programs. Alyson is the CEO of the food donation app, Careit. She's passionate about reconnecting all members of a community and healing through food.

ROLE: Alyson will assist with onboarding jurisdictions into the Careit app and training. She will also provide technical support during inspections to tier generators.

Attachment: MSW Consultants bid (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT

Kayla Friederich

Outreach Technician

Ms. Kayla Friederich is a diligent project analyst new to the solid waste industry. She has high standards for reporting quality data and providing effective outreach. Before joining MSW Consultants, Ms. Friederich has customer service experience in food service and retail. She has also gained further communication experience through social media creation by interning with The Water Conservation Garden and by assisting her family's small business.

Ms. Friederich has been with MSW consultants since September 2022. In that time, she has conducted outreach for SB 1383 compliance for the City of Stanton and the City of Rancho Palos Verdes. She has also assisted the Western Riverside Council of Government to analyze their edible food tier generator lists.

Ms. Friederich has always been passionate about the environment. Because of this, she earned a BS in Environmental Systems and a Minor in Communication from University of California, San Diego in 2021. She hopes to continue to grow in the solid waste industry and assist jurisdictions with environmental compliance.

ROLE: Ms. Friederich will serve as Outreach Technician. She will assist with capacity and compliance, implementing public outreach, and implementing the inspection program.

MSW Consultants provides solid waste consulting services exclusively to local governments in the areas of finance, economics, and public policy. Our mission is to work with municipal managers to maximize the value of the solid waste services that are delivered to their ratepayers. MSW Consultants was founded in 2000 by David L. Davis, CMA. In his over 30 years in the solid waste industry, Mr. Davis has provided a broad range of solid waste consulting services to over 80 cities, counties and special districts in the areas of auditing, contract negotiation, rate setting, competitive service procurement, contract compliance, waste diversion, and regulatory compliance. MSW Consultants is located in the City of Murrieta and is a California corporation.

MSW Consultants performs the following services for local governments:

- AB 341 and AB 1826 compliance
- SB 1383 compliance planning
- Design and implementation of waste diversion programs
- Performance audits of franchised waste haulers
- Contract negotiation and procurement assistance
- Rates studies for collection, processing, transfer and disposal service
- Solid waste program planning and design
- Reviews of contractor's requests for rate increases
- Route audits and routing efficiency studies

Attachment: WRCOG MoVal Program Agreement - Draft (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT BETWEEN THE

WESTERN RIVERSIDE COUNCIL OF GOVERNMENTS
REGIONAL EARLY ACTION PLANNING ('REAP") LOCAL STAFF ASSISTANCE PROGRAM AGREEMENT

1. Parties and Date.

This Agreement is made and entered into this _____ day of ____, 2023, by and between the Western Riverside Council of Governments, a California public agency ("WRCOG") and City of Moreno Valley ("Member Agency"), City Government, whose address is 14177 Frederick St, Moreno Valley, CA 92553. WRCOG and Member Agency are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Member Agency.

The Member Agency desires to participate in the Regional Food Recovery and Local Assistance program and made possible through WRCOG's REAP GRANT (the "Program") in order to receive certain on-call professional services as provided by WRCOG via its chosen consultant pursuant to the terms and conditions set forth in this Agreement and in the task order(s) to be issued pursuant to this Agreement and executed by the parties ("Task Order").

3. Terms.

3.1 Scope of Services and Term. Member Agency has requested WRCOG to provide certain professional service ("Services") offered under the Program.

3.1.1 Term. The term of this Agreement shall be from [INSERT DATE] to [INSERT DATE], unless earlier terminated as provided herein.

3.1.2 Services. The Services to be provided under this agreement shall be set forth in Task Orders approved by WRCOG and the Member Agency. The Task Order shall include a description of the Services, the requested schedule for the Services, the Consultant assigned to perform the Services ("the Consultant"), the expected product and the maximum budget for the Services provided under the Task Order. The maximum cost of Consultant's work provided to the Member Agency shall not exceed the maximum budget set forth in the Task Order without the written approval from WRCOG.

3.2 Insurance. WRCOG shall require the Consultant to procure and maintain, at its own expense, for the duration of the Agreement insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Agreement by the Consultant, its agents, representatives, employees or subcontractors. Consultant shall also require its subcontractors to procure and maintain the same insurance for the duration of the Agreement. Such insurance shall give both WRCOG and the Member Agency insured status.

DRAFT

Attachment: WRCOG MoVal Program Agreement - Draft (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT BETWEEN THE

3.3 General Provisions.

3.3.1 Termination of Agreement.

(a) Grounds for Termination. WRCOG or the Member Agency may terminate the whole or any part of this Agreement at any time and without cause by giving written notice of such termination, and specifying the effective date thereof, at least ninety (90) days before the effective date of such termination.

3.3.2 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective Parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Member Agency: City of Moreno Valley
Attn: Purchasing & Sustainability Manager
14177 Frederick St
Moreno Valley, CA 92553

WRCOG: Western Riverside Council of Governments
3390 University Ave., Suite 200
Riverside, CA 9501
Attn: Kurt Wilson
Phone: 951-405-6701

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the Party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.3.3 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.3.4 Attorney's Fees. If either Party commences an action against the other Party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorney's fees and all other costs of such action.

3.3.5 Indemnification. WRCOG's agreement with the Consultant shall require the Consultant to defend, indemnify and hold the Member Agency, its officials, officers, employees, volunteers and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury, in law or equity, to property or persons, including wrongful death, in any manner arising out of or incident to the Services provided by the Consultant under the Program.

DRAFT

Attachment: WRCOG MoVal Program Agreement - Draft (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT BETWEEN THE

3.3.6 Entire Agreement. This Agreement contains the entire Agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements. This Agreement may only be modified by a writing signed by both Parties.

3.3.7 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in Riverside County.

3.3.8 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.3.9 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the Parties.

3.3.10 Assignment or Transfer. Consultant shall not assign, hypothecate, or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of WRCOG. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.

3.3.11 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to the Member Agency include all personnel, employees, agents, and subcontractors of Consultant, except as otherwise specified in this Agreement. All references to WRCOG include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.3.12 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.3.13 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.3.14 No Third Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.3.15 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

DRAFT

3.3.16 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.3.17 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

DRAFT

Attachment: WRCOG MoVal Program Agreement - Draft (6210 : APPROVE THE 3-YEAR MEMORANDUM OF AGREEMENT BETWEEN THE

Report to City Council

TO:	Mayor and City Council
FROM:	Kenneth Reichle, Chief of Police
AGENDA DATE:	April 18, 2023
TITLE:	APPROVAL TO USE ASSET FORFEITURE FUNDS TO PURCHASE A THERMO SCIENTIFIC UNLIMITED HAND-HELD NARCOTICS ANALYZER IN FY 2022/23

RECOMMENDED ACTION

Recommendations:

1. Authorize the Police Department to purchase one new Thermal Scientific-TruNarc Unlimited Handheld Narcotics Analyzer (TruNarc), at a cost of $29,160.38 ($27,063.00 for the equipment and warranty, plus $2,097.38 sales tax).

2. Authorize a budget adjustment as set forth in the Fiscal Impact section of this report.

SUMMARY

This report recommends the City Council authorize the Police Department to purchase the TruNarc, for a cost of $29,160.38. This cost includes the TruNarc device and 3-year warranty.

TruNarc offered by Thermal Scientific provides safe and accurate analysis of narcotics, which has now become increasingly important as a measure to mitigate the dangers of exposure to certain narcotics. Additionally, requirements by the Riverside County District Attorney's Office include a preliminary analysis of narcotics when filing narcotics related cases. This is the only technology available to provide a safe and initial analysis of dangerous and illegal substances. Additionally, this purchase ensures continuity of operations as the Riverside County Sheriff Department is utilizing this tool in its operations.

DISCUSSION

The global drug problem is verifiably at an all-time high with trafficking of methamphetamines, heroin, and emerging threats like fentanyl, and carfentanil, impacting communities worldwide. Riverside County and the City of Moreno Valley are not immune. Law enforcement officials need to quickly identify suspected narcotics in the field to help keep drugs, and drug dealers off the streets. As a result, and to increase the number of convictions, the Riverside County District Attorney's Office requires a presumptive test of all narcotics prior to filing narcotics cases.

Prior to the requirement, due to the increasing dangers of handling narcotics that may contain fentanyl, several agencies began to conduct their investigations without conducting preliminary drug-recognition tests in the field and used their training and experience in drug recognition for filing purposes. However, beginning in April 2022, the District Attorney's Office would no longer accept cases for filing unless a field-test was completed verifying the type of narcotics in the suspect's possession or a full admission from the suspect.

There is, unfortunately, a significant need in Moreno Valley to be able to conduct these field tests. To provide some perspective, in 2022 the Moreno Valley Police Department (Moreno Valley Sheriff's Station) conducted 1,431 drug related investigations for possession, possession for sales and under the influence. There were also 128 drug overdose investigations with at least six (6) leading to the death of the user. Two (2) of the overdose investigations led to homicide charges being filed on the dealer. There has been one deputy who had an exposure to fentanyl who luckily only suffered minor symptoms. With this technology, narcotics can be tested anywhere in the field or station and provides a significantly increased level of safety for personnel.

The law enforcement community has established that TruNarc has been the only proven way to conduct these field-test without personnel becoming exposed.

The Thermo Scientific™ TruNarc™ handheld analyzer enables law enforcement and other personnel to scan more than 498 suspected controlled substances in a single, definitive test.

With the TruNarc, the accuracy and reliability of a narcotics and drug test lab are available anywhere. With this handheld drug detector, narcotics, stimulants, depressants, hallucinogens, and analgesics are easily identified using lab-proven Raman spectroscopy. It Identifies more than 300 of the highest priority illicit and abused narcotics in a single drug test, saving time and money. A single drug test for multiple controlled substances provides clear, definitive results for presumptive identification with no user interpretation. Trained law enforcement personnel can scan directly through plastic or glass for most drug test samples to minimize contamination, reduce exposure, and preserve evidence. TruNarc Administration captures all scan and self-check results to help support prosecution.

ALTERNATIVES

Council has the following alternatives:

1. Authorize the Police Department to purchase the Thermo Scientific TruNarc Handheld Narcotics Analyzer, with a not-to-exceed of $29,160.38 from Asset Forfeiture Funds, which includes all related equipment, software, warranty, and costs. *Staff recommends this alternative.*

2. Do not authorize the Police Department to purchase the TruNarc Handheld Narcotics Analyzer, with Thermo Scientific not to exceed $29,160.38 of Asset Forfeiture Funds, which includes all related equipment, software, warranty, and costs. *Staff does not recommend this alternative.*

FISCAL IMPACT

The Police Department is requesting the Moreno Valley City Council to approve the use of Asset forfeiture funding held by the County of Riverside to purchase the TruNarc Handheld Narcotics Analyzer. Funding for this purchase will, if approved, not have an impact on the City's General Fund in FY 2022/23. The requested FY 2022/23 budget appropriation will be as follows:

Description	Fund	GL Account No.	Type (Rev/Exp)	FY 22/23 Proposed Amendment	FY 22/23 Amended Budget
Asset Forfeiture Revenue (from County)	Gen. Fund	1010-60-65-40010-480150	Rev	$29,160	$294,963
TruNarc Handheld Narcotics Analyzer	Gen. Fund	1010-60-65-40010-625010	Exp	$29,160	$34,160

THERMO SCIENTIFIC PORTABLE ANALYTICAL INSTRUMENTS INC – TERMS AND CONDITIONS O

Last revised November 2019

UNLESS OTHERWISE EXPRESSLY AGREED IN WRITING, ALL SALES ARE SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

1. GENERAL. Thermo Scientific Portable Analytical Instruments Inc ("Seller") hereby offers for sale to the buyer named on the face hereof ("Buyer") the products listed on the face hereof (the "Products") on the express condition that Buyer agrees to accept and be bound by the terms and conditions set forth herein. Any provisions contained in any document issued by Buyer are expressly rejected and if the terms and conditions in this agreement (the "Agreement") differ from the terms of Buyer's offer, this document shall be construed as a counter offer and shall not be effective as an acceptance of Buyer's document. Buyer's receipt of Products or Seller's commencement of the services provided hereunder will constitute Buyer's acceptance of this Agreement. This is the complete and exclusive statement of the contract between Seller and Buyer with respect to Buyer's purchase of the Products. No waiver, consent, modification, amendment or change of the terms contained herein shall be binding unless in writing and signed by Seller and Buyer. Seller's failure to object to terms contained in any subsequent communication from Buyer will not be a waiver or modification of the terms set forth herein. All orders are subject to acceptance in writing by an authorized representative of Seller.

2. PRICE. All prices published by Seller or quoted by Seller's representatives may be changed at any time without notice. All prices quoted by Seller or Seller's representatives are valid for thirty (30) days, unless otherwise stated in writing. All prices for the Products will be as specified by Seller or, if no price has been specified or quoted, will be Seller's price in effect at the time of shipment. All prices are subject to adjustment on account of specifications, quantities, raw materials, cost of production, shipment arrangements or other terms or conditions, which are not part of Seller's original price quotation.

3. TAXES AND OTHER CHARGES. Prices for the Products exclude all sales, value added and other taxes and duties imposed with respect to the sale, delivery, or use of any Products covered hereby, all of which taxes and duties must be paid by Buyer. If Buyer claims any exemption, Buyer must provide a valid, signed certificate or letter of exemption for each respective jurisdiction. Buyer shall be solely responsible for obtaining any and all necessary licenses, registrations, certificates, permits, approvals or other authorizations required by federal, state or local statute, law or regulation pertaining to the use or possession of the products contemplated herein that include radioactive isotopes, or x-ray tubes if any.

Buyer shall pay Seller such surcharges, or other fees, in respect of the sale of Products hereunder as Seller deems necessary and appropriate (in Seller's sole, good-faith, reasonable discretion) to account for changes in the cost to product, develop, market, or sell the Products to Buyer hereunder (whether as the result of the imposition of tariffs or otherwise). All such surcharges must be paid by Buyer in accordance with the payment terms set forth herein. Buyer agrees that such surcharges, or other fees, or any termination thereof, shall take effect immediately upon written notice thereof by Seller to Buyer. In the event that Seller's quote and/or order acknowledgement set forth surcharges, those documents shall be considered adequate written notice to Buyer that said surcharges are Buyer's responsibility. Any such surcharges shall not constitute an increase in the Price(s) of any Products or Services sold under this Agreement

4. TERMS OF PAYMENT. Seller may invoice Buyer upon shipment for the price and all other charges payable by Buyer in accordance with the terms on the face hereof. If no payment terms are stated on the face hereof, payment shall be net thirty (30) days from the date of invoice. If Buyer fails to pay any amounts when due, Buyer shall pay Seller interest thereon at a periodic rate of one and one-half percent (1.5%) per month (or, if lower, the highest rate permitted by law), together with all costs and expenses (including without limitation reasonable attorneys' fees and disbursements and court costs) incurred by Seller in collecting such overdue amounts or otherwise enforcing Seller's rights hereunder. Seller reserves the right to require from Buyer full or partial payment in advance, or other security that is satisfactory to Seller, at any time that Seller believes in good faith that Buyer's financial condition does not justify the terms of payment specified. All payments shall be made in U.S. Dollars.

5. DELIVERY CANCELLATION OR CHANGES BY BUYER. The Products will be shipped to the destination specified by Buyer, F.O.B. shipping point. Seller will have the right, at its election, to make partial shipments of the Products and to invoice each shipment separately. Seller reserves the right to stop delivery of Products in transit and to withhold shipments in whole or in part if Buyer fails to make any payment to Seller when due or otherwise fails to perform its obligations hereunder. All shipping dates are approximate only, and Seller will not be liable for any loss or damage resulting from any delay in delivery or failure to deliver which is due to any cause beyond Seller's reasonable control. In the event of a delay due to any cause beyond Seller's reasonable control, Seller reserves the right to terminate the order or to reschedule the shipment within a reasonable period of time, and Buyer will not be entitled to refuse delivery or otherwise be relieved of any obligations as the result of such delay. Products as to which delivery is delayed due to any cause within Buyer's control may be placed in storage by Seller at Buyer's risk and expense and for Buyer's account. Orders in process may be canceled only with Seller's written consent and upon payment of Seller's cancellation charges. Orders in process may not be changed except with Seller's written consent and upon agreement by the parties as an appropriate adjustment in the purchase price therefor. Credit will not be allowed for Products returned without prior written consent of seller.

6. RETURN OF PRODUCTS/RESTOCKING CHARGE. Buyer must obtain permission from Seller prior to returning Products. The request must be received within ten (10) days of receipt of the Products. Older items, service parts, and discontinued items cannot be returned for credit. In order to obtain a RMA number, Buyer must contact Seller's customer support. Seller, in its discretion, may impose a twenty (20%) percent restocking charge of the price paid for any item authorized for return for credit

7. TITLE AND RISK OF LOSS. Notwithstanding the trade terms indicated above and subject to Seller's right to stop delivery of Products in transit, title to and risk of loss of the Products will pass to Buyer upon delivery of possession of the Products by Seller to the carrier irrespective of which Party's carrier is used for the transport or the manner of payment ascribed to the transport; provided, however, that title to any software incorporated within or forming a part of the Products shall at all times remain with Seller or the licensor(s) thereof, as the case may be.

8. WARRANTY. Seller warrants that the Products will operate or perform substantially in conformance with Seller's published specifications and be free from defects in material and workmanship, when subjected to normal, proper and intended usage by properly trained personnel, for the period of time set forth in the product documentation, published specifications or package inserts. If a period of time is not specified in Seller's product documentation, published specifications or package inserts, the warranty period shall be one (1) year from the date of shipment to Buyer for equipment and ninety (90) days for all other products (the "Warranty Period"). During the Warranty Period, Seller agrees, in its sole discretion, to repair or replace, Products and/or provide additional parts or services as reasonably necessary to cause the same to perform in substantial conformance with said published specifications; provided that Buyer shall (a) promptly notify Seller in writing upon the discovery of any defect, which notice shall include the product model and serial number (if applicable) and details of the warranty claim; and (b) after Seller's review, Seller will provide Buyer with service data and /or a Return Material Authorization ("RMA), which may include biohazard decontamination procedures and other product-specific handling instructions, then, if applicable, Buyer may return the defective Products to Seller with all costs prepaid by Buyer. Replacement parts may be new or refurbished, at the election of Seller. All replaced

Attachment: Riverside Sheriff Trunarc Lamb Contract Moreno Valley (004) (6105 : APPROVAL TO USE ASSET FORFEITURE FUNDS TO

the property of Seller. Shipment to Buyer of repaired or replacement Products shall be made in accordance with the Delivery provisions of Seller's Terms and Conditions of Sale. Consumables are expressly excluded from this warranty. If Seller elects to repair defective device instruments, Seller may, in its sole discretion, provide a replacement loaner instrument to Buyer as necessary for use while the instruments are being repaired. Notwithstanding the foregoing, Products supplied by Seller that are obtained by Seller from an original manufacturer or third party supplier are not warranted by Seller, but Seller agrees to assign to Buyer any warranty rights in such Product that Seller may have from the original manufacturer or third party supplier, to the extent such assignment is allowed by such original manufacturer or third party supplier. In no event shall Seller have any obligation to make repairs, replacements or corrections required, in whole or in part, as the result of (i) normal wear and tear, (ii) accident, disaster or event of force majeure, (iii) misuse, fault or negligence of or by Buyer, (iv) use of the Products in a manner for which they were not designed, (v) causes external to the Products such as, but not limited to, power failure or electrical power surges, (vi) improper storage and handling of the Products or (vii) use of the Products in combination with equipment or software not supplied by Seller. If Seller determines that Products for which Buyer has requested warranty services are not covered by the warranty hereunder, Buyer shall pay or reimburse Seller for all costs of investigating and responding to such request at Seller's then prevailing time and materials rates. If Seller provides repair services or replacement parts that are not covered by this Warranty shall pay Seller therefor at Seller's then prevailing time and materials rates.

ANY INSTALLATION, MAINTENANCE, REPAIR, SERVICE, RELOCATION OR ALTERATION TO OR OF, OR OTHER TAMPERING WITH, THE PRODUCTS PERFORMED BY ANY PERSON OR ENTITY OTHER THAN SELLER WITHOUT SELLER'S PRIOR WRITTEN APPROVAL, OR ANY USE OF REPLACEMENT PARTS NOT SUPPLIED BY SELLER, SHALL IMMEDIATELY VOID AND CANCEL ALL WARRANTIES WITH RESPECT TO THE AFFECTED PRODUCTS. THE OBLIGATIONS CREATED BY THIS WARRANTY STATEMENT TO REPAIR OR REPLACE A DEFECTIVE PRODUCT SHALL BE THE SOLE REMEDY OF BUYER IN THE EVENT OF A DEFECTIVE PRODUCT. EXCEPT AS EXPRESSLY PROVIDED IN THIS WARRANTY STATEMENT, SELLER DISCLAIMS ALL OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, ORAL OR WRITTEN, WITH RESPECT TO THE PRODUCTS, INCLUDING WITHOUT LIMITATION ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. SELLER DOES NOT WARRANT THAT THE PRODUCTS ARE ERROR-FREE OR WILL ACCOMPLISH ANY PARTICULAR RESULT.

9. INDEMNIFICATION

9.1. By Seller. Seller agrees to indemnify, defend and save Buyer, its officer, directors, and employees from and against any and all damages, liabilities, actions, causes of action, suits, claims, demands, losses, costs and expenses (including without limitation reasonable attorney's fees) ("Indemnified Items") for (i) injury to or death of persons or damage to property to the extent caused by the negligence or willful misconduct of Seller, its employees, agents or representatives or contractors in connection with the performance of services at Buyer's premises under this Agreement and (ii) claims that a Product infringes any valid United States patent, copyright or trade secret; provided, however, Seller shall have no liability under this Section to the extent any such Indemnified Items are caused by either (i) the negligence or willful misconduct of Buyer, its employees, agents or representatives or contractors, (ii) by any third party, (iii) use of a Product in combination with equipment or software not supplied by Seller where the Product would not itself be infringing, (iv) compliance with Buyer's designs, specifications or instructions, (v) use of the Product in an application or environment for which it was not designed or (vi) modifications of the Product by anyone other than Seller without Seller's prior written approval. Buyer shall provide Seller prompt written notice of any third party claim covered by Seller's indemnification obligations hereunder. Seller shall have the right to assume exclusive control of the defense of such claim or, at the option of the Seller, to settle the same. Buyer agrees to cooperate reasonably with Seller in connection with the performance by Seller of its obligations in this Section.

Notwithstanding the above, Seller's infringement related indemnification obligations shall be extinguished and relieved if Seller, at its discretion and at its own expense (a) procures for Buyer the right, at no additional expense to Buyer, to continue using the Product; (b) replaces or modifies the Product so that it becomes non-infringing, provided the modification or replacement does not adversely affect the specifications of the Product; or (c) in the event(a) and (b) are not practical, refund to Buyer the amortized amounts paid by Buyer with respect thereto, based on a five (5) year amortization schedule. THE FOREGOING INDEMNIFICATION PROVISION STATES SELLER'S ENTIRE LIABILITY TO BUYER FOR THE CLAIMS DESCRIBED HEREIN.

9.2. By Buyer. Buyer shall indemnify, defend with competent and experienced counsel and hold harmless Seller, its parent, subsidiaries, affiliates and divisions, and their respective officers, directors, shareholders and employees, from and against any and all damages, liabilities, actions, causes of action, suits, claims, demands, losses, costs and expenses (including without limitation reasonable attorneys' fees and disbursements and court costs) to the extent arising from or in connection with (i) the negligence or willful misconduct of Buyer, its agents, employees, representatives or contractors; (ii) use of a Product in combination with equipment or software not supplied by Seller where the Product itself would not be infringing; (iii) Seller's compliance with designs, specifications or instructions supplied to Seller by Buyer; (iv) use of a Product in an application or environment for which it was not designed; or (v) modifications of a Product by anyone other than Seller without Seller's prior written approval

10. SOFTWARE. With respect to any software products incorporated in or forming a part of the Products hereunder, Seller and Buyer intend and agree that such software products are being licensed and not sold, and that the words "purchase", "sell" or similar or derivative words are understood and agreed to mean "license", and that the word "Buyer" or similar or derivative words are understood and agreed to mean "licensee". Notwithstanding anything to the contrary contained herein, Seller or its licensor, as the case may be, retains all rights and interest in software products provided hereunder. Seller hereby grants to Buyer a royalty-free, non-exclusive, nontransferable license, without power to sublicense, to use software provided hereunder solely for Buyer's own internal business purposes on the hardware products provided hereunder and to use the related documentation solely for Buyer's own internal business purposes. This license terminates when Buyer's lawful possession of the hardware products provided hereunder ceases, unless earlier terminated as provided herein. Buyer agrees to hold in confidence and not to sell, transfer, license, loan or otherwise make available in any form to third parties the software products and related documentation provided hereunder. Buyer may not disassemble, decompile or reverse engineer, copy, modify, enhance or otherwise change or supplement the software products provided hereunder without Seller's prior written consent. Seller will be entitled to terminate this license if Buyer fails to comply with any term or condition herein. Buyer agrees, upon termination of this license, immediately to return to Seller all software products and related documentation provided hereunder and all copies and portions thereof

11. LIMITATION OF LIABILITY. NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED HEREIN, THE LIABILITY OF SELLER UNDER THESE TERMS AND CONDITIONS (WHETHER BY REASON OF BREACH OF CONTRACT, TORT, INDEMNIFICATION, OR OTHERWISE, BUT EXCLUDING LIABILITY OF SELLER FOR BREACH OF WARRANTY (THE SOLE REMEDY FOR WHICH SHALL BE AS PROVIDED UNDER SECTION 8 ABOVE)) SHALL NOT EXCEED AN AMOUNT EQUAL TO THE LESSER OF (A) THE TOTAL PURCHASE PRICE THERETOFORE PAID BY BUYER TO SELLER WITH RESPECT TO THE PRODUCT(S) GIVING RISE TO SUCH LIABILITY OR (B)

Attachment: Riverside Sheriff Trunarc Lamb Contract Moreno Valley (004) (6105 : APPROVAL TO USE ASSET FORFEITURE FUNDS TO

ONE MILLION DOLLARS ($1,000,000). NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED HEREIN, IN NO EVEN SELLER BE LIABLE FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL OR INCIDENTAL DAMAGES (INCLUDING WITHOUT LIMITATION DAMAGES FOR LOSS OF USE OF FACILITIES OR EQUIPMENT, LOSS OF REVENUE, LOSS OF DATA, LOSS OF PROFITS OR LOSS OF GOODWILL), REGARDLESS OF WHETHER SELLER (a) HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES OR (b) IS NEGLIGENT

12. EXPORT RESTRICTIONS. Buyer acknowledges that each Product and any related software and technology, including technical information supplied by Seller or contained in documents (collectively "Items"), is subject to export controls of the U.S. government. The export controls may include, but are not limited to, those of the Export Administration Regulations of the U.S. Department of Commerce (the "EAR"), which may restrict or require licenses for the export of Items from the United States and their re-export from other countries. Buyer shall comply with the EAR and all other applicable laws, regulations, laws, treaties, and agreements relating to the export, re-export, and import of any Item. Buyer shall not, without first obtaining the required license to do so from the appropriate U.S. government agency; (i) export or re-export any Item, or (ii) export, re-export, distribute or supply any Item to any restricted or embargoed country or to a person or entity whose privilege to participate in exports has been denied or restricted by the U.S. government. Buyer shall, if requested by Seller, provide information on the end user and end use of any Item exported by the Buyer or to be exported by the Buyer. Buyer shall cooperate fully with Seller in any official or unofficial audit or inspection related to applicable export or import control laws or regulations, and shall indemnify and hold Seller harmless from, or in connection with, any violation of this Section by Buyer or its employees, consultants, or agents

13. HAZARDOUS MATERIALS. Some Products may require special packaging, labeling, marking and handling. Carriers may add additional freight charges for the handling or transporting of these materials. The consolidating of such material with other Products may be prohibited. Additional freight charges will be billed per Seller's shipping terms. Be sure to advise Seller of shipping instructions for these hazardous materials to reduce your freight costs

14. MISCELLANEOUS. (a) Buyer may not delegate any duties nor assign any rights or claims hereunder without Seller's prior written consent, and any such attempted delegation or assignment shall be void. (b) The rights and obligations of the parties hereunder shall be governed by and construed in accordance with the laws of the State of Seller's manufacturing location, without reference to its choice of law provisions. Each party hereby irrevocably consents to the exclusive jurisdiction of the state and federal courts located in the county and state of Seller's manufacturing location, in any action arising out of or relating to this Agreement. (c) Both parties waive any right they may have under applicable law or otherwise to a right to a trial by jury. Any action arising under this Agreement must be brought within one (1) year from the date that the cause of action arose. (d) The application to this Agreement of the U.N. Convention on Contracts for the International Sale of Goods is hereby expressly excluded. (e) In the event that any one or more provisions contained herein shall be held by a court of competent jurisdiction to be invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions contained herein shall remain in full force and effect, unless the revision materially changes the bargain. (f) Seller's failure to enforce, or Seller's waiver of a breach of, any provision contained herein shall not constitute a waiver of any other breach or of such provision. (g) Unless otherwise expressly stated on the Product or in the documentation accompanying the Product, the Product is intended for non-clinical, non-diagnostic, non-therapeutic use only and is not to be used for any other purpose, including without limitation, unauthorized commercial uses, in vitro diagnostic uses, ex vivo or in vivo therapeutic uses, or any type of consumption by or application to humans or animals. (h) Buyer agrees that all pricing, discounts and technical information that Seller provides to Buyer are the confidential and proprietary information of Seller. Buyer agrees to (1) keep such information confidential and not disclose such information to any third party, and (2) use such information solely for Buyer's internal purposes and in connection with the Products supplied hereunder. Nothing herein shall restrict the use of information available to the general public. (i) Any notice or communication required or permitted hereunder shall be in writing and shall be deemed received when personally delivered or three (3) business days after being sent by certified mail, postage prepaid, to a party at the address specified herein or at such other address as either party may from time to time designate to the other (j) Seller hereby rejects and disclaims any rights of Buyer contained, or obligations imposed upon Seller, in any document provided, referenced or otherwise submitted by Buyer, in each case, that Seller has not expressly included in these [terms and conditions] or a writing manually executed by Seller (including, without limitation, any rights of Buyer in respect of designs, specifications, source code or intellectual property, owned, created, developed or licensed, by Seller; any rights to items or services not specifically identified in Seller's quotation; any audit rights or financial offset rights of Buyer; any penalties or liquidated damages imposed upon Seller; any obligation by Seller to comply with Health Insurance Portability and Accountability Act of 1996 (as amended), Current Good Manufacturing Practice regulations (as amended), the requirements, as amended, of the Customs-Trade Partnership Against Terrorism or any code of conduct, quality program, information security program, background or drug screening program or other guidelines, programs or policies, in each case, promulgated or required by Buyer; any obligation that Seller comply with any law that, under law, would not otherwise apply to Seller in respect of the transaction(s) contemplated hereby; any right of Buyer to withhold all, or any portion, of the purchase price of any products or services provided hereunder for any period of time; any right of Buyer, itself or through any third party, to remediate any defects in, replace or re-perform, any products or services provided hereunder at Seller's cost or expense; any obligation of Seller to waive, or require its insurers to waive, any rights of subrogation; any obligation of Seller that would impair, restrict or prohibit Seller's ability to freely conduct any business with any person or in any geography or market; any early-payment, or other, discount; any obligation of Seller to maintain a supply of spares, or otherwise make any services available, for any particular period of time; any representation, warranty or other obligation of Seller to provide pricing comparable to, or more favorable than, the pricing that Seller provides to others; any restriction of, or prohibition on, Seller's ability to modify, change or discontinue any of its products, processes or services; or any waiver by Seller of any right to enforce any of the terms hereof).

15. SOFTWARE-AS-A-SERVICE TRANSACTIONS. IF YOU ARE PURCHASING ANY PRODUCTS PROVIDED BY SELLER HEREUNDER AND DESCRIBED IN THE RELEVANT QUOTATION OR PURCHASE ORDER AS A SUBSCRIPTION TO ANY THERMO FISHER SOFTWARE-AS-A-SERVICE OFFERING (ANY SUCH PRODUCT, HEREINAFTER, A "SUBSCRIPTION"),THEN IN RESPECT OF SUCH SUBSCRIPTION(S) ONLY

(a) The following terms and conditions of this Agreement shall not apply: Sections 6-7, 9.1, and 13.

(b) The following terms and conditions of this Agreement shall be modified as set forth below:

(i) Section 5 shall be replaced in its entirety with the following:

5. CANCELLATION OR CHANGES BY BUYER. Seller reserves the right to suspend or terminate the Buyer's Subscription(s), in whole or in part, if Buyer fails to make any payment to Seller when due, otherwise fails to perform its obligations hereunder, or fails to comply with the Seller's Terms of Use agreement agreed to by Buyer and governing Buyer's use of the Subscription(s), as in effect from time to time (the "Terms of Use"). Seller will not be liable for any loss or damage resulting from any delay in activation of the Subscription(s) or failure to activate the Subscription(s) which is due to any cause beyond Seller's reasonable control. In the event of a delay due to any cause beyond Seller's reasonable control, Seller reserves the right to terminate the order or to reschedule the activation of the Subscription(s) within a reasonable period of time, and Buyer will not be entitled to refuse payment or otherwise be relieved of any obligations as the result of such delay. Orders in process may be canceled only with Seller's written

Attachment: Riverside Sheriff Trunarc Lamb Contract Moreno Valley (004) (6105 : APPROVAL TO USE ASSET FORFEITURE FUNDS TO

payment of Seller's cancellation charges. Orders in process may not be changed except with Seller's written consent a agreement by the parties as an appropriate adjustment in the purchase price therefor.

(ii) Section 8 shall be replaced in its entirety with the following:
8. WARRANTY. BUYER AGREES AND ACKNOWLEDGES THAT THE SUBSCRIPTIONS ARE SOLD "AS-IS", WITH NO WARRANTIES EXPRESSED OR IMPLIED. SELLER DISCLAIMS ALL EXPRESS OR IMPLIED WARRANTIES, ORAL OR WRITTEN, WITH RESPECT TO THE SUBSCRIPTIONS, INCLUDING WITHOUT LIMITATION ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

(iii) Section 10 shall be replaced in its entirety with the following:

10. SOFTWARE. This Agreement shall not be construed to grant to Buyer any patent license, know-how license or any other rights except as specifically provided herein. Buyer agrees and acknowledges that, by virtue of its purchase of the Subscriptions hereunder, it does not acquire any intellectual property rights (whether by license, assignment, or otherwise) of Seller, including without limitation any rights to the Subscriptions or related software or hardware systems (except for the limited right to use the Subscription subject to the terms and conditions set forth herein). Buyer shall not reverse engineer or copy the design, algorithms, or code, or any components thereof, of any information related to the Subscriptions for any purpose.

(iv) In Section 11, the language "ONE MILLION DOLLARS ($1,000,000)" shall be replaced with "TEN THOUSAND DOLLARS ($10,000)".

(c) The following additional terms and conditions shall apply
TERMS OF USE. Buyer hereby acknowledges and agrees that it shall comply with all terms and conditions of the Terms of Use, and that Buyer's use of the Subscription in violation of any such terms and/or conditions shall entitle Seller, without prejudice to any other remedies that may be available to Seller at law or in equity, to terminate Buyer's use of the Subscription(s) effective immediately. Buyer further agrees and acknowledges that it shall not be entitled to any refund of any portion of the purchase price paid in respect of Subscription(s) cancelled by Seller pursuant to Seller's rights under this Section and/or the Terms of Use. Buyer's rights to use these Subscription will begin upon Seller's transmission to Buyer of Subscription link and end 12 months from this date unless otherwise terminated by Seller. In the event of any conflict between this Agreement and the Terms of Use, the Terms of Use shall control.

Report to City Council

TO:	Mayor and City Council Acting in its Capacity as President and Members of the Board of Directors of the Moreno Valley Community Services District (CSD)
FROM:	Brian Mohan, Assistant City Manager
AGENDA DATE:	April 18, 2023
TITLE:	PURSUANT TO LANDOWNER PETITIONS, ANNEX CERTAIN PARCELS INTO COMMUNITY FACILITIES DISTRICT NO. 2021-01 (PARKS MAINTENANCE) - AMENDMENT NOS. 78, 81 AND 86-89 (RESO. NOS. CSD 2023- __ TO CSD 2023-__)

RECOMMENDED ACTION

Recommendation:

1. Adopt Resolution No. CSD 2023-__, a Resolution of the Board for the Moreno Valley Community Services District of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2021-01 (Parks Maintenance) and approving the amended map for said District (Amendment No. 78) (Abdon Sepulveda, 13400 Birchwood Dr.).

2. Adopt Resolution No. CSD 2023-__, a Resolution of the Board for the Moreno Valley Community Services District of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2021-01 (Parks Maintenance) and approving the amended map for said District (Amendment No. 81) (Pedro A. Rivera Hernandez, Esther Burgos Rivera, 25663 Dracaea Ave.).

3. Adopt Resolution No. CSD 2023-__, a Resolution of the Board for the Moreno Valley Community Services District of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2021-01 (Parks Maintenance) and approving the amended map for said District (Amendment No. 86) (Raul Romero, 22060 Monico Dr.).

4. Adopt Resolution No. CSD 2023-__, a Resolution of the Board for the Moreno Valley Community Services District of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2021-01 (Parks Maintenance) and approving the amended map for said District (Amendment No. 87) (Dale Kimbriel, 14361 Anthony Pl.).

5. Adopt Resolution No. CSD 2023-__, a Resolution of the Board for the Moreno Valley Community Services District of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2021-01 (Parks Maintenance) and approving the amended map for said District (Amendment No. 88) (Juan Ramon and Bertha Maldonado, 25035 Quebrada Ct.).

6. Adopt Resolution No. CSD 2023-__, a Resolution of the Board for the Moreno Valley Community Services District of the City of Moreno Valley, California, ordering the annexation of territory to City of Moreno Valley Community Facilities District No. 2021-01 (Parks Maintenance) and approving the amended map for said District (Amendment No. 89) (11 Fir Park Apartment Homes, located on the northside of Fir Ave., east of Indian St.).

SUMMARY

Adoption of the resolutions (Attachments 1-6) will certify the annexation of 6 parcels into Community Facilities District (CFD) No. 2021-01 (Parks Maintenance) (“District”). This action impacts only the property owners identified below, not the general citizens or taxpayers of the City.

DISCUSSION

As a condition of approval for the development projects identified below, the applicants are required to provide an ongoing funding source for maintenance of certain public facilities (e.g., parks). The funding is used to mitigate the cost of the impacts created by the proposed development.

Property Owner Project ACP Record #s	Amendment No.	APN	Location
Abdon Sepulveda Accessory Dwelling Unit (ADU) PEN21-0178/SCP22-0063	78	479-140-019	13400 Birchwood Dr.
Pedro A. Rivera Hernandez, Esther Burgos Rivera Accessory Dwelling Unit (ADU) BFR22-0212/SCP22-0126	81	479-641-002	25663 Dracaea Ave.
Raul Romero Accessory Dwelling Unit (ADU) BFR22-0192/SCP22-0094	86	264-371-014	22060 Monico Dr.
Dale Kimbriel Accessory Dwelling Unit (ADU) PEN21-0306/SCP23-0003	87	486-290-016	14361 Anthony Pl.
Juan Ramon and Bertha Maldonado Accessory Dwelling Unit (ADU) PEN21-0315/SCP22-0096	88	474-391-009	25035 Quebrada Ct.
11 Fir Park Apartment Homes 11-Unit Apartment Complex PEN19-0157/SCP23-0008	89	481-171-039	Located on northside of Fir Ave., East of Indian St.

On June 1, 2021, the CSD Board formed CFD No. 2021-01, pursuant to the Mello-Roos Community Facilities Act of 1982. The District was created to provide the development community with an alternative funding tool to mitigate the impacts of their proposed development. If a property owner elects to annex the parcels of their development into the District, they also authorize the CSD to annually levy a special tax, collected on the annual property tax bill, against property in the development project. Thus, satisfying the condition of approval.

On December 21, 2021, the CSD Board adopted Ordinance No. 56, which designated the entire territory of the City as a future annexation area for the District. With the future annexation area designated, annexations can occur without an additional public hearing as long as the annexing landowner provides unanimous consent. Once annexed, parcels are subject to the annual special tax to fund the service they are receiving.

An applicant has two options to satisfy the condition(s) of approval:

1. The property owner submits a Landowner Petition unanimously approving annexation of the property into the District. Approval of the petition and special tax rate allows the City to annually levy the special tax on the property tax bill of the property. This option is only available if there are

fewer than 12 registered voters living within the proposed annexation area; or

2. The applicant funds an endowment in an amount sufficient to yield an annual revenue stream that meets the annual obligation and provides for the ongoing operation and maintenance of parks facilities.

The Property Owners listed above elected to annex their property into CFD No. 2021-01 and have the special tax applied to the annual property tax bill. The Office of the Riverside County Registrar of Voters confirmed the number of registered voters residing at each property, allowing a special election of the landowner. Adoption of the resolutions (Attachments 1-6) amends the District and adds the property to the tax rate area identified in the Fiscal Impact section of this report. The resolutions also direct the recordation of the boundary maps (Attachments 7-12) and amended notice of special tax liens for the amendments. The Election Official confirmed the Property Owners unanimously approved the annexation of their property into the District (Attachments 13-18).

ALTERNATIVES

1. Adopt the resolutions. *Staff recommends this alternative since it will annex the properties into CFD No. 2021-01 at the request of the Property Owners and satisfy the condition of approval for the proposed developments.*

2. Do not adopt the resolutions. *Staff does not recommend this alternative because it is contrary to the request of the Property Owners, will not satisfy the condition of approval, and may delay development of the projects.*

3. Do not adopt the resolutions but rather continue the item to a future regularly scheduled City Council meeting. *Staff does not recommend this alternative as it will delay the Property Owners from satisfying the condition of approval and may delay development of the projects.*

FISCAL IMPACT

Revenue received from the special tax is restricted and can only be used to fund the services for each tax rate area within the District. The special tax can only be applied to a property tax bill of a parcel wherein the qualified electors (i.e., landowners or registered voters, depending upon the number of registered voters) have previously provided approval. If the projected revenue from the maximum special tax exceeds what is necessary to fund the services within the tax rate area, a lower amount will be applied to the property tax bill for all of the properties within the affected tax rate area. The maximum special tax rates are detailed below.

Property Owner Project ACP Record #s	Amendment No.	Property Type	FY 2022/23 Maximum Special Tax Rate
Abdon Sepulveda Accessory Dwelling Unit (ADU) PEN21-0178/SCP22-0063	78	Single Family	$308.39/unit
Pedro A. Rivera Hernandez, Esther Burgos Rivera Accessory Dwelling Unit (ADU) BFR22-0212/SCP22-0126	81	Single Family	$308.39/unit
Raul Romero Accessory Dwelling Unit (ADU) BFR22-0192/SCP22-0094	86	Single Family	$308.39/unit
Dale Kimbriel Accessory Dwelling Unit (ADU) PEN21-0306/SCP23-0003	87	Single Family	$308.39/unit
Juan Ramon and Bertha Maldonado Accessory Dwelling Unit (ADU) PEN21-0315/SCP22-0096	88	Single Family	$308.39/unit
11 Fir Park Apartment Homes 11-Unit Apartment Complex PEN19-0157/SCP23-0008	89	Multi-Family	$308.39/unit

The maximum special tax rate is subject to an annual inflation adjustment based on the change in the Consumer Price Index (CPI) or five percent (5%), whichever is greater. However, the annual adjustment cannot be applied unless the CSD Board annually authorizes such adjustment. The increase to the maximum special tax rate cannot exceed the annual inflationary adjustment without a two-thirds approval of the qualified electors within the affected tax rate area.

NOTIFICATION

The Landowner Petitions were emailed to the Property Owners on March 16, 2023 and on March 20, 2023.

PREPARATION OF STAFF REPORT

Prepared by:
Kimberly Ganimian
Special Districts Division Manager

Department Head Approval:
Brian Mohan
Assistant City Manager

Concurred by:
Jeremy Bubnick
Parks & Community Services Director

CITY COUNCIL GOALS

Revenue Diversification and Preservation. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 4.2: Develop and maintain a comprehensive Infrastructure Plan to invest in and deliver City infrastructure.

Objective 5.2: Promote the installation and maintenance of cost effective, low maintenance landscape, hardscape and other improvements which create a clean, inviting community.

RESOLUTION NO. 2023-___

A RESOLUTION OF THE BOARD FOR THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, ORDERING THE ANNEXATION OF TERRITORY TO MORENO VALLEY COMMUNITY SERVICES DISTRICT COMMUNITY FACILITIES DISTRICT NO. 2021-01 (PARKS MAINTENANCE) AND APPROVING AN AMENDED MAP FOR SAID DISTRICT

WHEREAS, by its Resolution No. CSD 2021-22, Board established the Moreno Valley Community Services District Community Facilities District No. 2021-01 (Parks Maintenance) (the "CFD"), pursuant to the Mello-Roos Community Facilities Act of 1982 (Government Code Section 53311 *et seq*.) (the "Act"); and

WHEREAS, by its Ordinance No. CSD 55, the Board authorized an annual special tax to be levied against all non-exempt parcels of real property within the CFD (the "Special Tax") to fund parks maintenance services; and

WHEREAS, in order to permit landowners to efficiently annex developing parcels to the CFD, the Board, by its Ordinance No. CSD 56 designated the entire territory of the City of Moreno Valley as a future annexation area for the CFD; and

WHEREAS, the landowner of the parcel listed on Exhibit A to this Resolution, which is attached hereto and incorporated herein by reference, has submitted to the District a petition requesting and approving annexation of the listed parcel (the "Annexation Parcel") to the CFD; and

WHEREAS, the Annexation Parcel is comprised of the territory shown on the boundary map (the "Boundary Map") entitled "Amendment No. 78 to Boundaries of Community Facilities District No. 2021-01 (Parks Maintenance), Moreno Valley Community Services District, City of Moreno Valley, County of Riverside, California" which is included as Exhibit B to this Resolution, and incorporated herein by this reference; and

WHEREAS, the Board desires to annex the Annexation Parcel to the CFD.

NOW, THEREFORE, THE BOARD FOR THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Recitals. The above recitals are all true and correct and are herein incorporated.

2. Annexation Approved. The Annexation Parcel is hereby added to and part of the CFD with full legal effect and is subject to the Special Tax.

3. Description of Services. The following is a general description of the services (the "Services") provided in the CFD:

Attachment: Resolution Ordering Annexation - Amendment No. 78 (6185 : PURSUANT TO LANDOWNER PETITIONS, ANNEX CERTAIN

Maintaining, lighting, and operating parks and park improvements that are owned and operated by the CSD, to the extent such services are in addition to services already provided at the time CFD No. 2021-01 was created and do not supplant existing services.

Fundable services include (i) planting, replanting, mowing, trimming, irrigation and fertilization of grass, trees, shrubs, and other plants and vegetation, (ii) the operation, maintenance, repair, and replacement of irrigation systems and lighting systems, and (iii) the operation maintenance, repair and replacement of any real property or improvements with a useful life of more than five years.

Fundable costs include, but are not limited to: (i) contracted costs for such services, (ii) salaries and benefits of staff, including park rangers, devoted to such services, (iii) expenses related to equipment, apparatus, and supplies related to these services, (iv) administrative and overhead costs, including staff time, associated with providing such services, and (v) lifecycle costs associated with the repair and replacement of facilities and improvements.

4. Amended Boundary Map. The Boundary Map attached hereto as Exhibit B is hereby approved. This map amends, and does not supersede, the existing maps of the CFD. The Board directs that said map be filed with the Riverside County Recorder pursuant to Section 3113 of the Streets and Highways Code.

5. Notice of Special Tax Lien. The Board directs that an amended notice of special tax lien be recorded pursuant to Section 3117.5 of the Streets and Highways Code with respect to the Annexation Parcel associated with the Boundary Map.

6. This Resolution shall be effective immediately upon adoption.

7. The Secretary shall certify to the adoption of this Resolution, and shall maintain it on file as a public record this Resolution.

8. Severability. The Board declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

RESOLUTION NO. 2023-___

A RESOLUTION OF THE BOARD FOR THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, ORDERING THE ANNEXATION OF TERRITORY TO MORENO VALLEY COMMUNITY SERVICES DISTRICT COMMUNITY FACILITIES DISTRICT NO. 2021-01 (PARKS MAINTENANCE) AND APPROVING AN AMENDED MAP FOR SAID DISTRICT

WHEREAS, by its Resolution No. CSD 2021-22, Board established the Moreno Valley Community Services District Community Facilities District No. 2021-01 (Parks Maintenance) (the "CFD"), pursuant to the Mello-Roos Community Facilities Act of 1982 (Government Code Section 53311 *et seq*.) (the "Act"); and

WHEREAS, by its Ordinance No. CSD 55, the Board authorized an annual special tax to be levied against all non-exempt parcels of real property within the CFD (the "Special Tax") to fund parks maintenance services; and

WHEREAS, in order to permit landowners to efficiently annex developing parcels to the CFD, the Board, by its Ordinance No. CSD 56 designated the entire territory of the City of Moreno Valley as a future annexation area for the CFD; and

WHEREAS, the landowner of the parcel listed on Exhibit A to this Resolution, which is attached hereto and incorporated herein by reference, has submitted to the District a petition requesting and approving annexation of the listed parcel (the "Annexation Parcel") to the CFD; and

WHEREAS, the Annexation Parcel is comprised of the territory shown on the boundary map (the "Boundary Map") entitled "Amendment No. 81 to Boundaries of Community Facilities District No. 2021-01 (Parks Maintenance), Moreno Valley Community Services District, City of Moreno Valley, County of Riverside, California" which is included as Exhibit B to this Resolution, and incorporated herein by this reference; and

WHEREAS, the Board desires to annex the Annexation Parcel to the CFD.

NOW, THEREFORE, THE BOARD FOR THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Recitals. The above recitals are all true and correct and are herein incorporated.

2. Annexation Approved. The Annexation Parcel is hereby added to and part of the CFD with full legal effect and is subject to the Special Tax.

3. Description of Services. The following is a general description of the services (the "Services") provided in the CFD:

Attachment: Resolution Ordering Annexation - Amendment No. 81 (6185 : PURSUANT TO LANDOWNER PETITIONS, ANNEX CERTAIN

Maintaining, lighting, and operating parks and park improvements that are owned and operated by the CSD, to the extent such services are in addition to services already provided at the time CFD No. 2021-01 was created and do not supplant existing services.

Fundable services include (i) planting, replanting, mowing, trimming, irrigation and fertilization of grass, trees, shrubs, and other plants and vegetation, (ii) the operation, maintenance, repair, and replacement of irrigation systems and lighting systems, and (iii) the operation maintenance, repair and replacement of any real property or improvements with a useful life of more than five years.

Fundable costs include, but are not limited to: (i) contracted costs for such services, (ii) salaries and benefits of staff, including park rangers, devoted to such services, (iii) expenses related to equipment, apparatus, and supplies related to these services, (iv) administrative and overhead costs, including staff time, associated with providing such services, and (v) lifecycle costs associated with the repair and replacement of facilities and improvements.

4. Amended Boundary Map. The Boundary Map attached hereto as Exhibit B is hereby approved. This map amends, and does not supersede, the existing maps of the CFD. The Board directs that said map be filed with the Riverside County Recorder pursuant to Section 3113 of the Streets and Highways Code.

5. Notice of Special Tax Lien. The Board directs that an amended notice of special tax lien be recorded pursuant to Section 3117.5 of the Streets and Highways Code with respect to the Annexation Parcel associated with the Boundary Map.

6. This Resolution shall be effective immediately upon adoption.

7. The Secretary shall certify to the adoption of this Resolution, and shall maintain it on file as a public record this Resolution.

8. Severability. The Board declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

RESOLUTION NO. 2023-___

A RESOLUTION OF THE BOARD FOR THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, ORDERING THE ANNEXATION OF TERRITORY TO MORENO VALLEY COMMUNITY SERVICES DISTRICT COMMUNITY FACILITIES DISTRICT NO. 2021-01 (PARKS MAINTENANCE) AND APPROVING AN AMENDED MAP FOR SAID DISTRICT

WHEREAS, by its Resolution No. CSD 2021-22, Board established the Moreno Valley Community Services District Community Facilities District No. 2021-01 (Parks Maintenance) (the "CFD"), pursuant to the Mello-Roos Community Facilities Act of 1982 (Government Code Section 53311 *et seq*.) (the "Act"); and

WHEREAS, by its Ordinance No. CSD 55, the Board authorized an annual special tax to be levied against all non-exempt parcels of real property within the CFD (the "Special Tax") to fund parks maintenance services; and

WHEREAS, in order to permit landowners to efficiently annex developing parcels to the CFD, the Board, by its Ordinance No. CSD 56 designated the entire territory of the City of Moreno Valley as a future annexation area for the CFD; and

WHEREAS, the landowner of the parcel listed on Exhibit A to this Resolution, which is attached hereto and incorporated herein by reference, has submitted to the District a petition requesting and approving annexation of the listed parcel (the "Annexation Parcel") to the CFD; and

WHEREAS, the Annexation Parcel is comprised of the territory shown on the boundary map (the "Boundary Map") entitled "Amendment No. 88 to Boundaries of Community Facilities District No. 2021-01 (Parks Maintenance), Moreno Valley Community Services District, City of Moreno Valley, County of Riverside, California" which is included as Exhibit B to this Resolution, and incorporated herein by this reference; and

WHEREAS, the Board desires to annex the Annexation Parcel to the CFD.

NOW, THEREFORE, THE BOARD FOR THE MORENO VALLEY COMMUNITY SERVICES DISTRICT OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

1. Recitals. The above recitals are all true and correct and are herein incorporated.

2. Annexation Approved. The Annexation Parcel is hereby added to and part of the CFD with full legal effect and is subject to the Special Tax.

3. Description of Services. The following is a general description of the services (the "Services") provided in the CFD:

Attachment: Resolution Ordering Annexation - Amendment No. 88 (6185 : PURSUANT TO LANDOWNER PETITIONS, ANNEX CERTAIN

Maintaining, lighting, and operating parks and park improvements that are owned and operated by the CSD, to the extent such services are in addition to services already provided at the time CFD No. 2021-01 was created and do not supplant existing services.

Fundable services include (i) planting, replanting, mowing, trimming, irrigation and fertilization of grass, trees, shrubs, and other plants and vegetation, (ii) the operation, maintenance, repair, and replacement of irrigation systems and lighting systems, and (iii) the operation maintenance, repair and replacement of any real property or improvements with a useful life of more than five years.

Fundable costs include, but are not limited to: (i) contracted costs for such services, (ii) salaries and benefits of staff, including park rangers, devoted to such services, (iii) expenses related to equipment, apparatus, and supplies related to these services, (iv) administrative and overhead costs, including staff time, associated with providing such services, and (v) lifecycle costs associated with the repair and replacement of facilities and improvements.

4. Amended Boundary Map. The Boundary Map attached hereto as Exhibit B is hereby approved. This map amends, and does not supersede, the existing maps of the CFD. The Board directs that said map be filed with the Riverside County Recorder pursuant to Section 3113 of the Streets and Highways Code.

5. Notice of Special Tax Lien. The Board directs that an amended notice of special tax lien be recorded pursuant to Section 3117.5 of the Streets and Highways Code with respect to the Annexation Parcel associated with the Boundary Map.

6. This Resolution shall be effective immediately upon adoption.

7. The Secretary shall certify to the adoption of this Resolution, and shall maintain it on file as a public record this Resolution.

8. Severability. The Board declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Report to City Council

TO:	Mayor and City Council
FROM:	Brian Mohan, Assistant City Manager
AGENDA DATE:	April 18, 2023
TITLE:	PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT PERIOD FOR THE FIVE-YEAR CONSOLIDATED PLAN FOR PROGRAM YEARS 2023/2028 AND FOR THE CDBG, HOME & ESG PROJECT SELECTIONS FOR INCLUSION IN FISCAL YEAR 2023/24 ANNUAL ACTION PLAN

RECOMMENDED ACTION

Recommendation:

1. Conduct a Public Hearing to review and begin the 30-day public comment period for the five-year Consolidated Plan for program years 2023/2028 and for the Community Development Block Grant (CDBG), HOME Investment Partnerships Program (HOME) and Emergency Solutions Grants Program (ESG) programs to allow the public an opportunity to comment on the proposed project selections for Fiscal Year (FY) 2023/24 Annual Action Plan.

SUMMARY

Every year, the City is required to submit an Annual Action Plan to the U.S. Department of Housing and Urban Development (HUD). The Annual Action Plan identifies how the CDBG, HOME and ESG program funds will be utilized to provide programs and projects that benefit low and moderate-income households and neighborhoods. It serves as the City's official grant application to HUD which must be submitted at least forty-five days before the beginning of the program year.

The activities for inclusion in the FY 2023/24 Annual Action Plan for CDBG, HOME and ESG are summarized in Attachment 1. Staff recommends that the City Council conduct a public hearing to review and begin the 30-day public comment period of the proposed projects for inclusion in the FY 2023/24 Annual Action Plan. Staff will return to Council

on May 16, 2023 to close the public comment period, recommend approval of staff's project selections and submittal to HUD.

Every five, years the City must submit a Consolidated Plan. The Consolidated Plan is designed to help assess affordable housing and community development needs, market conditions, and to make data-driven, place-based investment decisions. The Consolidated Plan is carried out through the Annual Action Plan. Staff recommends that the City Council conduct a public hearing to review and begin the 30-day public comment period of the Consolidated Plan.

DISCUSSION

Moreno Valley will allocate CDBG, HOME and ESG funds for the upcoming fiscal year. The FY 2023/24 Action Plan will serve as the first year of the annual update to the City's proposed five-year Consolidated Plan (FY 2023/24-2027/28). Tonight's Public Hearing represents one of the Public Hearings in a series of meetings conducted under the City's FY 2023/24 Action Plan schedule. The City Council established CDBG funding priorities at the December 6, 2022, meeting. The following provides a summary of the events that have occurred during the application process to date:

- November 22, 2022 — Finance Subcommittee review of grant policies and objectives
- December 6, 2022 — City Council Public Hearing to review Policies and Objectives and to collect community needs and comments
- December 15, 2022 — Notification of Notice of Funding Available (NOFA) posted by City Clerk in various satellite locations
  Application made available on City website & PlanetBids
- January 5, 2023 — Application Workshop held via teleconference
- January 31, 2023 — Application submittal deadline

The following provides a summary of the events that are scheduled to occur during the continued application process:

- April 17, 2023 — Start of 30-day public comment period for the draft Annual Action Plan, proposed Consolidated Plan, and proposed Analysis of Impediments
- April 18, 2023 — City Council Public Hearing to review and consider project selections
- May 16, 2023 — City Council Public Hearing to approve the proposed Consolidated Plan (FY 23/27), Annual Action Plan (FY 23/24), and Analysis of Impediments (FY 23/27), and close of public comment/review period
- May 17, 2023 — Submittal of Approved FY 2023/24 Annual Action Plan to HUD

HOME Investment Partnerships Program (HOME) – Grant Purpose

The Home Investment Partnerships Program was established by the Title II of the Cranston-Gonzalez National Affordable Housing Act. The objectives of the HOME program include:

- Expanding the supply of decent and affordable housing, particularly housing for low- and very low-income residents,
- Strengthening the abilities of State and local governments to design and implement strategies for achieving adequate supplies of decent, affordable housing,
- Providing financial and technical assistance to participating jurisdictions, including the development of model programs for affordable low-income housing; and
- Extending and strengthening partnerships among all levels of government and the private sector, including for-profit and non-profit organizations, in the production and operation of affordable housing.

HOME Investment Partnerships Program (HOME) – Funding and Limitations

Year 2023/2024 Allocation	Funding Allocation
Planning and Administration Cap (10% of annual grant)	$75,599
Mandatory CHDO set-aside (15% of annual grant)	$113,398
Available for Other Activities	$566,992
TOTAL Allocation	**$755,989**
TOTAL Uncommitted Prior Year HOME Funds	$1,953,951
TOTAL Available for Funding	**$2,709,940**

Emergency Solutions Grants Program (ESG) – Grant Purpose

The objectives of the ESG program are to assist, protect, and improve living conditions for the homeless. The program provides funding to:

- Engage homeless individuals and families living on the street,
- Improve the number and quality of emergency shelters for homeless individuals and families,
- Help operate these shelters,
- Provide essential services to shelter residents,
- Rapidly re-house homeless individuals and families, and
- Prevent families/individuals from becoming homeless.

Emergency Solutions Grants Program (ESG) – Funding and Limitations

Year 2023/2024 Allocation	Funding Allocation
Planning and Administration Cap (7.5% of annual grant)	$12,702
Available for Other Activities	$156,663
TOTAL Allocation	**$169,365**
TOTAL Available for Funding	**$169,365**

Community Development Block Grant (CDBG) – Grant Purpose

The Community Development Block Grant program is authorized by Title I of the Housing and Community Development Act of 1974, as amended. The primary objective of the CDBG program is to develop viable urban communities by providing decent housing, a suitable living environment, and expanded economic opportunities, principally for persons of low and moderate income.

The CDBG objective is to be achieved in two ways: First, a grantee can only use funds to assist eligible activities that meet one of three national objectives of the program:

- Benefit low- and moderate-income persons,
- Aid in the prevention or elimination of slums and blight, or
- Meet community development needs having a particular urgency.

Second, at least 70 percent of funds must be spent (over a period of up to 3 years) for activities that address the national objective of benefiting low- and moderate-income persons.

Community Development Block Grant (CDBG) – Funding and Limitations

Year 2023/2024 Allocation	Funding Allocation
Planning and Administration Cap (20% of annual grant)	$395,804
Public Services Cap (15% of annual grant)	$296,853
Available for Other Activities (65% of annual grant)	$1,286,362
TOTAL Allocation	**$1,979,019**
TOTAL Uncommitted Prior Year(s) CDBG Funds*	$421,191
TOTAL Available for Funding	**$2,400,210**

**** The City may utilize prior-year uncommitted funds towards non-public service activities***

Our independent consultant, Avant-Garde Inc., conducted the application review process and the preliminary draft of the CDBG, HOME and ESG program summaries

and funding recommendations are shown in Attachment 1.

ALTERNATIVES

The Council has the following alternatives:

1. Conduct a public hearing providing the public with an opportunity to comment on the proposed Consolidated Plan and the FY 2023/24 Annual Action Plan and provide an opportunity for City Council to review the project allocations. *Staff recommends this alternative as it will allow the grant funds to be allocated and approved within HUDs requirements.*

2. Do Not conduct a public hearing providing the public with an opportunity to comment on the proposed Consolidated Plan and the FY 2023/24 Annual Action Plan, and NOT provide an opportunity for City Council to review the project allocations. *Staff does not recommend this alternative as it will not allow the grant funds to be allocated and approved within HUDs requirements.*

FISCAL IMPACT

Expenses for these programs are reimbursed by the Federal grants. The ESG program requires a 100% match that will be met by the City's ESG subrecipients. Based on the recommended actions, there is no impact to the General Fund.

NOTIFICATION

Notice of this meeting was published in the Press-Enterprise and La Prensa newspapers on Friday, March 17, 2023. Additional notification was available through the City's website and directly e-mailed to those who applied for funding and are on our interest list.

Executive Summary

ES-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)

1. Introduction

Moreno Valley is located approximately 52 miles east of downtown Los Angeles and 42 miles west of Palm Springs. The City is located near the eastern edge of the Los Angeles metropolitan area. Moreno Valley is situated along two major freeways. The Moreno Valley Freeway (State Route 60) connects directly to downtown Los Angeles and the regional freeway system. State Route 60 connects to Orange County via the Riverside Freeway (State Route 91). To the east, State Route 60 connects with Interstate 10, running to Palm Springs, Phoenix, and beyond. Interstate 215 runs by the westerly city limits and is an important north-south link from San Diego through western Riverside and San Bernardino counties and beyond.

As a recipient of Community Development Block Grant (CDBG), HOME Investment Partnership (HOME), and Emergency Solutions Grant (ESG) funds Moreno Valley is required to prepare a Consolidated Plan. The Consolidated Plan serves four functions. These functions include the development of a planning document that encourages citizen participation, a consolidated application to HUD, a strategy to be followed in carrying out HUD programs, and an action plan that provides a basis for assessing performance. The Consolidated Plan outlines the community's needs, the strategies for addressing those needs, citizen participation and a one-year action plan, which is subsequently updated annually. The Consolidated Plan is a five-year community development plan covering the period July 1, 2023 to June 30, 2028.

2. Summary of the objectives and outcomes identified in the Plan Needs Assessment Overview

The overall goals of the CDBG, HOME and ESG Programs, as included in the Consolidated Plan, are to develop viable urban communities by providing (1) decent housing, (2) a suitable living environment, and (3) expanded economic opportunities principally for low and moderate-income persons.

Decent housing includes assisting homeless persons, retention of the affordable housing stock, increasing the availability of permanent housing in standard condition and affordable cost to low-income and moderate-income persons.

A suitable living environment includes improving the safety and livability of neighborhoods, increasing access to quality public and private facilities and services, and the revitalization of deteriorating or deteriorated neighborhoods.

Expanded economic opportunities include job creation and retention, as well as establishment, stabilization, and expansion of small businesses. The primary means towards this end is to extend and strengthen partnerships among all levels of government and the private sector, including for-profit and non-profit organizations, in the production and operation of affordable housing.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

3. Evaluation of past performance

The description of past performance is based on the most recent available data which includes the period from FY 2018-2019 through FY 2021-2022. The last year (FY 2022-2023) of the 2018-2023 Consolidated Plan cycle is still ongoing at the time of preparation of this plan, therefore that data is not included in this evaluation. However, the City anticipates meeting most of its accomplishments outlined in its 2018-2023 Consolidated Plan at the end of FY 2022-2023.

Below is a summary of the goals outlined in the 2018-2023 Consolidated Plan followed by performance through FY 21-22.

Achieve Fair Housing for All

- 5-Yr Goal: Provide fair housing and landlord/tenant rights and responsibilities counseling services to 23,500 households.
- Cumulative Actual at End of FY 21-22: The City assisted 19,614 households.

Address Homelessness:

- 5-Yr Goal: To assist 800 homeless persons and persons threatened with homelessness.
- Cumulative Actual at End of FY 21-22: The City provided homelessness prevention services to 66 to persons.

Improve the condition of existing housing stock:

- 5-Yr Goal: Construct 80 new affordable rental units; Rehabilitate 16 rental units; rehabilitate 90 homeowner housing.
- Cumulative Actual at End of FY 21-22: The City constructed 80 new affordable rental units; rehabilitated 4 rental units and rehabilitated 137 homeowner housing units.

Improve the well-being of persons:

- 5-Yr Goal: Assist 290,000 persons.
- Cumulative Actual at End of FY 21-22: The City has assisted 393,324 individuals through public services.

Promote Economic Development Activities:

- 5-Yr Goal: To create or retain 100 low-to moderate income jobs and assist 390 businesses.
- Cumulative Actual at End of FY 21-22: The City has helped retained or create 50 jobs and assisted 426 businesses.

Public Facilities and Infrastructures:

- 5-Yr Goal: To assist 55,000 persons through public facility/improvement projects aimed at improving ADA standards and City streets.

- Cumulative Actual at End of FY 21-22: The City carried out public facilities and infrastructure improvement projects that benefited 578,458 cumulative persons.

4. Summary of citizen participation process and consultation process

Citizen participation for the development of the Consolidated Plan and Annual Action Plan was accomplished through a series of public notices, announcements, public meetings, and public hearings. The City staff also distributed a survey to residents and non-profit organizations to solicit input on the community's needs. Public hearings were conducted to determine priority needs, review funding applications, and approve the 5-Year 2023-2028 Consolidated Plan and the FY 2023-2024 Annual Action Plan. In addition, the public was provided a 30-day period to review and comment on the Draft Consolidated Plan/Annual Action Plan. The citizen participation outreach effort is described in greater detail in part PR-15 Citizen Participation.

5. Summary of public comments

TBD, pending close of public hearing.

6. Summary of comments or views not accepted and the reasons for not accepting them

TBD, pending close of public hearing.

7. Summary

The City of Moreno Valley has undertaken diligent and good faith efforts in outreaching to all segments of the community that may benefit from the CDBG, HOME and ESG Programs.

PR-10 Consultation – 91.100, 91.110, 91.200(b), 91.300(b), 91.215(l) and 91.315(l)

1. Introduction

This part describes the consultation that was completed by the City during the development of the Consolidated Plan. City staff consistently work closely with outside agencies in both the public and private sectors. Through working with nonprofit agencies and other public institutions, the City hopes to achieve all the goals set forth in the Consolidated Plan.

Provide a concise summary of the jurisdiction's activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health, and service agencies (91.215(l)).

The City enjoys a cooperative relationship with surrounding jurisdictions and agencies, as well as nonprofit organizations. The City meets on a regular basis with the Riverside County Department of Public Social Services as part of the Continuum of Care process. The City utilizes a variety of nonprofit organizations to address community needs, such as homelessness, special needs, and fair housing. In addition, the City also works with state and federal agencies through several grant programs to facilitate services and programs, which meet housing and safety needs in the community.

As a result of cooperating with surrounding jurisdictions, the City can address a wide variety of community needs including housing rehabilitation, housing programs, public services, and public safety. To facilitate the coordination and cooperation, the City will continue to work with these entities though meetings, correspondence, and joint endeavors. The City has been and will continue to be supportive of direct applications for funds from housing providers as well as local Community Housing and Development Organizations (CHDO's) and other entities. In addition, the City will continue to support funding applications for local nonprofit service providers.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness.

The City participates in the Riverside County Continuum of Care (CoC). The CoC consists of local government agencies as well as non-profit agencies that work together to address homeless issues in the region. Funding is provided to local public and non-profit agencies to provide homeless services and shelter. Monthly and quarterly meetings provide an opportunity for networking and working towards the common goal. In addition, the City continues to locally participate in the Riverside County Homeless Count. Participating in these counts provides staff with a firsthand knowledge of homeless needs through direct interaction with potential recipients of homeless services. Data from the homeless count is utilized to determine homeless service needs and levels in the City.

Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS.

The City staff serves as a representative on the Board of Governance for the Continuum of Care (CoC). The Board provides governance and strategic oversight to the CoC, monitors the established goals of the 10 Year Plan to End Homelessness, and serves as the planning body for the County's submission of the Riverside County Consolidated Application for HUD funds such as ESG. City staff has historically participated in rating grantee applications for ESG funding and have been instrumental in helping making determinations for the allocation of funds. The CoC developed a Homeless Management Information System (HMIS) working group to develop policies and procedures for the administration of the HMIS in the region. The working group has been instrumental in gaining compliance from HMIS users throughout the region. City staff attends the regional HMIS conference hosted by the CoC and Riverside County Department of Public Social Services

2. Describe Agencies, groups, organizations, and others who participated in the process and describe the jurisdictions consultations with housing, social service agencies and other entities.

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(l)).

The City coordinated efforts and consulted with several public entities including local governmental agencies such as the relevant County Departments, public housing organizations, and State government departments during the development of the Consolidated Plan. The Riverside County Public Housing Authority provided information regarding public and assisted housing in Moreno Valley. Entities were engaged via surveys, email and follow up correspondence, public meetings, and public hearings.

Needs Assessment

NA-05 Overview

Needs Assessment Overview

This section assesses the housing needs within Moreno Valley by analyzing various demographic and economic indicators. To understand the needs of the community, the broad trends in population, income, and household demographics must be analyzed first. Each of the sections that follow looks closely at specific housing factors and how they relate to the city's population.

Data Note: Many fields in this document are populated automatically by the IDIS system. To provide the most accurate and up-to-date analysis, additional data sources are often used.

NA-10 Housing Needs Assessment - 24 CFR 91.205 (a, b, c)

Summary of Housing Needs

The housing needs of a community are, like all items in the market economy, a product of supply and demand. However, determining the factors that impact supply and demand is much more complicated than building one house for one household. Changes in population, household size, availability of rental housing, income, and the condition of a property all work to shift the community's housing needs.

Overall, the city has experienced economic growth, but the growth has been relatively small. There is a need for affordable housing in Moreno Valley that meets the needs of the community. Not only will this likely require additional units, but the type of units must be taken into consideration. The quality of the city's housing stock, which includes age, and the condition of the structure can contribute to housing problems, including housing affordability. The specific qualities needed by the community will be addressed throughout this document.

Demographics

Moreno Valley, like many communities throughout the country, has seen its population grow in recent years. Between 2010 and 2021, Moreno Valley's population grew by 10%, which is over twice the statewide growth rate of 4.8%. During the same period, the number of households in the city increased by 6%. When the population grows more quickly than the number of households it indicates an increase in average household size. Larger households may be overcrowded or face other housing problems. This may indicate a housing market that is not meeting the needs of the community.

According to US Census data, the median household income increased from $56,507 to $73,635 (+23%) between 2010 and 2021. However, that figure does not reflect the true change of purchasing power in the community because it is not adjusted for inflation (real dollars). When inflation is factored in, the actual increase in purchasing power is 1.6%.[1] Income growth is a positive indicator, but if housing costs have increased by more than 1.6% in real dollars then it is likely the number of cost burdened households is increasing. The change in housing costs is addressed later in this document in the Market Analysis.

Demographics	Base Year: 2010	Most Recent Year: 2021	% Change
Population	187,428	208,371	10%
Households	49,746	53,135	6%
Median Income	$56,507	$73,635	23%

Table 5 - Housing Needs Assessment Demographics

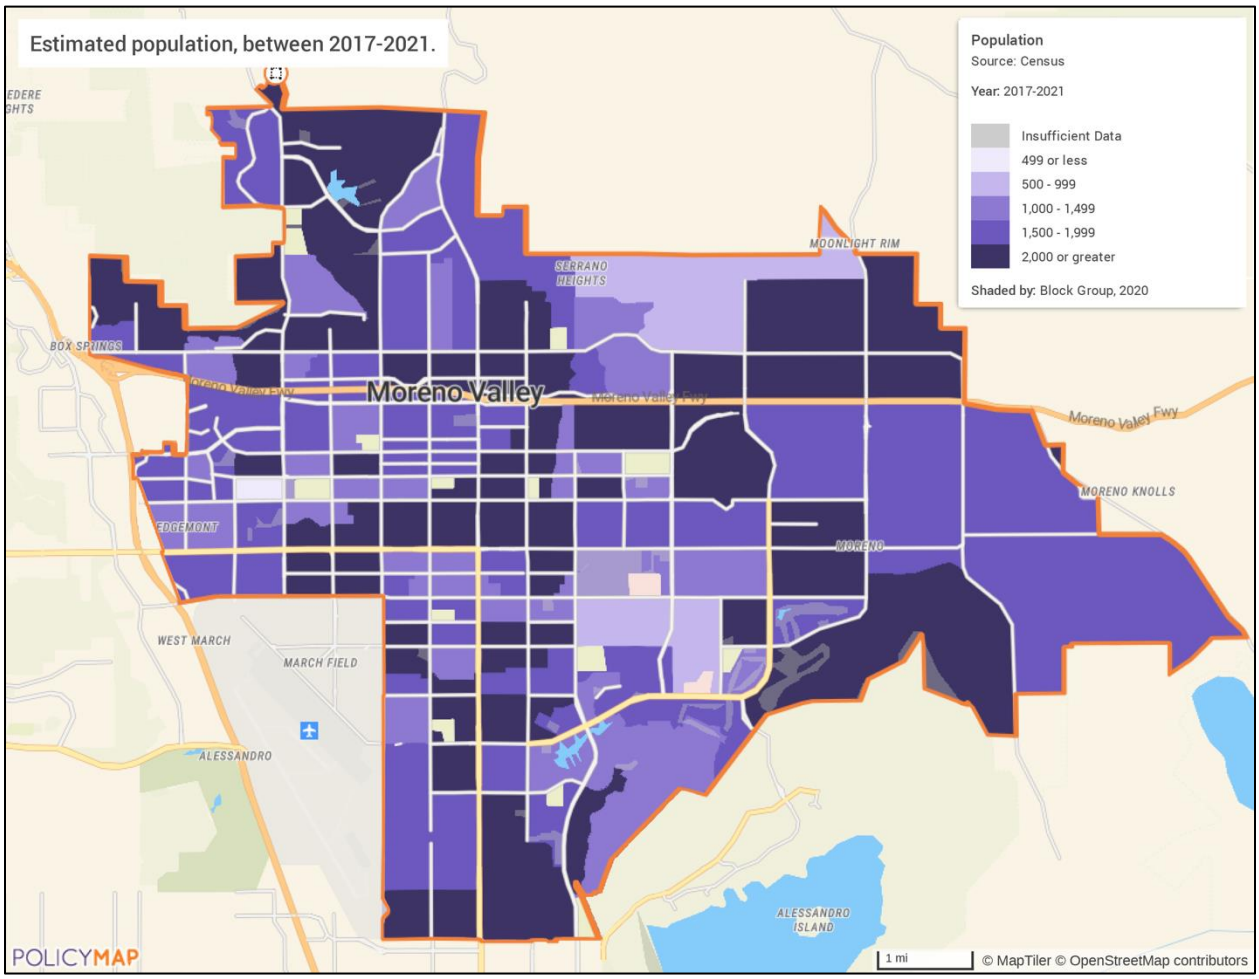
Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

The maps below display the geographic distribution of demographic trends in the city across a few key indicators, including population change, median household income, and poverty. The block groups shaded with lighter colors have fewer people, while darker block groups have a higher population.

Population

There is a fairly even distribution of the total population throughout the city with notably higher density in the smaller block groups that are zoned primarily residential (whether Suburban Residential, Multifamily, Residential 2 DU/AC). There are a few tracts in the city with relatively low populations, under 500 people. The lower population of some of these groups are due to large lot residential zoning in the northern parts of the city.

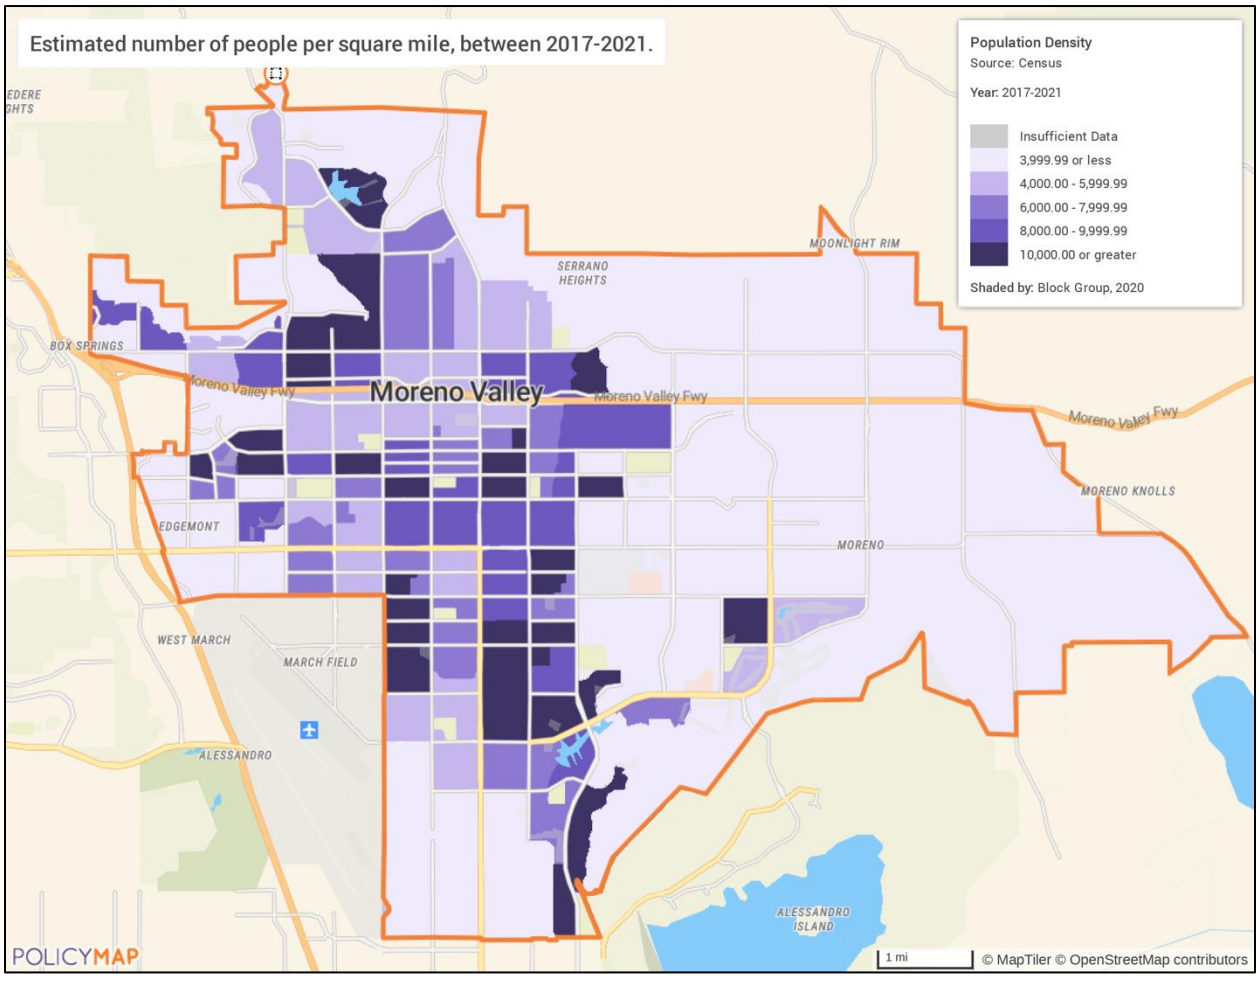


Source: 2017-2021 American Community Survey 5-Year Estimates

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Population Density

Block groups with the highest density of population reside in the central and western parts of the city, with a higher density level west and northwest of the downtown center. Many of the city's office space, commercial shopping, and mixed-use buildings are in these block groups.



Source: 2017-2021 American Community Survey 5-Year Estimates

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Median Household Income

As noted earlier, the median household income has grown in the city by 23% to over $70,000 (though purchasing power has only increased by an estimated 1.6%). High income households are heavily concentrated in the same tracts that are more densely populated. Areas on the northern, eastern, and southern edges of the city have much higher median household incomes—over $100,000, while just a few blocks away the median household income can be less than half that amount.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Poverty

The map below displays the percentage of the population who live below the poverty level by census tract. Unsurprisingly, areas that have higher median income tend to have lower levels of poverty. The census tracts on the northern, eastern, and southern edges of the city have poverty rates below 10%, while tracts in the central and eastern areas of the city have rates above 20%.

Table 6 - Total Households Table

Data Source: 2015-2019 CHAS

Data Source Comments: HAMFI stands for HUD Area Median Family Income.

In addition to the median household income, an important economic indicator is the distribution of wealth in the community. The above table shows family dynamics and income in the jurisdiction using data from the 2015-2019 Comprehensive Housing Affordability Study (CHAS). Median numbers can show growth and change, but alone they can provide an inaccurate view. By looking at the number of households within different income groups, a clearer picture can be found. According to 2015-2019 CHAS data, Moreno Valley has approximately 50,885 households. Of this number of households, 23,000 (45%) have low/moderate incomes (LMI), meaning they earn 0-80% of the area median income (AMI). The percentage of the LMI households was similar in the 2006-2010 ACS (43.3%).

In Moreno Valley, small families are more prevalent than large families, like the household trends of the nation. There appears to be a correlation between household type and income. Small family households are more common among households earning over 80% than those earning less and are more likely to earn 80% AMI or more than large family households. The most common housing types associated with earning less than the AMI are large households, households with a member between 62 and 74 years old, and households with children 6 years or younger. These factors are all related, and it is likely that many large households have children or are multigenerational with elderly household members.

Table 7 – Housing Problems Table

Alternate Data Source: 2015-2019 CHAS

Housing Needs Summary

The table above provides information on housing problems in the city. Using 2015-2019 CHAS data, it provides the numbers of households experiencing each category of housing problem broken down by income ranges (up to 100% AMI) and owner/renter status. As defined by HUD in the Comprehensive Housing Affordability Strategy (CHAS) data, housing problems include:

- Units with physical defects (lacking complete kitchen or bathroom)
- Overcrowded conditions (housing units with more than one person per room)
- Housing cost burden (including utilities) exceeding 30% of gross income
- Severe housing cost burden (including utilities) exceeding 50% of gross income

Cost burden is by far the largest housing problem facing the city and is a common trend in many communities across the state and nation today. According to the 2015-2019 CHAS data there were 4,875 renters in the 0% to 100% AMI range spending more than 50% of their income on housing costs (100% AMI is the area median income) and an additional 4,635 spending 30-50% of their income on housing costs. This data also shows there were 3,340 homeowner households in the 0% to 100% AMI range spending more than 50% of their income on housing costs, and another 4,160 spending over 30% of their income on housing costs. These figures do not include households that earned more than 100% AMI, so the actual number of cost burdened households may be higher than the number shown in this table.

Housing problems in the city impact renter households more significantly than owner households. In general, renter-households experience substandard housing, overcrowding, and severe cost burdens to

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

a greater extent than owner- households. Of these housing problems, the most common in Moreno Valley is housing cost burden. Nearly 4,500 low/mod income households are cost burdened and 7,885 are severely cost burdened.

2. Housing Problems 2 (Households with one or more Severe Housing Problems: Lacks kitchen or complete plumbing, severe overcrowding, severe cost burden)

Table 8 – Housing Problems 2

Alternate Data Source: 2015-2019 CHAS

Severe Housing Problems

The data table above shows the number of households between 0% and 100% AMI that have one or more severe housing problems. Severe housing problems include lack of kitchen or complete plumbing, severe overcrowding, and severe cost burden. Severe housing problems are significantly less common than standard housing problems, but they are still present in the city. Low-income households 0-50% are most likely to have a severe housing problem. In total, approximately 21,000 households in the 0-100% AMI range have a severe housing problem.

Table 9 – Cost Burden > 30%

Alternate Data Source: 2015-2019 CHAS

The table above displays 2015-2019 CHAS data on cost-burdened households with income that is 0% to 80%. Households are considered cost burdened if they spend over 30% of their income on housing costs. There are nearly 4,500 households that are cost burdened in the community and there appears to be a relationship between housing type and cost burden. Elderly households show the greatest difference between overall population and extremely low-income population. Despite making up only 11% of the LMI population they make up 45% of the extremely low-income population. This is true for both homeowners and renters.

Housing Cost Burdened

The following maps below display the percentage of the population who are cost-burdened by census tract using data from the 2017-2021 American Community Survey 5-Year Estimates. Despite higher median household incomes in the northern, western, and southern edges of the city, there are still high rates of cost burden, sometimes over 40% for homeowners and over 80% for renters.

Severe Cost Burden

The table above displays 2015-2019 CHAS data on cost-burdened households with income that is 0% to 80%. Households are considered severely cost burdened if they spend over 50% of their income on housing costs. There are no household types that are disproportionately likely to be extremely low income, but the sheer number of households with a severe cost burden is worth noting. There are nearly 8,000 households with a severe cost burden, which is 43% more than the number of households with just a standard cost burden. These 8,000 households are at the greatest risk of housing insecurity and homelessness, particularly renters who may face eviction if unexpected expenses arise.

Alternate Data Source: 2015-2019 CHAS

Overcrowding

HUD defines an overcrowded household as one having from 1.01 to 1.50 occupants per room and a severely overcrowded household as one with more than 1.50 occupants per room. Overcrowding is less common than cost burden issues, but it is still present in nearly 4,000 households. Renters are more likely to have overcrowding issues, as well as households in the 50-80% AMI range. This supports the earlier data that showed an increase in housing size over the last decade.

The following table shows the number of overcrowded households with children present by tenure and income level. The larger number of households identified here means that overcrowding is not an issue limited to LMI households but is also present in households earning over 100% AMI.

Table 12 – Crowding Information – 2/2

Alternate Data Source Name: 2015-2019 CHAS

Describe the number and type of single person households in need of housing assistance.

According to the 2021 American Community Survey (ACS), there are 6,176 single person households in the city. Of those households, 3,427 are homeowners and 2,749 are renters. Over 52% of single person households are 35 to 64 years old. Householders 65 years and over make up 32% of single person households. These households are the group primarily in need of housing assistance due to the higher poverty rates and fixed incomes.

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault, and stalking.

Persons with Disabilities

According to ACS data, 20,423 residents of Moreno Valley have a disability, making up 9.8% of the city's population. The most common disability is ambulatory difficulty, meaning the person has severe difficulty walking or climbing stairs. Over 9,800 persons report this difficulty. Approximately 6,800 of the disabled residents are over the age of 65. These seniors may need in home supportive services and eventually, as disabilities worsen, may need to relocate to one of the city's assisted living facilities.

As mentioned above, this population is most in need of financial housing assistance as well.

An exact count of those in need of housing assistance is difficult to determine but it is likely many residents with a disability either need housing assistance through financial support or access to homes that meet their needs. With over 20,000 households with one or more disabled person, it is reasonable to assume that such households also experience housing problems to the same or greater extent as households with no disabled members do. That is, problems such as cost burden and severe cost burden are also problems confronting households with a disabled member. Most homes require expensive modifications to accommodate the needs of residents.

Victims of Domestic Violence

According to the 2022 County of Riverside Point-in-Time Homeless Count, 95 persons experiencing homelessness reported being a victim of domestic violence. Statistics compiled by the California Department of Justice found that in 2021, there were 654 calls for assistance in Moreno Valley related

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

to domestic violence. Most of these instances (73%) did not involve a weapon. The FBI reported that 19 rapes were reported to law enforcement in Moreno Valley in 2019. Sexual assault and other intimate crimes are underreported. The National Coalition Against Domestic Violence states that only 25% of physical assaults, 20% of rapes, and 50% of stalking cases are reported to the police. Based on this information, it is likely that there are many more victims of domestic violence, dating violence, sexual assault and stalking that have not reported to law enforcement. It is imperative that survivors have access to housing and economic support to escape dangerous situations. Emergency shelter as well as counseling and other services often are needed by the victims of domestic violence, dating violence, sexual assault, and stalking.

What are the most common housing problems?

The most common housing problem identified in Moreno Valley is housing cost burden. According to the 2015-2019 CHAS data, over 12,350 low/mod income households are cost burdened (>30%) or severely cost burdened (>50%). Based on this data, among low- and moderate-income renters, 13% are cost burdened and 40% are severely cost burdened. Among all low- and moderate-income owners, 27% are cost burdened and another 27% are severely cost burdened. Low- and moderate-income households are especially adversely impacted by severe housing costs. This financial burden puts significant pressure on households and increases the likelihood of less-than-optimal living arrangements and risk of homelessness.

Are any populations/household types more affected than others by these problems?

Overall, household income is correlated with the likelihood that households are impacted by housing problems, particularly for renters. Residents with lower incomes have increased rates of cost burden and other substandard living conditions. Renters also experience crowding to a greater extent than owners. Elderly residents have a higher cost burden rate than other household types.

Additionally, residents with disabilities and those experiencing homelessness are particularly vulnerable to housing problems. A discussion of the prevalence of housing problems by race and ethnicity is discussed later in NA-15 to NA-30.

Describe the characteristics and needs of Low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance.

The city has almost 1,700 extremely low-income renters in large, related families who are severely cost burdened. These families face difficulties in meeting their monthly housing obligations and could lose their housing because of financial constraints. Extremely low-income households (those at or below 30% of the area median income) spending more than 50% of their income for housing costs are particularly

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

vulnerable to an unexpected financial or personal crisis which could lead to homelessness. According to 2015-2019 CHAS data, 3,440 households fit these criteria and are at imminent risk of homelessness.

Single-parent households with children are the most vulnerable. They have a greater need for affordable housing, accessible childcare, health care, and other supportive services. Because of their lower income and higher living expenses, very low-income single-parent households are at imminent risk of becoming homeless. The major needs for these households are money management and budget counseling along with job training and affordable childcare. Formerly homeless families who are receiving rapid re-housing and are nearing the termination of that assistance are also in need of these same supportive services.

If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates:

Not applicable

Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness.

Instability and increased risk of homelessness are associated with a lack of financial resources, temporarily living in the home of another, imminent eviction, or living in a motel. Death of a family member, medical expenses, or other unanticipated emergency expenditure, such as a major car repair, are particularly burdensome for families with low or fixed incomes that do not have the resources to pay for unanticipated costs. Extremely low-income households with a severe housing cost burden are most likely to lose their housing in the event of these unexpected expenses. According to the 2022 Moreno Valley Point In Time Count, 43% of unsheltered homeless persons reported that their reason for homelessness was attributed to family disruption. Some examples of this include death in the family, divorce, or violence. Additionally, 12% of the population attributed their homelessness strictly to lack of income or unemployment.

Income stagnation combined with rising rents increases the risk of homelessness. While efforts to produce affordable housing are important to reducing disproportionate housing needs, it also is important to find ways to increase household incomes through jobs with higher wages and other economic development strategies.

NA-15 Disproportionately Greater Need: Housing Problems – 91.205 (b)(2)

Introduction

A review of Housing Assessment data provided by HUD provides information that can be analyzed and used to determine any racial or ethnic groups that may have a proportionally higher housing need than other ethnic groups in the community. HUD has determined that a disproportionally higher need exists when the members of a racial or ethnic group at a given income level experience housing problems at a greater rate (10 percent or more) than the income level as a whole. Identifying and understanding any disproportionately greater needs due to housing problems is vital to the analysis of past programs and should help guide future programs to address disparities between groups in the community.

Discussion

Extremely Low-Income (0-30% AMI)
Jurisdiction as a whole: 87.1%

In the extremely low-income group, there is one racial or ethnic group that is disproportionately impacted by housing problems. According to the available data, every American Indian or Alaska Native household in this group has a housing problem. This discrepancy should be analyzed but due to the low number of estimated households in this group (30 households), there is potentially a high margin of error in this estimate.

Very Low-Income (30-50% AMI)
Jurisdiction as a whole: 86.9%

The overall rate of housing problems for very low-income households is very similar to extremely low-income households. As with the above group, there is one racial or ethnic group that is disproportionately impacted. Again, every American Indian or Alaska Native household reports a housing problem in this income group and the estimated population size is small (30 households).

Low-Income (50-80% AMI)
Jurisdiction as a whole: 73.9%

The rate of housing problems shows a significant decrease for low-income households when compared to lower income groups, but there are still many households with housing problems. In this income group there are three racial or ethnic groups that are disproportionately impacted. Approximately 87%

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

of Black or African American households, 86.2% of American Indian or Alaska Native households, and 100% of Pacific Islander households report at least one housing problem. The largest group is Black or African American households and includes over 2,000 households, making up approximately 20% of the total population of this income group.

Moderate Income (80-100% AMI)
Jurisdiction as a whole: 42.2%

The largest change in the prevalence in housing problems is between low- and moderate-income groups. There are no groups disproportionately impacted by housing problems among moderate income households.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

NA-20 Disproportionately Greater Need: Severe Housing Problems – 91.205 (b)(2)

Introduction

A review of Housing Assessment data provided by HUD provides information that can be analyzed and used to determine any racial or ethnic groups that may have a proportionally higher housing need than other ethnic groups in the community. HUD has determined that a proportionally higher need exists when the percentage of persons in each category is at least 10 percentage points higher than the percentage of persons in the category. Identifying and understanding any disproportionately greater needs due to severe housing problems is vital to the analysis of past programs and should help guide future programs to address disparities among groups in the community.

Discussion

Extremely Low-Income (0-30% AMI)
Jurisdiction as a whole: 76.9%.

In the extremely low-income group approximately 4,670 households have a severe housing problem, making up over 75% of the population. However, there are no racial or ethnic groups that are disproportionately impacted by severe housing problems.

Very Low-Income (30-50% AMI)
Jurisdiction as a whole: 63.9%

The overall rate of housing problems for very low-income households is approximately 13% lower than for extremely low-income households. Similar to the housing problem data in NA-20, there is one group that is disproportionately impacted by severe housing problems in this income group. Every American Indian or Alaska Native household reports a severe housing problem in this income group.

Low-Income (50-80% AMI)
Jurisdiction as a whole: 27.3%

The rate of severe housing problems drops significantly for low-income households when compared to lower income groups. In Moreno Valley, an income level in this group appears to be a threshold level where households can live without severe housing problems, though housing problems are still prevalent (see NA-15). Despite the improvement from prior income groups, there are two racial or

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

ethnic groups that are disproportionately impacted. According to the available estimates, approximately 83.3% of American Indian or Alaska Native households and 60% of Pacific Islander households have a severe housing problem. The total number of households in these two groups is relatively small but this disparity still warrants consideration.

Moderate Income (80-100% AMI)
Jurisdiction as a whole: 13.2%

Moderate income households have the lowest rate of severe housing problems. There is one group that is disproportionately impacted, approximately 27.5% of Hispanic households have a severe housing problem.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

NA-25 Disproportionately Greater Need: Housing Cost Burdens – 91.205 (b)(2)

Introduction

The following section analyzes the prevalence of a specific housing problem, cost burden. A household is considered to have a cost burden when they pay more than 30% of their income on housing costs. HUD has determined that a proportionally higher need exists when the percentage of persons in each category is at least 10 percentage points higher than the percentage of persons in the category. Identifying and understanding any disproportionately greater needs due to severe housing problems is vital to the analysis of past programs and should help guide future programs to address disparities between groups in the community.

Housing Cost Burden

Housing Cost Burden	<=30%	30-50%	>50%	No / negative income (not computed)
Jurisdiction as a whole	29,055	12,118	9,315	395
White	7,485	1,885	1,405	70
Black / African American	5,145	2,545	2,555	125
Asian	1,920	590	550	70
American Indian, Alaska Native	30	69	30	0
Pacific Islander	55	14	15	0
Hispanic	14,005	6,720	4,560	115

Table 21 – Greater Need: Housing Cost Burdens AMI

Alternate Data Source: 2015-2019 CHAS

Discussion:

For the purposes of this discussion, "Cost Burden" is broken into three separate categories. Households that spend between 30% and 50% have a *Standard Cost Burden,* households that spend more than 50% of their income on housing costs have *Severe Cost Burden,* and these two groups combined is the *Total Cost Burden.* By separating the data into these groups, it is possible to identify the degree of need of any groups that are disproportionately impacted by cost burden.

Standard Cost Burden

Jurisdiction as a whole: 24%

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

In Moreno Valley, there are over 12,000 households with a standard cost burden, making up nearly one-quarter of all households. There is only one group that is disproportionately impacted, approximately 53.4% of American Indian and Alaska Native households have a standard cost burden.

Severe Cost Burden
Jurisdiction as a whole: 18.5%

Severely cost burdened households are at a high risk of housing insecurity and experiencing homelessness. A minor financial problem could lead to default and/or eviction. There are currently nearly 10,000 households with a severe cost burden. There are no groups with a disproportionate impact.

Total Cost Burden
Jurisdiction as a whole: 42.5%

In total, over 20,000 households are cost burdened in the community. American Indian or Alaska Native households have a disproportionate impact, over 75% of these households have a cost burden. The actual prevalence of households who face financial pressure due to housing costs is actually higher because these figures do not include households that have zero or negative income.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

NA-30 Disproportionately Greater Need: Discussion – 91.205(b)(2)

Are there any Income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

The available data identified American Indian and Alaska Native households as the group that is most frequently impacted by disproportionate need throughout multiple income groups. This population is relatively small but the frequency with which they appear points to a potential housing need to be addressed. Additionally, low-income Pacific Islander households reported disproportionately greater need for both housing problems, severe housing problems, and cost burden. Per the analysis in NA-25, the most common household problem for all racial or ethnic groups is cost burden.

Disproportionate Housing Problems:

- Extremely Low Income: American Indian or Alaska Native
- Very Low Income: American Indian or Alaska Native
- Low Income: Black or African American, American Indian or Alaska Native, Pacific Islander
- Moderate Income: None

Disproportionate Severe Housing Problems:

- Extremely Low Income: None
- Very Low Income: American Indian or Alaska Native
- Low Income: American Indian or Alaska Native, Pacific Islander
- Moderate Income: Hispanic

Standard Cost Burden: American Indian or Alaska Native

Extreme Cost Burden: None

Total Cost Burden: American Indian or Alaska Native

If they have needs not identified above, what are those needs?

No additional needs were identified that disproportionately impact households based on race or ethnicity. Household income is the primary indicator for both housing and non-housing. Additional information can be found throughout the document, including public and assisted housing needs by race or ethnicity in NA-35 and disparities in housing locations and income in MA-50.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

There are some areas that have a concentration of racial or ethnic groups. There are multiple tracts that have a concentration of Black, non-Hispanic residents. One area encompasses multiple tracts on the northwest side of the city and one area is in the southern tip. There are a few tracts that have a concentration of multiracial, Hispanic residents. There are two general areas with a concentration of this

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

population. One area encompasses tracts on the northcentral part of the city and one area is in the south. Moreno Valley has also multiple census tracts that have a concentration of Hispanic residents. The southwest quadrant of the city has a larger Hispanic population relative to other parts of the city. A more detailed analysis of the geographic distribution of different racial and ethnic groups and income levels can be found in MA-50.

NA-35 Public Housing – 91.205(b)

Introduction

The City of Moreno Valley does not have a designated Public Housing Authority. Therefore, the city does not own or manage any housing directly or operate any voucher programs. However, the Housing Authority of the County of Riverside (HACR) serves the entire county, including residents of Moreno Valley, through the administration of voucher programs and public housing units. Additionally, the city has invested housing funds into the construction and rehabilitation of affordable multi-family rental projects in partnership with developers throughout the city. In return, the project owners provide discounted, below-market rents to income-qualified tenants during the term of their agreements with the city. Units in developments priced at a "below market rate" are made affordable to varied incomes ranging from very low to moderate income households (30% -120% AMI). Each project has a specific number of units reserved at below market rates, as well as specific income requirements for the units. The city does not own or manage any housing directly.

Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units.

Not applicable. The City of Moreno Valley does not own or manage any public housing directly.

Most immediate needs of residents of Public Housing and Housing Choice voucher holders.

Public housing units are not located in the City of Moreno Valley. The HACR administers Housing Choice Vouchers to residents of the city and the most immediate need for these residents is continued rental assistance. Vouchers enable residents to remain stably housed while also being able to use their limited financial resources to meet other basic needs such as food security.

How do these needs compare to the housing needs of the population at large.

Moreno Valley's extremely low-income renters have needs similar to voucher holders: food insecurity and other basic human needs. However, many extremely low-income renters do not receive Housing Choice Vouchers and therefore, residents that do receive rental assistance through the HCV program tend to have similar but more severe needs.

NA-40 Homeless Needs Assessment – 91.205(c)

Introduction

Homelessness is an incredibly complex issue that most communities across the country are struggling to address. The major reason that homelessness is difficult to address is that it has many overlapping and interrelated causes and variables. Homelessness is impacted by multiple factors and is typically caused by the convergence of many events and conditions. Homelessness can be an economic problem caused by unemployment or underemployment, lack of affordable housing options, and/or poverty. Homelessness can also be a health issue because many homeless persons struggle with mental illness, physical disabilities, HIV, substance abuse, or a combination of health factors. Another way to view homelessness is as a social problem, caused by factors such as domestic violence, educational attainment, and racism. Homelessness can be caused by all these issues, and they are often interrelated. Due to this complexity, fighting homelessness requires a collaborative and community-based approach.

The Stewart B. McKinney Homeless Assistance Act defined “homeless” or “homeless person” as an individual who lacks a fixed, regular, and adequate night-time residence; and who has a primary night-time residence that is:

- A supervised publicly or privately-operated shelter designed to provide temporary living accommodations (including welfare hotels, congregate shelters, and transitional housing for the mentally ill).
- An institution that provides a temporary residence for individuals intended to be institutionalized; or
- A public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

Moreno Valley is part of the Riverside County Continuum of Care, which was formed in 2020.

The Continuum of Care oversees the community's plan to organize and deliver supportive social services, including housing options, which meet the specific needs of homeless individuals and families. Ultimately, the goal of the Continuum is to move homeless people toward stable housing and maximum self-sufficiency.

According to the 2022 Moreno Valley Point in Time (PIT) Count, 87 persons are experiencing homelessness during a single night in the city. Most persons experiencing homelessness are unsheltered. The major challenges and barriers of these persons include substance abuse (44%), chronic health issues (24%), traumatic brain injury (22%), and PTSD (22%). These populations need intensive supportive services in addition to housing. Of the persons counted in the 2022 Count, 43% were experiencing homelessness for the first time. Homelessness continues to be a problem facing the city as additional households are falling into homelessness daily.

Homeless Needs Assessment

Population	Estimate the # of persons experiencing homelessness on a given night		Estimate the # experiencing homelessness each year	Estimate the # becoming homeless each year	Estimate the # exiting homelessness each year	Estimate the # of days persons experience homelessness
	Sheltered	Unsheltered				
Persons in Households with Adult(s) and Child(ren)	0	0	31	0	9	185
Persons in Households with Only Children	0	0	5	0	4	59
Persons in Households with Only Adults	10	77	105	0	39	195

Table 27 - Homeless Needs Assessment

Alternate Data Source Name: 2022 Moreno Valley PIT Count; Riverside County Continuum of Care HMIS
Data Source Comments: Population details were only provided for unsheltered persons

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth).

HMIS data from the homeless projects located in Moreno Valley that patriciate in the data system was used to estimate the number of persons experiencing homelessness and exiting homelessness and number of days those persons experienced homelessness. HMIS data is not available on the number of persons becoming homeless each year. Approximately 39 adult only households, 4 children only households, and 9 households with both adults and children exit homelessness each year. On average, chronically homeless individuals, and households experience homelessness for 201 days. Adult only households spend an average of 195 days homeless and households with adults and children spend 185 days homeless.

Additional information on each homeless population type is provided below:

Chronically Homeless – Residents are considered to be experiencing chronic homelessness if they have a disabling condition and have been consecutively experiencing homelessness for one year or more or had four separate episodes of homelessness in the last three years, totaling twelve months. In 2022, 30 people experiencing homelessness who were counted on the night of the PIT Count experienced chronic homelessness. Approximately 39% of those experiencing unsheltered homelessness were also chronically homeless. These are the most vulnerable residents experiencing homelessness.

Families with Children – Households that include at least one adult and one person under the age of 18 are considered as a family with children. Children raised in households that experience homelessness are likely to experience housing instability into adulthood. In the 2022 PIT Count, no families with children were counted. HMIS data reports that 31 families with children experience homelessness each year.

Veterans – Providing additional resources and support for veterans is a priority for communities across the country. During the 2022 PIT Count, there were 4 veterans experiencing unsheltered homelessness. It is estimated that 6 veterans experience homelessness each year. Homeless veterans often also experience chronic homelessness.

Unaccompanied Youth – Individuals who are between the ages of 18 and 24 years old that lack a fixed, regular, nighttime residence are considered unaccompanied youth. 18 unaccompanied youth were counted in the 2022 PIT Count. HMIS is data is not available on the number of unaccompanied youths who experience homelessness each year.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

Nature and Extent of Homelessness: (Optional)

Race	Sheltered	Unsheltered (optional)
White	7	31
Black or African American	3	20
Asian	0	1
American Indian or Alaska Native	0	5
Pacific Islander		1
Ethnicity	**Sheltered**	**Unsheltered (optional)**
Hispanic	2	31
Not Hispanic	8	34

Alternate Data Source Name: 2022 Moreno Valley PIT Count
Data Source Comments: Population details were only provided for unsheltered persons. The table above does not include person experiencing homelessness that are multiple races. Of the unsheltered homeless population identified in the 2022 PIT Count, 8 individuals identified as multiple races.

Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

Homeless children face a litany of complexities and problems that can contribute to a pattern of homelessness into adulthood if they are not addressed early on. Housing insecurity and homelessness influence educational attainment. Lack of transportation, volatile living conditions, and general instability make showing up to school a challenge, and learning and excelling in these conditions is often impossible. Based on the Point in Time Count, 0 homeless persons were in families that included at least one adult and one child. Families experiencing homelessness are often "hidden." According to CoC HMIS data 31 families with children experience homelessness each year in Moreno Valley, and it is likely that there are additional families experiencing homelessness in the city that need housing assistance. Four veterans were counted in the 2022 PIT Count and HMIS reports 6 veterans experience homelessness each year.

Describe the Nature and Extent of Homelessness by Racial and Ethnic Group.

Homeless individuals are more likely to identify as White than any other racial or ethnic group. Over 43% of all residents experiencing homelessness during the 2022 Point in Time Count identified as White. However, according to ACS data White residents make up only 29% of the city's population. It should be noted that over 44% of the city's population identify as "some other race." The city has a high Hispanic population, and it is possible that the survey participants do not understand the difference between race and ethnicity and are answering the question incorrectly. With this data, it cannot be determined if White residents are disproportionately represented among residents experiencing homelessness. Nearly 38% of the homeless population identified as Hispanic in the 2022 Point in Time Count.

The second largest racial group is Black or African American residents making up 26% of the population experiencing unsheltered homelessness.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

Of those counted in the city's Point In Time Count approximately 89% were unsheltered. These persons face additional barriers to affordable housing and access to supportive services. Unsheltered residents were primarily White. Emergency shelter is extremely limited in Moreno Valley. Only 10 persons experiencing homelessness were staying in a shelter on the night of the count. Unsheltered homeless persons are most frequently sleeping on the street (35%) or in a tent or shed (17%).

NA-45 Non-Homeless Special Needs Assessment - 91.205 (b, d)

Introduction

Non-homeless persons with special needs include the elderly; frail elderly; persons with mental, physical, and/or developmental disabilities; persons with drug and alcohol addictions; persons with HIV/AIDS and their families; and victims of domestic violence, sexual assault, and stalking. Members of these special needs populations often have low incomes. Data on special needs populations is limited, but there is a significant need for housing and/or supportive services for all special needs sub-populations and meeting these needs is a high priority for the city.

Describe the characteristics of special needs populations in your community.

Elderly: According to the 2021 ACS data, Moreno Valley's elderly population (65+) is comprised of 19,307 persons, which represents 9.3% of the total population. The city's elderly population is comprised of 8,321 men and 10,986 women. Over 1,200 elderly households (65+) are cost burdened or severely cost burdened. Of these cost burdened households, 60% are homeowners and 40% are renters. Approximately 10% of the elderly population of the city is below the poverty level.

The elderly population faces increased housing challenges, and providing decent, affordable housing is incredibly important. The elderly population is often on a limited income and/or has a disability, which puts financial pressure on them that reduces independence. As prices throughout the community inflate, the elderly population generally lacks the ability to increase their income to match.

Frail Elderly: Moreno Valley's frail elderly population could be as large as approximately 5,473 persons. This number is comprised of 1,984 seniors 65 years of age or older with a self-care limitation and 3,489 seniors with an independent living limitation It is possible that some elderly have both difficulties. Additionally, 4,454 city residents aged 65 and older report having an ambulatory difficulty, meaning they have serious difficulty walking or climbing stairs. Many of the frail elderly also live on fixed incomes and many need home modifications to help prevent falls.

Alcohol and Drug Addiction: Gathering accurate data about alcohol and drug addiction within a community is difficult. Addiction often goes unrecognized because people do not seek help due to fear of criminal charges and/or the social stigma associated with addiction and other medical health issues. Often people are only counted in statistics when they overdose, get arrested, or seek treatment. According to the 2020 data analyzed by Conduent Healthy Communities Institute, 19% of Moreno Valley adults binge drank in the last 30 days. This is slightly higher than the national average of 15.5%. The age-adjusted death rate due to drug use in Riverside County between 2018 and 2020 was 23.1 deaths per 100,000 persons. This rate has seen significant increases in recent years. Between 2016 and 2018, the rate was 17.5 deaths per 100,000 persons. The age-adjusted emergency department visit rate due to drug overdose was 133.5 per 100,000 persons. Additionally, 3% of Riverside County residents are opioid prescription patients. Opioid use can often lead to drug abuse and addiction.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Disabilities: According to 2017-2021 ACS data (S1810), there are 20,423 residents with disabilities in Moreno Valley making up 9.8% of the population. The most common disability is ambulatory difficulty, and 9,868 residents report this difficulty. By age, 13.5% percent of disabled persons are under 18, 15.9% are ages 18 to 34, 37.3% are 35 to 64, and 33.2% are 65 and older.

Survivors of Abuse and Sexual Assault: Statistics compiled by the California Department of Justice found that in 2021, there were 654 calls for assistance in Moreno Valley related to domestic violence. Most of these instances (73%) did not involve a weapon. The FBI reported that 19 rapes were reported to law enforcement in Moreno Valley in 2019. Sexual assault and other intimate crimes are underreported so it is likely additional persons are survivors of abuse and sexual assault. These victims face numerous barriers to housing such as limited incomes, lack of a credit history, landlord discrimination, and need for additional supportive services.

What are the housing and supportive service needs of these populations and how are these needs determined?

Elderly and Frail Elderly: Providing secure, safe, affordable, and stable housing for the elderly population is vitally important. There are many factors that contribute to a healthy environment for the elderly including, but not limited to, access to health care, shopping, social networks, bathing, housework, etc. Seniors that participated in the 2020-2024 Area Plan on Aging needs assessment process for Moreno Valley indicated that their top needs for assistance were meal preparation, transportation, and housework. A robust public transportation network is needed to assist the elderly remain active and independent and with access to needed services. Additionally, elderly residents' homes may need modifications to assist with disabilities that may develop as they age. Seniors are also in need of access to food programs. With their limitations, they may not be able to regularly access a meal program. In a survey conducted at a meal program site for the Area Plan on Aging needs assessment, only 7% of respondents stated that they can cook for themselves days that the food program is closed.

Disability: In general, the special housing needs of the disabled populations include independent living units with affordable housing costs; supportive housing with affordable housing costs; and housing with design features that facilitate mobility and independence. The shortage of available, accessible, and/or affordable housing is an acute problem for most people with disabilities (PWD). The individuals who have more independent skills tend to utilize subsidized housing options. Individuals requiring more support find residences in publicly funded community homes either sharing settings or privately-owned personal care settings. Many individuals continue to reside with parents and families throughout adulthood. Regardless of housing situation, a common thread is the need for continuous supportive services based on varying levels of capability.

Persons with Alcohol/Drug Addictions: Individuals with substance abuse problems need a strong network to stay healthy and sober. Health professionals have identified the following needs: raise awareness about prescription drug abuse; make usage of California's prescription drug monitoring program, Controlled Substance Utilization Review and Evaluation System (CURES) which can be used to identify clinicians with patterns of inappropriate prescribing and dispensing controlled substances,

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

mandatory; and assistance with the safe disposal of prescription drugs. Housing needs for persons with substance use issues include sober living environments, support for employment, access to health facilities, and easy access to family and friend networks. Additionally, detoxification facilities are necessary when addiction is first recognized.

Survivors of Abuse and Sexual Assault: Women who are victims of domestic violence experience unique housing issues. Women and their children are often forced to move out of their homes away from their abuser to seek other housing where they are safe. Emergency housing is needed to fill a short-term need.

There is a high need for continued care and case management to support this population. There is a need for additional emergency, transitional, and permanent affordable housing that can care for families, particularly women with children. Survivors need additional support including economic support, counseling, medical care, and more to ensure escape from dangerous households. Barriers are confronted when seeking permanent housing because of limited incomes, lack of credit, and housing discrimination. Transitional housing and transitional housing with supportive services can help address these barriers.

Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area.

The Riverside County HIV/STD Program housed at the Riverside University Health System publishes HIV/AIDS data for the County and its municipalities. According to the Program's 2020 report, the prevalence of persons living with HIV/AIDS (PLWH) in Moreno Valley was 228.9 per 100,000 persons in 2020, while the prevalence for all Riverside County was 422.0 per 100,000 persons. The prevalence rate refers to persons living with HIV disease who were reported to be living in Moreno Valley regardless of time of infection or date of diagnosis. The average HIV incidence of Moreno Valley between 2018 and 2020 was 12.3 per 100,000 population. During the same period, the average HIV incidence for Riverside County was 11.1 per 100,000 population. The rate of incidence is the number of newly diagnosed cases of HIV in the population during the period.

Moreno Valley is in Western Riverside County, and 22% of the persons living with HIV/AIDS in Riverside County live in the western part of the County. The greatest proportion of African American Persons Living with AIDS are in west Riverside County. Approximately 73% of all people living with HIV in west Riverside County are people of color compared to 29.9% in the rest of Riverside County. Additionally, West Riverside County is home to a younger and more diverse group of PLWH than the east region. The median age of persons living with HIV in the west part of the county is 47 years, compared to 59 in the rest of the county. Nearly 35% of all people living with HIV in west county are under 40 years old. In the rest of Riverside County, only 10.6% of those living with HIV/AIDS are younger than 40.

Persons living with HIV/AIDS and their families may require housing that provides emergency, transitional, or long-term affordable solutions. A variety of HUD programs and projects provide such housing; however, this housing often is not the typical "house" structure. HIV/AIDS housing includes

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

short and long-term rental assistance, live-in medical facilities, and housing sites developed exclusively for people living with AIDS.

NA-50 Non-Housing Community Development Needs – 91.215 (f)

Describe the jurisdiction's need for Public Facilities

HUD Community Planning and Development funds (CDBG, HOME, and ESG) can be used for a variety of supportive services and community development activities. These include economic development; public and infrastructure improvements; community facilities; and community services.

Moreno Valley has a wide range of community development issues, particularly in older neighborhoods where the housing stock, public improvements and community facilities are deteriorating, and businesses are declining.

Many of the CDBG and HOME programs and strategies are centered in the CDBG Target Areas. Infrastructure improvements are needed in the Target Areas which include some of the oldest areas in the city. To improve public safety and facilitate pedestrian traffic, the city plans to continue the development of public facilities within the CDBG Target Areas utilizing a combination of CDBG and city General Funds to improve neighborhoods and increase quality of life for Moreno Valley residents.

How were these needs determined?

The Public Facility needs of the city were determined through a review of the city's most recent Capital Improvements Plan and through consultation with key stakeholders and public meetings. A summary of the consultation process can be found in the Consultation section at the beginning of the Consolidated Plan.

The noted needs are identified in the City of Moreno Valley *Adopted Capital Improvement Plan: Fiscal Years 2021/22 & 2022/23* and *Momentum MoVal Strategic Plan, August 2016.*

Describe the jurisdiction's need for Public Improvements.

According to the city's most recent Capital Improvement Plan, the city's greatest needs for public improvements are essential updates to public infrastructure such as streets, bridges, and drainage. Specifically identified updates include the State Route (SR) 60/Moreno Beach Drive Interchange, the Citywide Pavement Rehabilitation Project, Sunnymead-Flaming Arrow Drive Storm Drain, South Laselle Street Safety Corridor, and more. The city plans to use both CDBG funds and city general funds to make these and more essential public infrastructure improvements to improve quality of life for residents.

How were these needs determined?

The Public Improvements needs of the city were determined through a review of the city's most recent Capital Improvements Plan, the city's 2016 Strategic Plan, and through consultation with key stakeholders and public meetings. A summary of this process can be found in the Consultation section at the beginning of the Consolidated Plan.

The noted needs are identified in City of Moreno Valley, *Adopted Capital Improvement Plan: Fiscal Years 2021/22 & 2022/23* and *Momentum MoVal Strategic Plan, August 2016.*

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Describe the jurisdiction's need for Public Services:

The highest priority public service needs are listed below:

- Basic Needs Related to Social Services Programs (such as but not limited to emergency food, shelter (homelessness), and utility assistance)
- Community Public Safety Programs
- Programs Offering Low-Cost Transportation
- Employment Services/Programs and Job Skills Training
- Free/Low-Cost Programs for School-Aged Youth
- Fair Housing

How were these needs determined?

The Public Services needs of the city were determined through consultation with key stakeholders and public meetings. A summary of this process can be found in the Consultation section at the beginning of the Consolidated Plan.

Housing Market Analysis

MA-05 Overview

Housing Market Analysis Overview

The Market Analysis provides insight into what types of housing are needed and who needs them. This provides complementary data to the Needs Assessment. The information gathered and analyzed here helps set the priorities for both the Action Plan and Strategic Plan. It is necessary to understand how things have changed and how they stand now to make wise decisions about how to use resources in the future.

MA-10 Number of Housing Units – 91.210(a)&(b)(2)

Introduction

The following section looks at the size of the city's housing stock. In addition to the number of units present, it looks at the type of housing units and where they are located. It also includes a comparison of renters and owner-occupied households.

All residential properties by number of units

Property Type	Number	%
1-unit, detached structure	43,507	78%
1-unit, attached structure	1,027	2%
2-4 units	2,098	4%
5-19 units	5,402	10%
20 or more units	2,343	4%
Mobile Home, Boat, RV, Van, etc.	1,155	2%
Total	**55,532**	**100%**

Table 26 – Residential Properties by Unit Number

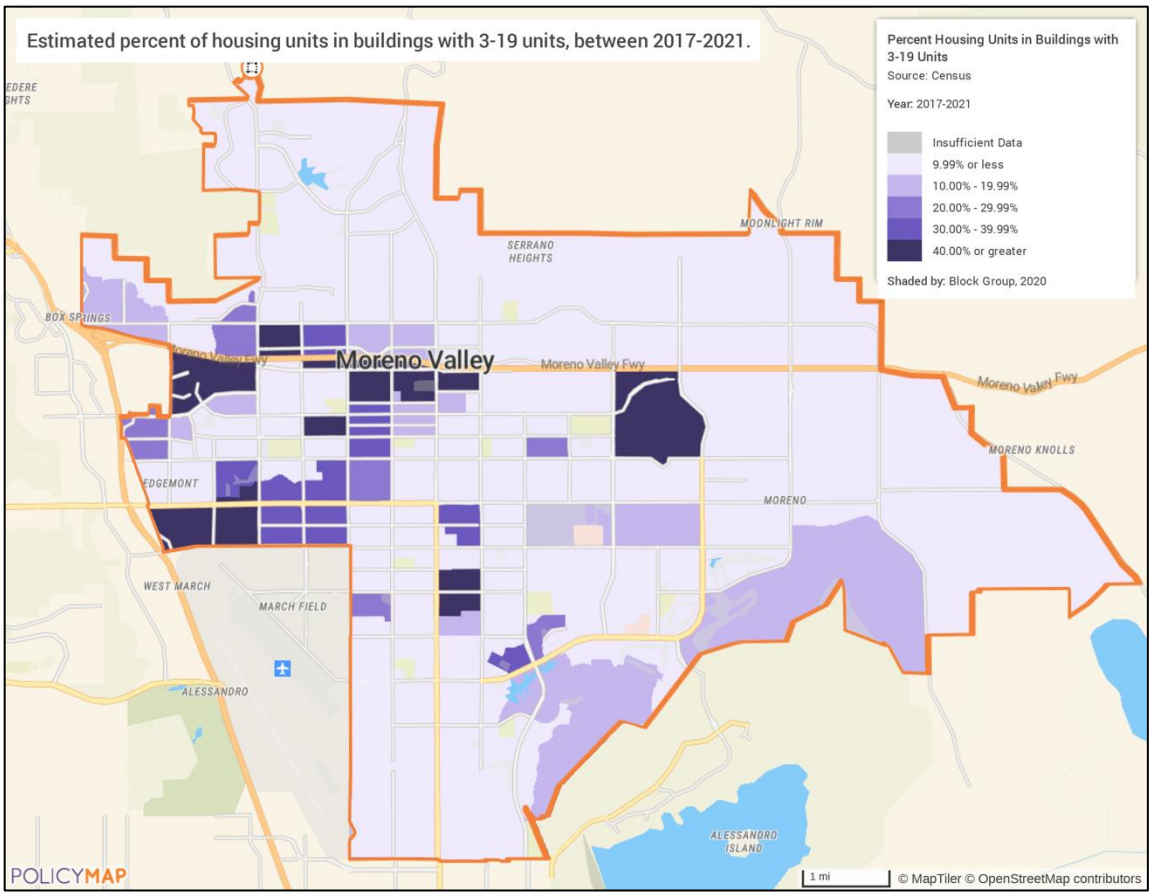
Data Source: 2017-2021 ACS

The table above breaks down the city's housing stock by the number of units in each structure and by structure type. Traditional single-family, detached homes are most prominent, accounting for 78% of all housing units in the city. The next most common category of residential structure is mid-sized multifamily developments with 5-19 units, accounting for 10% of units.

Multifamily Development Distribution

The maps below display the distribution of small, medium, and large multifamily developments in the jurisdiction. Small multifamily units have between 3 and 19 units in each development. These developments are primarily concentrated in the downtown area on the west side of the city. These tracts that are highly concentrated with small developments represent over 40% of the housing stock.

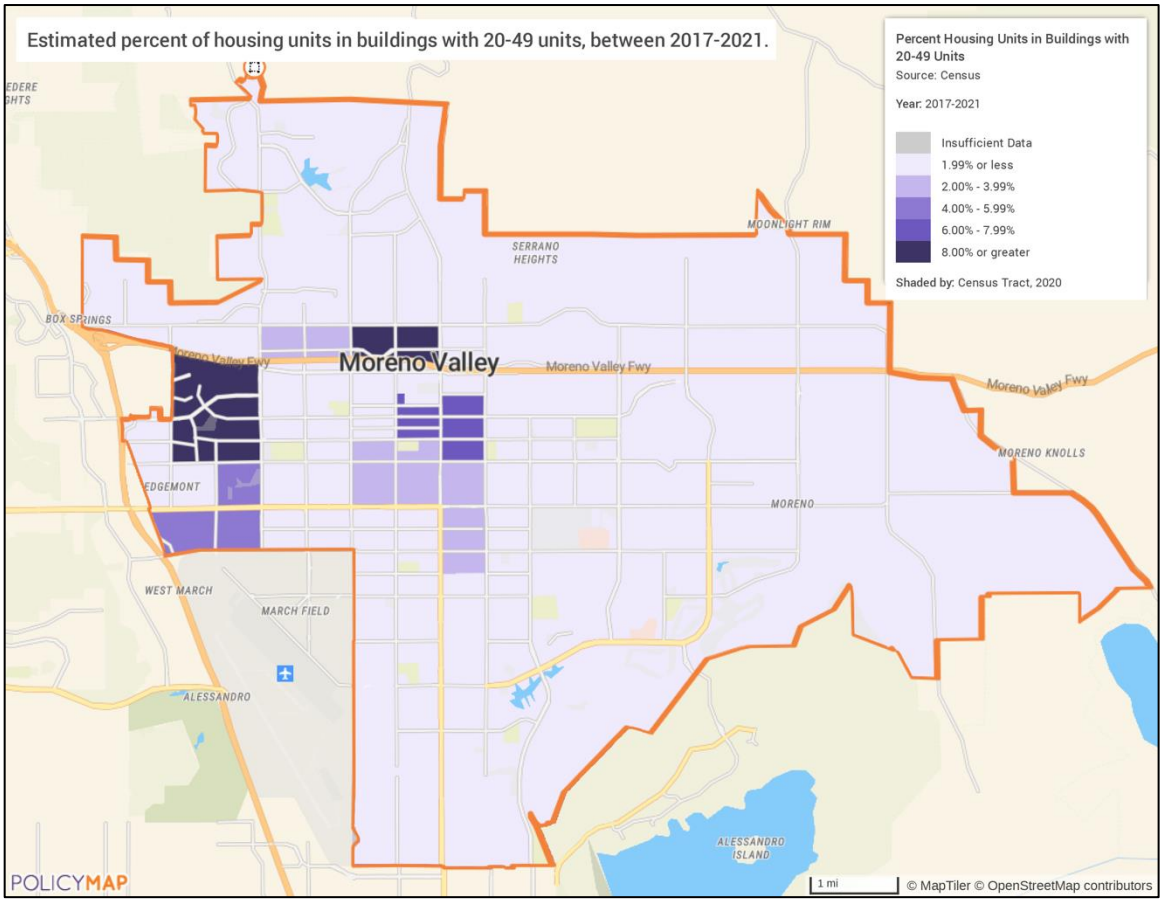
Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT



Source: ACS 2017-2021 via PolicyMap

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Medium multifamily developments have between 20 and 49 units per development. Like small multifamily developments, medium developments are found primarily on the western side of the city, but they are significantly less common. There are virtually no units in medium structures on the east side of the city.



Source: ACS 2017-2021 via PolicyMap

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Large multifamily developments are buildings with 50 or more units and have a similar distribution pattern as medium and small developments. However, they appear to be more common than medium multifamily structures, which include units outside of the more urbanized area.

3 or more bedrooms	29,839	90%	11,115	55%
Total	***32,977***	***100%***	***20,158***	***100%***

Table 27 – Unit Size by Tenure

Data Source: 2017-2021 ACS

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

The size of housing units is generally linked to whether it is owner-occupied, or renter occupied. Owner-occupied units tend to be larger than rental units. Less than 2% of owner-occupied units have one bedroom or less, while 14% of renter-occupied units are that size. Conversely, about 90 % of owner-occupied units have three bedrooms or more, while only 55% of rental units are this large.

Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

The city has identified low-income households as being in need of support. They plan to fund an owner-occupied housing rehabilitation program for low-income residents. The goal of this program is to ensure secure housing for all extremely low-income families.

The city currently has over 1,200 affordable developments that are targeted toward low- and moderate-income households, including Housing Choice Vouchers, multifamily developments, and LIHTC Developments. The city has partnered with multiple developers to invest in construction and rehabilitation of affordable units to ensure that LMI households have adequate housing.

Additionally, the city ran an emergency rental assistance program called MoVal Rental Rescue. This program targeted low- and extremely-low-income households who were at risk of eviction and homelessness by providing rental assistance for arrears and three months of forward rent. The intention was to keep households stably housed.

Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.

According to the HUD Multifamily Assistance and Section 8 Database, there are three developments with contracts in the city. Of these developments, two have expiring contracts in the next five years. These developments account for 92 units of affordable housing.

According to the city's 2021 - 2029 Housing Element, Moreno Valley does not have units at risk of conversion within the next ten years. However, the affordability covenants of the 25 units in two rehabilitated developments (The Mediterranean at Towngate and Walker Terrace) are set to expire within five to ten years. The city plans to enact a program to purchase affordability covenants on existing multifamily units in partnership with a local agency to maintain the city's affordable housing inventory.

Does the availability of housing units meet the needs of the population?

While the availability of housing meets a variety of needs in terms of size of units, there continues to be increased need for more affordable units. As mentioned in the Needs Assessment, cost burden is the most common housing problem for residents of the city, affecting both renters and homeowners. Residents cannot find housing units that are the size and price that meet their needs. Renters are particularly likely to be cost burdened. Overall, there is a need for increased supply of affordable rental and owner-occupied housing.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Describe the need for specific types of housing.

The city has a very limited supply of smaller owner-occupied units with fewer than two bedrooms. Smaller units tend to be more affordable and attractive to new homeowners or retired residents who are looking to downsize. If these units are not available, then residents have no choice but to move outside of the city or live in substandard housing. There is also a lack of small and medium sized rental units, particularly on the east side of city. Small families and individuals who live alone have fewer housing options which may lead to living in substandard housing or being severely cost burdened.

Describe the need for specific types of housing for special needs groups.

The gap in the supply of smaller rental units is particularly challenging for elderly and disabled residents. According to the city's 2020 Analysis of Impediments to Fair Housing Choice (AI), almost one in every four households in Moreno Valley includes a family member with one or more disabilities. Ninety-six percent of disabled residents live in a housing unit that does not meet their accessibility and support needs. While the Housing Authority of the County of Riverside provides Housing Choice Vouchers to disabled residents (including listings of accessible units and supportive services), it can still often be a challenge for disabled residents to find available housing units that meet their needs.

MA-15 Housing Market Analysis: Cost of Housing - 91.210(a)

Introduction

One of the most important factors in evaluating a community's housing market is the cost of housing and, more importantly, whether the housing is affordable to households who live there or would like to live there. Housing costs correlate to the housing problems in a community. If housing costs are relatively high in comparison to household income, a correspondingly high rate of housing cost burden and overcrowding could result. The following section examines the cost of housing for both homeowners and renters. A review is made of current home values and rents as well as the recent changes in home values and rents. Finally, a closer look is given to the affordability of the existing housing stock for the residents of the jurisdiction.

Cost of Housing

	Base Year: 2009	Most Recent Year: 2017	% Change
Median Home Value	194,700	353,400	81.5%
Median Contract Rent	1,128	1,510	33.9%

Table 28 – Cost of Housing

Data Source: 2008-2012 ACS, 2017-2021 ACS

Rent Paid	Number	%
Less than $500	406	2%
$500-999	1,645	8%
$1,000-1,499	4,273	21%
$1,500-1,999	8,552	43%
$2,000 or more	5,032	25%
Total	***19,908***	***100%***

Table 29 - Rent Paid

Data Source: 2017-2021 ACS

Housing Costs

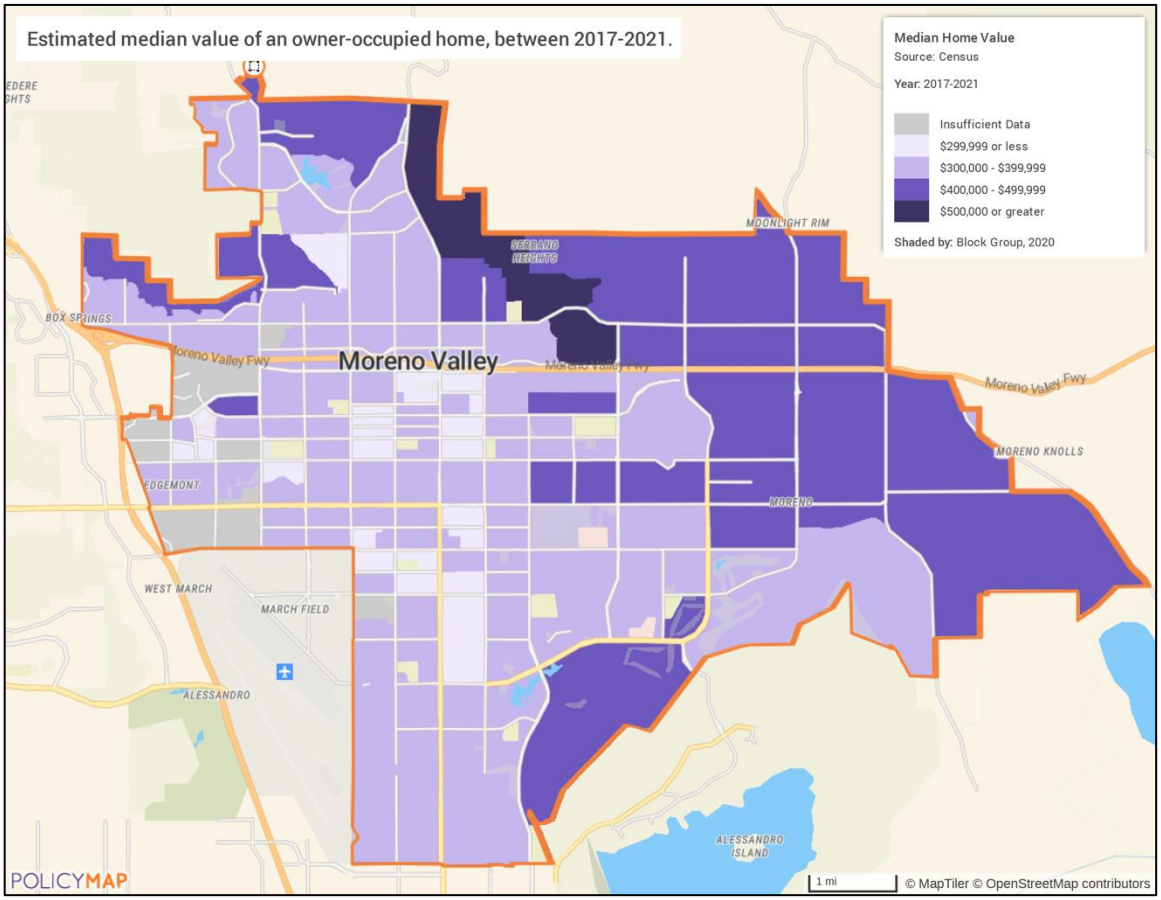
Since 2010, the median home value has increased by 81.5% and rent has increased by 33.9% in nominal dollars. When housing costs from 2010 are compared to 2021 using inflation adjusted dollars (real dollars), the analysis changes slightly. The median home value increased by 33.5% instead of 81.5% and median contract rent increased by 11% instead of 33.9%. As noted in NA-10, the median income in the city grew by 23% during this period. That means that rental units have generally become more affordable for a household with median income, but home ownership continues to be more difficult.

Table *Rent Paid* breaks down the number of households and the amount they are paying in rent. Approximately 43% of renters are paying $1,500 to $1,999, making this the largest price cohort. The

smallest group is households that pay less than $500 per month (2%). Later in this section rental rates will be looked at more closely.

Home Value

The map below shows the median home value by block group throughout the city. Higher home values are primarily found in the eastern and northern portions of the city. Earlier in the plan it was noted that these areas had low concentration of multiunit developments. Considering standard urban growth patterns, it is not unexpected that the high value areas include newer and larger single-family homes.



Source: ACS 2017-2021 via PolicyMap

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Median Rent

The map below displays the median rent by block group, and a distribution that is similar to those of home values. There is no clear area with a concentration of high rent census tracts, though the city center appears to have generally lower rents.

Monthly Rent

Monthly Rent ($)	Efficiency (no bedroom)	1 Bedroom	2 Bedroom	3 Bedroom	4 Bedroom
Fair Market Rent	$955	$1,106	$1,390	$1,917	$2,369
High HOME Rent	$879	$943	$1,134	$1,302	$1,433
Low HOME Rent	$691	$740	$888	$1,027	$1,146

Table 31 – Monthly Rent

Data Source: HUD 2021 FMR and HOME Rents

HOME Rents Limits and Fair Market Rents (FMR)

The tables above compare the 2021 Fair Market Rents (FMR) to the 2021 HOME program rent limits for the Riverside-San Bernardino-Ontario MSA, which includes Moreno Valley. FMRs are set by HUD and used to determine payment standard amounts for HUD Programs. HUD annually estimates FMRs for the Office of Management and Budget (OMB) defined metropolitan areas, some HUD defined subdivisions of OMB metropolitan areas, and each nonmetropolitan county. HOME Rent Limits are based on the FMRs published by HUD. HOME Rent Limits are the maximum amount that may be charged for rent in HOME-assisted rental units and are applicable to new HOME leases.

Is there sufficient housing for households at all income levels?

According to 2017-2021 ACS data, the vacancy rate of Moreno Valley is 4.3%. This vacancy rate is significantly lower than the national average of 11.2%. Additional housing stock is needed for all income levels. Low- and moderate-income households are especially in need of additional affordable housing. As rent and home values increase more quickly than incomes, housing costs exceed what is affordable to many of these households.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

How is affordability of housing likely to change considering changes to home values and/or rents?

It is difficult to project exactly how housing affordability will change, but it is likely that the affordability of housing will continue to decrease. As home values increase, the rental market will become more competitive due to less households having the ability to purchase a home. The increased competition will continue to increase rental prices. In addition to this, the low vacancy rates and growing population will contribute to the competition and rising prices; low- and moderate-income households will likely have fewer affordable options.

How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?

The area median rent is $1,510, which is in between the FMR for a two bedroom and a three bedroom. The median rent exceeds both Low and High HOME Rents for all bedroom sizes. FMR significantly increases for three- and four-bedroom sizes. The city will take these items into consideration when determining the appropriate size and pricing for the development of affordable units. Subsidies will likely be necessary to produce housing affordable to extremely low- and low-income households. HOME funds often need to be combined with other state and federal resources to facilitate the production of affordable rental housing.

MA-20 Housing Market Analysis: Condition of Housing – 91.210(a)

Introduction

The tables and maps in this section provide details on the condition of housing units throughout the region by looking at factors such as age, vacancy, and the prevalence of housing problems.

As defined by HUD, the four housing problems are:

1) a home which lacks complete or adequate kitchen facilities
2) a home which lacks complete or adequate plumbing facilities
3) a home which is overcrowded (having more than one person per room)
4) a household that is cost burdened (paying 30% or more of their income towards housing costs)

It is important to recognize that safe and secure housing is more than just an available physical space. The quality of the space and its ability to meet the needs of the residents is vital to housing security.

Definitions

For the purposes of this plan, units are in "standard condition" when the unit complies with the local building code, and the California Building Code, which is based on the International Building Code.

The definition of substandard housing is a housing unit with one or more serious code violations. For the purposes of this analysis the lack of a complete plumbing or a complete kitchen will also serve as an indicator of substandard housing.

Units are in "substandard condition but suitable for rehabilitation" when the unit is out of compliance with one or more code violations, and it is both financially and structurally feasible to rehabilitate the unit.

Condition of Units

Condition of Units	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
With one selected Condition	11,456	35%	11,233	56%
With two selected Conditions	827	3%	2,080	10%
With three selected Conditions	10	0%	24	0%
With four selected Conditions	0	0%	0	0%
No selected Conditions	20,684	63%	6,821	34%
Total	***32,977***	***100%***	***20,158***	***100%***

Table 32 - Condition of Units

Data Source: 2013-2017 ACS

Housing Conditions

The table above details the number of owner and renter households that have at least one housing condition. Thirty-five percent of all owner-occupied housing units face at least one housing condition,

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

while 56% of all renters have at least one housing condition. Generally, there are relatively few households with multiple housing problems and when compared to the affordability statistics provided earlier in the plan, the overwhelming majority of housing problems are housing cost burden. However, it should be noted that approximately 10% of renters have two housing problems.

Year Unit Built

Year Unit Built	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
2000 or later	7,855	24%	5507	27%
1980-1999	19,396	59%	9,677	48%
1950-1979	5,305	16%	4,294	21%
Before 1950	421	1%	680	3%
Total	***32,977***	***100%***	***20158***	***100%***

Table 33 – Year Unit Built

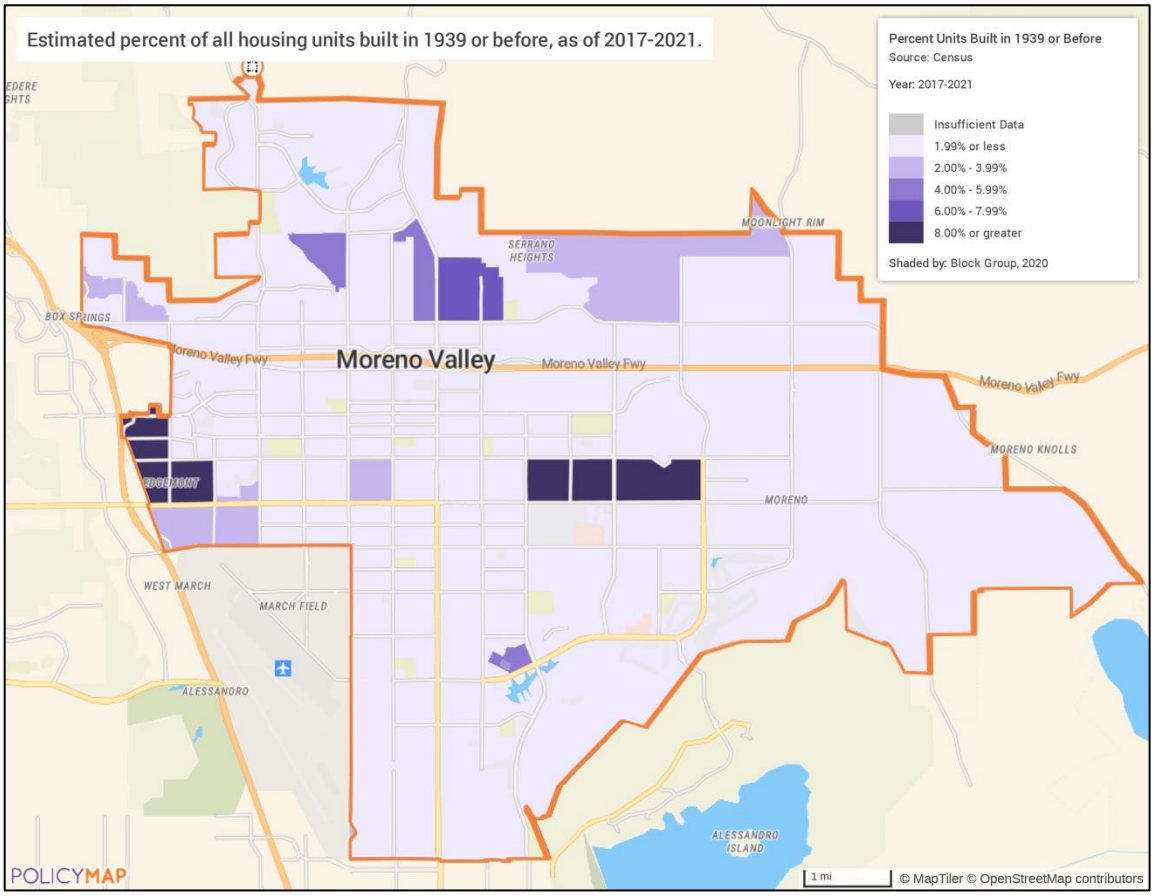
Data Source: 2017-2021 CHAS

In Moreno Valley, the housing stock is relatively new. Approximately 17% of owner-occupied units and 24% of rental units were built prior to 1980. These homes have a risk of lead-based paint and may require additional support to ensure a safe living environment, particularly for children. This amounts to over 10,000 units total, most of which are owner-occupied.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Age of Housing

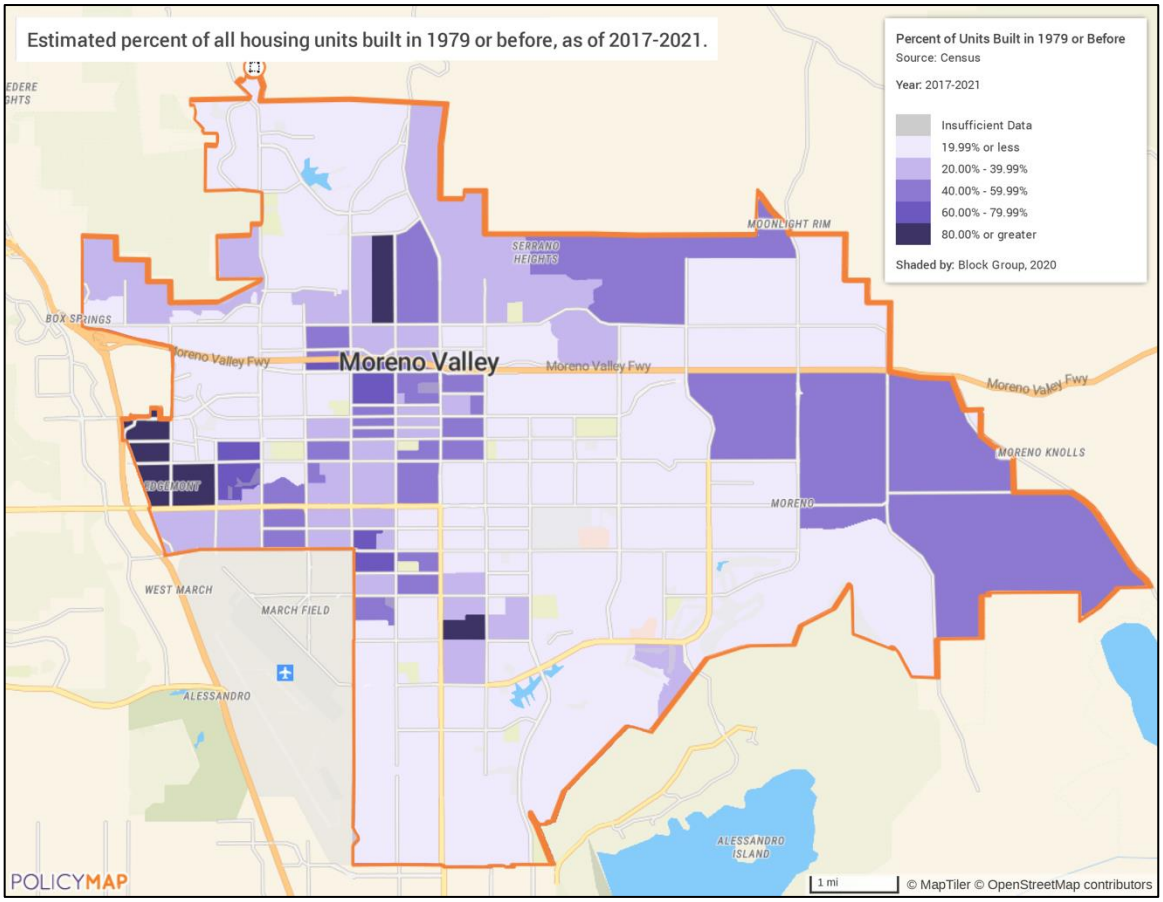
The maps below depict the prevalence of older housing units in the jurisdiction. The first map identifies the percentage of all housing units built prior to 1940. As noted above, the housing stock is relatively new in the area. There are two areas that stand out with a relatively older housing stock. The first is west of Elsworth Street near I-215 between Alessandro Blvd and Eucalyptus Avenue. The second area is towards the east between Alessandro Blvd to the south, Cottonwood Avenue to the north, Moreno Beach Drive to the east and Lasselle Street to the west.



Source: ACS 2017-2021 via PolicyMap

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

In the following map the distribution of homes built prior to 1980 is shown. Areas in the west and northern portion of the city have tracts with a relatively large number of units built prior to 1980, sometimes over 80%. Due to the age of the units many units in those tracts have a risk of lead-based paint hazard.



Source: ACS 2017-2021 via PolicyMap

Risk of Lead-Based Paint Hazard

Risk of Lead-Based Paint Hazard	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
Total Number of Units Built Before 1980	5,070	16%	4,595	23%
Housing Units build before 1980 with children present	10,905	35%	5,945	30%

Table 34 – Risk of Lead-Based Paint

Data Source: 2013-2017 ACS (Total Units) 2013-2017 CHAS (Units with Children present)

Lead-Based Paint Hazard

As mentioned previously, any housing unit built prior to 1980 may contain lead-based paint in portions of the home. The most common locations are window and door frames, walls, and ceilings, and in some

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

cases throughout the entire home. Thus, it is generally accepted that these homes at least have a risk of lead-based paint hazards and should be tested in accordance with HUD standards. According to the most recent CHAS data, there are approximately 16,850 units with both a lead-based paint hazard and children present.

Vacant Units

	Suitable for Rehabilitation	Not Suitable for Rehabilitation	Total
Vacant Units	2,397	0	2,397
Abandoned Vacant Units	0	0	0
REO Properties	0	0	0
Abandoned REO Properties	0	0	0

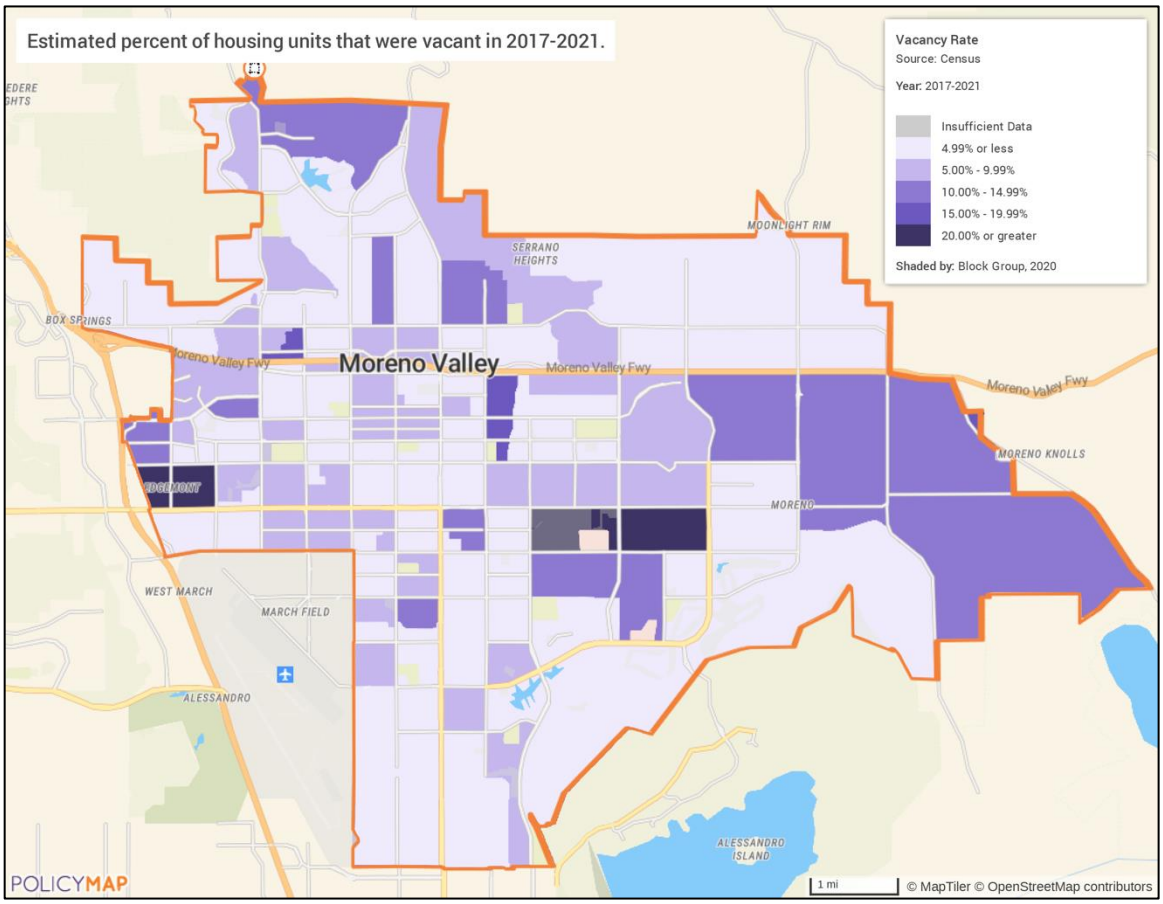
Table 35 - Vacant Units

Alternate Data Source Name: 2017-2021 ACS
Data Source Comments: Moreno Valley does not have data for specific types of vacant units in the city, and ACS data only reports on the total number of vacant units. Data does not distinguish between suitable or nor suitable for rehab or if they were abandoned, Real Estate Owned (REO) properties or abandoned REO properties

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Vacancy Rate

There are currently nearly 2,400 vacant units in the area that are suitable for rehabilitation. These units provide an opportunity to create affordable housing units for LMI households. However, it is important to note that HUD considers a unit vacant for several reasons, including units that are used seasonally and not available for occupancy. There are approximately 400 units vacant due to seasonal use and another 663 units that were vacant for other reasons and are not available for rent or sale. The following map shows that vacancy rates are not uniform throughout the city. Rates range from less than 5% to over 20%, depending on the neighborhood.



Source: ACS 2017-2021 via PolicyMap

Need for Owner and Rental Rehabilitation

Within the city's jurisdiction there is a continued need for rehabilitation for both homeowners and renters. There are 10,000 homes built prior to 1980 that have a potential lead-based paint hazard. This is a large concern for low-income households that may lack the resources to properly rehabilitate their homes to address the presence of lead-based paint.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Estimated Number of Housing Units Occupied by Low- or Moderate-Income Families with LBP Hazards.

To estimate the number of housing units in the jurisdiction by low- or moderate-income families that may contain lead-based paint hazards, this report assumes that homes by year built are distributed evenly across income categories, as no local data exists to describe otherwise. There are approximately 10,000 units built prior to 1980 and approximately 5,750 have LMI households in them.

MA-25 Public and Assisted Housing – 91.210(b)

Introduction

The City of Moreno Valley does not have a designated Public Housing Authority. Therefore, the city does not own or manage any housing directly or directly operate any voucher programs. However, the Housing Authority of the County of Riverside (HACR) operates as the public housing authority for all Riverside County. The HACR administers Housing Choice Vouchers and public housing units. Additionally, the city has invested housing funds into the construction and rehabilitation of affordable multi-family rental projects in partnership with developers throughout the city. In return, the project owners provide discounted, below-market rents to income-qualified tenants during the term of their agreements with the city. Units in development priced at a "below market rate" are made affordable to varied incomes ranging from very-low- to moderate- income households (30% -120% AMI). Each project has a specific number of units reserved at below market rates, as well as specific income requirements for the units. The city does not own or manage any housing directly.

Totals Number of Units

	Program Type								
	Certificate	Mod-Rehab	Public Housing	Vouchers					
				Total	Project -based	Tenant -based	Special Purpose Voucher		
							Veterans Affairs Supportive Housing	Family Unification Program	Disabled *
# of units vouchers available	0	77	469	8,681	48	8,633	819	1,759	342
# of accessible units			2						

***includes Non-Elderly Disabled, Mainstream One-Year, Mainstream Five-year, and Nursing Home Transition**

Table 36 – Total Number of Units by Program Type

Data Source: PIC (PIH Information Center)

Describe the supply of public housing developments.

According to the HACR, there are currently 469 public housing units available in the city. The HACR also administers approximately 8,680 Housing Choice Vouchers to Moreno Valley Residents, including 819 veteran's affairs supportive housing (VASH) vouchers, and 1,759 Family Unification Vouchers. Each resource currently has a waiting list of residents in need.

Describe the number and physical condition of public housing units in the jurisdiction, including those that are participating in an approved Public Housing Agency Plan.

There are currently no public housing developments in the City of Moreno Valley.

Public Housing Condition

Public Housing Development	Average Inspection Score
N/A	N/A

Table 37 - Public Housing Condition

Describe the restoration and revitalization needs of public housing units in the jurisdiction.

Not applicable; there are currently no public housing developments in the City of Moreno Valley.

Describe the public housing agency's strategy for improving the living environment of low- and moderate-income families residing in public housing.

The mission of the HACR is "to transform and promote healthy, thriving communities, re-ignite hope and restore human dignity through the creation and preservation of high quality and innovative housing and community development programs which enhance the quality of life and revitalize neighborhoods to foster self-sufficiency." The HACR's strategy for carrying out this mission is through the following goals:

1. Expanding the supply of assisted housing though an increase in vouchers and rehab/construction of affordable units.
2. Improving the quality of assisted housing through HQS inspections and increased customer service.
3. Increasing assisted housing choice through landlord outreach, replacement vouchers, and expansion of the Family Self-Sufficiency Program (FSS).
4. Promoting self-sufficiency within existing programs through FSS, employment programs, and supportive services.
5. Ensuring equal opportunity and affirmatively furthering fair housing.

Discussion.

No further discussion.

MA-30 Homeless Facilities and Services – 91.210(c)

Introduction

The following section provides a discussion and analysis of homeless facilities and services that are available to those who are in need in the community. The city has approximately 12 year-round emergency shelter beds, 12 transitional housing beds, and 70 Permanent Supportive Housing beds. One of the city's highest priorities for the use of CDBG and ESG funds is to address the emergency shelter and housing needs of homeless persons. The city will continue to fund applications for homeless shelters that serve the Moreno Valley homeless population. In addition to beds, supportive services are an essential part of the service delivery system.

Facilities and Housing Targeted to Homeless Households

	Emergency Shelter Beds		Transitional Housing Beds	Permanent Supportive Housing Beds	
	Year-Round Beds (Current & New)	Voucher / Seasonal / Overflow Beds	Current & New	Current & New	Under Development
Households with Adult(s) and Child(ren)	0	0	12	18	0
Households with Only Adults	12	0	12	52	0
Chronically Homeless Households	0	0	0	29	0
Veterans		12	12	0	0
Unaccompanied Youth	0	0	0	0	0

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Describe mainstream services, such as health, mental health, and employment services to the extent those services are used to complement services targeted to homeless persons.

The Riverside County Housing and Workforce Solutions (HWS) Department facilitates the Continuum of Care (CoC) as the Collaborative Applicant and lead agency. It oversees the community's plan to organize and deliver supportive social services and maintains and establishes partnerships to leverage community stakeholders, agencies, businesses, and non-profit partners.

Many local agencies and organizations offer mainstream services to help close the gaps of homelessness through the local, state, and private funding streams. CoC providers and community stakeholders can leverage federal funding sources in partnership with agencies like the Riverside County University Health System-Behavioral Health, Housing Authority of the County of Riverside (HACR), Veterans Administration, and the DPSS Self Sufficiency programs. Mainstream benefits are made accessible to qualifying clients through the CoC program housing providers, local non-profit organizations, agencies, and educational institutions which collaborate and work on creating accessibility to homeless emergency services for homeless families and individuals.

Other mainstream services available in the city include:

1. CalWORKs: Funds are available to families on public assistance to provide rent and utility payments, which are funded through Temporary Assistance for Needy Families (TANF).

2. Riverside County Workforce Development Center: helps job seekers access employment, education, training, and support services to succeed in the labor market and match employers with the skilled workers they need through the Riverside County Workforce Development Centers.

3. Moreno Valley Employment Resource Center: The city partners with Riverside County to operate the Business & Employment Resource Center that provides job training, placement services, and job search assistance.

4. Riverside County Department of Public Social Services: Provides assistance to individuals and families needing senior services, physical health, behavioral health, dentistry services, and public health.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth.

The Housing First approach adopted by the Continuum of Care (CoC) requires that homeless people are assisted with permanent housing or rapid re-housing as soon as possible. Transitional housing beds have been decreasing in the county and permanent housing is increasing due to reallocations made in the HUD CoC Program Consolidated Application, and the CoC's success in obtaining additional funding for Permanent Supportive Housing.

Both transitional housing programs and emergency shelters focus on decreasing a homeless person's or family's length of time homeless (LOTH) in the shelter by getting them quickly stabilized into permanent

housing and providing support through intensive case management as they transition out of homelessness.

The CoC works with the Economic Development Agency (EDA) and other public funding agencies to integrate the CoC Programs, Emergency Solutions Grant, Social Services to Veteran Families (SSVF), and CDBG funding to increase the number of families with children who are assisted through rapid re-housing. Service providers that serve homeless persons in Moreno Valley are listed below:

Path of Life Ministries offers an emergency shelter program to individuals and families in a housing crisis. The Community Shelter provides 90 beds to men and women, and the Family Shelter provides 46 beds to families with children. Shelter guests are provided with wraparound stabilization services including employment support and housing referrals that foster self-sufficiency and family restoration.

LightHouse Social Service Centers operates a Veterans Transitional Living Program that provides comprehensive transitional living services to male veterans ages 18 years and up, in a drug and alcohol free, peer oriented, supportive environment. Transitional living services can be provided to 12 veterans at any given time.

March Veterans Village, a community dedicated to supporting low-income veterans and their families with affordable housing and supportive services, is conveniently located next to March Air Reserve Base in Riverside County. March Veterans Village consists of 7 apartment buildings that are home to more than 400 veterans and their families, including 138 units of permanent supportive housing.

Operation SafeHouse is a 24-hour emergency shelter whose mission is to serve runaway, homeless, and at-risk youth ages 11 – 17 in Riverside County. Services include up to 3 weeks of emergency shelter, nutritious meals, counseling, attempts at family reunification, on-site education program, aftercare, and a 24-hour toll-free crisis line. The organization also has a Main Street Housing Program that offers a unique program consisting of Transitional Living for homeless young adults in Riverside County between 18-21 years of age. Participants are aided in developing the life skills needed to live independent lives.

Saving Grace Homes Sober Living Transitional Home in Moreno Valley is a Faith based sober living home for men in recovery from alcohol and drug addiction. It provides its residents with a safe, supportive environment, a clean and positive living experience based on sobriety and a new way of living without the use of drugs or alcohol.

Immanuel House Transitional Housing Program is a full-service structured 6-month re-entry program for the lifer and long-term parolee population. The program facility has space for 15 participants with 24-hour staffing. Services provided include one-on-one case management, external resource linkage, family reintegration support, peer-led support groups, social security assistance, ID and driver's license services, appointment help, vocational training services, and job development and referrals.

MA-35 Special Needs Facilities and Services – 91.210(d)

Introduction

The following section discusses the resources available to the populations identified in NA-45. In the city, a significant effort has been made to ensure that these populations have access to the resources they need. A variety of facilities and services targeting persons with special needs are available in Moreno Valley. In particular, the city works with medical facilities, agencies, and non-profit service providers to efficiently allocate resources. Health specific services such as free or reduced-price clinics, and educational programs provide health access to low-income residents and those without healthcare.

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify and describe their supportive housing needs.

Elderly and Frail Elderly: The supportive housing needs for this population can vary widely depending on the health and fitness of the individuals. Generally, with aging, disabilities and other health issues become more common. Because of this, supportive housing must include access to health professionals and housing modifications to assist the resident. It is important to help residents stay independent and in their own homes for as long as possible if they prefer that. The city has a Senior Citizens' Advisory Board that assists in identifying and finding support for these needs. Seniors that participated in the 2020-2024 Area Plan on Aging Needs Assessment process for Moreno Valley indicated that their top needs for assistance were meal preparation, transportation, and housework. The city helps fund various nonprofits to help address these needs, including Family Services Association and More Than A Meal. The city also offers health classes for seniors, low-cost lunch, and low-cost transportation and other programs for seniors. There are 220 Senior Living options in the Moreno Valley area, with 15 in the City of Moreno Valley.

HIV/AIDS: Medical and social support is important for residents living with HIV/AIDS. While there have been great advances in the medical treatment of HIV/AIDS, it is still important to provide specialized support. Family and friends must be accessible and medical facilities should be nearby. However, data in the Needs Assessment shows that there is still an ongoing need in the region for support, to include live-in medical facilities, and housing sites developed exclusively for people living with HIV/AIDS.

Alcohol and/or Drug Addiction: Individuals dealing with addiction often require housing options that will provide a safe and sober place for recovery. A strong network is necessary to maximize the chance they will stay healthy and sober. It is important that these persons have access to health services, support groups, employment assistance, and access to family and friends. There is also a need for sober emergency shelter facilities and emergency staff that is knowledgeable about the best way to support residents with addiction. Additionally, detoxification facilities are necessary when addiction is first recognized.

Mental and Physical Disabilities: Individuals with disabilities encompass a wide range of skill levels and abilities. Therefore, they have many of the same issues as the general population with the added needs

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

that are unique to their situation. Often, individuals with disabilities have a fixed income and limited housing options. Individuals with more independent skills can utilize subsidized housing but individuals that need more support or specialized housing have fewer options. Many individuals continue to reside with parents and families throughout adulthood, which can put additional financial burdens on the family. Natural disasters can be particularly difficult for residents with disabilities. It is important that emergency procedures and resources are available to ensure support, safe sheltering, and evacuation, if necessary. Regardless of the housing situation, a common thread is the need for continuous supportive services that vary based on level of capabilities.

Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing.

As part of the city's involvement with the Continuum of Care, a Discharge Planning Policy was established to ensure that all appropriate local and State government entities that discharge persons from publicly funded institutions or systems of care participate in the Discharge Planning Policy. The Policy strengthens discharge planning with major institutions to limit the number of chronically homeless persons discharged into homelessness and connects the homeless and those persons threatened with homelessness with supportive housing and community-based resources upon discharge. The overall objective of the Discharge Coordination Policy and Practices is to reduce the number of persons being released and discharged into homeless shelters, unsuitable accommodations, or homelessness.

Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs.

The city has identified several activities that will be funded in the next year to support persons who are not homeless but have other special needs. Activities to be funded include:
Capital Improvement Activities

- Health, Safety, and Public Welfare Activities
- Homeless/Homeless Prevention Activities
- Housing and Neighborhood Improvement Activities
- Public Service Activities
  - Basic Needs Related to Social Services Programs (such as but not limited to emergency food, shelter (homelessness), and utility assistance)
- Community Public Safety Programs
- Capital Improvement Activities
- Fair Housing Activities

For entitlement/consortia grantees: Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. (91.220(2)).

Not applicable.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

MA-40 Barriers to Affordable Housing – 91.210(e)

Describe any negative effects of public policies on affordable housing and residential investment.

In 2023, the city completed an Analysis of Impediments to Fair Housing Choice (AI). During the production of this analysis the city identified several potential barriers to fair housing and affordable housing. The barriers to affordable housing are listed below. Further details are provided in the city's AI.

- Lack of a Balanced Housing Stock.
- Need for Utilization of Bilingual Housing Materials.
- Rapid Increase in Home Prices and Cost Burdened Households.
- Reduction in Housing Funds.
- High Number of Cost Burdened Renters.

The City does not have growth limits, or policies and ordinances that regulate the number of housing units that can be constructed annually. The City does not have ordinances such as rent control that directly affect the residential investment rate of return. In affordable for-sale and for-rent projects, however, the City does enact controls to maintain affordability. For instance, in HOME-assisted ownership projects the City implements a recapture policy.

Furthermore, tax policy affecting land and other property is governed by California state law. Property taxes are based on a property's assessed value. State law mandates that all property is subject to taxation unless otherwise exempted. In general, properties that are owned and used by educational, charitable, religious, or government organizations may be exempt from certain property taxes. Housing for low-income households owned and operated by a qualifying nonprofit organization is eligible for exemption from property taxes.

MA-45 Non-Housing Community Development Assets – 91.215 (f)

Introduction

This section provides insight into the economic development landscape of the City of Moreno Valley. The table below details the extent of business sector employment throughout the city. Unemployment, commuting times, and education are also analyzed in this section.

Economic Development Market Analysis

This section provides insight into the non-housing assets within the community, with a focus on economic activity and education levels. These are used to identify areas of concern or sectors to reinforce support.

Business Activity

Business by Sector	Number of Workers	Number of Jobs	Share of Workers %	Share of Jobs %	Jobs less workers %
Agriculture, Mining, Oil & Gas Extraction	573	33	0	0	0
Arts, Entertainment, Accommodations	8,102	4,645	9	11	2

Table 39 - Business Activity

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

Alternate Data Source Name: 2017-2021 ACS (Workers), 2019 LEHD (Jobs)

Data Source Comments: The Business Activity table above compares the number of workers to the number of jobs in the city. At this time, the most recent data set for the number of jobs was 2019 from the Longitudinal Employer-Household Dynamics (LEHD), US Census Bureau. Data from the 2017-2021 ACS 5-Year estimates was used for comparison.

Share of Workers and Jobs

In the above table the prevalence of both workers and jobs by sector is presented. There are nearly twice as many workers than jobs. There are nearly 44,000 more workers in the city. In addition to the discrepancy in raw numbers, there are significant gaps in specific sectors. Overall, there is a 160,000-job discrepancy. The largest gap is in the Retail Trade sector which has nearly 7,700 more workers than jobs. Transportation and Warehousing is the only sector with more jobs than workers.

Labor Force

Total Population in the Civilian Labor Force	99,492
Civilian Employed Population 16 Years and Over	91,490
Unemployment Rate	3.7%
Unemployment Rate for Ages 16-24	18%
Unemployment Rate for Ages 25-65	7%

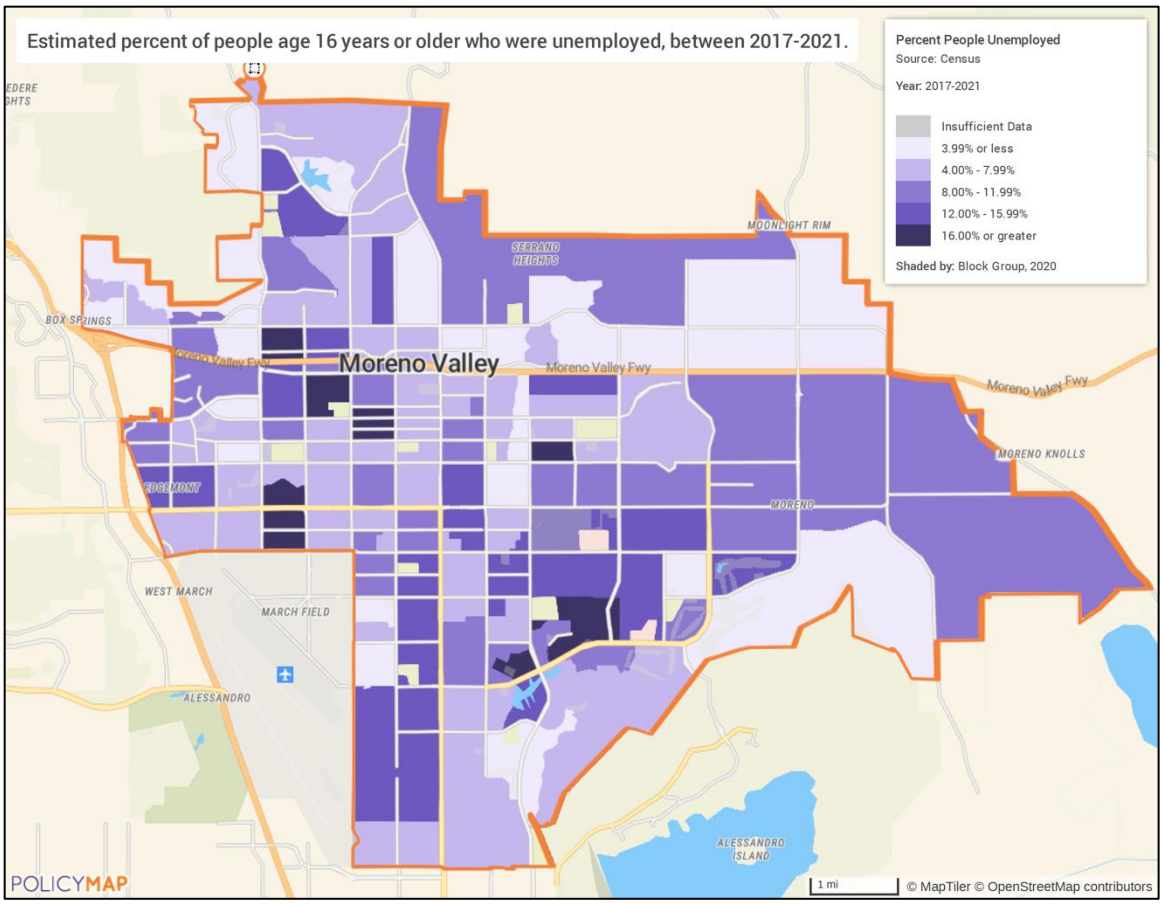
Table 40 - Labor Force

Data Source: 2017-2021 ACS
Data Source Comments: Unemployment Rate data is from the BLS, November 2022. All other labor force data is from the 2017-2021 ACS including unemployment rate by age.

Unemployment

There are two primary sources used to analyze the unemployment rate in the city for this report. They each have pros and cons, but when taken together they can provide a clearer view of unemployment in the city. The first source is the US Census Bureau's American Community Survey 5-Estimates (ACS). In the ACS, unemployment data is only taken annually, and the most recent data is from 2021. It is also an average of the five years included, which does not necessarily provide an accurate view of recent employment trends. However, the ACS data is available at a block group level and can help identify any areas that have disproportionately high unemployment. The most recent unemployment rate is 3.7%, according to ACS. There is a large difference between the unemployment rate for eligible workers under the age of 25 and those between 25 and 65. The following map shows the difference in unemployment rates by block group. There is no clear pattern, but some tracts have an unemployment rate that is triple the rate in other block groups.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT



Source: ACS 2017-2021 via PolicyMap

The second source is the Bureau of Labor Statistics. This measurement of unemployment is updated monthly and provides insight into trends at the city level. It is not available at the census tract or block group level and therefore provides a look at employment as it relates to time, while the ACS looks at employment as it relates to space.

The tables below show that the unemployment rate in the city has steadily decreased over the last decade except for 2020 due to the impacts of the COVID-19 pandemic. Additionally, according to the monthly unemployment rates during 2022 (most current data at the time of plan development), the overall downward trend of unemployment levels remained steady, highlighting a strong labor market.

2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
12.5	10.7	8.8	7.2	6.4	5.6	4.6	4.4	10.8	8.4	4.4

Table 44 - Table: BLS Unemployment by Year

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
6.4	5.6	4.6	4.2	3.6	4.1	3.9	4.1	3.9	4.0	4.5	3.9

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Occupations by Sector	Number of People
Management, Business, and Financial	22,617
Farming, Fisheries, and Forestry Occupations	357
Service	17,091
Sales and Office	19,824
Construction, Extraction, Maintenance, and Repair	11,487
Production, Transportation, and Material Moving	20,114

Table 41 – Occupations by Sector

Data Source: 2017-2021 ACS

Occupations by Sector

In the table *Occupations by Sector*, occupations by sector are analyzed. Instead of showing which sectors are most common, as the table at the beginning of this section did, this shows what type of jobs are available in each sector. For example, this table would include a manager of a fast-food restaurant and the manager of a logging company in the same category (Management, Business, and Financial) while in the earlier table they would be in separate categories. In Moreno Valley, the most prominent occupation sector is the Management, Business, and Financial sector. Over 22,500 people are employed in that sector. The second largest sector is Production, Transportation, and Material Moving with 20,114 people and the third largest is Sales and Office with 19,824.

Travel Time

Travel Time	Number	Percentage
< 30 Minutes	37,815	45%
30-59 Minutes	29,598	35%
60 or More Minutes	16,434	20%
Total	***83,846***	***100%***

Table 42 - Travel Time

Data Source: 2017-2021 ACS

All other things being equal, residents would rather live in the same area as their job. Relative to short commutes, long commute times are associated with lower life satisfaction, increased stress, obesity, anxiety, depression, and increased exposure to pollutants. This is particularly true when compared to commuters who use bicycles or walk to work. Less than half of the residents in Moreno Valley commute less than 30 minutes. Most residents commute longer than 30 minutes and 20% commute more than an hour.

Education

Educational Attainment by Employment Status (Population 16 and Older)

Educational Attainment	In Labor Force		
	Civilian Employed	Unemployed	Not in Labor Force
Less than high school graduate	13,535	1,664	7,869
High school graduate (includes equivalency)	22,893	2,610	8,094
Some college or Associate's degree	25,129	1,854	7,655
Bachelor's degree or higher	13,853	1,117	3,152

Table 43 - Educational Attainment by Employment Status

Data Source: 2017-2021 ACS

Educational attainment is one of the best indicators of economic success, both in attaining a job and receiving a higher wage. In Moreno Valley, the unemployment rate for a person without a high school diploma is 11% while the rate for a resident with a bachelor's degree or higher is only 7.5%. The labor participation rate is also higher for those with higher educational attainment. Approximately 34% of residents without a high school diploma are not in the workforce, which is higher than the 17% for those with bachelor's degrees.

Educational Attainment by Age

	Age				
	18–24 yrs.	25–34 yrs.	35–44 yrs.	45–65 yrs.	65+ yrs.
Less than 9th grade	255	736	1,950	7,585	3,971
9th to 12th grade, no diploma	2,276	3,210	3,724	5,278	1,574
High school graduate, GED, or alternative	9,609	12,273	7,924	12,838	3,885
Some college, no degree	8,492	8,876	6,424	10,469	4,169
Associate's degree	974	2,690	2,381	3,489	1,949
Bachelor's degree	1,301	4,718	3,388	4,205	2,575
Graduate or professional degree	87	1,504	1,964	2,235	1,184

Table 44 - Educational Attainment by Age

Data Source: 2017-2021 ACS

There are nearly 15,000 residents that have less than a 9th grade education, the majority of whom are over the age of 45. Over 20% of residents over 65 years old have less than a 9th grade education. Also, there are approximately 16,000 residents with a 9th grade education but without a high school diploma. As noted above, education is closely related to employment, and without a high school diploma or equivalent these residents may struggle to find stable employment and sustainable living wages.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Educational Attainment – Median Earnings in the Past 12 Months

Educational Attainment	Median Earnings in the Past 12 Months
Less than high school graduate	29,300
High school graduate (includes equivalency)	35,194
Some college or Associate's degree	41,325
Bachelor's degree	53,351
Graduate or professional degree	76,397

Table 45 – Median Earnings in the Past 12 Months

Data Source: 2017-2021 ACS

As mentioned earlier in the plan, educational attainment and earnings are linked. The annual wage difference based on education can lead to substantial wealth differences over time. A person who graduates high school and works from the age 18 to 65 will earn approximately $1,377,100 during their working life. A person with a bachelor's degree who works from age 23 to 65 will earn $2,240,742. That is nearly 40% more with fewer years of work. Additionally, this added financial benefit does not consider that most jobs that require a bachelor's degree tend to have benefits like health insurance, and the higher income can lead to investments, purchasing a home instead of renting, and other activities that can increase wealth substantially.

Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?

According to the Business Activity table, the Education and Healthcare sector provides the highest percentage of all workers and jobs in the area. Approximately 19% of workers and 39% of jobs are in that field. Most jobs are in a different sector. The sector with the second largest number of workers is Professional, Scientific, Management Services; and the sector with the second largest number of jobs is Retail Trade.

Describe the workforce and infrastructure needs of the business community.

Among the workforce characteristics local Inland Empire companies are seeking as they add workers are:

- Higher education providing the skills needed by employees (new employees need to recognize that skills and technical abilities are changing rapidly, and workers must continue with training and certifications to stay current).
- Acquire the appropriate technical education and training to fill employer needs.

Among the city's priority objectives for funding are economic development and capital improvement activities. The city staff assess the needs of the communities yearly and include specific activities when developing its Annual Action Plan.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.

Moreno Valley recently allocated $50 million toward repaving nearly 190 miles of road throughout the city and set aside $5.5 million to strengthen the city's public safety initiatives. The city has welcomed several electric vehicle manufacturers in recent years, bringing job opportunities to its residents. The city's economic incentive efforts have helped create nearly 26,000 local jobs since 2011. The city has plans in the works for the revitalization of the Moreno Valley Mall, the Moreno Valley Town Center, and Aquatic Center, as well as park renovation projects.

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

As noted earlier in the plan, there is currently a significant disconnect between workers and jobs in the city. There are nearly 44,000 more workers than jobs in the community. Except for the Agriculture sector, every sector requires between 1,000 and 7,700 jobs for workers to stay in the city.

Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction's Consolidated Plan.

The City of Moreno Valley partners with Riverside County to provide a small business resource center for both owners and job seekers. This program is called the Business and Employment Resource Center (BERC). BERC provides several services, including:

- Access to computers and the internet
- Workshops, training, and recruitment events
- Resume assistance
- Resource library
- Hot jobs announcements
- Career assessment software
- Veteran's employment services and resources

Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)?

Yes

If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

The City of Moreno Valley is part of the County of Riverside CEDS. The most recent strategy is the 2019-2024 Five Year Plan. Five goals were identified at the county level, all of which also apply to the City of Moreno Valley.

- Goal 1: Increase access to high-paying jobs.
- Goal 2: Provide a world-class education.
- Goal 3: Provide quality housing.
- Goal 4: Promote and provide culturally rich activities.
- Goal 5: Enhance safe and healthy communities.

MA-50 Needs and Market Analysis Discussion

Are there areas where households with multiple housing problems are concentrated?

HUD identifies four specific data points that constitute "housing problems". Housing problems include:

1. Housing units that lack complete kitchen facilities.
2. Housing units that lack complete plumbing facilities.
3. Households with more than one person per room (i.e., overcrowding).
4. Cost Burden - monthly housing costs (including utilities) exceeding 30% of monthly income.

Areas of concentration are census tracts that have two or more housing problems that are substantially higher than the city average. For this analysis, “substantially higher” is based on the HUD provided standards set in the Needs Assessment section of the plan. A tract with a housing problem rate of 10% higher than the city average is considered substantially higher. To provide a more nuanced analysis, “cost burden” has been split into renter cost burden and homeowner cost burden.

Citywide Rate

- Overcrowding: 10.5%
- Lack of Complete Plumbing Facilities: 0.2%
- Lack of Complete Kitchen Facilities: 0.4%
- Renter Cost Burden: 62.8%
- Homeowners Cost Burden: 37.9%

Substantial Rate

- Overcrowding: 20.5%
  - No areas of concentration
- Lack of Complete Plumbing Facilities: 10.2%
  - No areas of concentration
- Lack of Complete Kitchen Facilities: 10.4%
  - No areas of concentration
- Renter Cost Burden: 72.8%
  - Census Tract 424.03 – 77.3%
  - Census Tract 424.09 – 75.4%
  - Census Tract 424.10 – 89.2%
  - Census Tract 425.13 – 76.3%
  - Census Tract 425.14 – 80.5%
  - Census Tract 425.19 – 82.2%
  - Census Tract 425.21 – 84.1%
  - Census Tract 425.22 – 80.4%
  - Census Tract 489.01 – 85.2%
- Homeowner Cost Burden: 47.9%

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

- Census Tract 425.10 – 66.0%
- Census Tract 425.11 – 51.6%
- Census Tract 425.14 – 49.1%
- Census Tract 426.22 – 50.4%
- Census Tract 490.01 – 48.1%

Cost burdens create the bulk of housing problems. There are 14 tracts with a concentration of housing cost burden, but no tracts have a concentration of multiple housing problems. Substandard housing does not contribute greatly to housing problems.

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated?

Race/Ethnicity

For the purposes of this analysis, a concentration is any census tract where the racial or ethnic minority group makes up 10% more than the city average.

Citywide Rate

- Asian, non-Hispanic: 5.2%
- Black or African American, non-Hispanic: 17.6%
- Multiracial, non-Hispanic: 2.5%
- Multiracial, Hispanic: 7.0%
- Hispanic, all races: 60.4%

Concentration Rate

- Asian, non-Hispanic: 15.2%
- Black, non-Hispanic: 27.6%
- Multiracial, non-Hispanic: 12.5%
- Multiracial, Hispanic: 17.0%
- Hispanic, all races: 70.4%

Due to the small size of other racial groups a comparison could not be conducted. Each group had a total population of less than 1%.

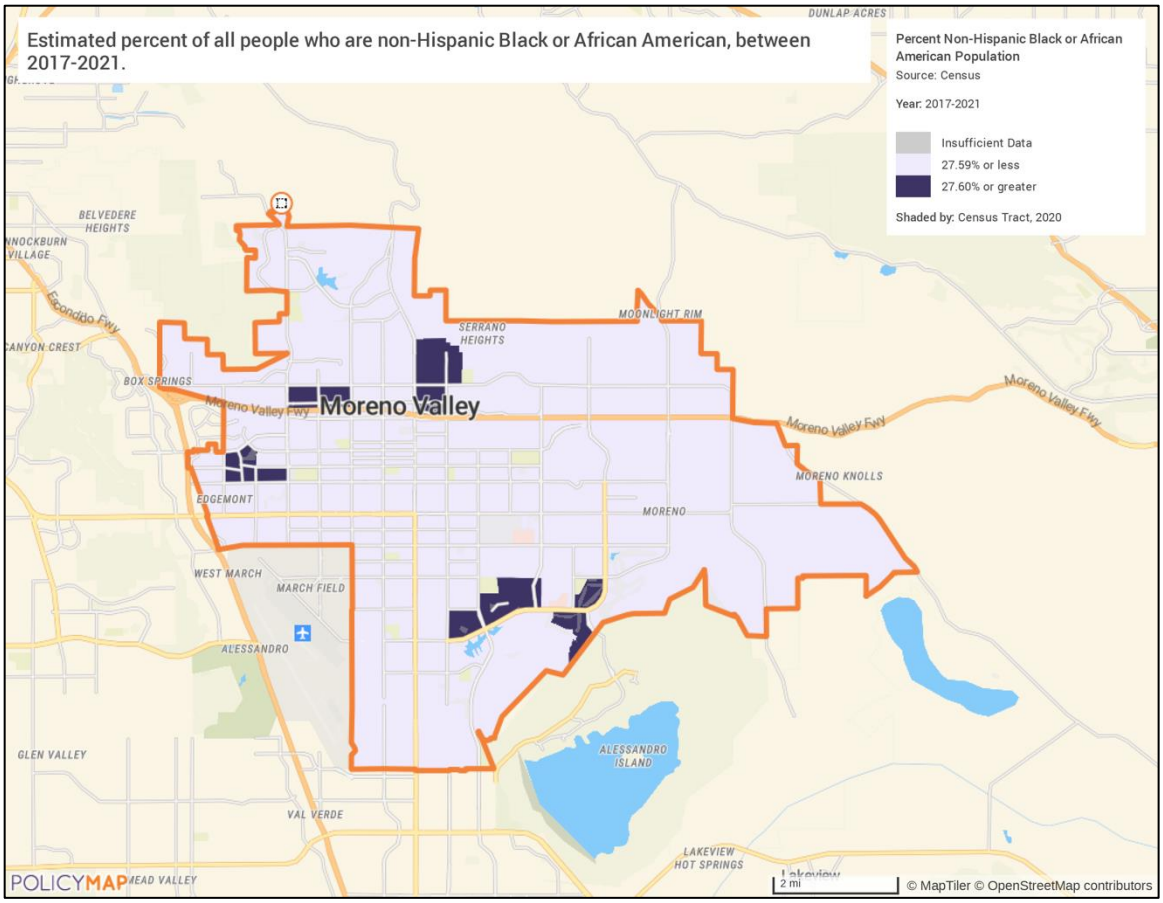
Black, non-Hispanic

There are multiple tracts that have a concentration of Black, non-Hispanic residents. As the map below shows, there are two general areas with a concentration of this population. One area encompasses multiple tracts on the northwest side of the city and one area is in the southern tip.

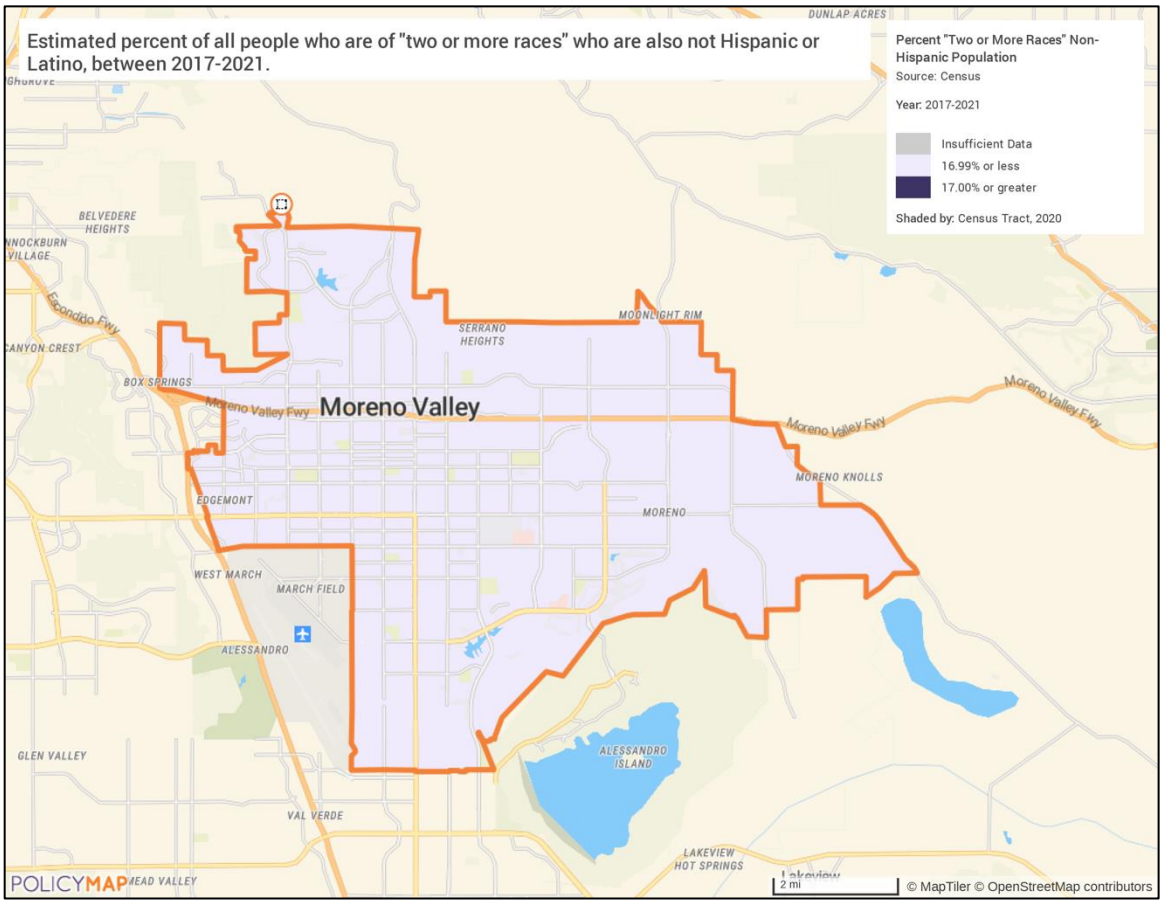


Source: ACS 2017-2021 via PolicyMap

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Multiracial, non-Hispanic

There are no tracts that have a concentration of multiracial, non-Hispanic residents.

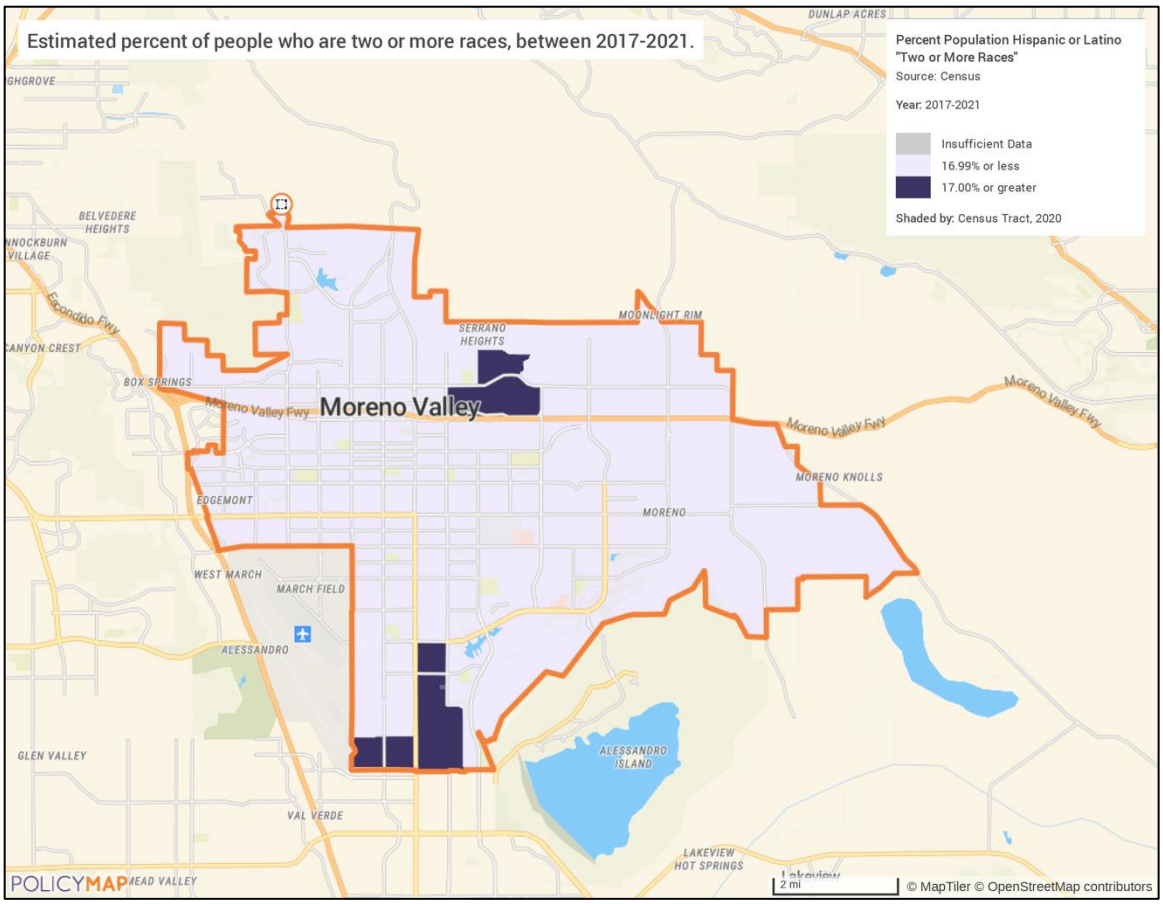


Source: ACS 2017-2021 via PolicyMap

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Multiracial, Hispanic

There are a few tracts that have a concentration of multiracial, Hispanic residents. As the map below shows, there are two general areas with a concentration of this population. One area encompasses tracts on the northcentral part of the city and one area is in the south.

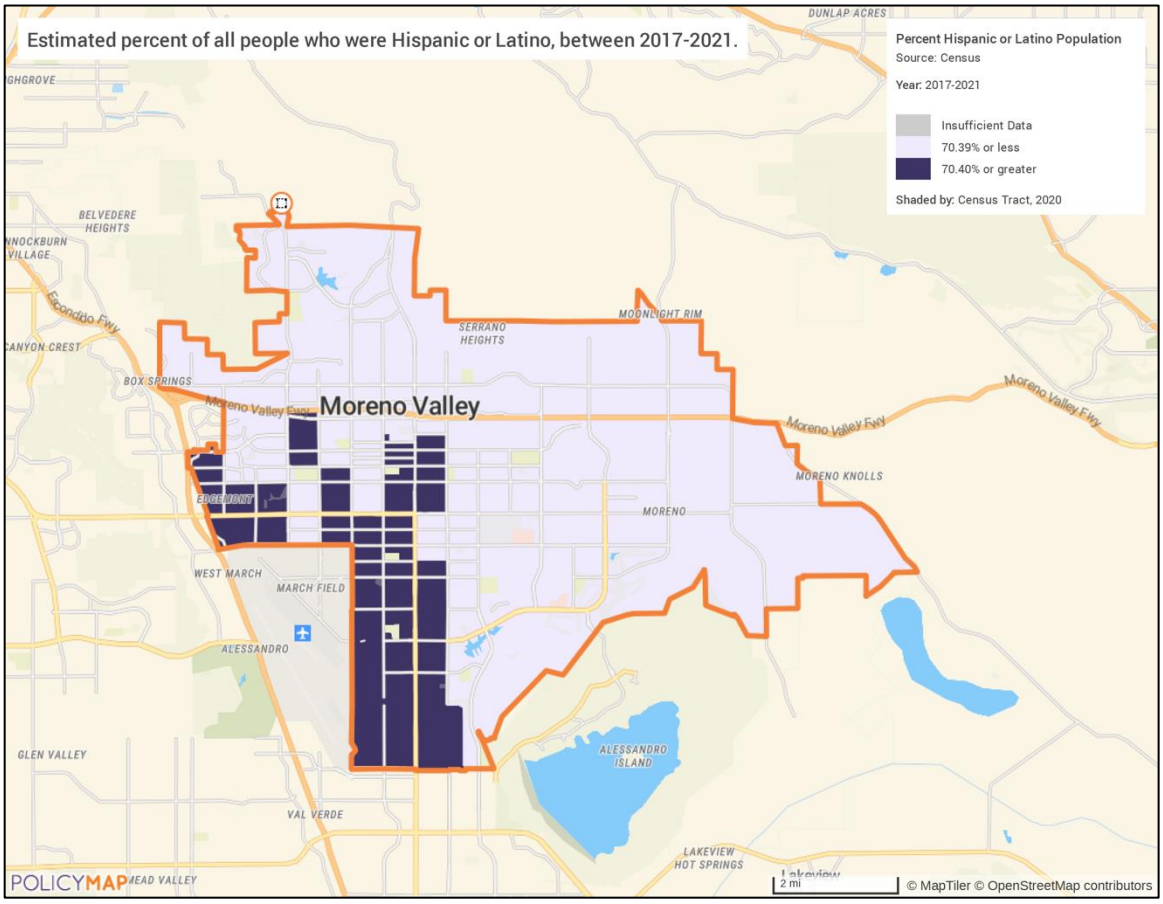


Source: ACS 2017-2021 via PolicyMap

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Hispanic, all Races

Moreno Valley has multiple census tracts that have a concentration of Hispanic residents. As the map below shows, the southwest quadrant of the city has a large Hispanic population.

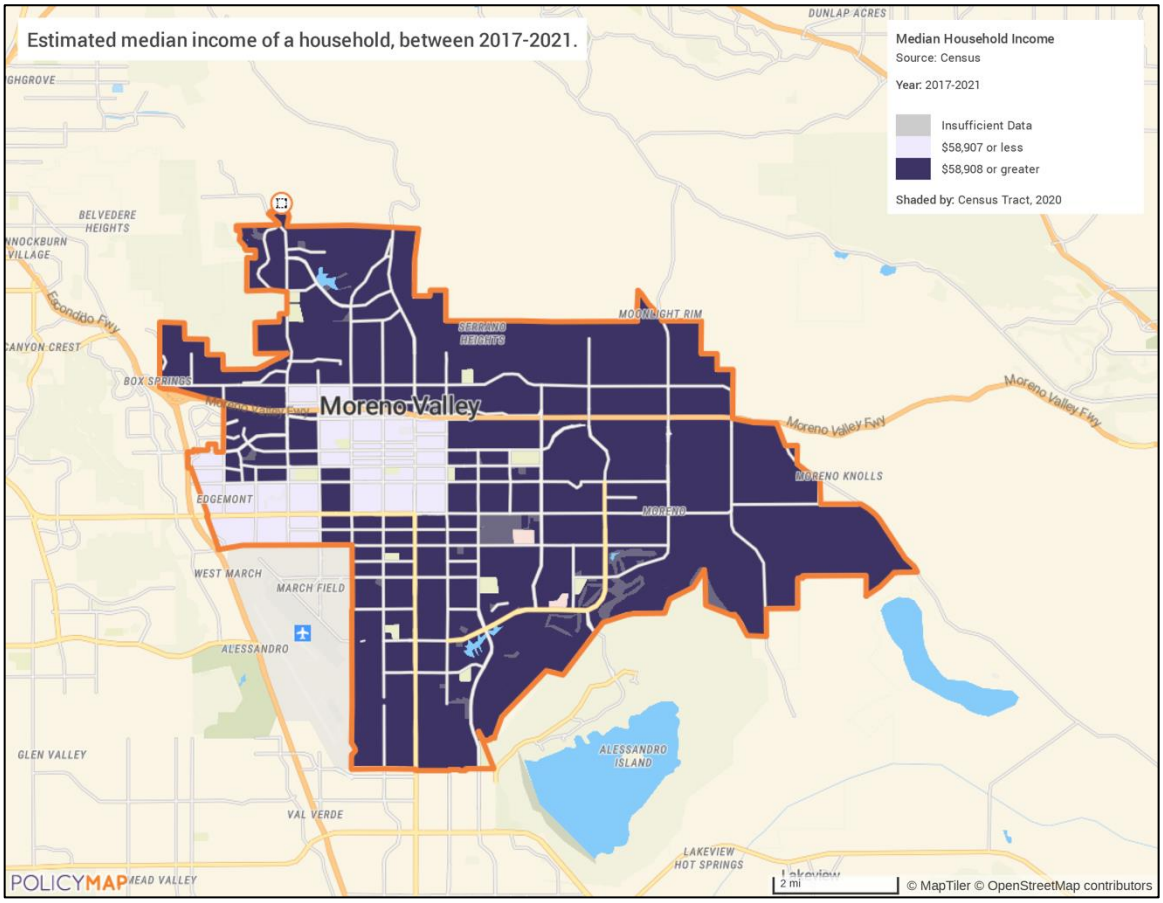


Source: ACS 2017-2021 via PolicyMap

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Low-Income Families

A family is considered low-income if it earns less than 80% of the area median income. A tract has a concentration of low-income families if the tract's median household income is less than 80% of the area median household income. The city median family income is $73,635 and relatively low-income is $58,908. Using this definition, the tracts on the west side of the city have a concentration of low-income families. These tracts match the areas with a concentration of Hispanic households and a concentration of Black, non-Hispanic households.



Source: ACS 2017-2021 via PolicyMap

What are the characteristics of the market in these areas/neighborhoods?

In the areas of the city that have disproportionately large number of low-income households, the housing market shows some unique characteristics. The units that tend to be older and have an increased risk of lead-based paint hazard overlap many of the same areas in the city. The units also tend to be in larger multi-family developments and have an increased rate of housing problems, which is common in older homes. Additionally, housing units in these areas have lower rents and home values. Due to the lower housing price in this area, it is possible that these areas are a prime place for reinvestment and improvement.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Are there any community assets in these areas/neighborhoods?

There are several community assets in this relative area. The following community centers are in the area and accessible to residents: Edgemont Community Center, Towngate Community Center, and Moreno Valley Community Education Center. The Moreno Public Library also has 2 locations in this area. The city has 24 affordable housing developments located in this concentrated area that are priced at below market rate and leased to very-low- to moderate-income households. On the perimeter of the area lies Highway 265 and 60 providing transportation opportunities for residents and businesses.

Are there other strategic opportunities in any of these areas?

The Village Specific Plan includes a portion of this geographic area. A purpose of the Village Plan is to revitalize the neighborhoods by providing a vision for the area and to create a balanced distribution of land uses. CDBG funds have been expended in the Village area including the installation of curbs, gutters, and sidewalks; park improvements; and street improvements. In addition to this Specific Plan and other redevelopment projects, there are several economic opportunities in the identified area that aim to create a robust walkable community where jobs, recreation, and housing can thrive in one place.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

MA-60 Broadband Needs of Housing occupied by Low- and Moderate-Income Households - 91.210(a)(4), 91.310(a)(2)

Describe the need for broadband wiring and connections for households, including low- and moderate-income households and neighborhoods.

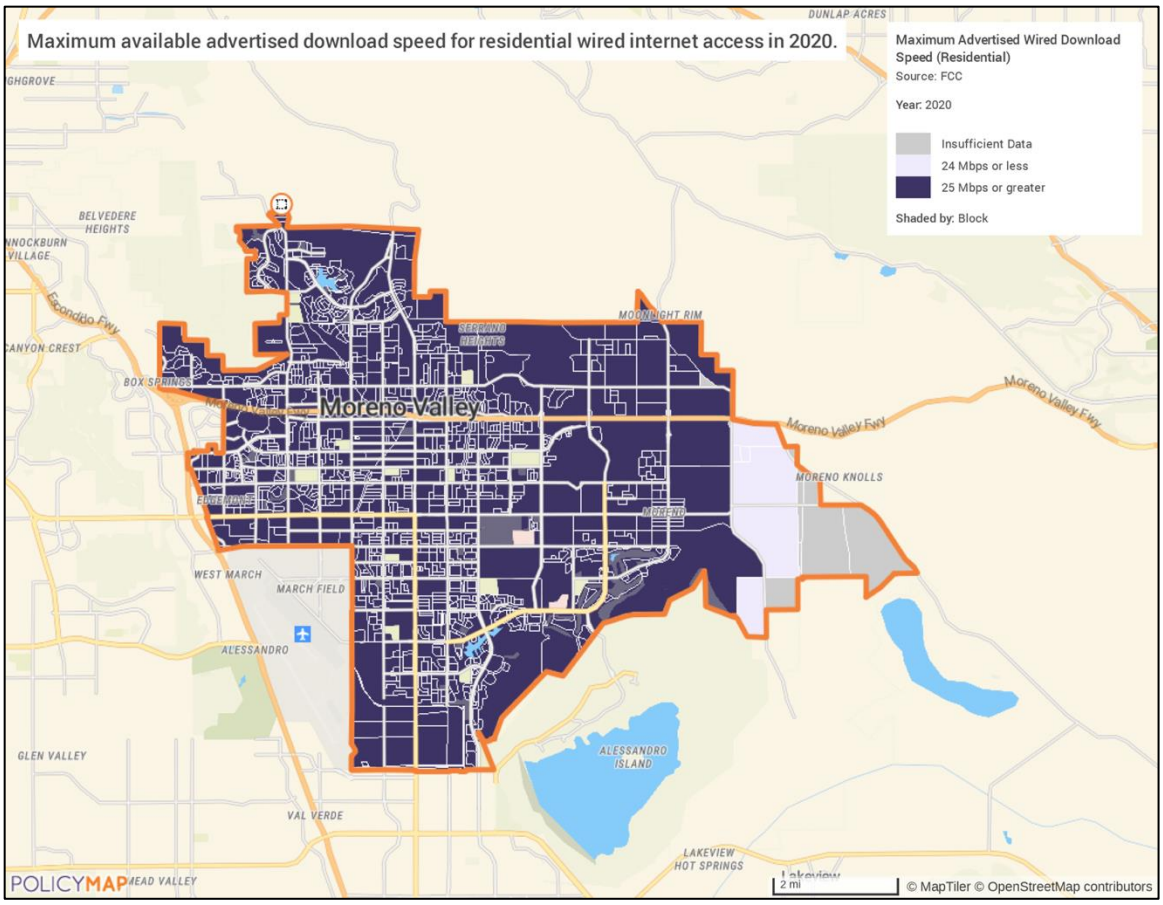
Internet is an essential communications and information platform that allows users to take advantage of the increased interconnectedness of business, education, commerce, and day-to-day utility. The FCC definition of broadband includes download speeds faster than 25 Mbps. Broadband is accessible to 99.6% of Moreno Valley.

Reliable access to the internet is a necessity to thrive in the modern economic environment. Communities that lack broadband access struggle to keep pace with the country. Locations without broadband access impedes its population's ability to take advantage of the educational and entrepreneurial opportunities available online. This is particularly problematic for LMI areas where economic opportunities are already often lacking. Moreno Valley does not have significant gaps in broadband coverage in the residential areas. Nearly all the city has multiple options of internet providers, to include LMI areas.

According to Stanford University, the "digital divide" refers to the growing gap between the underprivileged members of society, especially the poor, rural, elderly, and handicapped portion of the population who do not have access to computers or the internet; and the wealthy, middle class, and young Americans living in urban and suburban areas who have access. RIVCOconnect is a Riverside County initiative, supported by the Riverside County Board of Supervisors and Executive Office, and led by Riverside County Information Technology (RCIT), that seeks to remove the roadblocks that obstruct service providers from building out current infrastructure. RIVCOconnect invites the private sector to deliver broadband services Countywide at speeds of 1 Gbps and above. RIVCOconnect also has a Digital Equity Program that provides refurbished computers to low-income families and non-profit organizations within Riverside County at no cost.

The following map shows broadband access throughout the city. The FCC definition of broadband includes download speeds faster than 25 Mbps. FCC data shows three major infrastructure options within Moreno Valley: cable, DSL, and fiber.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT



Source: ACS 2017-2021 via PolicyMap

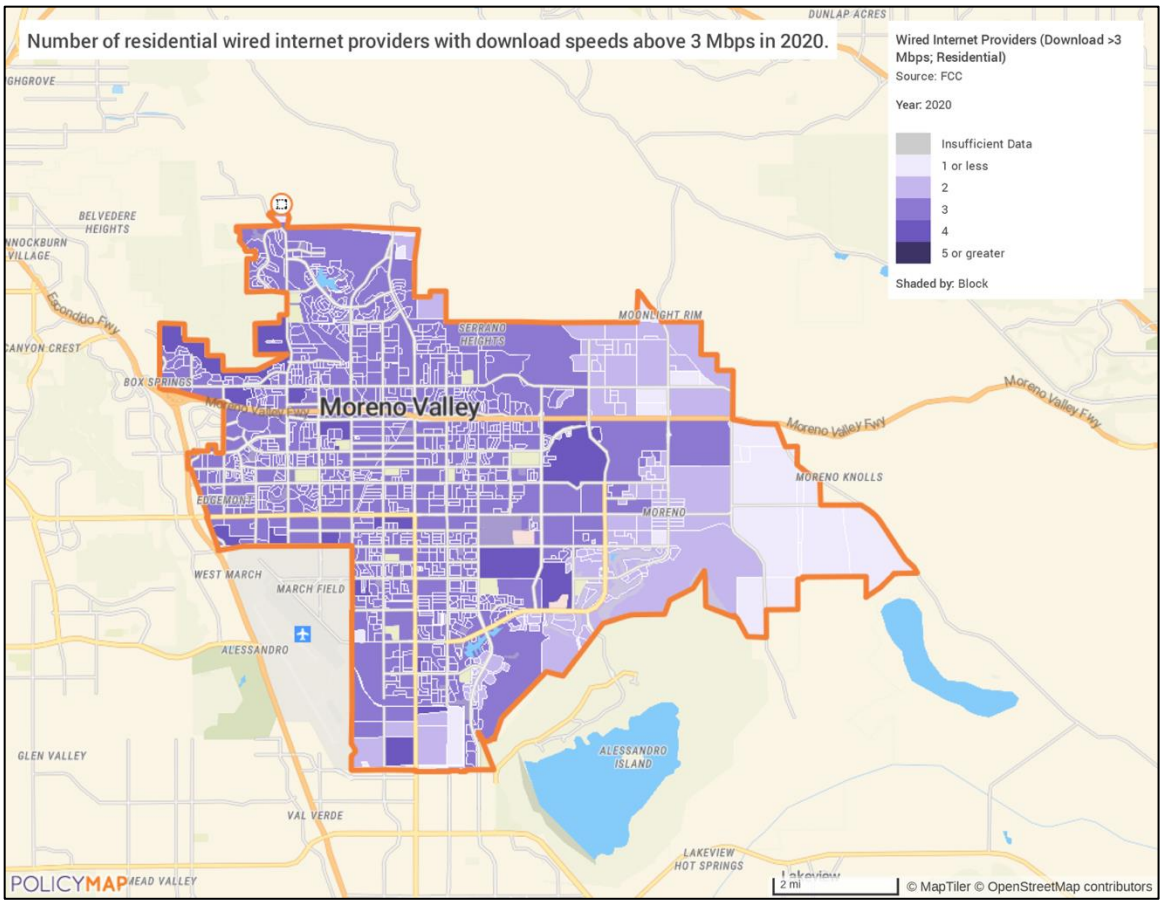
Describe the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction.

Once broadband access has been obtained, it is important to ensure there is competition among service providers. Any resource that has a de facto monopoly on an area may not be incentivized to provide standard and consistent services. The city has three types of internet service providers: cable, DSL and fiber. There are 22 internet service providers in Moreno Valley. The following providers who cover over 95% of the city with broadband:

- Spectrum (Cable)
- Frontier (Fiber)
- Viasat Internet (Satellite)
- HughesNet (Satellite)

The following map shows the number of broadband service providers by block. Most of the residential areas in the city have two (2) options of high-speed internet with competitive providers, though there are some tracts with lower populations that only have access to one provider.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT



Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

MA-65 Hazard Mitigation - 91.210(a)(5), 91.310(a)(3)

Describe the jurisdiction's increased natural hazard risks associated with climate change.

The City of Moreno Valley is in the northwestern portion of Riverside County, surrounded by the Box Springs Mountains, the hills of the Badlands and the mountains of Lake Perris State Recreation Area. According to the city's 2011 Local Hazard Mitigation Plan (LHMP), because of the topography and the climate, the air basin of the city allows for high air pollution potential.

Additionally, the LHMP identifies multiple natural hazard risks and their probability and severity. The most probable risk identified is power outage, followed by earthquakes, wildland and urban fires, flooding, drought, extreme weather, and severe wind. The most severe of these potential risks would be earthquakes. Three major faults directly affect Moreno Valley: the San Andreas Fault, the San Jacinto Fault, and the Elsinore Fault. The San Jacinto Fault is considered the most active fault in Southern California and is the closest to the city, running through its eastern side.

Riverside County's 2019 Local Hazard Mitigation Plan Identifies similar increased natural hazard risks, citing earthquakes, fire, and flooding as the most prominent risks for the County area.

Describe the vulnerability to these risks of housing occupied by low- and moderate-income households based on an analysis of data, findings, and methods.

Low- and moderate-income residents in the area are incredibly vulnerable to the risks of these climate-based natural hazards. While the risks of earthquakes widely depend on the severity, sudden ground shaking has the potential to severely damage housing stock. According to Riverside County's LHMP, a moderate earthquake can cause serious damage to property, including collapsing walls, breaking glass, and more.

LMI residents also face the greatest risk of social and financial impact from exposure to wildfires in wildland-urban interface (WUI) areas. These are areas where structures and other human development meet or intermingle with undeveloped wildland or vegetative fuels, making them much more susceptible to fire. Wildfires can often become uncontrollable and cause severe damage and destruction to the local housing stock.

Additionally, LMI households typically have fewer economic resources, are less able to respond to a disaster without assistance and are less likely to be able to access available local, state, and federal assistance needed for recovery. Dramatic increases in electricity or housing costs can put LMI households at risk of homelessness. Special populations such as people with disabilities, non-English speakers, and homeless individuals are disproportionately more likely to need additional support, such as medical equipment, access to evacuation information, or basic shelter.

Strategic Plan

SP-05 Overview

Strategic Plan Overview

The Strategic Plan is the centerpiece of the Consolidated Plan. The Plan describes:

- General Priority Needs
- Influence of Market Conditions
- Anticipated Resources
- Institutional Delivery System
- Goals Summary
- Public Housing Accessibility and Involvement
- Barriers to Affordable Housing
- Homeless Strategy
- Lead Based Paint Hazards
- Anti-Poverty Strategy
- Monitoring

Key components of the Strategic Plan include three strategies: homeless strategy, actions to reduce lead-based paint hazards, and anti-poverty strategy. The nature and scope of each strategy is described below.

Homeless Strategy

- Outreach to homeless persons (especially unsheltered persons) and assess their individual needs.
- Fill gaps created by lack of emergency shelter and transitional housing needs for those experiencing homelessness.
- Help homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living.
- Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are:
    1. Likely to become homeless after being discharged from publicly funded institutions and systems of care.
    2. Receiving assistance from public and private agencies that address housing, health, social services, employment, education, or youth needs.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Reduction of Lead-Based Paint Hazards Strategy

- Actions to evaluate and reduce lead-based paint hazards.
- Actions to increase access to housing without health hazards.
- How actions will be integrated into housing policies and programs.
- How the actions are related to the extent of lead poisoning and hazards.

Anti-Poverty Strategy

- Establish goals, programs, and policies for reducing the number of poverty-level families such as:
    - Activities designed to reduce the number of persons in poverty.
    - Coordination of housing programs funded through the Consolidated Plan with other City funding.
    - Job training, job placement, life skills training, and welfare to work programs.
    - Policies for providing employment and training opportunities to Section 3 residents pursuant to 24 CFR 135.

SP-10 Geographic Priorities – 91.215 (a)(1)

Geographic Area

1	**Area Name**	Eligible CDBG Target Areas
	Area Type	Local Target Area
	HUD Approval Date	N/A
	% of Low/Mod	N/A
	Revital Type	Comprehensive
	Other Revival Type Description	N/A
2	**Area Name**	Citywide
	Area Type	Local Target Area
	HUD Approval Date	N/A
	% of Low/Mod	N/A
	Revital Type	Comprehensive
	Other Revival Type Description	N/A

Table 46 - Geographic Priority Areas

General Allocation Priorities

The CDBG program requires that each CDBG-funded activities principally benefit low- and moderate-income persons, aid in the prevention or elimination of slums or blight, or meet a community development need having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community and other financial resources are not available to meet that need. With respect to activities that principally benefit *low- and moderate-income persons, at least 51% o*f the activity's beneficiaries must be low and moderate income.

Some CDBG assisted activities, such as parks, neighborhoods, public facilities, community centers and streets, serve an identified geographic area. These activities generally meet the low- and moderate-income principal benefit requirement if 51% of the residents in the activity's *service area* are low- and moderate- income.

When determining the geographic locations where Moreno Valley will allocate its investments, staff will consider if the activity will be physically located within a designated CDBG Target Area, and if the activity is meant to directly benefit the low-to-moderate income population in that area.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

The City may also consider current poverty levels of an area when determining geographic location priorities. Poverty levels can act as a measure of need, providing staff with insight to fund services appropriately. Staff will also take public demand into account, recommendations from other City departments (such as Code Enforcement, Capital Projects, or the Police Department), reports from CDBG subgrantees which track referrals and measure trends in service levels, recommendations of other local entities such as the Continuum of Care, Department of Public Social Services, Housing Authority, Economic Development Agency, and local non-profits.

SP-25 Priority Needs - 91.215(a)(2)

Priority Needs

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

1	**Priority Need Name**	Substandard Housing
	Priority Level	High
	Population	Extremely Low Low Moderate Elderly Frail Elderly Persons with Physical Disabilities
	Geographic Areas Affected	CDBG TARGET AREA(S)
	Associated Goals	Housing and Neighborhood Improvement Activities
	Description	Rehabilitated mobile homes and single-family homes in need of repairs.
	Basis for Relative Priority	The 2014-2021 Housing Element indicates that mobile homes and single-family homes exhibit substandard housing conditions. Moreno Valley's existing housing stock includes 1,364 mobile homes of which 872 are in seven mobile home parks. The existing housing stock contains 45,220 single family dwellings. T
2	**Priority Need Name**	Homelessness
	Priority Level	High
	Population	Extremely Low Chronic Homelessness Persons with Mental Disabilities Victims of Domestic Violence
	Geographic Areas Affected	CDBG TARGET AREA(S)
	Associated Goals	Homeless/Homelessness Prevention Activities
	Description	Address and prevent homelessness.
	Basis for Relative Priority	In Moreno Valley at least 42.5% of the population experience cost burdens, which is a factor of being at risk of homelessness.
3	**Priority Need Name**	Public Facilities and Infrastructure

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

	Priority Level	High
	Population	Extremely Low Low Moderate
	Geographic Areas Affected	CDBG TARGET AREA(S)
	Associated Goals	Capital Improvement Activities
	Description	Some of the public facilities such as parks and public buildings which are in low and moderate neighborhoods need improvement and some neighborhoods lack adequate drainage systems, water lines, traffic signals, street lighting and street improvements.
	Basis for Relative Priority	Moreno Valley has a wide range of community development issues, particularly in older neighborhoods where the housing stock, public improvements and community facilities are deteriorating, and businesses are declining.
4	**Priority Need Name**	Public Service Programs
	Priority Level	High
	Population	Extremely Low Low Moderate Elderly Frail Elderly Persons with Physical Disabilities Other
	Geographic Areas Affected	CDBG TARGET AREA(S)
	Associated Goals	Public Service Activities
	Description	Improving the quantity and quality of public services, principally for low-and- moderate income persons, including the homeless, elderly, and disabled
	Basis for Relative Priority	The responses to notices of CDBG, CDBG and HOME funding availability have demonstrated the need to continue to financially support the activities of organizations addressing the needs of low- and moderate-income persons

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

5	**Priority Need Name**	Housing Discrimination
	Priority Level	High
	Population	Extremely Low Low Moderate Large Families Families with Children Elderly Frail Elderly Persons with Mental Disabilities Persons with Physical Disabilities Persons with Developmental Disabilities Victims of Domestic Violence
	Geographic Areas Affected	Citywide
	Associated Goals	Fair Housing Activities
	Description	Need for fair housing and tenant/landlord counseling services
	Basis for Relative Priority	HUD requirement to engage in efforts to further fair housing choice.
6	**Priority Need Name**	Economic Development
	Priority Level	High
	Population	Extremely Low Low Moderate
	Geographic Areas Affected	Citywide
	Associated Goals	Economic Development Activities
	Description	Strong economic development is needed to retain and attract businesses and to reduce the unemployment and poverty rates
	Basis for Relative Priority	Economic development was identified as a priority need by the City's Economic Development Strategy Plan and research and analysis completed for several planning studies
7	**Priority Need Name**	Planning and Administration

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

	Priority Level	High
	Population	Extremely Low Low Moderate Large Families Families with Children Elderly Frail Elderly Persons with Mental Disabilities Persons with Physical Disabilities Persons with Developmental Disabilities Persons with Alcohol or Other Addictions Non-housing Community Development
	Geographic Areas Affected	Citywide
	Associated Goals	Planning and Administration
	Description	Overall program management, coordination, monitoring, and evaluation of projects funded by CDBG, HOME and ESG funds and the preparation of the Annual Action Plans and CAPERs.
	Basis for Relative Priority	Administration of HUD programs is needed to carryout successful activities that have positive community impacts.

Table 47 – Priority Needs Summary

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

SP-30 Influence of Market Conditions – 91.215 (b)

Influence of Market Conditions

Affordable Housing Type	Market Characteristics that will influence the use of funds available for housing type
Tenant Based Rental Assistance (TBRA)	In determining whether to undertake TBRA programs, the City will take into consideration: documented local need, documented local demand, existing services offering that type of assistance currently provided by the City and/or its subgrantees, existing services offering that type of assistance currently provided by other regional organizations (i.e., County and State programs), the possibility of expansion of financial education programs, evaluation of the area rents, costs of utilities, degree of need based on other pertinent community needs, available funding and how many persons the funding is able to assist.
TBRA for Non-Homeless Special Needs	In determining whether to undertake TBRA for non-homeless/ special needs programs, the City will take into consideration: documented local need, documented local demand, degree of need based on other pertinent community needs, existing services offering that type of assistance currently provided by the City and/or it's subgrantees, existing services offering that type of assistance currently provided by other regional organizations (i.e., County and State programs), area statistics for special needs populations, evaluation of changing trends
New Unit Production	The City will evaluate individual projects/proposals with an emphasis on the availability of adequate amount of funding to subsidize the new project and/or the availability of other (funding) resources in which to leverage projects. The City will consider the land values, analysis of the overall construction costs and 'cost per door' as per industry standards. It will compare costs to past City projects, and research to ensure reasonable development fees are imposed.
Rehabilitation	At the City level, enough City entitlement is available to offer rehab a program and there is sufficient staff capacity to adequately carry-out/manage rehab programs. At the market level, characteristics that would influence the use of housing funds toward a rehab activity include home values, homeowner's ability and willingness to borrow money, construction costs, public need and demand, evaluation of housing types in need of rehab and specific circumstances and types of repairs needed for those housing units, availability of other funding sources in which to leverage projects.
Acquisition, including preservation	Prior to any acquisition, the City would consider the following market characteristics: a full evaluation of parcel size, zoning, and allowable land uses, proximity to Target Areas, current land values, costs of maintenance (current and long term), projection of how quickly a project would be completed, availability of monies in which to purchase land

Table 48 – Influence of Market Conditions

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

SP-35 Anticipated Resources - 91.215(a)(4), 91.220(c) (1,2)

Introduction

The city is using its FY 2023-2024 yearly allocation as a basis to estimate the funding it may receive over the course of the 5-year period of the Consolidated Plan. Based on its estimates the City anticipates resources to be received from the CDBG, HOME and ESG programs in the following amounts:

- CDBG $9.5 million
- HOME $3.77 million
- ESG $845,000

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

Anticipated Resources

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan $	Narrative Description
			Annual Allocation: $	Program Income: $	Prior Year Resources: $	Total: $		
CDBG	Public - Federal	Acquisition; Admin and Planning; Economic Development; Housing; Public Improvements; Public Services	$1,979,019	$0	$421,191	$2,400,210	$7,520,981	A formula-based program that annually allocates funds to metropolitan cities, urban counties, and states for a wide range of eligible housing and community development activities
HOME	Public - Federal	Acquisition; Homebuyer Assistance; Homeowner Rehab; Multifamily Rental New Construction; Multifamily Rental Rehab; New Construction for Ownership; TBRA	$755,989	$0	$1,953,951	$2,709,940	$3,019,011	A formula-based program that provides allocations to states and units of general local governments, known as participating jurisdictions. Its purpose is to retain and expand the supply of affordable housing principally for low- and extremely low-income families through housing rehabilitation, new construction, first-time home buyer financing, and rental assistance

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

ESG	Public - Federal	Conversion and Rehab for Transitional Housing; Financial Assistance; Overnight Shelter; Rapid Re-Housing (rental assistance); Rental Assistance Services; Transitional Housing	$169,365	$0	$0	$169,365	$675,635	A formula -based program that allocates funds to states, metropolitan cities, and urban counties to support emergency shelters and other assistance for homeless individuals and families.

Table 49 - Anticipated Resources

Explain how federal funds will leverage those additional resources (private, state, and local funds), including a description of how matching requirements will be satisfied.

Leveraging

The City and HUD share an interest in leveraging HUD resources to the maximum extent feasible to address priority needs and associated goals.

During the 5-year period of the ConPlan the City will seek funds to leverage the Federal CDBG, HOME and ESG funds.

Volunteer services and private donations provide additional resources to leverage CDBG funds for public service projects.

In the past, Moreno Valley has actively leveraged its affordable housing projects, mostly with Redevelopment Set-aside funds. As the Redevelopment Agency was dissolved, the city will continue its efforts to leverage projects with other available resources. Some potential leveraging resources are listed below:

- Low-income Housing Tax Credit (LIHTC): The California Tax Credit Allocation Committee (TCAC) allocates federal and state tax credits to affordable housing projects. Corporations provide equity to build the projects in return for the tax credits.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

- Affordable Housing Sustainable Communities Housing Program: AHSC directs investments to historically under-invested communities, giving more Californians access to opportunity. At least 50% of AHSC funding is required by state law to be allocated to affordable housing and projects in, or that provide a benefit to, disadvantaged communities.

- Housing Choice Vouchers: The Section 8 rental voucher program provides rental assistance to help very low-income families afford decent, safe, and sanitary rental housing. The County of Riverside Housing Authority pays the owner a portion of the rent (a housing assistance payment (HAP)) on behalf of the family.

- Mortgage Credit Certificate Program: Income tax credits are available to first-time homebuyers to buy new or existing single-family housing. Riverside County administers the program on behalf of jurisdictions in the County. A Mortgage Credit Certificate (MCC) entitles qualified home buyers to reduce the amount of their federal income tax liability by an amount equal to a portion of the interest paid during the year on a home mortgage.

Matching Requirement

Entitlement cities receiving HOME funds are required to contribute a 25% match of non-HOME funds for every dollar of HOME funds spent. The HOME statute also provides a reduction of the matching contribution under three conditions: 1. Fiscal distress, 2. severe fiscal distress, and 3. presidential disaster declarations. Moreno Valley has been identified by HUD as a fiscally distressed jurisdiction for several consecutive years and has been granted a 100-percent match reduction. The City anticipates that the 'fiscally distressed' classification to continue through the entire Consolidated Plan period.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan.

Current land holdings that may be available for affordable housing developments include:

- Day/Alessandro - 8.15 acres
- Fir/Heacock - 0.90 acres
- JFK/Elm - 0.17 acres
- Sheila/Perris - 0.18 acres

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

SP-40 Institutional Delivery Structure – 91.215(k)

Explain the institutional structure through which the jurisdiction will carry out its consolidated plan including private industry, non-profit organizations, and public institutions.

Responsible Entity	Responsible Entity Type	Role	Geographic Area Served
City of Moreno Valley	Government	Administer HUD programs; Carryout activities as noted in the Consolidated Plan and Annual Action Plans; Reporting	Citywide

Table 50 - Institutional Delivery Structure

Assess of Strengths and Gaps in the Institutional Delivery System

The institutional delivery system requires the participation of many organizations to accomplish the goals identified in the Consolidated Plan. Coordination with other public and private agencies is necessary. The establishment of solid working relationships is key to assist and enable service providers to better assist those in need. The City has worked to build cooperative relationships with surrounding jurisdictions and agencies, as well as nonprofit organizations. This has proven to be strength for Moreno Valley.

Availability of services targeted to homeless persons and persons with HIV and mainstream services.

Table 51 - Homeless Prevention Services Summary

Describe how the service delivery system including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth).

In addition to the services delivered by or with the City's assistance, the CoC implements a countywide Coordinated Entry System (CES) to assess homeless individuals/families using the VI-SPDAT data system that tracks the length of time a client has been on the streets or in emergency shelter. DPSS use HUD CoC Program planning grant funding to measure system wide performance in HMIS, such as length of time homeless. This is used to help the CoC prioritize and house those who have experiences the longest length of time being homeless. The planning process also includes working with the CoC Standards and Evaluation Committee to continue developing strategies to prioritize chronically homeless individuals/families with the longest time homeless and most severe needs, including:

- Increasing the supply of permanent supportive housing and rapid rehousing.
- Housing individuals/families identified in CES with the longest time homeless first.
- Using HMIS data to record episodes of homelessness and destination at program exit to track agency and system performance.

The CoC has also adopted a "Housing First" approach that is based evidence-based and promising practices and endorsed by HUD to place a homeless individual or family in permanent housing and provide services to keep them stably housed.

Homeless CoC youth providers have implemented outreach and service-based events in the communities to draw homeless youth, unaccompanied and transitional age, into contact with services available to them. Housing Authority of the County of Riverside in collaboration with Operation SafeHouse opened a permanent supportive housing program called Harrison House for transitional age youth, in the eastern region of Riverside County.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above.

The city has cooperative relationships with surrounding jurisdictions, diverse types of agencies, and nonprofits who can help the city meet its Consolidated Plan goals. This coordination leads to solid working relationships that enable all service providers to better assist those in need.

Non-Profit Organizations: The City utilizes a variety of nonprofit organizations to address community needs, such as homelessness, special needs, fair housing, and food distribution services.

Public Housing Authority: The Housing Authority of the County of Riverside administers public housing and the Housing Choice Voucher Program (Section 8) for Moreno Valley residents.

JPA: The City is a member of the March Joint Powers Authority (JPA). The JPA is a public entity created for the purpose of addressing the use, reuse, and joint use of realigned March ARB. The JPA approved a Homeless Assistance Program and is the location of two local transitional homeless facilities.

Coordination with those described above has led to solid working relationships that enable all service providers to better assist those in need and create a strong network of individual agencies working toward a common goal.

Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs.

With resources becoming more and more limited, the City proposes to overcome gaps in institutional structure by:

1. Maintaining open communication with subgrantees and other consolidated planning partners.
2. Utilizing technology to share, distribute information, foster, and maintain constant contact with community planning partners.
3. Recommending and assisting to coordinate the use of volunteers (volunteer-based organizations) in which to fill gaps where it logically makes sense.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

Goal Descriptions

1	**Goal Name**	Capital Improvement Activities
	Goal Description	Acquisition, design, construction, and installation of needed public facilities and improvements located in CDBG income eligible Target Areas where infrastructure is missing or substandard. Public facilities and improvements may include ADA-compliant ramps and sidewalk improvements, storm drains, and water and sewer lines. Improvements shall facilitate pedestrian activity, eliminate flooding, and provide for safer streets within the Target Areas.
2	**Goal Name**	Fair Housing Activities
	Goal Description	The promotion of housing choice and support of state and federal fair housing laws to ensure that all residents have access to a decent home in a suitable living environment in the City. Fair Housing activities are met by promoting and affirmatively furthering equitable housing opportunities through education, counseling, enforcement, and training.
3	**Goal Name**	Public Services Activities
	Goal Description	Improving the quantity and quality of public services, principally for low-and- moderate income persons, including the homeless, elderly, and disabled. The following services are identified by order of priority: 1. 'Basic Needs' Related Social Services Programs (such as but not limited to emergency food, shelter (homelessness), and utility assistance) 2. Community Public Safety Programs 3. Programs offering Low-Cost Transportation 4. Employment Services/Programs and Job (Skills) Training 5. Free/Low-Cost programs for School-Aged Youth
4	**Goal Name**	Homeless/Homelessness Prevention Activities

	Goal Description	Improve the quality of life for the city's homeless and those threatened with homelessness by extending emergency services aimed at assisting, protecting, and improving the living conditions and ultimately stabilizing the housing situation of those individual(s).
5	**Goal Name**	Housing and Neighborhood Improvement Activities
	Goal Description	Conserving and improving housing stock through rehabilitation of units occupied by low-and-moderate income households. Activities are designed to: (1) improve existing substandard or deteriorated housing stock that does not meet building, safety, or fire code and (2) achieve the goals identified in the City's Consolidated Plan.
6	**Goal Name**	Planning and Administration
	Goal Description	Overall program management, coordination, monitoring, and evaluation of projects funded by CDBG, HOME and ESG funds and the preparation of the Annual Action Plans and CAPERs.
7	**Goal Name**	Health, Safety, and Public Welfare
	Goal Description	Eliminating conditions which are detrimental to health, safety, and public welfare through interim rehabilitation, community policing, code enforcement, etc.
8	**Goal Name**	Economic Development Activities
	Goal Description	Expanded economic opportunities through micro-enterprise loan programs and counseling as well as employment and job skills programs to create and retain jobs for low-and-moderate persons.
9	**Goal Name**	Slum or Blight Activities
	Goal Description	Elimination of slums and blight to prevent the deterioration of City neighborhoods, principally in the CDBG Target Areas.
10	**Goal Name**	Historic Preservation
	Goal Description	Restoring and preserving properties formally designated as historic structures.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2).

HOME 91.315(b)(2) definitions refer to the income eligibility and affordability requirements for housing financially assisted by the HOME program. These requirements are spelled out in detail in CFR 92.252 and CFR 92.254. The city estimates that HOME funds will assist 90 homeowners and 16 renter-occupied housing units.

SP-50 Public Housing Accessibility and Involvement – 91.215(c)

Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement).

This section is not applicable to the City.

Activities to Increase Resident Involvements.

This section is not applicable to the City.

Is the public housing agency designated as troubled under 24 CFR part 902?

This section is not applicable to the City.

Plan to remove the 'troubled' designation.

This section is not applicable to the City.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

SP-55 Barriers to affordable housing – 91.215(h)

Barriers to Affordable Housing

As noted in section MA-40 of this plan, the city's barriers to affordable housing include:

- Lack of a Balanced Housing Stock.
- Need for Utilization of Bilingual Housing Materials.
- Rapid Increase in Home Prices and Cost Burdened Households.
- Reduction in Housing Funds.
- High Number of Cost Burdened Renters.

The City does not have growth limits, or policies and ordinances that regulate the number of housing units that can be constructed annually. The City does not have ordinances such as rent control that directly affect the residential investment rate of return. In affordable for-sale and for-rent projects, however, the City does enact controls to maintain affordability. For instance, in HOME-assisted ownership projects the City implements a recapture policy.

Furthermore, tax policy affecting land and other property is governed by California state law. Property taxes are based on a property's assessed value. State law mandates that all property is subject to taxation unless otherwise exempted. In general, properties that are owned and used by educational, charitable, religious, or government organizations may be exempt from certain property taxes. Housing for low-income households owned and operated by a qualifying nonprofit organization is eligible for exemption from property taxes.

Strategy to Remove or Ameliorate the Barriers to Affordable Housing

Key components that the city will engage in to ameliorate and/or remove barriers to affordable housing as follows:

- When feasible, consider reducing, waiving, or deferring development fees to facilitate the provision of affordable housing.
- Periodically review and revise City development standards to facilitate quality housing that is affordable to lower and moderate-income households.
- Monitor all regulations, ordinances, departmental processing procedures and fees related to the rehabilitation and/or construction of dwelling units to assess their impact on housing costs.
- Ensure that water and sewer providers are aware of the City's intentions for residential development throughout the City.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

SP-60 Homelessness Strategy – 91.215(d)

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs.

The City has developed a comprehensive Homeless Strategy that involves reaching out to homeless persons, assessing, and addressing their individual emergency/ housing needs. To reach these individuals, the City extends CDBG funding to a variety of public service subgrantees that in turn provide direct services which may including street outreach, case management, housing search assistance, emergency housing/motel vouchers, food, and counseling. These social service programs are often the primary source for referrals and assistance to homeless persons. Typically, homeless populations become aware of available programs through word of mouth and seek out services by calling the service provider or traveling to their local office.

The County of Riverside CoC has established chronically homeless persons as the highest need priority based on HUD established goals. The CoC implements a Coordinated Entry System (CES) to ensure appropriate intervention is utilized to serve those who are homeless and providing a prioritization of community resources and housing based on the vulnerability of the participant.

Within the CoC, there are several outreach teams from County, cities, and nonprofit homeless providers that cover specific populations or geographic regions in the County. There are also specific outreach teams serving those with mental health issues, veterans, youth, and persons experiencing chronic homelessness. The teams collaborate to conduct outreach and provide client services focused on the chronically homeless populations living on the streets to connect them with supportive services and achieve housing stability.

Addressing the emergency and transitional housing needs of homeless persons.

Addressing the housing needs of the homeless is the primary objective of ESG funding and one of the city's highest priorities for the use of CDBG public service dollars. ESG funding will be allocated to address the emergency shelter and housing needs of homeless persons located in Moreno Valley. The city’s ESG program allocation will be used to leverage homeless prevention efforts originally initiated by CDBG. However, ESG will provide for a much-needed injection of additional funding. The ESG program will be used to assist, protect, and improve living conditions for the homeless and provides for the following eligible activities:

- Outreach to homeless individuals and families living on the street.
- Improve the number and quality of emergency shelters for homeless individuals and families.
- Help operate shelters.
- Provide essential services to shelter residents.
- Rapidly re-house homeless individuals and families.
- Prevent families/individuals from becoming homeless.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

The City of Moreno Valley will continue to engage with systems that assists efforts for persons and families to transition to permanent housing and independent living through a variety of resources involving the continued partnerships and financial support to local nonprofit service providers and participation and support to the Riverside County Continuum of Care. Additionally, the Riverside County's Department of Public Social Services (DPSS) is considered the "umbrella" anti-poverty agency for the region. The goal of self-sufficiency for persons can be accomplished by moving poor families out of poverty. DPSS interacts with needy residents on many levels, and assists them through childcare, education, employment, training, health and human services, homelessness and housing with available mainstream programs.

Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education, or youth needs.

The Riverside County CoC has a standing six-year cooperative agreement between various key organizations and agencies that establish county-wide protocols and procedures intended to prevent people from being discharged from public and private institutions (programs) into homelessness. The agreement includes County Mental Health, Veterans, Sheriff's, and Children's Services Independent Living Program, as well as the Southern California Hospital Association, and administrators of the 2-1-1 telephone referral program, Community Connect of Riverside County. With the services made available via ESG funding, Community Connect and other partners can formally register its programs to ensure that the public is referred to appropriate ESG services, among others. City public service providers assists those threatened with homelessness by providing referrals and coordinating with other agencies to locate assistance for the family or individuals. Additionally, Moreno Valley dedicates ESG entitlement funding toward homeless prevention and rapid-re-housing efforts.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

SP-65 Lead based paint Hazards – 91.215(i)

Actions to address LBP hazards and increase access to housing without LBP hazards.

To help evaluate and reduce the number of housing units containing lead-based paint(LBP) hazards the City has two main courses of action: (1) the City has integrated LBP hazards evaluation and reduction activities into its housing programs, and (2) the City also provides public information and education concerning lead-based paint.

How are the actions listed above related to the extent of lead poisoning and hazards?

Approximately 9,700 housing units were built before 1980. Based on the age of housing and the HUD-approved prevalence rates, it is likely that one-half (4.850) of the housing units built prior to 1980 may contain LBP.

How are the actions listed above integrated into housing policies and procedures?

Lead based paint issues are addressed via Moreno Valley's housing loan/grant programs. Housing program participants are provided the 'Renovate Right Informational Booklet' from the United States Environmental Protection Agency. Each participant signs a certification that they received and reviewed the booklet.

If a dwelling was constructed prior to 1978, the City contracts with Home Safe for a lead- based paint inspection of the property. If the property is found to contain lead-based paint, mitigation measures are incorporated as a part of the revitalization work.

A City housing specialist answers any questions a participant may have regarding the lead-based paint. City Building Inspectors also discuss with housing program participants any issues found in a dwelling and initiate further evaluation as necessary.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

SP-70 Anti-Poverty Strategy – 91.215(j)

Jurisdiction Goals, Programs,and Policies for reducing the number of Poverty-Level Families.

The City strives to reduce the poverty rates of the city's population and neighborhoods.

During the 5-year Consolidated Plan cycle, the city believes that the most direct path to reducing the poverty rates in its neighborhoods is to concentrate efforts on the working poor and jobless adults in the labor force. To prevent generational poverty, the city can provide job skills or employment programs to help move people, in particular parents of young children, out of poverty.

Specific actions to reduce poverty are described below:

Provide Job Skills Training to Persons Living in the R/ECAP: The City can fund activities that provide jobs skills training to unemployed persons living in the R/ECAP. A key poverty reducing strategy is to provide appropriate technical education and training to low wage workers and unemployed workers in the labor force.

Increase Participation in Poverty Reducing Programs by Persons Living in the R/ECAP: The City will work to inform families living in the R/ECAP of poverty reducing programs such as the Earned Income Tax Credit (EITC). Research has demonstrated that increasing participation in safety net programs helps to reduce poverty rates.

Provide Job search and Placement Services to Low Wage and Unemployed Workers Living in the R/ECAP and High Poverty Neighborhoods: Annually, the city's Business Employment Resource Center (BERC) can provide job seekers with access to resources that are necessary to search and acquire employment within the city and surrounding areas. Assistance will be provided with preparing resumes, job applications and job searches as well as one-on-one mock interviews.

Policies to reduce the number of poverty-level families include:

- Anti-Poverty Policy #1: To continue to support and coordinate with public and private efforts aimed at preventing and reducing poverty level incomes.
- Anti-Poverty Policy #2: To conduct outreach with public and private agencies whose mission is to reduce poverty level incomes.
- Anti-Poverty Policy #3: Allocate CDBG public service funds to projects and activities that will help persons and families who have incomes below the poverty level.

How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan.

The Anti-Poverty Strategy is directly coordinated with the City's Affordable Housing Plan/Strategy. A fundamental purpose of the housing programs is to reduce the cost burdens experienced by low- and moderate-income families. Many of these families have extremely low incomes and, therefore, likely to have poverty level incomes.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

SP-80 Monitoring – 91.230

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements.

Monitoring serves as an effective tool to ensure that expenditures of funds are consistent with Federal requirements, CDBG National Objectives, and achieve program/project goals. The following outlines Moreno Valley's monitoring standards and procedures.

Subrecipients: When an organization becomes a city subrecipient, it must sign a contract with the city in which the scopes of work, timelines, and documentation requirements are outlined. On a monthly basis, each subrecipient must submit detailed information regarding the number, ethnicity, and income level of individuals benefiting from CDBG funds. Quarterly summary reports are required of some agencies in which further information is provided on activities accomplished during that quarter. The City conducts an on-site inspection of each agency at least once per year, usually toward the end of the funding cycle.

Construction Projects: All construction projects comply with Federal Labor and Procurement Procedures as well as the various affirmative action, equal opportunity, and Section 3 requirements mandated by various federal and state laws. Staff review contract preparation at each step from bid preparation, contract document preparation, pre- construction meetings, and ongoing project inspections.

Multi-Family Affordable Housing Programs: The City requires property owners who have received HOME funds to recertify their tenant's eligibility annually. They report information and provide documentation related to the property, unit occupancy, tenant information and financial reporting. Forms and applicable documentation such as Federal income tax returns are completed by tenants of reserved (affordable) units and submitted with the report. If the unit was occupied by multiple tenants, then a copy of the application, rental agreement, and the dates of residency must be provided. In addition, a copy of 'Determining Affordable Rent' is provided to the owner for the reserved units. A city building inspector conducts a property inspection to determine if the property complies with code requirements and in good condition. The City works with a recertification consulting service to ensure that the information is accurate and complete.

Annual Action Plan

AP-15 Expected Resources – 91.220(c) (1,2)

Introduction

For FY 2023-2024 the city of Moreno Valley anticipates the resources noted in Table 58 -*Expected Resources*

Anticipated Resources

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan $	Narrative Description
			Annual Allocation: $	Program Income: $	Prior Year Resources: $	Total: $		
CDBG	Public - Federal	Acquisition; Admin and Planning; Economic Development; Housing; Public Improvements; Public Services	$1,979,019	$0	$421,191	$2,400,210	$7,520,981	A formula-based program that annually allocates funds to metropolitan cities, urban counties, and states for a wide range of eligible housing and community development activities
HOME	Public - Federal	Acquisition; Homebuyer Assistance; Homeowner Rehab; Multifamily Rental New Construction; Multifamily Rental Rehab; New Construction for Ownership; TBRA	$755,989	$0	$1,953,951	$2,709,940	$3,019,011	A formula-based program that provides allocations to states and units of general local governments, known as participating jurisdictions. Its purpose is to retain and expand the supply of affordable housing principally for low- and extremely low-income families through housing rehabilitation, new construction, first-time home buyer financing, and rental assistance

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

ESG	Public - Federal	Conversion and Rehab for Transitional Housing; Financial Assistance; Overnight Shelter; Rapid Re-Housing (rental assistance); Rental Assistance Services; Transitional Housing	$169,365	$0	$0	$169,365	$675,635	A formula -based program that allocates funds to states, metropolitan cities, and urban counties to support emergency shelters and other assistance for homeless individuals and families.

Table 53 - Expected Resources – Priority Table

Explain how federal funds will leverage those additional resources (private, state, and local funds), including a description of how matching requirements will be satisfied.

The City and HUD share an interest in leveraging HUD resources to the maximum extent feasible to address priority needs and associated goals. Volunteer services and private donations provide additional resources to leverage CDBG funds for public service activities.

In the past, Moreno Valley has actively leveraged its affordable housing activities, mostly with Redevelopment Set-aside funds. As the Redevelopment Agency was dissolved, the City will continue its efforts to leverage activities with other available resources. Some potential leveraging resources are listed below:

- Low-income Housing Tax Credit (LIHTC): The California Tax Credit Allocation Committee (TCAC) allocates federal and state tax credits to affordable housing projects. Corporations provide equity to build the projects in return for the tax credits.

- Affordable Housing Sustainable Communities Housing Program: AHSC directs investments to historically under invested communities, giving more Californians access to opportunity. At least 50% of AHSC funding is required by state law to be allocated to affordable housing and projects in, or that provide a benefit to, disadvantaged communities.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

- Housing Choice Vouchers: The Section 8 rental voucher program provides rental assistance to help very low-income families afford decent, safe, and sanitary rental housing. The County of Riverside Housing Authority pays the owner a portion of the rent (a housing assistance payment (HAP)) on behalf of the family. There are 957 City households currently receiving Section 8 housing vouchers.

- Mortgage Credit Certificate Program: Income tax credits are available to first time homebuyers to buy new or existing single-family housing. Riverside County administers program on behalf of jurisdictions in the County. A Mortgage Credit Certificate (MCC) entitles qualified home buyers to reduce the amount of their federal income tax liability by an amount equal to a portion of the interest paid during the year on a home mortgage.

Matching Requirements: Entitlement cities receiving HOME funds are required to contribute a 25% match of non-HOME funds for every dollar of HOME funds spent. The HOME statute also provides a reduction of the matching contribution under three conditions: 1. Fiscal distress, 2. Severe fiscal distress, and 3. presidential disaster declarations. Moreno Valley has been identified by HUD as a fiscally distressed jurisdiction for several consecutive years and has been granted a 100 percent match reduction. The City anticipates that the 'fiscally distressed' classification to continue through the Annual Action Plan period.

The Emergency Solutions Grant program has a 100% match requirement that can be met as a dollar for dollar or with in kind services. During the FY 2023-2024 application process, the City has requested that ESG applicants be prepared to provide the match that would equal amounts of cash or in-kind services.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan.

Current land holdings that may be available for affordable housing developments include:

- Day/Alessandro 8.15 acres
- Fir/Heacock 0.90 acres
- JFK/Elm 0.17 acres
- Sheila/Perris 0.18 acre

AP-35 Projects – 91.220(d)

Introduction

The City of Moreno Valley has selected a variety of proposed activities and activities aimed at meeting the goals and priority needs established in the Consolidated Plan. For HOME, the City has allocated the allowable max of 10% Administration to be utilized for staffing and administration. The mandatory 15% CHDO set aside has also been allocated. The remaining funds will be used to fund three different Housing and Neighborhood Improvement Activities. The City has a balance of $365,825 in unencumbered funds that it will allocate later in the fiscal year.

For ESG, the City has allocated the allowable max of 7.5% Administration to be utilized for staffing and administration. The city will fund one Neighborhood Improvement Activity. The City have a balance of $116,673 in unencumbered funds that it will allocate later in the fiscal year.

For CDBG, the City has allocated the maximum 15% Public Service cap for FY 2023-24. The 20% Administration cap will be utilized for staffing and administration. The remaining 65% will fund Neighborhood Improvements and Public (Street) Improvements.

26	MARY ERICKSON COMMUNITY HOUSING – FIR-LASSELLE PERMANENT SUPPORTIVE - TRANSITIONAL HOUSING

Table 55 – Project Information

Describe the reasons for allocation priorities and any obstacles to addressing underserved needs.

Moreno Valley seeks to meet the federal national objectives of (1) providing benefits to the low and moderate income, (2) removing areas of slum and blight, and (3) meeting urgent or emergency community needs. The City also seeks to prioritize in a way that can assist goals set by the City Council including Revenue Diversification & Preservation, Public Safety, Positive Environment Community Image, and Neighborhood Pride & Cleanliness. Every year, in accordance with HUD's requirements, Moreno

Valley re-evaluates and updates its program specific Objectives and Policies to ensure they adequately reflect the current needs of the community. The updated Objectives and Policies must then be adopted at the local level by the City Council for the upcoming program year. CDBG, HOME, and ESG Objectives and Policies primarily focus on: (1) defining the City's funding priorities, (2) offering activity selection criteria, and (3) providing guidance for staff when reviewing and recommending programs and activities for funding.

	Estimate the number and type of families that will benefit from the proposed activities	158 Persons Assisted
	Location Description	Applicant proposes to acquire two sets of vacant lots both privately and City-owned on Fir Ave (60 units). and Lasselle St. (52 units)
	Planned Activities	Applicant will turn-key project using innovative, significantly lower cost and rapid deployment construction method LifeArk to owner-operator non-profit, The Illumination Foundation (TIF). CDBG funds will be used for land acquisition and PSH-T in-take services.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND

AP-50 Geographic Distribution – 91.220(f)

Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed.

The CDBG Target Areas consist of census tracts within the City that are qualified as having a population of 51% or more low to moderate income residents.

In February 2019, Notice CPD 19-02 was released to publicize the new Low and Moderate- Income Summary Data (LMISD), based on the 2015 America Community Survey (ACS). Commencing July 1, 2021, the City formally adjusted and adopted its Target Area Maps to reflect most recent data released.

Geographic Distribution

Target Area	Percentage of Funds
CDBG Target Area	32%
Citywide	68%

Table 56 - Geographic Distribution

Rationale for the priorities for allocating investments geographically.

When determining the geographic locations where Moreno Valley will allocate their investments, the city staff consider if the activity or program will physically be located within an already designated CDBG Target Area, and in line with whether the program will directly benefit the low-to- moderate income population in that area. Poverty levels act as a measure of need for an area, providing staff with insight on the state of the population within that area and allow City representative to fund services accordingly. City representative also take public demand into account, recommendations from other city departments (such as Capital Activities, or the Police Department), reports from CDBG subrecipients which track referrals and measure trends in service levels, recommendations of other local entities like the County partners (the Continuum of Care, Department of Social Services, local Housing Authority, Economic Development Agency) and local non-profits.

Discussion

Moreno Valley utilizes geographic distribution designations that further describe where the City will focus its programs. An activity can be designated as serving either: (1) 'Citywide", or (2) 'in the CDBG Target Areas'. "Citywide' is a designation used for programs that offer services to the entire community. Many public programs provide services to the entire City, the nature of these program services is often to exclusively serve low-to-moderate income persons. If a program is designated as 'CDBG Target Area' it is confined exclusively to the CDBG Target Area. In general, CDBG Target Areas typically include older sections of the City where much of the building stock and infrastructure is deteriorated or fails to meet current standards. Many structures need minor or major rehabilitation with some structures in need of extensive reconstruction. The areas lack adequate drainage systems, water lines, street lighting, and street improvements.

AP-55 Affordable Housing – 91.220(g)

Introduction

The City plans to utilize all programs available (whether City, County, State, or Federal) to meet the affordable housing needs of the community. For example, low-income households seeking multi-family rental opportunities will be assisted through the City's HOME and Neighborhood Stabilization (NSP) programs. HOME offers a variety of activities aimed at providing affordable housing opportunities. The NSP works exclusively to rehabilitate foreclosed or vacant properties in the community and convert them into affordable housing opportunities for the qualified low-income families.

Discussion

Through the Housing Authority of the County of Riverside (HACR), the City can offer its residents affordable housing through the County's Public Housing programs. HACR administers and manages approximately 1,100 Section 8 properties and 66 Public Housing units in Moreno Valley.

DRAFT

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

AP-60 Public Housing – 91.220(h)

Introduction

The Housing Authority of Riverside County (HACR) addresses the public housing needs of the cities within Riverside County. The Public Housing Program is intended to provide decent, safe, and sanitary housing to low and moderate-income families, seniors, and persons with disabilities.

Actions planned during the next year to address the needs to public housing.

In FY 2021, HUD reported there were approximately 8,500 households who received housing choice vouchers countywide with approximately 1,000 for Moreno Valley residents who received Housing Choice Vouchers (or Section 8). All Voucher recipients were below 50% of the area median income and approximately 75% of the recipients were below 30% of the area median income. At the time the countywide Section 8 waiting list had approximately 68,000 families. Based on the large numbers of families waiting for Section 8 assistance, the City supports the HACR goal to: expand the supply of assisted housing by applying for additional rental vouchers via annual competitions for the U.S. Department of Housing and Urban Development (HUD) affordable housing funding available to Public Housing Authorities; improve the quality of assisted housing; leverage private or other public funds to create additional housing opportunities; and expand and promote self-sufficiency programs. The City will actively pursue opportunities for local affordable housing activities as well as non-housing public service programs that contribute to the overall affordable housing needs of the community and eases the financial burden of its struggling, low-income residents. To further collaborate, the City of Moreno Valley will continue to review the Riverside County Agency's Action Plan and monitor the affordable housing needs of the area. The City reviews proposed development sites, the comprehensive plan, and any proposed demolition or disposition of public housing developments.

Actions to encourage public housing residents to become more involved in management and participate in homeownership.

The Riverside County Housing Authority encourages public housing residents to become more involved in management and to participate in homeownership opportunities through its Public Housing Resident Initiatives (PHRI). The Riverside County Housing Authority seeks to facilitate the successful transition of residents from public housing residency to economic independence and/or from welfare-dependence to increased earning capacity or sustained work. This Initiative builds upon the efforts of the local welfare plan and other self-sufficiency efforts of the Housing Authority and targets public housing residents who are receiving welfare assistance. The goals of the PHRI are to reduce welfare dependence by assisting residents in returning to the work force in a job commensurate with their abilities; reduce poverty by assisting residents in increasing their self-sufficiency by enhancing their employment or earning potential; and to increase homeownership among public housing residents. Local partners including public agencies and community-based nonprofits, as well as faith-based organizations provide self-sufficiency services including job training, employment opportunities, computer instruction, etc. The Family Self Sufficiency (FSS) Program was established to assist Section 8 residents and enable families to

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

gain economic independence from all governmental assistance. Supportive services offered to participating families include:

- Remedial Education and Classroom Training
- Employment Training and Placement
- Counseling/Case Management
- Credit Counseling and Money Management
- Child Care
- Transportation

The Housing Authority has also established a "Homeownership Program" (HP). The HP assists eligible participants in the Section 8 program, who are also participants of the Family-Self Sufficiency Program (FSS) by offering a single down payment assistance grant. To maximize the use of resources available to home seekers, the Housing Authority program also targets families who take part in the Riverside County Economic Development Agency's (EDA) First Time Home Buyer Program (FTHB). In combination, the HP/FTHB partnership enables families to realize their dream of becoming homeowners by providing them with financial assistance and other resources that they would not normally have access to.

If the PHA is designated as troubled, describe the way financial assistance will be provided or other assistance.

Not applicable.

DRAFT

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

AP-65 Homeless and Other Special Needs Activities – 91.220(i)

Introduction

The of the City's highest priorities for the use of grant funds is to address the emergency shelter and housing needs of homeless persons. In the coming year, Moreno Valley will continue to dedicate funding toward homeless services. The City will assist homeless persons with emergency vouchers and other critical support funded through partnership with homeless service providers. It will also continue to subsidize affordable housing development that offers long-term affordable housing opportunities. With the added Emergency Solutions Grant (ESG) entitlement funding, Moreno Valley will offer programs that will help quickly house homeless individuals and prevent loss of housing for those at risk of becoming homeless.

Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including:

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs.

In line with the HUD requirements, the City has developed a comprehensive Homeless Strategy that involves reaching out to homeless persons, assessing, and addressing their individual emergency/ housing needs. To reach these individuals, the City extends CDBG funding to a variety of public service subrecipients who in turn provide the direct services including street outreach, case management, housing search assistance, emergency housing/motel vouchers, food, and counseling. These social service programs are often the primary source for referrals and assistance to homeless persons. Most of the homeless population become aware of available programs through word of mouth and seek out services by calling the service provider or traveling to their local office. The City will also provide funds for reporting homelessness assistance through the Riverside County's Homeless Management Information System (HMIS).

Riverside County has worked with the chronic homeless population for several years through the Mental Health Homeless Intervention Team (HIT) program. The HIT Team actively seeks out homeless persons, throughout Riverside County, who are living on the streets and/or in unsheltered locations. The teams focus on areas of high homeless concentration. Support workers are trained to recognize symptoms of mental illness and substance abuse. Support workers also possess the interpersonal skills necessary to solicit and provide information in a friendly, respectful, non-threatening manner. They are familiar with various community resources that serve the homeless population, both public and private. At a minimum, all homeless persons contacted on the streets are provided with information and referrals to programs relevant to their needs. Once the chronic homeless persons have been identified, and if mentally ill and willing to participate, they are enrolled into a series of programs by the Department of Mental Health.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Addressing the emergency shelter and transitional housing needs of homeless persons.

Addressing the housing needs of the homeless is the primary objective of the ESG program and one of the City's highest priorities for the use of CDBG public service dollars. ESG funding will be allocated to address the emergency shelter and housing needs of homeless persons located in Moreno Valley. The City's ESG program allocation will be used to leverage the homeless prevention efforts originally initiated by CDBG. However, ESG will provide additional funding that will be used to assist, protect, and improve living conditions for the homeless and provide for the following eligible activities:

- Outreach to homeless individuals and families living on the street.
- Improve the number and quality of emergency shelters for homeless individuals and families.
- Help operate these shelters.
- Provide essential services to shelter residents.
- Rapidly re-house homeless individuals and families.
- Prevent families/individuals from becoming homeless.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

The City of Moreno Valley will continue to engage with systems that assists efforts for persons and families to transition to permanent housing and independent living through a variety of resources involving the continued partnerships and financial support to local nonprofit service providers and participation and support to the Riverside County Continuum of Care. Additionally, the Riverside County's Department of Public Social Services (DPSS) is considered the "umbrella" anti-poverty agency for the region. The goal of self-sufficiency for persons can be accomplished by moving poor families out of poverty. DPSS interacts with needy residents on many levels, and assists them through childcare, education, employment, training, health and human services, homelessness, and housing with available mainstream programs.

Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving

assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs.

The Riverside County CoC has a standing six-year cooperative agreement between various key organizations and agencies that establish county-wide protocols and procedures intended to prevent people from being discharged from public and private institutions (programs) into homelessness. The agreement includes County Mental Health, Veterans, Sheriff's, and Children's Services Independent Living Program, as well as the Southern California Hospital Association, and administrators of the 2-1-1 telephone referral program, Community Connect of Riverside County. With the services made available via ESG funding, Community Connect and other partners can formally register its programs to ensure that the public is referred to appropriate ESG services, among others. City public service providers assists those threatened with homelessness by providing referrals and coordinating with other agencies to locate assistance for the family or individuals. Additionally, Moreno Valley dedicates ESG entitlement funding toward homeless prevention and rapid-re-housing efforts.

AP-75 Barriers to affordable housing – 91.220(j)

Introduction

As a condition of receiving federal funding for the CDBG and HOME programs, cities must certify that it will affirmatively further fair housing as required by the Fair Housing Act. The Act includes policies that ensure that persons are not denied equal opportunities in connection with housing because of their race, color, national origin, religion, disability, sex, or familial status. In compliance, prior to the start of each Consolidated Plan period, Moreno Valley prepares an Analysis of Impediments (AI) to Fair Housing Choice Report. As part of the report, the City of Moreno Valley is required to:

1. Conduct an analysis to identify impediments to fair housing choice within the jurisdiction.

2. Take appropriate actions to overcome the effects of any impediments identified through that analysis; and Maintain records reflecting the analysis and actions in this regard. The AI is a review of impediments or barriers that affect the rights of fair housing choice and serves as a basis for fair housing planning. It provides detailed information to policy makers, administrative staff, housing providers, lenders, and fair housing advocates to assist in building public support for fair housing efforts. In FY 2023-24 the city updated its AI.

Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment.

Key components that the city will engage in to ameliorate and/or remove barriers to affordable housing as follows:

- When feasible, consider reducing, waiving, or deferring development fees to facilitate the provision of affordable housing.
- Periodically review and revise City development standards to facilitate quality housing that is affordable to lower and moderate-income households.
- Monitor all regulations, ordinances, departmental processing procedures and fees related to the rehabilitation and/or construction of dwelling units to assess their impact on housing costs.
- Ensure that water and sewer providers are aware of the City's intentions for residential development throughout the City.

AP-85 Other Actions – 91.220(k)

Introduction

Following is a summary of critical components of 'other' necessary actions for the upcoming Consolidated Plan year, including how the City plans to overcome obstacles to meeting underserved needs, create plans to foster and maintain affordable housing, plans to reduce lead-based paint hazards, to reduce the number of poverty-level families, develop institutional structure, and actions planned to enhance coordination between public and private housing and social service agencies.

Actions planned to address obstacles to meeting underserved needs.

The primary obstacle in meeting the needs of underserved communities underserved (low-income families, seniors, homeless, etc.) is the lack of funding available to local public and private agencies. The economic downturn resulted in a decline in federal funding and the elimination of Redevelopment agencies and the associated tax increment/housing set-aside funding. It has also resulted in a decline in funding donations to local non-profits. This loss in revenue has not been fully overcome; however, staff can take the following actions in efforts to address the needs of the City's underserved communities, effectively:

1) Continue to establish partnerships with other agencies to better prioritize and utilize resources, conduct more detailed research and citizen participation each year to prioritize the needs of the underserved, seek out additional resources, and apply for grants where there are opportunities.
2) Formally adjust the programs Objectives and Policies to reflect the updated prioritization and allocate accordingly; even if it means shifting away from what's been historically funded. Create new programs/temporary emergency programs to address urgent issues.
3) Work hand in hand with subrecipients to adjust budgets, services, and restructure programs to better fit the needs of the underserved.

Actions planned to foster and maintain affordable housing.

Homeownership opportunities for low-income households was made available through the City's Single Family Residential Acquisition, Rehabilitated, and Resale (SFR-ARR) component of the Neighborhood Stabilization Program. To date, over 91 affordable single-family units have been rehabilitated for qualified lower-income families. The City of Moreno Valley's affordable housing portfolio includes 29 different multi-family rental activities expected to provide 1,643 low and moderate-income families with affordable housing during FY 2021-22. Lastly, through the Housing Authority of the County of Riverside (HACR), the City is also able to offer its residents affordable housing through the County's Public Housing programs. HACR administers and manages approximately 86 Section 8 properties in Moreno Valley.

Actions planned to reduce lead-based paint hazards.

City Housing Programs

Due to funding cuts, the City had temporarily discontinued three of its consumer loan programs that were impacted by the requirements of lead-based paint disclosure. However, Moreno Valley was able to reinstate the Mobile Home Repair Program and add a Single-Family Home Repair program. Habitat for Humanity, Riverside applied for and has been contracted to administer this HOME funded program. All homeowners participating in this grant program receive a copy of the "Protect Your Family from Lead in Your Home," a lead-based paint disclosure booklet, and are asked to sign an acknowledgment that is included in the loan application. If the unit was constructed after 1978, an exemption form is prepared and placed in the project file. If the home was constructed prior to 1978, Envirocare Consulting, Inc. is subcontracted to provide a lead-based paint inspection and risk assessment of the property. If the property is found to contain lead-based paint, mitigation measures are incorporated as a part of the revitalization work.

Countywide Lead Hazard Control Program

While the City of Moreno Valley does not currently have a stand-alone lead prevention program, the City will continue to work closely with the County of Riverside to address these issues. The County has adopted a regional strategy to control lead hazards. The County's strategy thoroughly spells out the control methods used once lead based paint hazards have been identified. It also describes its typical public outreach efforts which include: the distribution of bilingual educational brochures, public presentations, informational booths at the mall and community events, immunization clinics, testing within Target Areas, use of public media for outreach, as well as a "Free Testing Program."

Actions planned to reduce the number of poverty-level families.

The City strives to reduce the poverty rates of the city's population and neighborhoods.

Specific actions to reduce poverty are described below:

Provide Job Skills Training to Persons Living in the R/ECAP: The City can fund activities that provide jobs skills training to unemployed persons living in the R/ECAP. A key poverty reducing strategy is to provide appropriate technical education and training to low wage workers and unemployed workers in the labor force.

Increase Participation in Poverty Reducing Programs by Persons Living in the R/ECAP: The City will work to inform families living in the R/ECAP of poverty reducing programs such as the Earned Income Tax Credit (EITC). Research has demonstrated that increasing participation in safety net programs helps to reduce poverty rates.

Provide Job search and Placement Services to Low Wage and Unemployed Workers Living in the R/ECAP and High Poverty Neighborhoods: Annually, the city's Business Employment Resource Center (BERC) can provide job seekers with access to resources that are necessary to search and acquire employment within the city and surrounding areas. Assistance will be provided with preparing resumes, job applications and job searches as well as one-on-one mock interviews.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Policies to reduce the number of poverty-level families include:

- Anti-Poverty Policy #1: To continue to support and coordinate with public and private efforts aimed at preventing and reducing poverty level incomes.
- Anti-Poverty Policy #2: To conduct outreach with public and private agencies whose mission is to reduce poverty level incomes.
- Anti-Poverty Policy #3: Allocate CDBG public service funds to projects and activities that will help persons and families who have incomes below the poverty level.

Actions planned to develop institutional structure.

The City of Moreno Valley benefits from a solid institutional structure and relationships with various local public and private agencies. The City will continue to work at strengthening its dialogue with Riverside County agencies such as the Departments of Mental Health and Public Social Services, specifically to address regional homeless issues, and staff will continue to serve on the Continuum of Care Consortium which provides opportunities to work with local public and non-profit agencies. The City will maintain open dialogue with the Riverside County Housing Authority and focus on the use of resident initiatives in public housing. The City helped form a Non-Profit Coalition in efforts to increase collaboration amongst service providers and better meet the needs of the community and shall continue to support their efforts. The City will remain a member of the March Joint Powers Authority, created for the repurposing of the March Air Reserve Base. Additionally, the City will continue to coordinate with all the local Chambers of Commerce, as well as administer the Business Roundtables, and Nonprofit Roundtables which encourage communication with professionals from a variety of industries including health care, transportation, education, and other local businesses.

Actions planned to enhance coordination between public and private housing and social service agencies.

The City's goal is to continue to establish collaborative relationships between governmental and social service agencies to assure the effective delivery of services to low-income individuals by maintaining open communication with sub-recipients and other consolidated planning partners; Utilizing technology to share, distribute information, foster and maintain constant contact with community planning partners; and Recommending and participating in committees aimed at filling gaps where they exist.

Program Specific Requirements

AP-90 Program Specific Requirements – 91.220(l)(1,2,4)

Introduction:

Community Development Block Grant Program (CDBG)
Reference 24 CFR 91.220(l)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed.	0
2. The amount of proceeds from section 108 loan guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan.	0
3. The amount of surplus funds from urban renewal settlements.	0
4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan.	0
5. The amount of income from float-funded activities	0
Total Program Income	0

Other CDBG Requirements

1. The amount of urgent need activities	0
2. The estimated percentage of CDBG funds that will be used for activities that benefit persons of low and moderate income. Overall Benefit - A consecutive period of one, two or three years may be used to determine that a minimum overall benefit of 70% of CDBG funds is used to benefit persons of low and moderate- income. Specify the years covered that include this Annual Action Plan.	70%

HOME Investment Partnership Program (HOME)
Reference 24 CFR 91.220(l)(2)

1. **A description of other forms of investment being used beyond those identified in Section 92.205 is as follows:**
   Not applicable. The City does not intend to use HOME funding beyond those noted in Section 92.205.
2. **A description of the guidelines that will be used for resale or recapture of HOME funds when used for homebuyer activities as required in 92.254, is as follows:**
   The City normally engages in HOME funded rehabilitation and rental activities not homebuyer activities. However, when homeownership programs were developed under the NSP 3 program, leveraged with HOME, the City ensured that Resale or Recapture Requirements were integrated directly into the Affordable Housing Agreement with the development partner. The requirements were delineated within the Conditions, Covenants, and Restrictions (CC&R) in detail and in accordance with 92.254.
3. **A description of the guidelines for resale or recapture that ensures the affordability of units acquired with HOME funds. See 24 CFR 92.254(a)(4) are as follows:**
   Not applicable. The City does not plan to engage in HOME funded acquisition of single-family units as described in 24 CFR 92.254(a)(4).
4. **Plans for using HOME funds to refinance existing debt secured by multifamily housing that is rehabilitated with HOME funds along with a description of the refinancing guidelines required that will be used under 24 CFR 92.206(b), are as follows:**
   Not applicable. The City has no plans to refinance existing debt secured by multifamily housing rehabilitated with HOME funds during the upcoming program year FY 2023-2024.

Attachment: FY 23-28 ConPlan DRAFT v1.04.11.2023 (003) (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC COMMENT

Emergency Solutions Grant (ESG)
Reference 91.220(l)(4)

1. **Include written standards for providing ESG assistance (may include as attachment)**
   Per grant requirements, the ESG standards include:

   1. Standard policies and procedures for evaluating individuals and family's eligibility for assistance under ESG.
   2. Policies and procedures for determining and prioritizing which eligible families and individuals will receive homelessness prevention assistance and which eligible families and individuals will receive rapid re-housing assistance.
   3. Policies and procedures for coordination among emergency shelter providers, essential service providers, homelessness prevention and rapid re-housing assistance providers and mainstream service and housing providers.
   4. Standards for determining the share of rent and utilities cost that each program participant must pay, if any, while receiving homeless prevention and rapid re-housing assistance.
   5. Standards for determining how long a program participant will be provided with rental assistance and whether the amount of that assistance will adjust over time.
   6. Standards for determining the type, amount, and duration of housing stabilization and/or relocation services to provide a program participant, including the limits, if any, on the homelessness prevention or rapid re-housing assistance that each program participant may receive, such as the maximum amount of assistance, maximum number of months the program participant receives assistance, or the maximum number of times the program participant may receive assistance.
2. **If the Continuum of Care has established centralized or coordinated assessment system that meets HUD requirements, describe that centralized or coordinated assessment system.**
   The McKinney-Veto Homeless Assistance Act requires that communities operate a Continuum of Care (CoC) program designed to assist homeless persons with housing and/or services with the goal of long-term stability. Riverside County's Department of Public Social Services (DPSS) has been the lead agency in coordinating the CoC including securing membership and ensuring that CoC's various legal responsibilities are met. Current members include the County, various entitlement cities, non-profit/service providers, homeless persons, and members of the public. As a collaborative, the group must assess the needs of the areas homeless and affordable housing needs then develop a regional plan to address them. They also promote a community-wide commitment to ending homelessness, provide for funding for local efforts to address homelessness, and promote effective use of mainstream programs, including designing and operating a software system called the Homeless Management Information System (HMIS) intended to minimize duplication of services.

   Due to changing demographics, Moreno Valley is now a direct recipient of ESG entitlement funding. Upon notification of award, the City understood that CoC Consultation was an ESG grant requirement. To comply, Moreno Valley consults with the CoC by sharing ESG funding recommendations issued at the City level and requesting feedback from the full CoC membership.

3. **Identify the process for making sub-awards and describe how the ESG allocation available**

to private nonprofit organizations (including community and faith-based organizations).
The ESG sub-awards proposed as part of this FY 23-24 Annual Action Plan were selected via the standard annual application process along with the City's CDBG and HOME programs. The City's competitive process includes required public notifications and issuance of a Notice of Funding Availability (NOFA). In efforts to reach as many applicants as possible the City advertised in local publication of general circulation, online, via social media, and through e-mail blasts to interested parties. Moreno Valley also offered an on-line application workshop aimed at providing program information and application assistance. Applications were due January 31, 2023. The efforts resulted in the City receiving one (1) ESG application requesting a total $39,990. As part of the application process, in preparation of the Action Plan, the City contracted a third party to collaborate with City Staff as the Technical Review Committee for review of the ESG applications. Each application was reviewed two times, once for completeness and HUD eligibility and once for completion of the City's formal evaluation form. Return applicant's prior performance in terms of meeting their established goals, expenditure and administrative requirements were evaluated with the input of City's grant management staff. The applications received by the Technical Review Committee were presented to the City Council at a Public Hearing held on April 18, 2023. In line with the City's policies and objectives, the final project selections shall be made by the City Council via final Public Hearings.

4. **If the jurisdiction is unable to meet the homeless participation requirement in 24 CFR 576.405(a), the jurisdiction must specify its plan for reaching out to and consulting with homeless or formerly homeless individuals in considering policies and funding decisions regarding facilities and services funded under ESG.**
The homeless requirements under 24 CFR 576.405(a) and 91.220 (1)(4) (iv) indicate that the City's policy making entity must have at least one homeless or formerly homeless individual on its panel. The City contends that it has met the homeless participation requirement via the consultation process with the CoC. The CoC has a member who is formally homeless and an active participant.

5. **Describe performance standards for evaluating ESG.**
The City shall work with the one (1) ESG subrecipient to form the appropriate performance standards customized for the specific ESG activity being carried out. These agreed upon standards will be consistent with ESG regulations, the City's 2018-2023 Consolidated Plan, and the adopted ESG written standards. The ESG performance standards shall be included in the subrecipient's FY 23-24 grant agreement. Because ESG is a newer program for Moreno Valley, the City fully expects that the performance standards will evolve over time. For now, the City shall continue to consult with the CoC members to discuss the ESG program including performance standards.

OVERVIEW

Historically, the City of Moreno Valley (the "City") has received federal funding on an annual basis from the Department of Housing and Urban Development (HUD) for two formula block grant programs: Community Development Block Grant (CDBG) and HOME Investment Partnerships Program (HOME). Since Program Year 2013/14, the City has become a direct recipient of Emergency Solutions Grants Program (ESG) funds.

Descriptions of each formula block program (HOME, ESG and CDBG) can be found in Sections II, III, and IV of this report.

The following subsections provide an overview of the Five-Year Consolidated Plan, The Citizen Participation Plan, The Annual Action Plan, Objectives and Policies, and the Fiscal Year (FY) 2023/24 Application Process and Review.

The Five-Year Consolidated Plan

Every five years, the City of Moreno Valley prepares a Five-Year Consolidated Plan (ConPlan), which describes community needs, resources, priorities, and proposed activities to be undertaken under certain HUD programs, including, HOME, ESG and CDBG that benefit low and moderate-income households and neighborhoods.

The proposed ConPlan for Fiscal Years 2023/24 through 2027/28, outlines the following goals and strategies:

Substandard Housing Strategy

Homelessness Strategy

Public Facilities and Improvements Strategy

Public Services Program Strategy

Housing Discrimination Strategy

Economic Development Strategy

Planning and Administration Strategy

The Citizen Participation Plan

The City has developed a Citizen Participation Plan (CPP) as a part of the ConPlan that sets forth the policies and procedures to encourage citizen's participation in the HOME, ESG and CDBG Program planning and implementation processes. This CPP provides the method and process by which the City will encourage citizen participation in the development of its ConPlan.

Attachment: MV Grant Funding Reco Booklet 041823 v3 edits - 4-11-23 (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC

A copy of the City's Citizen Participation Plan is available for inspection at the Financial & Management Services Department during normal business hours.

The Annual Action Plan

Each year in May, the City of Moreno Valley is required to submit an update to the ConPlan to HUD, referred to as an Annual Action Plan (AAP). The AAP outlines the specific steps that will be taken during the year to address both the community development and housing priorities of the ConPlan. The AAP identifies how the HOME, ESG and CDBG Program funds will be utilized to provide programs and projects that benefit low and moderate-income households and neighborhoods.

A copy of the City's AAP for prior program years is available for inspection at the Financial & Management Services Department during normal business hours and is available on the City's website at www.moval.org.

FY 2023/24 Proposed HOME, ESG and CDBG Objectives and Policies

The City's Objectives for the HOME, ESG and CDBG programs are summarized below (*listed alphabetically*) and additional detail can be found in the application booklet:

Capital Improvement Activities

Economic Development Activities

Health, Safety, and Public Welfare Activities

Historic Preservation Activities

Homeless/Homeless Prevention Activities

Housing and Neighborhood Improvement Activities

Public Service Activities
Basic Needs Related to Social Services Programs (such as but not limited to emergency food, shelter (homelessness), and utility assistance)
Community Public Safety Programs
Programs offering Low-Cost Transportation
Employment Services/Programs and Job (Skills) Training
Free/Low-Cost programs for School-Aged Youth
Fair Housing Activities

Slum or Blight Activities

FY 2023/24 Application Process and Review

On December 15, 2022, the City published Notice of Funding Availability (NOFA) for Fiscal Year 2023/24 Application for Funding for HOME, ESG and CDBG. According to the application guidelines, interested parties were informed to submit their completed applications by January 31, 2023, 5:00 pm. Programs and projects seeking funding from the City of Moreno Valley must address one or more of the Community Development Priorities set forth in the Five-Year Consolidated Plan, in addition to meeting all other conditions as summarized in the application booklet. A copy of the application booklet which provided additional information on the City's objectives and policies was made available on the City's website.

The City received twenty-two (22) eligible applications requesting a total $6,795,901. This report does not include information from any applications that were incomplete, withdrawn and/or deemed ineligible.

As part of the application process in preparation of the One-Year Action Plan, the City has contracted Avant-Garde Inc. ("AGI") to collaborate with City Staff and Officials, as the Technical Review Committee for the HOME, ESG and CDBG application proposals.

The applications received by the Technical Review Committee's will be presented at a Public Hearing scheduled on April 18, 2023. At this meeting, the City of Moreno Valley City Council will review and consider the proposed project applications. In line with the City's policies and objectives and the Citizen's Participation Plan, the final project selections will be made by the City Council via Public Hearing on May 16, 2023. The Annual Action Plan is scheduled to be submitted to HUD at least 45 days before the beginning of the program year.

The following sections of this report contain the received applications for FY 2023/24.

Attachment: MV Grant Funding Reco Booklet 041823 v3 edits - 4-11-23 (6218 : PUBLIC HEARING TO REVIEW AND BEGIN THE 30-DAY PUBLIC

Home Investment Partnerships Program (HOME) - $755,989

Grant Purpose

The Home Investment Partnerships Program was established by the Title II of the Cranston-Gonzalez National Affordable Housing Act. The objectives of the HOME Program include:

Expanding the supply of decent and affordable housing; primarily rental housing.

Strengthening the ability of state and local government to provide adequate supplies of decent, affordable housing.

Providing financial and technical assistance to participating jurisdictions, including the development of model programs for affordable low-income housing.

Extending partnerships among all levels of government and the private sector, including for-profit and non-profit organizations, in the production and operation of affordable housing.

Funding

Fiscal Year 2023/2024 Allocation	**HOME**
Planning and Administration Cap (10% of annual grant)	$75,599
Mandatory CHDO set-aside (15% of annual grant)	$113,398
Available for Other Activities	$566,992
TOTAL Approved Allocation	**$755,989**
TOTAL Uncommitted Prior Year HOME Funds	$1,953,951
TOTAL Estimated Available for Funding	**$2,709,940**

Applications

The City received three (3) HOME applications requesting a total of $2,155,118 in HOME funding, leaving uncommitted HOME funds of $365,825.

Emergency Solutions Grants Program (ESG) - $169,365

Grant Purpose

The Homeless Emergency Assistance and Rapid Transition to Housing Act of 2009 (HEARTH Act) amended the McKinney-Vento Homeless Assistance Act, revising the Emergency Shelter Grants Program in significant ways and renaming it the Emergency Solutions Grants Program. The City has received ESG program grant funds for 8 years. The decision to apply the American Community Survey (ACS) data to calculate HUD allocations made Moreno Valley eligible to receive ESG funds.

The ESG program is issued to assist, protect, and improve living conditions for the homeless. The program provides funding to:

Engage homeless individuals and families living on the street,

Improve the number and quality of emergency shelters for homeless individuals and families,

Help operate these shelters and provide essential services to shelter residents,

Rapidly re-house and provide essential services to shelter residents,

Prevent families/individuals from becoming homeless and provide essential services to those at risk of homelessness.

Community Development Block Grant (CDBG) - $1,979,019

Grant Purpose

The Community Development Block Grant (CDBG) Program is authorized by Title I of the Housing and Community Development Act of 1974, as amended. The primary objective of the CDBG program is to develop viable urban communities by providing decent housing, a suitable living environment, and expanded economic opportunities, principally for persons of low and moderate income.

The CDBG objective is to be achieved in two ways:

First, a grantee can only use funds to assist eligible activities that meet one of three national objectives of the program:

Benefit low- and moderate-income persons,

Aid in the prevention or elimination of slums and/or blight,

Meet community development needs having a particular urgency.

Second, at least 70 percent of funds must be spent (over a period of up to 3 years) for activities that address the national objective of benefiting low and moderate-income persons.

Funding and Limitations

Fiscal Year 2023/2024 Allocation	**CDBG**
Planning and Administration Cap (20% of annual grant)	$395,804
Public Services Cap (15% of annual grant)	$296,853
Available for Other Activities (65% of annual grant)	$1,286,362
TOTAL Approved Allocation *	**$1,979,019**
TOTAL Uncommitted Prior Year(s) CDBG Funds*	$421,191
TOTAL Available for Funding	**$2,400,209.69**

** The City may utilize prior-year uncommitted funds towards non-public service activities.*

CDBG Public Service – Limited to 15%

The City's Public Service priority ranking as approved by the Council is recapped below:

Priority 1: Basic Needs Related Social Services Programs (such as but not limited to emergency food and shelter (homelessness), abused children advocacy, and utility assistance)

Priority 2: Community Public Safety Programs

Priority 3: Programs offering Low-Cost Transportation

Priority 4: Employment Services/Programs and Job (Skills) Training

Priority 5: Free/Low-Cost programs for School-Aged Youth

Priority 6: Fair Housing Activities

According to the CDBG regulations, the amount of CDBG funds obligated within a program year to support public service activities may not exceed 15% of the annual program allocation. As a result, the City's Public Service projects for program year 2023/24 is limited to **$296,853.**

There was a total of thirteen (13) public service applications received totaling $949,895 exceeding the estimated available for funding by $653,042.

Total # Person Served:	31
MV # Person Served:	31
Funding per Person Served:	$52,786.06

Program Description:

Mary Erickson Community Housing, a Non-Profit Corporation (MECH) presents the new construction of seven (7) detached single family homes for sale to up to 80% Area Median Income (AMI) first time homebuyers with a preference for US Veterans and/other groups on the City-owned lot at Eucalyptus/Heacock. MECH proposes four (4), 3 bedroom, 2 bath, and three (3) 4 bedroom 2 bath with attached 2 car garage and front and back yards incorporating selected ADA adaptability, and energy efficient sustainability features. The total development budget is $3,498,000 and MECH requests $1,636,368 in HOME construction subsidy. Funds will be used for construction, development subsidies and down payment loan assistance for the homebuyers. The homes will have HOME and City affordability covenants for 45 years. At permanent financing, program will return ~$400K+ to the City or final City funding of $1,224,000. The project helps meet the City's RHNA goals and transforms a nuisance lot into the American Dream of homeownership.

The CDBG grant funds will be used to provide added enforcement support through overtime hours worked in the CDDBG target areas. The overall purpose is to reduce crime within the areas, improve blighted conditions, and enhance quality of life for the targeted community. The officers will acquaint themselves with stakeholders and residents and will work closely with them to forge improved relationships to reduce crime. Additionally, funding will be used for CSU overtime to provide training for the Citizens Patrol and Volunteer/Explorer Programs, which enhance crime preventative efforts.

Funding: CDBG

Applicant: **Riverside Area Rape Crisis Center**
Program: **Building Safe Communities**

Funding Type:	Public Service (Crime Awareness/Prevention)
City Objective:	Public Service
Public Service Priority:	(2) Community Public Safety Programs
Requested Funding Amount:	**$15,000.00**
Total # Person Served:	9,000
MV # Person Served:	2,600
Funding per MV Person Served:	$5.77

Program Description:

Building Safe Communities promotes mental health equity, increases community safety, and addresses gender-based violence through a hybrid outreach and education service model. The program reaches over 9,000 individuals annually, including 2,600 Moreno Valley residents. To reach Moreno Valley residents who face myriad barriers and lack access to culturally specific support and resources, RARCC's Building Safe Communities online portal offers access to rape prevention education, healthcare, and other informational resources. Moreno Valley residents who access the portal will complete a demographic profile including address, zip code, and HUD income per household acknowledgment. RARCC will measure community safety and awareness and offer participation in virtual learning and in-person workshops. RARCC expects 90% of participants and online visitors to increase their knowledge of trauma care, gender-based violence, and how to identify healthy behaviors that improve community safety. Virtual sessions require pre- registration with zip code to ensure that CDBG-funded clients are tracked appropriately.

Program Description:
MoVan is a transportation van for twelve passengers plus 2 wheelchairs, provided Monday through Friday, 8:00am-5pm. The MoVan is a convenient form of transit service dedicated to meet mobility needs of Moreno Valley seniors 60 years plus and disabled adults. MoVan transports curb-to-curb to our Senior Community Center as well as medical, legal, food distribution appointments and City events. MoVan provides this at a low cost of $1.00 each way within a 20-mile radius. No one is turned away due to their inability to pay. The requested funds are used to pay the third-party transit company for drivers, dispatch service, fuel, maintenance, permit fees and insurance at an all-inclusive rate of $83.48/hour.

City Objective:	Public Service
Public Service Priority:	(4) Employment Services/Program and Job (Skills) Training

Requested Funding Amount:	**$432,000.00**
Total # Person Served:	1,102
MV # Person Served:	1,102
Funding per MV Person Served:	$392.01

Program Description:

WeeCare's BOOST program provides technical assistance and business support to childcare providers who run home daycares. They serve children ages 0-5 (and up to age 13 with before/after school care). The program's goal is to expand economic opportunities for daycare providers in Moreno Valley by training them to use essential tools to make their operations more efficient. This enables them to reach their full revenue potential and stabilize their jobs in the childcare industry. Daycare providers get personal guidance, relevant technology tools and learn best practices to grow and sustain their business, all while supporting the LMI with childcare services. Therefore, WeeCare requests $432,000 to pay for the program expenses to run BOOST for one year. This will benefit 72 LMI daycare owners, potentially create 22 LMI jobs, and can benefit up to 1,008 LMI families seeking childcare.

Total # Person Served:	2000
MV # Person Served:	375
Funding per MV Person Served:	$93.33

Program Description:

Operating since 1967, Operation School Bell (OSB) is a program provided to students with a goal of assisting them in removing barriers to learning. The program provides new school clothes and dental kits to homeless and economically disadvantaged children. Through collaboration with nine school districts, we get referrals for students who need our program. We expect to serve around 2000 students next year and believe about 375 of these will come from Moreno Valley. Referred students are assigned a specific date and time to come to a local JCPenney store (one of which is in Moreno Valley). The students are met by Assistance League of Riverside (ALR) volunteers who guide them regarding what type of purchases they may make (school-appropriate backpacks, clothes, and/or shoes). After the students select their purchases, an ALR volunteer pays. Younger students receive $130-worth and older students receive $150-worth.

Program Description:

VFC's Court Appointed Special Advocate (CASA) program will address the needs of abused and neglected City of Moreno Valley youth in foster care by providing them with the comprehensive, individualized advocacy of a CASA volunteer in court and throughout the community. The organizational cost of providing one year of CASA advocacy to a youth in Riverside County is $2,000. A $30,000 grant from the City of Moreno Valley CDBG program will enable Voices for Children (VFC) to provide CASA volunteers to fifteen (15) youth from the City of Moreno Valley during fiscal year (FY) 2023-24. On average, CASAs provide youth with 10-15 hours of direct advocacy services per month. This grant would partially fund salaries for the VFC staff Advocacy Supervisors who will manage the CASA volunteers and the cases of grant-funded City of Moreno Valley youth in foster care.

Program Description:

This project is proposing the renovation of its existing 20-year Residential Care Facilities for the Elderly to better serve its 100% population of Elderly, many of whom are disabled, in order to provide more dignified living conditions. The proposed project will include renovations of the common areas and shared living spaces for all four of the existing on-site residential care facilities. Specifically, California Drug Consultants, Inc. will be replacing the carpet with vinyl hardwood floors, replacing countertops in the kitchens and dining areas, repainting the walls and sanding, and repainting the cabinets to improve ease of use. Additionally, funds will be used to replace the existing appliances which include: washer/dryer units, dishwashers, microwaves, oven ranges and refrigerators. The purpose of these improvements will be to improve usability, and provide clean, safe, energy efficient, functional facilities for residents regardless of income or background.

Program Description:

This project provides new pavement construction and pavement rehabilitation for 17 local streets within the City's HUD-CDBG target areas. Pavement rehabilitation consists of the removal of 1.5-inch thick of existing asphalt concrete pavement surface and construction of new asphalt concrete pavement surface of same thickness for streets that are severely distressed. Rehabilitation also includes localized pavement repairs, crack sealing, and application of slurry seal for streets that are less distressed. New pavement is proposed for a segment of Brill Road. The project is to improve roadways and extend the service life of street pavement while enhancing safety and aesthetic appearance of various communities within HUD-CDBG target areas. Refer to the Location Map and List of Streets for more information.

Report to City Council

TO:	Mayor and City Council
FROM:	Manuel A. Mancha, Community Development Director
AGENDA DATE:	April 18, 2023
TITLE:	MORENO VALLEY TRADE CENTER

RECOMMENDED ACTION

That the City Council take the following actions:

1. Adopt Resolution No. [next in order] approving and adopting the Mitigation, Monitoring and Reporting Program and Statement of Overriding Considerations and Certifying the Final Environmental Impact Report for the Moreno Valley Trade Center Project;

2. Adopt Resolution No. [next in order] approving General Plan Amendment (PEN19-0191), Tentative Parcel Map (PEN19-0234), and Plot Plan (PEN19-0193) and the respective conditions of approval, based on the Recitals, Evidence and Findings contained in the Administrative Record of the proceedings;

3. Introduce Ordinance No. [next in order] approving Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas and the conditions of approval, based on the Recitals, Evidence and Findings contained in the Administrative Record of the proceedings;

4. Adopt Resolution No. [next in order] finding and determining pursuant to Senate Bill No. 330 that approval of the Moreno Valley Trade Center project shall not result in a net loss in residential capacity; and,

5. Adopt Resolution No. [next in order] accepting the Community Benefits and Community Park on behalf of the City of Moreno Valley, as offered by the Applicant and set forth in the Community Park Acquisition and Improvement Agreement and authorize the City Manager to execute the Agreement and approve any subsequent amendments, subject to the consent of the City Attorney, consistent with the intent and purposes of the Agreement.

BACKGROUND:

The proposed Moreno Valley Trade Center project consists of the following: 1) General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193), collectively, the "Proposed Project." The Proposed Project, as analyzed by the Draft Environmental Impact Report ("Draft EIR") consisted of the proposed merger of 11 parcels into a single parcel for the purpose of developing and constructing an approximately 1,263,271 square foot "warehouse and logistics center" or in the alternative a "fulfillment/e-commerce center facility" on about 80 acres south of Eucalyptus Avenue, north of Encelia Avenue, east of Quincy Street, and west of Redlands Boulevard, currently comprising Assessor Parcel Nos. 488-340-002 through 012 ("Project Site").

The Proposed Project's warehouse and logistics center option was considered by the Planning Commission at a duly noticed public hearing conducted on October 28, 2021, and the Planning Commission voted 4-0 to deny the Proposed Project's warehouse and logistics center option based on the findings that: 1) the Proposed Project's warehouse and logistics center option was inconsistent with the City's General Plan; and 2) the Proposed Project's warehouse and logistics center option would result in significant and unavoidable environmental impacts to the surrounding community.

The Applicant, MVTC, LLC, a Delaware limited liability company, appealed the Planning Commission's decision (Planning Case No. PAA21-0001), and a duly noticed public hearing on the appeal was conducted by the City Council on December 7, 2021. However, at the public hearing, the City Council did not rule on the appeal; rather, after receiving public testimony, the City Council unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project (both options) to a date uncertain.

The City Council public hearing for the Proposed Project has subsequently been rescheduled (continued) for the City Council Meetings of June 21, 2022, November 15, 2022, and December 6, 2022. The November 15, 2022, City Council meeting was adjourned due to a lack of a quorum. However, at the subsequent City Council meeting, the public hearing was continued to a date uncertain at the request of the Applicant. Thereafter, on March16, 2023, the applicant submitted an email (Attachment 27), requesting that the public hearing be scheduled for the City Council meeting of April 18, 2023. As such, all the requisite public hearing notices were prepared, distributed and posted pursuant to applicable law for the April 18, 2023 public hearing.

Proposed Project - Requested Entitlements

The Proposed Project includes the following requested entitlements: 1) General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and the corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193).

General Plan Amendment (PEN19-0191) – The purpose of the General Plan Amendment is to change the Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map from Residential 2 (R2) to Business Park (BP). The primary purpose of the Business Park (BP) General Plan Land Use Designation is to provide for manufacturing, research and development, warehousing and distribution, as well as office and support commercial activities. The proposed General Plan Amendment, as requested by the Applicant, will be consistent with the Project Site's adjacent parcels to the northwest, north, northeast, and east, which have Business Park (BP) Land Use Designations. The parcels to the northwest, north, and northeast have been developed with industrial warehouse buildings. The parcels to the east are currently vacant and unimproved. The change in the Project Site's Land Use Designation would result in a total increase of approximately 80.04-acres of the Business Park (BP) General Plan Land Use Designation and a corresponding reduction of approximately 80.04-acres of the Residential 2 (R2) General Plan Land Use Designation.

Change of Zone (PEN19-0192) – The purpose of the Change of Zone is to rezone the Project Site from Residential Agriculture 2 (RA2) District to Light Industrial (LI) District, and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification. The primary purpose of the Light Industrial (LI) District zone is to provide for light manufacturing, light industrial, research and development, warehousing and distribution, and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial uses on a limited basis. The Light Industrial District (LI) District is intended as an area for light industrial uses that can meet high-performance standards. The proposed Change of Zone will be consistent with the Project Site's adjacent parcels to the northwest, north, and northeast, which are currently zoned Light Industrial (LI) District and developed with industrial warehouses uses.

Tentative Parcel Map (PEN19-0234) – The purpose of the Tentative Parcel Map is to merge the existing 11 parcels into a single parcel. Out of the 11 subject parcels, 7 parcels are currently vacant and unimproved. The other 4 parcels are developed with the Adam's Hall Plant Nursery that includes some residential structures. Staff has reviewed the proposed Tentative Parcel Map and confirmed that the proposed single parcel complies with all applicable development and subdivision standards consistent with the State's Subdivision Map Act.

Plot Plan (PEN19-0193) – The purpose of the Plot Plan is to construct an approximately 1,263,271 square foot Warehouse/Distribution building on the Project Site with associated parking, landscape improvements, and off-site public improvements. An alternative land-use option, a fulfillment/e-commerce center facility was also discussed in the Draft EIR. Should the Applicant decide to pursue the option of developing and constructing the fulfillment/e-commerce center facility, either an amended Plot Plan or a new Plot Plan proposal would have to be submitted for review and approval.

Proposed Revisions to the Proposed Project Description

As described above, the Proposed Project, as analyzed by the Draft EIR, consisted of a warehouse and logistics center or in the alternative a fulfillment/e-commerce center option. The Planning Commission's decision, however, was related only to the Proposed Project's warehouse and logistics center option.

The Applicant has taken into consideration several issues raised by the Planning Commission in its denial of the Proposed Project and input it received from members of the public at the City Council public hearing held on December 7, 2021. As a result, the Applicant decided to submit various revisions to the Proposed Project's warehouse and logistic center that the Applicant believes are responsive to the various concerns that have been officially raised regarding the scope of the Proposed Project's warehouse and logistics center option and its impacts on the surrounding community and environment.

Section 3.0, Project Description, of the Draft EIR included a detailed description of the Proposed Project, as originally proposed. With the exception of the items listed below, all components of the proposed development and characteristics of the Proposed Project's warehouse and logistic center, as described in Section 3.0 of the Draft EIR remain applicable, in that they will not need to be altered, modified or changed in any manner to accommodate any of the "Proposed Revisions" as offered by the Applicant, as particularly described below. (See Moreno Valley Trade Center - Revised Project Evaluation, attached hereto.)

The Proposed Revisions include the following:

1. The square footage of the interior floor area of the Proposed Project's light industrial building will be reduced by 65,582 square feet to approximately 1,263,271 square feet.
2. The number of loading docks on the south side of the building will be reduced by 4 to 117 loading docks.
3. The number of loading docks on the north side of the building will be reduced by 7 to 97 loading docks.
4. The number of trailer parking spaces will be reduced by 10 to 228.
5. The number of passenger vehicle parking spaces will be reduced by 86 to 521.
6. All driveways on Encelia Avenue will be eliminated.
7. The finished floor elevation (feet above mean sea level) of the building will be reduced by approximately 3.25 feet to 1,732.25 feet, which will reduce the perceived height of the building.
8. An approximately 35-foot-tall, solid earthen berm, densely landscaped with trees, shrubs, and groundcover, will be installed at the interface between the Project Site's southern boundary and Encelia Avenue.
9. Truck access will be limited to Eucalyptus Avenue, thereby eliminating any truck access from Redlands Boulevard.
10. Traffic signals will be installed at Redlands Boulevard at the proposed northern driveway to the Project Site.
11. A water quality/detention basin will be installed at the southeastern corner of the Project Site.

The Draft EIR still includes the alternative fulfillment/e-commerce center option. However, while the fulfillment/e-commerce center option remains conceptual, the Applicant has proposed that the Proposed Revisions described above also apply to the Proposed Project's fulfillment/e-commerce center option, with the following modifications applied to the number of loading docks, trailer parking stalls, and passenger vehicle parking stalls. For the fulfillment/e-commerce center option, the Applicant proposes zero loading docks on the south side of the proposed building; only 103 trailer parking stalls on the north side of the building; and 3) 1,352 passenger vehicle parking stalls for the entire Project Site. (See Conceptual Site Plan for the Fulfillment/E-Commerce Option, attached hereto).

It is important to note that there are no proposed modifications requested by the Applicant nor recommended by staff regarding the proposed General Plan Amendment (PEN19-0191) and Change of Zone (PEN19-0192), as originally presented on October 28, 2021, at the Planning Commission public hearing and on December 7, 2021, at the City Council public hearing. As discussed above, the purpose of the General Plan Amendment (PEN19-0191) is to change the Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map from Residential 2 (R2) to Business Park (BP), which provides for manufacturing, research and development, warehousing and distribution, as well as office and support commercial activities. Moreover, the purpose of the Change of Zone (PEN19-0192) is to rezone the Project Site from Residential Agriculture 2 (RA2) District to Light Industrial (LI) District, and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification. The purpose of the Light Industrial District (LI) zone is to provide for light manufacturing, light industrial, research and development, warehousing and distribution, and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial uses on a limited basis. In conclusion, the Proposed Revisions do not necessitate any need to modify the Applicant's requests for either the General Plan Amendment (PEN19-0191) or Change of Zone (PEN19-0192) since the proposed uses remain the same. In light of the foregoing, the City Council is not required to refer the Proposed Project back to the Planning Commission for a recommendation prior to taking final action on the revised Project, as otherwise would have been required per sections 9.02.040 (General plan amendments) and 9.02.050 (Amendments to zoning districts or other provisions of Title 9) if there were in fact modifications made to either General Plan Amendment (PEN19-0191) or Change of Zone (PEN19-0192).

Storm Drain Condition

1. The Proposed Project has been conditioned to require the Applicant, prior to occupancy, to install a 72" reinforced concrete pipe (RCP) storm drain to join the existing 72" RCP, located at Redlands Boulevard south of Eucalyptus Avenue. The Applicant shall also make the necessary installations to cause the proposed 72" RCP to transition to a proposed 78" RCP at Redlands Boulevard north of Encelia Avenue which will also be installed by the Applicant and which will terminate near Dracaea Avenue where it will join an existing 42" RCP. The Applicant has consented to complying with this condition, as set forth in a letter from the Applicant, dated December 1, 2021, which is attached to the attached Resolution Accepting

Community Benefits and Approving Park Agreement, which is consistent with Municipal Code Section 9.14.110 (Flood control and tract drainage) and the City's relevant standard design standards that the City Engineer relies upon when determining whether the use of streets for drainage purposes is not in the interest of public health, safety and welfare. The City Engineer's determination that the use of streets for drainage purposes is not in the interest of public health, safety and welfare is based on 1) evidence that the water discharge that will be created by the Proposed Project (Proposed Project Flows) will exceed the existing water discharge conditions (Undeveloped, Existing Project Flows) associated with the Project Site, which will exacerbate the downstream flooding potential at Dracaea Avenue, and 2) the capacity of existing downstream drainage infrastructure including that of the developed westerly half of Redlands Boulevard. The City's construction inspector supervisor has noted that flooding has occurred on the east and west side of Redlands Boulevard between Encelia Avenue and Dracaea Avenue during significant rain events, with the flooding on the eastern side of Redlands Boulevard spilling over to the west side of the street. For instance, under significant rain events (i.e., major storm events), at the 42" storm drain headwall, stormwater tends to back up and eventually flows over to the other side of Redlands Boulevard as fast-moving sheet flow which may create dangerous driving conditions and a risk of property damage. Additionally, it is common for manhole lids downstream from the 42" headwall at Dracaea Avenue to pop open when the 42" pipe backs up due to the velocity and the volume of water that flows through the subject storm drainpipe during major storm events.

Community Benefits Offered by Applicant

In addition to the CEQA-related Mitigation Measures and the Conditions of Approval related to the requested entitlements, the Applicant has offered numerous "Community Benefits," as set forth in letters from the Applicant, dated December 1, 2021, June 14, 2022, and April 13, 2023 which are included in the attached Resolution Accepting Community Benefits and Approving Park Agreement, that fall beyond the City's legal authority to approve as CEQA-related Mitigation Measures or as the Conditions of Approval related to the requested entitlements, with the exception of the Storm Drain Condition described above. In other words, since the Community Benefits being offered by the Applicant lack sufficient nexus to the potential impacts of the Proposed Project, the City lacks the legal authority to unilaterally imposed the Community Benefits as bona fide Mitigation Measures or Conditions of Approval. Notwithstanding the above, the Applicant has agreed that the Community Benefits be memorialized as enforceable conditions of approval. As such, since these conditions of approval will be incorporated into the Proposed Project's approval, the City will be able to use code and permit enforcement procedures to ensure the implementation of each of the Community Benefits offered by the Applicant.

The Community Benefits offered by the Applicant in their December 1, 2021 letter include providing up to $204,000 to fund and administer several electric vehicle grant programs, which will include funding for Heavy Duty Electric Trucks, Medium Duty Electric Trucks, Local Delivery Electric Vehicles and Electric Passenger Vehicles. The Developer shall be responsible for establishing, funding, and administering each of the

grant programs and provide a hyperlink to each grant program that the City may post on the City's official website for interested parties to access information about the programs. In addition, the Applicant has offered to provide $113,000 to fund a Solar Advocacy Fund, Residential Air Filtration Reimbursement Program, Residential Noise Insulation Reimbursement Program, and Residential Exterior Pressure Washing Reimbursement Program, in addition to installing additional onsite EV charging stations and at least one APU plug-in for every 35 dock doors at multiple locations within the Project Site where trucks are proposed to park. Moreover, only electrical appliances shall be used in building office areas, and the use of portable or stationary diesel-powered generators shall be prohibited unless necessary due to emergency situations or constrained supply. Also, all construction equipment shall meet or be cleaner than Tier 4 standards, except if the general contractor overseeing the Proposed Project's construction certifies that it is not feasible to use exclusively Tier 4 equipment due to limited availability. In all events, at least 80% of all construction equipment shall meet or be cleaner than Tier 4 standards throughout the construction phase of the Proposed Project.

The Community Benefit offered by the Applicant in their June 14, 2022 letter is a $500,000 cash contribution to the Moreno Valley Community Foundation before a final Certificate of Occupancy is issued for any building or structure on the Project Site. (The specific purpose of the Moreno Valley Community Foundation, as described in its Bylaws, are as follows: 1) to lessen the burdens of government by aiding and assisting in the implementation, improvement, and maintenance of public services that preserve and promote the health and welfare and education of local citizenry of the City of Moreno Valley; 2) to form unincorporated divisions responsible for the furtherance of one or more of such public services as deemed appropriate by the Board of Directors of the Foundation; and 3) to receive, invest, and utilize funds and property acquired through the solicitation of contributions, donations, grants, gifts, bequests and the like for the purposes for which the Foundation was formed. Furthermore, all assets of the Foundation must be irrevocably dedicated to public and educational purposes for the benefit of the City and the residents and absolutely no part of the net income or assets of the Foundation shall ever inure to the benefit of any director, officer, or member thereof, or to the benefit of any private persons.

The Community Benefits offered by the Applicant in their April 13, 2023 letter include the donation $1,000,00.00 in annual revenue to the Moreno Valley Community Foundation for the first 15 years, a donation of $15,000,000.00 as a one-time payment, restricting the building height to 60 feet maximum, exclusively marketing to manufacturing uses for the first year, adding a 9,000 square foot community youth center to the previously proposed park, partnering with and donating $250,000 to the Kawhi Leonard Foundation for youth programs in the City; and the construction of two mega tesla charger stations for electric vehicle trucks on the project site.

In addition to the above-referenced Community Benefits, the Applicant has offered to develop and construct an 18-acre park facility, accommodating two full-size size fully lighted soccer fields, a fully lighted baseball field, a snack bar/concession, public restrooms, a walking path, playground, exercise equipment, landscaping and related parking, as more particularly described in the Community Park Acquisition and

Improvement Agreement, which is attached to the attached Resolution Accepting Community Benefits and Approving Park Agreement. Incidentally, the lighting installed by the Applicant will be for general illumination and night security purposes. The facility will be connected to all public utility services and all off-site public and private improvements shall be installed by the Applicant without any financial assistance or labor, equipment or materials provided by the City of Moreno Valley. Furthermore, fee title to the land for the facility shall be acquired by the Applicant without any financial assistance from the City of Moreno Valley. Fee title to the facility's real property and all improvements, free of any liens, mortgages non-public utility easements, or any other encumbrances, will be donated to the City of Moreno Valley.

Again, all of the Community Benefits referenced above (excepting the storm drain condition described above), the contribution to the Moreno Valley Community Foundation, and the development of the Community Park are neither CEQA-related mitigation measures nor conditions of approval that the City has the legal authority to unilaterally impose on the Applicant or the Proposed Project, due to the lack of the requisite nexus that is otherwise required in order to unilaterally impose as environmental mitigation measures or conditions of approval on an applicant or a proposed development project that requires discretionary approval. Notwithstanding the above, the Applicant has agreed that everything being offered by the Applicant be memorialized as enforceable conditions which means the City will be able to use code and permit enforcement procedures to ensure implementation.

Preparation of EIR

The Draft EIR and associated environmental documents for the Proposed Project were prepared by a third-party environmental consultant, T&B Planning, Inc. In practice, Lead Agencies commonly either retain a consultant to prepare the EIR or accept an EIR prepared by the applicant or its consultant rather than have City staff prepare the EIR. CEQA authorizes a Lead Agency to enter into a contract for the preparation of an EIR, and the CEQA Guidelines permit agencies to accept EIRs prepared by project applicants or their consultants. (*See CEQA section 21082.1(a)) and CEQA Guideline section 15084(d)(3)*.)

However, under CEQA, whatever method of preparation the Lead Agency uses, it must independently review and analyze the Draft EIR, and circulate a Draft EIR that reflects its independent judgment. (*See CEQA section 21082.1 (c)(1)-(2) and CEQA Guidelines section 15084 (e).*) In other words, the Lead Agency cannot avoid its legal obligation to independently review and evaluate the EIR by contracting with a consultant to prepare the EIR.

In light of the foregoing, staff independently analyzed the Draft EIR and all related documents, including but not limited to Preliminary WQMP, Hydrology Report, Noise Impact Analysis, and Traffic Impact Analysis. Relevant environmental documents were reviewed by various Departments and Divisions of the City, including without limitation, Planning, Public Works, Engineering and Fire, and the City Attorney's Office.

Draft EIR Public Comments & Responses to Comments

Fifteen public written comment letters were received during the 45-day public review period. Some of the written comments expressed concern regarding potential impacts to air quality, noise, traffic, and aesthetics, while others acknowledged the Proposed Project without providing specific comments addressing potential environmental impacts of the Proposed Project.

Per CEQA and the CEQA Guidelines, the Lead Agency must evaluate comments on the Draft EIR that were received during the public review period and must include written responses to comments in the Final EIR. (*See CEQA section 21091(d) and CEQA Guidelines section 15088(a).*) However, the Lead Agency is only required to provide responses regarding the disposition of any "significant environmental issues" raised by commentators. (*See CEQA section 21091(d)(2)(B) and CEQA Guidelines sections 15088(c), 15132(d), and 15204(a).*) In other words, the Lead Agency is not required to respond to those comments that do not address environmental issues. The Lead Agency's responses to comments may be incorporated as revisions to the Draft EIR or included in a separate section in the Final EIR. (*See CEQA Guidelines section 15088(d).*) In either case, they must appear in the final EIR, which must include the draft EIR, with any revisions or comments on the draft EIR either verbatim or in summary, and the Lead Agency's responses to comments on significant environmental issues. (See CEQA Guidelines section 15132.)

Lead Agencies must respond to comments received during the public comment period. (*See CEQA Guidelines section 15088(a).*) CEQA, however, does not require that the Lead Agency respond to late comments. (*See CEQA section 21091(d)(1); see also Residents Against Specific Plan 380 v County of Riverside (2017) 9 CA5th 941 and Gilroy Citizens for Responsible Planning v City of Gilroy (2006) 140 CA4th 911*.). Further, the Lead Agency need not hold open the review process to prepare responses to late comments. (*See CEQA section 15207; see also City of Poway v City of San Diego (1984) 155 CA3d 1037*.) Given that there is no legal duty to respond to late comments, the claimed inadequacy of responses to late comments cannot be a basis for challenging the legal adequacy of an EIR. (*See Gray v County of Madera (2008) 167 CA4th 1099*.)

In light of the foregoing, the environmental consultant, Planning staff, Public Works and Engineering staff, and the City Attorney’s Office prepared responses to the written comments the City received within the 45-day public review period and those written responses are included in the Final EIR. However, any written comments received after the close of the 45-day public review period were not included in the Final EIR, nor are any responses thereto (if any) been included in the Final EIR.

Point-by-point responses to the individual comments, which addressed potential or alleged environmental impacts of the Proposed Project were prepared with some responses to certain comments consisting of cross-references to responses to similar or related issues. (*See CEQA section 21082.1*.)

The purpose of staff’s participation in preparing said responses is to ensure that the City, as Lead Agency, independently review and analyze them so that the responses to comments and the Final EIR as a whole reflects the City’s independent judgment. (*See*

CEQA section 21082.1(c).)

Mitigation Measures and Mitigation Monitoring & Reporting Program

Mitigation measures are proposed to reduce the level of potential environmental impacts of the Proposed Project. In the responses to comments, numerous mitigation measures are referenced when such references are related to the potential impact described in the respective comment. Furthermore, the mitigation measures have been incorporated in the proposed Mitigation Reporting and Monitoring Program, that is included as part of the Final EIR, although the Program does not have to be included in the EIR. (*See Christward Ministry v County of San Diego (1993) 13 CA4th 31.*) The purpose of the Mitigation Reporting and Monitoring Program is to ensure that Proposed Project's mitigation measures shall be enforceable through permit conditions, agreements, or other mechanisms. (*See CEQA Guidelines section 5126.4(a)(2)*.) Moreover, because mitigation measures will be incorporated into the Proposed Project's approval, the City will be able to use code and permit enforcement procedures to ensure the implementation of each of the Proposed Project's mitigation measures. (*See CEQA Guidelines section 15126.4.*)

Statement of Overriding Considerations

Although the Mitigation Measures are recommended to reduce the level of the potential environmental impacts of the Proposed Project, after the application of all feasible mitigation measures, staff has determined that the Proposed Project would result in a few significant and unavoidable environmental effects. The following significant and unavoidable environmental impacts have been identified in the Final EIR and will require mitigation but cannot be mitigated to a level of insignificance: 1) Aesthetics: Substantial Adverse Effect on a Scenic Vista; 2) Air Quality: Air Quality Management Plan Conflict; 3) Air Quality: Criteria Pollutant Emissions; and 4) Greenhouse Gas Emissions: GHG Emissions Generation. Details of these significant unavoidable adverse impacts are discussed in the Final EIR and are summarized, or were otherwise provided in Section 5.3, Environmental Effects Which Remain Significant and Unavoidable After Mitigation and Findings, in the Statement of Facts and Findings.

Notwithstanding the above, when the Lead Agency approves a project with significant environmental effects that will not be avoided or substantially lessened, it must adopt a statement disclosing that because of the project's overriding benefits, it is approving the project despite its environmental harm. (*See CEQA Guidelines section 15043*.) The Lead Agency must set forth the reasons for its action, based on the final EIR or other information in the record. (*See CEQA section 21081(b) and CEQA Guidelines section 15093(a)*.) This requirement reflects the statutory policy that public agencies must weigh a proposed project's benefits against its unavoidable environmental risks and may find the adverse impacts "acceptable" if the benefits outweigh those effects. (*See CEQA section 21081(b) and CEQA Guidelines section 15093(a); see also Cherry Valley Pass Acres & Neighbors v City of Beaumont (2010) 190 CA4th 316, Sierra Club v Contra Costa County (1992) 10 CA4th 1212 and San Francisco Ecology Ctr. v City & County of San Francisco (1975) 48 CA3d 584*.) In other words, a statement of overriding considerations expresses the "larger, more general reasons for approving the project,

such as the need to create new jobs, provide housing, generate taxes, and the like." (*See Concerned Citizens of S. Cent. L.A. v Los Angeles Unified Sch. Dist. (1994) 24 CA4th 826*.)

In light of the foregoing, staff recommends that based on balancing the benefits of the Proposed Project against the unavoidable effects which remain, the City Council should find that any one of the following benefits standing alone would be sufficient to sustain the Statement of Overriding Considerations.

1. Approval of the Proposed Project will create maximum employment-generating opportunities for citizens of Moreno Valley and surrounding communities. Development and construction of the site will create both temporary on-site jobs as well as indirectly support local and regional jobs. Additionally, construction spending will create a one-time stimulus to the local and regional economics.

2. Approval of the Proposed Project will create a Class A speculative light industrial building in Moreno Valley that is designed to meet contemporary industry standards and be economically competitive with similar industrial buildings in the local area and region.

3. Approval of the Proposed Project will contribute towards maximizing employment opportunities within the City to improve the jobs-housing balance and to reduce systemic unemployment within the City. The Proposed Project will attract businesses that can expedite the delivery of essential goods to consumers and businesses in Moreno Valley and beyond the City boundary.

4. Approval of the Proposed Project will create approximately 1,000 new on-site jobs under the warehouse distribution/logistics option and 2,000 new on-site jobs under the e-commerce/fulfillment option.

5. Approval of the Proposed Project will result in the development and operation of a state-of-the-art logistics center that takes advantage of existing and planned infrastructure, is technologically feasible to construct, and in the general vicinity of similar industrial logistics and distribution center uses.

6. Approval of the Proposed Project will maximize efficient goods movement throughout the region by locating a large format logistics center in close proximity to the Ports of Los Angeles and Long Beach, thereby enabling trucks servicing the site to achieve a minimum of two roundtrips per day.

7. Approval of the Proposed Project will maximize the use of a large industrial site in the region that is in close proximity to the Ports of Los Angeles and Long Beach, to realize substantial unmet demand in the region, allowing the region to compete on a domestic and international scale through the efficient and cost-effective movement of goods.

8. Approval of the Proposed Project will facilitate the development of long-standing underutilized and vacant land.

Recirculation of Draft EIR Not Required

The Proposed Revisions will NOT: 1) result in new significant environmental impacts that were not disclosed in the Draft EIR; nor 2) result in significant impacts that are more severe than the impacts that were disclosed in the Draft EIR. This conclusion is supported by the various findings and determinations articulated in the recently prepared and updated technical studies, reports, and evaluations, attached to this Staff Report, which include but not limited to the following: 1) Revised Project Evaluation; 2) Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluations; 3) Traffic Impact Analysis Evaluations; 4) Noise Summaries; and 5) Hydrology Calculations. Accordingly, there are no changes needed to the analysis or mitigation measures contained in the Draft EIR; consequently, recirculation of the Draft EIR is not warranted according to the guidance set forth under CEQA and the CEQA Guidelines as referenced below. Furthermore, no changes are needed to the analyses or mitigation measures contained in the Final EIR that is under consideration by the City Council.

The Proposed Revisions, which are characterized as a "Comprehensive Project Redesign of the Proposed Project" (rather than mitigation) include a variety of changes to the Proposed Project through project redesign that are intended specifically to reduce the impacts of the Proposed Project as originally described in the Draft EIR. The Proposed Revisions will effectively benefit the neighboring residents, through reducing noise, traffic, and air quality impacts on neighbors by: 1) reducing building size by 65,000+ square feet; 2) eliminating driveways on Encelia Avenue which will remove 650 daily vehicles on Encelia Avenue; 3) eliminating truck traffic on Redlands Boulevard, south of Eucalyptus Avenue; 4) improving visual and noise screening prior to trees reaching full size; 5) eliminating 11 dock doors from the Proposed Project's design; and 6) adding a new approximately 35 foot-tall earthen berm on the southern side of the Project Site. The new onsite circulation will also direct trucks to access the Project Site from Eucalyptus Avenue only; as such, no trucks from the Project Site will travel on Redlands Boulevard, south of Eucalyptus Avenue as was originally proposed. Also, by designating the northern driveway on Redland Boulevard to "Automobile-Only," traffic traveling southbound toward Encelia Avenue will be reduced by 35% of what was originally proposed in the Draft EIR.

The addition of the approximately 35-foot berm to the southern portion of the Project Site will also result in major changes that will significantly lessen the Proposed Project's aesthetic impacts since: 1) it will completely block views of both the existing warehouses north of Eucalyptus Avenue and the Proposed Project from the adjacent neighborhood; 2) it will be landscaped with 24-inch box trees consisting of Blue Palo Verde, Desert Willow, California Sycamore, Coast Live Oak, Afghan Pine, and Canary Island Pine; and 3) only landscaping will then be visible from Encelia Avenue since the screen wall will be behind the berm. The berm will also lessen the anticipated noise impacts, as originally described in the Draft EIR, in that: 1) the berm will drastically reduce sound below levels in prior design by reducing the noise level by an additional 26% from what was originally projected in the Draft EIR; 2) the berm will reduce the estimated project noise levels to 35.5 decibels (equivalent to "Quiet Suburban Nighttime or Quiet Urban Nighttime") at the Encelia residential neighborhood, which is significantly lower than the ambient noise levels of 41.7 decibels (dBA Leq) that exist today within

the neighborhood; and 3) the berm will serve as a noise canceling mitigation measure related to ambient noise caused by back-up alarms mandated by OSHA and local regulations.

Normally, an EIR is circulated for one round of review and comment by the public and by public agencies. In some instances, however, an EIR must be recirculated for additional public comment, if significant new information is added to the EIR after the expiration of the public comment period but before certification. (*See Public Resources Code §21092.1; 14 Cal Code Regs §15088.5*.) However, recirculation is required only when the information added to the EIR changes the EIR in a way that deprives the public of a meaningful opportunity to comment on either a substantial adverse environmental impact of the project or a feasible project alternative or mitigation measure that would clearly reduce the impact and that is not going to be implemented.

A decision not to recirculate will be upheld if it is supported by substantial evidence in the administrative record. (*See 14 Cal Code Regs §15088.5(e); Laurel Heights Improvement Ass'n v Regents of Univ. of Cal. (1993) 6 C4th 1112; California Oak Found. v Regents of Univ. of Cal. (2010) 188 CA4th 227, 266*.) Under CEQA, “substantial evidence" means "enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached." (*See 14 Cal Code Regs §15384(a) and Laurel Heights Improvement Ass'n v Regents of Univ. of Cal. (1988) 47 C3d 376, 393.*) Substantial evidence includes facts, reasonable assumptions based on facts, and expert opinion supported by facts. Substantial evidence does not include argument, speculation, unsubstantiated opinion or narrative, evidence that is clearly inaccurate or erroneous, evidence that is not credible, or evidence of economic or social impacts that do not contribute to or are not caused by physical environmental impacts. (*See Pub Res C §§21080(e), 21082.2(c); and 14 Cal Code Regs §§15064(f)(5)-(6), 15384.)* Moreover, under the substantial evidence test, a reviewing court may not reweigh the evidence, as it would if it were to apply the independent judgment test. A reviewing court is limited to determining whether the record contains relevant information that a reasonable mind might accept as sufficient to support the conclusion reached. All reasonable doubts must be resolved in favor of the agency's determination, and the court may not set aside the agency's decision even if the opposite conclusion is more reasonable. (*See Western States Petroleum Ass'n v Superior Court (1995) 9 C4th 559, 572; Laurel Heights Improvement Ass'n v Regents of Univ. of Cal., supra; San Diego Citizenry Group v County of San Diego (2013) 219 CA4th 1; Sierra Club v County of Napa (2004) 121 CA4th 1490, 1497; Defend the Bay v City of Irvine (2004) 119 CA4th 1261, 1267; Mira Mar Mobile Community v City of Oceanside (2004) 119 CA4th 477; Association of Irritated Residents v County of Madera (2003) 107 CA4th 1383, 1390; and Placer Ranch Partners v County of Placer (2001) 91 CA4th 1336, 1341*.) Finally, a lead agency's factual determinations are given substantial deference and are presumed correct; the challenger bears the burden of proving the contrary. (*See State Water Resources Control Bd. Cases (2006) 136 CA4th 674, 723; Sierra Club v County of Napa (2004) 121 CA4th 1490, 1497; San Franciscans Upholding the Downtown Plan v City & County of San Francisco (2002) 102 CA4th 656, 674; Save Our Peninsula Comm. v Monterey County Bd. of Supervisors (2001) 87 CA4th 99, 117; Barthelemy v*

Chino Basin Mun. Water Dist. (1995) 38 CA4th 1609, 1617; and Al Larson Boat Shop, Inc. v Board of Harbor Comm'rs (1993) 18 CA4th 729, 740.)

In light of the fact that all of the Proposed Revisions are directly related to the specific issues raised by the Planning Commission in its denial of the Proposed Project and input received from members of the public and the City Council at the December 7, 2021, public hearing, each of the Proposed Revisions were designed and intended to lessen the anticipated impacts of the Proposed Project from the levels initially identified in the Draft EIR. This has been accomplished through project-redesign, versus additional or modified mitigation measures. As such, none of the Proposed Revisions should trigger recirculation since they do not deprive the public of a meaningful opportunity to comment on either a substantial adverse environmental impact of the Proposed Project or a feasible project alternative or any mitigation measures that would clearly reduce the impact and that is not going to be implemented. In summary, in light the evidence set forth in this staff report and in the administrative record of these proceedings, there is substantial evidence in the record to support the determination that recirculation is unnecessary.

NOTIFICATION

Consistent with the City Municipal Code provisions, public notice was sent to all property owners of record within 600 feet of the Project Site, posted on the Project Site, and published in the Press Enterprise Newspaper.

ALTERNATIVES

1. Conduct the public hearing regarding the Proposed Project and adopt Staff's recommendation to certify the Final Environmental Impact Report and approve the Proposed Project. *Staff recommends this alternative as the applicant has made numerous revisions to the Proposed Project that address concerns of land use compatibility and reduces project environmental impacts beyond those analyzed in the Environmental Impact Report.*

2. Conduct the public hearing regarding the Proposed Project, and do not certify the Final Environmental Impact Report and deny the Proposed Project. *Staff does not recommend this alternative.*

FISCAL IMPACT

If the Proposed Project is approved, the City will receive the donation of a Community Park which is valued in the millions of dollars for the land and improvements alone.

ADMINISTRATIVE RECORD

All documents that are part of the Administrative record and/or referenced in the list of "Attachments" have been made available for public review and inspection on the City's website at www.moval.org.

PREPARATION OF STAFF REPORT

Prepared By:
Sean P. Kelleher
Planning Official

Department Head Approval:
Manuel A. Mancha
Community Development Director

CITY COUNCIL GOALS

Revenue Diversification and Preservation. Develop a variety of City revenue sources and policies to create a stable revenue base and fiscal policies to support essential City services, regardless of economic climate.

Public Safety. Provide a safe and secure environment for people and property in the community, control the number and severity of fire and hazardous material incidents, and provide protection for citizens who live, work and visit the City of Moreno Valley.

Public Facilities and Capital Projects. Ensure that needed public facilities, roadway improvements, and other infrastructure improvements are constructed and maintained.

Positive Environment. Create a positive environment for the development of Moreno Valley's future.

Community Image, Neighborhood Pride and Cleanliness. Promote a sense of community pride and foster an excellent image about our City by developing and executing programs which will result in quality development, enhanced neighborhood preservation efforts, including home rehabilitation and neighborhood restoration.

CITY COUNCIL STRATEGIC PRIORITIES

1. **Economic Development**
2. **Public Safety**
3. **Library**
4. **Infrastructure**
5. **Beautification, Community Engagement, and Quality of Life**
6. **Youth Programs**

Objective 1.1: Proactively attract high-quality businesses.

Objective 1.2: Market all the opportunities for quality industrial development in Moreno Valley by promoting all high-profile industrial and business projects that set the City apart from others.

Objective 1.3: Promote local hiring through the expansion of local, quality, high paying jobs, and workforce development efforts.

Objective 1.5: Showcase Moreno Valley’s unique assets.

Objective 1.6: Establish Moreno Valley as the worldwide model in logistics development.

Moreno Valley, CA 92553

Re: Notice of Appeal of October 28, 2021, Planning Commission Denial of General Plan Amendment PEN19-0191 (Mun. Code, §§ 9.02.040.E; 9.02.240)

Honorable Mayor and Members of the City Council:

This firm represents MVTC, LLC ("**MVTC**") in connection with its application for the above-referenced General Plan Amendment (PEN19-0191) ("**GPA**") and associated entitlements for the proposed Moreno Valley Trade Center project ("**Project**"). The Project is situated on eleven parcels totaling approximately 80.04 acres located south of Eucalyptus Avenue, north of Encelia Avenue, east of Quincy Street, and west of Redlands Boulevard ("**Site**") in the City of Moreno Valley ("**City**"). In addition to the GPA, which proposes to change the land use designation for the Site from Residential 2 (R2) to Business Park (BP), the Project entitlements include: (i) Change of Zone (PEN19-0192) to rezone the Project Site from Residential Agriculture 2 (RA2) to Light Industrial (LI) and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification; (ii) Tentative Parcel Map No. 37836 (PEN19-0234) to merge the existing 11 parcels into a single parcel; and (iii) Plot Plan (PEN19-0193) to construct an approximately 1,328,853 square foot warehouse/distribution building on the Site (collectively, the "**Entitlements**").

On October 28, 2021, the Planning Commission voted 4-0, with Commission Cobian abstaining, to deny the GPA on the grounds that the Project was (i) inconsistent with the City's current 2040 General Plan and (ii) would result in significant environmental impacts to the surrounding community. As outlined more fully below, the Planning Commission's denial of the GPA, and the findings supporting that denial, are inadequate and insufficient to justify the Planning Commission's actions.

Attachment: Appeal Letter (6209 : Moreno Valley Trade Center/Park)

We respectfully request that this correspondence be included as part of the administrative record for this matter. We further request that the City Council hearing regarding the collective Project entitlements be scheduled together with the appeal hearing regarding the GPA. Given the recent election and uncertainty with the composition of the City Council, we also further request that the public hearing be scheduled for a date not earlier than the date of the second regular City Council meeting following the City Council meeting at which the newly elected Councilmember is officially seated. Finally, enclosed with this letter is a check in the amount of $750.00, as payment of the appeal processing fee for this matter.

In accordance with Municipal Code Sections 9.02.040.E and 9.02.240, MVTC respectfully submits this appeal of the Planning Commission's denial of the GPA for the following reasons:

The Planning Commission Erred in Finding That the GPA is Inconsistent with the 2040 General Plan

As noted above, the Project Site currently consists of 11 parcels (APN Nos. 488-340-002 through 012) totaling approximately 80.04 acres of land located south of Eucalyptus Avenue, north of Encelia Avenue, east of Quincy Street and west of Redlands Boulevard. Although the area located across Encelia Avenue to the south of the Project Site includes an existing neighborhood of single-family homes,[1] the properties located to the north, northwest, northeast and east of the Site consist of existing/operational and industrially zoned properties, including the ALDI Distribution Center and vacant parcels designated for commercial/light industrial development within the previously approved World Logistics Center Specific Plan. Thus, with the exception of a single residential neighborhood to the south, the Project Site is surrounded on virtually all sides by existing and planned commercial/industrial uses.

Based on the foregoing considerations, City Staff found that the GPA was consistent with the existing General Plan. Specifically, Staff concluded: "While the purpose of the two land use designations [R2 and Business Park (BP)] are different, ***the proposed General Plan Amendment, as requested by the Applicant, will be consistent with the Project Site's adjacent parcels to the northwest, north, northeast, and east***." (Staff Report, p. 2 [emphasis added].) During the course of its discussion and deliberations, the Planning Commission failed to address or rebut Staff's finding or otherwise acknowledge the Project's consistency with the surrounding properties and land uses.

[1] The vacant parcels located west of the Site across the Quincy Channel are also zoned for future residential use (Residential Agriculture 2 (RA2) and Residential 5 (R5)); however, the ultimate development plan for these parcels remains uncertain.

Attachment: Appeal Letter (6209 : Moreno Valley Trade Center/Park)

In finding that the GPA was inconsistent with the City's 2040 General Plan, the Planning Commission did not (and could not) undermine Staff's conclusion, which is supported by actual substantial evidence that is in the record. For that reason, the Planning Commission's denial of the GPA based on the Project's alleged General Plan inconsistency fails scrutiny and must be reversed.

Furthermore, the Planning Commission members devoted considerable time during the October 28 hearing questioning why the 2040 General Plan had designated the Site for residential uses when MVTC's applications for the Entitlements were in process during the same approximately 2-year period that the 2040 General Plan was pending. First, as MVTC's applications for the Entitlements were not finalized or acted upon by the City before approval of the 2040 General Plan, the City could not have affirmatively modified the land use plan for the 2040 General Plan to redesignate the Site as Business Park (BP). In addition, the previous designation for the Site under the 2006 General Plan was R2 residential. Therefore, contrary to statements made by the Planning Commission at the October 28 hearing, that the 2040 General Plan maintenance of the existing R2 land use designation was reflective of overwhelming community support for a long-term residential land use for the Site, all that the 2040 General Plan actually did was maintain the status quo.[2]

Finally, an argument could be made that any application for an amendment to the 2040 General Plan is ipso facto inconsistent with the General Plan, because by its very nature the GPA seeks to modify, change or "amend" the 2040 General Plan itself. This logic would turn the entire General Plan amendment process on its head and render fatal any application for an amendment to the General Plan, regardless of the merits of the application. Thus, this finding standing alone is not valid or sufficient to justify denial of the GPA.

Based on the foregoing, the GPA and Project at large are wholly consistent with the 2040 General Plan. The Planning Commission's findings to the contrary are not supported by substantial evidence (or any evidence for that matter) and should be rejected and reversed by the City Council.

[2] This is further supported by the fact that only eight (8) individuals spoke out in opposition to the Project at the October 28 hearing and several of them appeared in their capacity as representatives of region-wide environmental and political activist groups rather than as concerned community residents.

Attachment: Appeal Letter (6209 : Moreno Valley Trade Center/Park)

The Planning Commission Prejudiced the Project by Making it a Symbol for All Industrial Development in the City

In addition to the above, the Planning Commission (particularly, Commissioners Sims and DeJohnette) made several statements regarding the volume of existing and proposed industrial warehouse projects in the City and questioned whether the City has become sufficiently "saturated" as to warrant putting an end to all industrial development in the City. These comments, which were reiterated several times by individual members of the Planning Commission, unfairly conflated the proposed Project and GPA with other previously approved projects and created an unfair bias among the Planning Commissioners regarding the Project. In other words, the Planning Commission's consideration of the Project, and subsequent action on October 28 to deny the GPA, was based not solely on the merits of the Project itself and a response to specific fact-based concerns with the MVTC Project; but, rather as a greater response (and rebuke) to industrial development in the City as a whole.[3] The effect of this was to unfairly prejudice the Planning Commission's consideration of the Project in violation of MVTC's constitutional due process rights to a fair and unbiased hearing before neutral decisionmakers.

The Planning Commission Erred in Denying the GPA Based on the Alleged Environmental Impacts of the Project Because These Impacts Are Minor in Nature, Significantly Reduced by the Project's Mitigation and Design Measures, and Substantially Outweighed by the Project's Benefits

The Planning Commission's second basis for denying the GPA was premised on the alleged significant environmental effects of the Project. The underlying rationale and findings made in support of this ground for denial cannot be reconciled with the Project's environmental document (which the Commission freely acknowledged they had not read) or the extensive mitigation and design measures and community benefits of the Project. Therefore, denial of the GPA must be reversed.

As explained in detail in the Project Final Environmental Impact Report ("**EIR**"), *which the Planning Commissioners freely acknowledged they had **not** read prior to the October 28 hearing*,[4] the Project includes numerous mitigation measures that are designed to and

[3] The Planning Commission, of course, failed to acknowledge that all industrial development projects that had been approved to date were considered, vetted and ultimately approved by the Commission itself. The irony of the situation was apparently lost on them.

[4] The fact that the Planning Commission failed to take the time to review the Project's environmental documents directly undermines the Commissioners' determination that the potential environmental impacts of the Project justify denial of the GPA. The Planning Commission had no factual foundation upon which to base their findings regarding the

Attachment: Appeal Letter (6209 : Moreno Valley Trade Center/Park)

will effectively reduce the level of potential environmental impacts of the Project. However, after application of all feasible mitigation measures, the Project would nonetheless result in a "***few***" significant and unavoidable environmental effects that cannot be mitigated to a level of insignificance, including with respect to: (i) Aesthetics (adverse effect on a scenic vista); (ii) Air Quality; and (iii) Greenhouse Gas (GHG) Emissions. (Staff Report, p. 11 [emphasis added].)

In denying the GPA based on the alleged environmental impacts of the Project, the Planning Commission ignored and disregarded the multitude of mitigation measures that were identified in the Project EIR as means of reducing the Project's anticipated environmental impacts. Although some of these impacts remain unavoidable, they are significantly less than would occur without implementation of the mitigation measures that will be imposed on the Project.

As noted by City Staff in the Staff Report, the extent to which the Project's impacts exceed the applicable thresholds for a finding of significant and unavoidable impact are slim and the number of such unavoidable impacts in total are extremely minor when compared to the total scope of the Project and number of potential impact areas. (Staff Report, p. 11.) The reduced impacts are a direct result of the extensive mitigation measures and conditions of approval imposed on the Project, as well as the community benefits offered by MVTC in conjunction with the Project submittal.

In addition, as discussed in detail in the Staff Report, the California Environmental Quality Act (Pub. Resources Code, §§ 21000, et seq.) ("**CEQA**") allows a local agency such as the City to weigh the Project's benefits against its unavoidable environmental risks and in doing so find the adverse impacts "acceptable" if the benefits outweigh those effects, by adopting a statement of overriding considerations. (Pub. Resources Code, § 21081(b); CEQA Guidelines § 15093(a); see also *Cherry Valley Pass Acres & Neighbors v City of Beaumont* (2010) 190 Cal.App.4th 316, 356-358. In other words, a statement of overriding considerations expresses the "larger, more general reasons for approving the project, such as the need to create new jobs, provide housing, generate taxes, and the like." (*Id*., at p. 356 [internal citations omitted].)

Here, City Staff expressly determined that, balancing the benefits of the Project against the minor unavoidable effects, the Planning Commission should recommend that the City Council find that any one of the Project benefits standing alone would be sufficient to sustain the Statement of Overriding Considerations proposed for the

---

Project's potential environmental impacts. Contrary to the Planning Commission's belief, the large size of a staff report and CEQA document for a proposed project does not justify a failure to review the materials or constitute substantial evidence supporting denial of the project.

Attachment: Appeal Letter (6209 : Moreno Valley Trade Center/Park)

Project. The benefits of the Project, which are numerous and substantial, include the following:

1. Approval of the Project will create maximum employment-generating opportunities for citizens of Moreno Valley and surrounding communities. Development and construction of the site will create both temporary on-site jobs as well as indirectly support local and regional jobs. Additionally, construction spending will create a one-time stimulus to the local and regional economics.

2. Approval of the Project will create a Class A speculative light industrial building in Moreno Valley that is designed to meet contemporary industry standards and be economically competitive with similar industrial buildings in the local area and region.

3. Approval of the Project will contribute towards maximizing employment opportunities within the City to improve the jobs-housing balance and to reduce systemic unemployment within the City. The Project will attract businesses that can expedite the delivery of essential goods to consumers and businesses in Moreno Valley and beyond the City boundary.

4. Approval of the Project will create approximately 1,000 new on-site jobs under the warehouse distribution/logistics option and approximately 2,000 new on-site jobs under the e-commerce/fulfillment option.

5. Approval of the Project will result in the development and operation of a state-of- the- art logistics center that takes advantage of existing and planned infrastructure, is technologically feasible to construct, and in the general vicinity of similar industrial logistics and distribution center uses.

6. Approval of the Project will maximize efficient goods movement throughout the region by locating a large format logistics center in close proximity to the Ports of Los Angeles and Long Beach thereby enabling trucks servicing the site to achieve a minimum of two roundtrips per day.

7. Approval of the Project will maximize the use of a large industrial site in the region that is in close proximity to the Ports of Los Angeles and Long Beach, to realize substantial unmet demand in the region, allowing the region to compete on a domestic and international scale through the efficient and cost-effective movement of goods.

Attachment: Appeal Letter (6209 : Moreno Valley Trade Center/Park)

8. Approval of the Project will facilitate the development of long-standing underutilized and vacant land.

The above-described list of Project benefits does **not** include the extensive list of voluntary community benefits that MVTC has offered to provide to the City in conjunction with the Project. These additional Project benefits ***were not required either as mitigation measures or conditions of approval for the Project. These voluntary community benefits include, among others, the following:***

- Contributing up to $204,000.00 to fund and administer an electric vehicle grant program, that will include funding for Heavy Duty Electric Trucks, Medium Duty Electric Trucks, and Local Delivery and Passenger Electric Vehicles.

- Providing $113,000 to fund a Solar Advocacy Fund, Residential Air Filtration Reimbursement Program, Residential Noise Insulation Reimbursement Program and Residential Exterior Pressure Washing Reimbursement Program, in addition to installing additional onsite EV charging stations and at least one APU plug-in for every 35 dock doors at multiple locations within the Project Site where trucks are proposed to park.

- Requiring that only electrical appliances be used in building office areas and that all construction equipment meet or be cleaner than Tier 4 standards, except in certain circumstances, and prohibiting the use of portable or stationary diesel-powered generators unless necessary due to emergency situations or constrained supply.

- Construction of multi-use trails around the east and west sides of the Project Site for use by local residents and the community.

- Providing enhanced landscaping, setbacks from residences and construction of noise mitigation walls to minimize the Project's operational effect on the surrounding areas.

The Planning Commission's denial of the GPA based on the Project's alleged environmental impacts was made in a vacuum and without reference to the mitigation measures and community benefits that, individually and collectively, reduce or offset these impacts and ultimately provide greater community benefits to the City. Nor was there any factual or evidentiary foundation to support the Planning Commission's findings of denial, as the Commissioners freely acknowledged not having read or reviewed the Project EIR or related materials. For these reasons, the Planning Commission's denial of the Project based on its potential environmental impacts is

Attachment: Appeal Letter (6209 : Moreno Valley Trade Center/Park)

unsupported by substantial evidence (or any evidence for that matter) and should be reversed by the City Council.

Conclusion

The Planning Commission's denial of the GPA was not supported by valid findings and is devoid of any legitimate basis. Therefore, MVTC respectfully requests that the City Council overturn the Planning Commission's denial of the GPA and approve the Entitlements for the Project.

MVTC reserves the right to submit additional grounds in support of the appeal of the Planning Commission's decision prior to and during any subsequent City Council hearing on the matter.

We appreciate the City's processing of this appeal and look forward to a just and fair hearing on the Project before the City Council. Please contact me if you have any questions or wish to discuss this matter further.

Very truly yours,

RESOLUTION NO. 2023-__

A RESOLUTION OF THE MORENO VALLEY CITY COUNCIL APPROVING AND ADOPTING A MITIGATION, MONITORING AND REPORTING PROGRAM AND STATEMENT OF OVERRIDING CONSIDERATIONS AND CERTIFYING THE FINAL ENVIRONMENTAL IMPACT REPORT FOR THE MORENO VALLEY TRADE CENTER PROJECT

(Assessor Parcel Nos. 488-340-002 through 488-340-012)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California; and

WHEREAS, MVTC, LLC, a Delaware limited liability company ("Applicant") is proposing the development of a 1,263,271 square foot, modern light industrial building to be used as a warehouse distribution/logistics center, or, in the alternative, as an e-commerce facility, commonly known as the Moreno Valley Trade Center ("Proposed Project"), which includes associated site improvements, such as but not limited to, drive aisles, landscaping, utility infrastructure, water quality basins, exterior lighting, walls/fencing, and signage, as more fully described in the Environmental Impact Report (EIR), a copy of which is incorporated herein by this reference as though set forth in full; and

WHEREAS, the Proposed Project is located on land situated on Eucalyptus Avenue, west of Redlands Boulevard, north of Encelia Avenue, and east of Quincy Channel (APN'S 488-340-002 through 488-340-012) ("Project Site"); and

WHEREAS, the Proposed Project includes the following requested entitlements: General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193); and

WHEREAS, the purpose of General Plan Amendment (PEN19-0191) is to change the Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map from Residential 2 (R2) to Business Park (BP); and

WHEREAS, the purpose of Change of Zone (PEN19-0192) is to rezone the Project Site from Residential Agriculture 2 District (RA2) to Light Industrial District (LI), and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification; and

WHEREAS, the purpose of Tentative Parcel Map (PEN19-0234) is to merge the existing 11 parcels into a single parcel; and

WHEREAS, the purpose of Plot Plan (PEN19-0193) is to construct an approximately 1,263,271 square foot Warehouse/Distribution building on the Project Site with associated parking, landscape improvements and off-site public improvements; and

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

WHEREAS, the Proposed Project was considered by the Planning Commission at a duly noticed public hearing conducted on October 28, 2021, and the Planning Commission voted 4-0 to deny the Proposed Project; and

WHEREAS, the Applicant appealed the Planning Commission's decision as set forth in Appeal Application (PAA21-0001) and a duly noticed public hearing on the appeal was conducted by the City Council on December 7, 2021; and

WHEREAS, at the public hearing held on December 7, 2021, the City Council did not rule on the appeal, but rather, after receiving public testimony unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain; and

WHEREAS, after taking into consideration several issues raised by the Planning Commission in its denial of the Proposed Project and input it received from members of the public and the City Council at the December 7, 2021, public hearing, the Applicant submitted various revisions ("Proposed Revisions") to the Proposed Project that the Applicant represents are responsive to the various concerns raised by members of the public, the Planning Commission and the City Council; and

WHEREAS, since none of the Proposed Revisions presented by the Applicant require any modifications or revisions to General Plan Amendment (PEN19-0191) and Change of Zone (PEN19-0192), as originally presented on October 28, 2021, at the Planning Commission public hearing and on December 7, 2021, City Council public hearing, the City Council is not required to refer the Proposed Project back to the Planning Commission for a recommendation prior to taking final action of the Proposed Project, as revised per the Proposed Revisions; and

WHEREAS, pursuant to the California Environmental Quality Act ("CEQA") (Public Res. Code, § 2100 *et seq.*) and the CEQA Guidelines (14 CCR § 15000 *et seq*.), the City is the "lead agency" for the Proposed Project; and

WHEREAS, the City as lead agency determined during the initial processing of the Proposed Project that it could have potentially significant effects on the environment, requiring the preparation of an Environmental Impact Report pursuant to CEQA in order to analyze all potential adverse environmental impacts of the Proposed Project; and

WHEREAS , the City issued a Notice of Preparation ("NOP") of a Draft EIR on March 16, 2020, and circulated the NOP for a period of 30 days, pursuant to the CEQA Guidelines; and

WHEREAS, pursuant to CEQA Guidelines section 15082, the City solicited comments from potential responsible agencies, including details about the scope and content of the environmental information related to each responsible agency's respective area of statutory responsibility; and

WHEREAS, comment letters/emails were received by the City in response to the NOP, which assisted the City in narrowing the issues and alternatives for analysis in the

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

Draft EIR; and

WHEREAS, a public scoping meeting was also held on April 8, 2020, to familiarize the public with the Proposed Project and the environmental review process and to receive input as to the scope of the Draft EIR and issues of community concern; and

WHEREAS, pursuant to Public Resources Code section 210092, public notices announcing availability of the Draft EIR was mailed to interested parties, an advertisement was published in the Press Enterprise (a newspaper of general circulation in the City), and copies of the Draft EIR and its Technical Appendices were made available for public review and inspection at the locations identified in the public notices; and

WHEREAS, the Draft EIR circulated for review and comment by the public and other interested parties, agencies, and organizations on May 24, 2021, for a 45-day public review period, which commenced upon the filing of the Notice of Completion and Availability with the State Office of Planning and Research; and

WHEREAS, during the 45-day public review period, the City consulted with and requested comments from all responsible and trustee agencies, other regulatory agencies and others pursuant to CEQA Guidelines section 15086; and

WHEREAS, the City responded to all of the comments received by the City during the public review period; and

WHEREAS, the City prepared the Final EIR and, pursuant to Public Resources Code section 21092.5, the City provided copies of the Final EIR to all commenting persons and agencies; and

WHEREAS, the Final EIR sufficiently analyzes both the feasible mitigation measures necessary to avoid or substantially lessen the Proposed Project's potential environmental impacts and a range of feasible alternatives capable of eliminating or reducing these effects in accordance with CEQA and the CEQA Guidelines; and

WHEREAS, the Findings of Fact, attached hereto as Exhibit A, prepared for the Proposed Project conclude that the proposed mitigation measures, as set forth the Mitigation Monitoring and Reporting Program, attached hereto as Exhibit B, are feasible and constitute a binding set of obligations that will take full effect upon the City Council's certification of the Final EIR; and

WHEREAS, the City Council, after considering and weighing the economic, planning, social, aesthetic, and environmental benefits of the Proposed Project against the Proposed Project's unavoidable adverse impacts, has determined that the benefits of the Proposed Project outweigh the potential unavoidable adverse impacts; and

WHEREAS, pursuant to CEQA Guidelines Section 15093, the City prepared a Statement of Overriding Consideration, attached hereto as Exhibit C, that provides that any significant adverse effects of the Proposed Project are acceptable since the expected benefits of the Proposed Project outweigh Proposed Project's unavoidable adverse

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

environmental impacts; and

WHEREAS, the City has fulfilled its duties as lead agency pursuant to CEQA and the CEQA Guidelines and it has been determined by staff that the Final EIR is sufficiently detailed so that all of the potentially significant environmental effects of the Proposed Project have been adequately evaluated; and

WHEREAS, on June 21, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on November 15, 2022, the item was scheduled for consideration by the City Council; however, the meeting was canceled and adjourned to December 6, 2022, with no action being taken; and

WHEREAS, on December 6, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on April 18, 2023, the City Council conducted a duly noticed continued public hearing on the Proposed Project, as revised, and considered the Final EIR, the attached Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations; and

WHEREAS, the Final EIR reflects the independent judgment of the City Council and is deemed adequate for purposes of making decisions on the merits of the Project.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the Proposed Project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the City Council has considered all of the evidence submitted into the administrative record for the Proposed Project, including, but not limited to, the following:

(a) Moreno Valley General Plan and all other relevant provisions contained therein;

(b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code;

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

(c) Applications for 1) General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193) and all documents, records and references contained therein;
(d) Proposed Project's Final Environmental Impact Report and related Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations, attached hereto respectively as Exhibits B and C;
(e) Findings of Fact, as attached hereto as Exhibit A;
(f) Proposed conditions of approval for the Proposed Project;
(g) Staff Reports prepared for the Planning Commission for its October 28, 2021 public hearing and the City Council for its December 7, 2021 public hearing;
(h) Staff Reports prepared for the City Council for the June 21, 2022 public hearing;
(i) Staff Reports prepared for the City Council for the November 15, 2022 public hearing;
(j) Staff Reports prepared for the City Council for the December 6, 2022 public hearing;
(k) Staff Reports prepared for the City Council for the April 18, 2023 public hearing;
(l) Staff's presentation at the December 7, 2021 and April 18, 2023 City Council public hearings;
(m) Testimony and/or comments from Applicant and its representatives during the December 7, 2021 and April 18, 2023 public hearings; and
(n) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the December 7, 2021, June 21, 2022, November 15, 2022, December 6, 2022, and April 18, 2023 public hearings.

Section 4. Findings Regarding Recirculation

That based on the foregoing Recitals and the Evidence, and the additional related Findings set forth herein, the City Council makes the following findings with respect to the issue of Recirculation:

(a) That the Proposed Revisions, which are characterized as a "Comprehensive Project Redesign of the Proposed Project" (rather than mitigation) include a variety of changes to the Proposed Project that are intended specifically to reduce the impacts of the Proposed Project as originally described in the Draft EIR through project redesign;

(b) That the various findings and determinations articulated in the recently prepared and updated technical studies, reports and evaluations, attached to the Staff Report, which include but not limited to the following: 1) Revised Project Evaluation; 2) Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluations; 3) Traffic Impact Analysis Evaluations; 4) Noise Summaries; and 5) Hydrology Calculations, confirm that the Proposed

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

Revisions do not: 1) result in new significant environmental impacts that were not disclosed in the Draft EIR; nor 2) result in significant impacts that are more severe than the impacts that were disclosed in the Draft EIR;

(c) That the Proposed Revisions will effectively benefit the neighboring residents, through reducing noise, traffic and air quality impacts on neighbors by: 1) reducing building size by 65,000+ square feet; 2) eliminating driveways on Encelia Avenue which will remove 650 daily vehicles on Encelia Avenue; 3) eliminating truck traffic on Redlands Boulevard, south of Eucalyptus Avenue; 4) improving visual and noise screening prior to trees reaching full size; 5) eliminating 11 dock doors from the Proposed Project's design; and 6) adding a new approximately 35 foot-tall earthen berm on the southern side of the Project Site;

(d) That the revised onsite circulation will direct trucks to access the Project Site from Eucalyptus Avenue only which means that no trucks from the Project Site will travel on Redlands Boulevard, south of Eucalyptus Avenue as was originally proposed, and that by designating the northern driveway on Redland Boulevard to "Automobile-Only," traffic traveling southbound toward Encelia Avenue, traffic will be reduced by 35% of what was originally proposed in the Draft EIR;

(e) That the addition of the approximately 35-foot berm to the southern portion of the Project Site will also result in major changes that will significantly lessen the Proposed Project's aesthetic impacts since: 1) it will completely block views of both the existing warehouses north of Eucalyptus Avenue and the Proposed Project from the adjacent neighborhood; 2) it will be landscaped with 24-inch box trees consisting of Blue Palo Verde, Desert Willow, California Sycamore, Coast Live Oak, Afghan Pine, and Canary Island Pine; and 3) only landscaping will then be visible from Encelia Avenue since the screen wall will be behind the berm;

(f) That the berm will also lessen the anticipated noise impacts, as originally described in the Draft EIR, in that: 1) the berm will drastically reduce sound below levels in prior design by reducing the noise level by an additional 26% from what was originally projected in the Draft EIR; 2) the berm will reduce the estimated project noise levels to 35.5 decibels (equivalent to "Quiet Suburban Nighttime or Quiet Urban Nighttime") at the Encelia residential neighborhood, which is significantly lower than the ambient noise levels of 41.7 decibels (dBA Leq) that exist today within the neighborhood; and 3) the berm will serve as a noise cancelling mitigation measure related to ambient noise caused by back-up alarms mandated by OSHA and local regulations;

(g) That there are no changes needed to the analysis or mitigation measures contained in the Final EIR; and

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

(h) That the public has not been deprived of a meaningful opportunity to comment on either a substantial adverse environmental impact of the project or a feasible project alternative or mitigation measure that would clearly reduce the impact and that is not going to be implemented.

Section 5. Findings Regarding Mitigation Measures and Mitigation Monitoring & Reporting Program

That based on the foregoing Recitals and the Evidence, and the additional related Findings set forth herein, the City Council makes the following findings with respect to the Mitigation Measure and Mitigation Monitoring & Reporting Program:

(a) That the Proposed Project's mitigation measures are proposed to reduce the level of potential environmental impacts of the Proposed Project;

(b) That the mitigation measures have been incorporated in the proposed Mitigation Reporting and Monitoring Program, that is included as part of the Final EIR;

(c) That the purpose of the Mitigation Reporting and Monitoring Program is to ensure that Proposed Project's mitigation measures shall be enforceable through permit conditions, agreements, or other mechanisms; and

(d) That because mitigation measures are incorporated into the Proposed Project's approval, the City will be able to use code and permit enforcement procedures to ensure implementation of each of the Proposed Project's mitigation measures.

Section 6. Findings Regarding Statement of Overriding Considerations

That based on the foregoing Recitals and the Evidence, and the additional related Findings set forth herein, the City Council makes the following findings with respect to the Statement of Overriding Considerations:

(a) That although the Mitigation Measures are recommended to reduce the level of the potential environmental impacts of the Proposed Project, after the application of all feasible mitigation measures, that the Proposed Project would result in a few significant and unavoidable environmental effects;

(b) That the following significant and unavoidable environmental impacts have been identified in the Final EIR and will require mitigation but cannot be mitigated to a level of insignificance: 1) Aesthetics: Substantial Adverse Effect on a Scenic Vista; 2) Air Quality: Air Quality Management Plan Conflict; 3) Air Quality: Criteria Pollutant Emissions; and 4) Greenhouse Gas Emissions;

(c) That details of these significant unavoidable adverse impacts are discussed

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

in the Final EIR and are summarized, or were otherwise provided in Section 5.3, *Environmental Effects Which Remain Significant and Unavoidable After Mitigation and Findings*, in the Statement of Facts and Findings, attached hereto as Exhibit A;

(d) That when balancing the benefits of the Proposed Project against the unavoidable effects which remain, the City Council finds that any one of the following benefits standing alone would be sufficient to sustain the Statement of Overriding Considerations:

i. Approval of the Proposed Project will create maximum employment-generating opportunities for citizens of Moreno Valley and surrounding communities. Development and construction of the site will create both temporary on-site jobs as well as indirectly support local and regional jobs. Additionally, construction spending will create a one-time stimulus to the local and regional economics;

ii. Approval of the Proposed Project will create a Class A speculative light industrial building in Moreno Valley that is designed to meet contemporary industry standards and be economically competitive with similar industrial buildings in the local area and region;

iii. Approval of the Proposed Project will contribute towards maximizing employment opportunities within the City to improve the jobs-housing balance and to reduce systemic unemployment within the City. The Proposed Project will attract businesses that can expedite the delivery of essential goods to consumers and businesses in Moreno Valley and beyond the City boundary;

iv. Approval of the Proposed Project will create approximately 1,000 new on-site jobs under the warehouse distribution/logistics option and 2,000 new on-site jobs under the e-commerce/fulfillment option;

v. Approval of the Proposed Project will result in the development and operation of a state-of-the-art logistics center that takes advantage of existing and planned infrastructure, is technologically feasible to construct, and in the general vicinity of similar industrial logistics and distribution center uses;

vi. Approval of the Proposed Project will maximize efficient goods movement throughout the region by locating a large format logistics center in close proximity to the Ports of Los Angeles and Long Beach thereby enabling trucks servicing the site to achieve a minimum of two roundtrips per day;

vii. Approval of the Proposed Project will maximize the use of a large industrial site in the region that is in close proximity to the Ports of

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

Los Angeles and Long Beach, to realize substantial unmet demand in the region, allowing the region to compete on a domestic and international scale through the efficient and cost-effective movement of goods; and

viii. Approval of the Proposed Project will facilitate the development of long-standing underutilized and vacant land.

Section 7. Findings Regarding Final Environmental Impact Report

That based on the foregoing Recitals and the Evidence, and the additional related Findings set forth herein, the City Council makes the following findings with respect to the Final Environmental Impact Report:

(a) That pursuant to Public Resources Code section 21090.4 and CEQA Guidelines sections 15082 – 15083, the City solicited the views of responsible agencies and certain other public agencies regarding the scope and content of the Draft EIR via a Notice of Preparation of the Draft EIR;

(b) That pursuant to Public Resources Code sections 21080.4 and 21092.3, a copy of the Notice of Preparation also must be mailed to the State Office of Planning and Research and posted in the office of the Riverside County Clerk;

(c) That pursuant to CEQA Guidelines sections 15082(c) and 15083, the City held a scoping meeting to consult with responsible and trustee agencies, the public and other interested parties;

(d) That pursuant to Public Resources Code sections 21080.3.1 – 21080.3.2, the provided formal written notification to any tribe that has requested notice of projects within its traditionally and culturally affiliated area;

(e) That the Draft EIR was prepared and circulated to the public and affected public agencies for review and comments for a 45-day pubic review period and the Final EIR, including the comments submitted and responses to those comments, was prepared;

(f) That pursuant to Public Resources Code section 21092(b)(1), a Notice of Completion was prepared and it included a description of how the draft EIR can be obtained in electronic format;

(g) That pursuant to Public Resources Code section 21091(d)(2) and CEQA Guidelines section 15088, written comments received during the public review period for the Draft EIR were responded to in writing;

(h) That pursuant to Public Resources Code section 21091(d)(2)(B) and CEQA Guidelines section 15088, the responses to comments provided reasoned, good faith analyses regarding all significant environmental issues raised in

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

the EIR comments;

(i) That pursuant to Public Resources Code section 21100 and CEQA Guidelines sections 15120-15132, the Final EIR accurately describes the Proposed Project; identifies and analyzes each significant environmental impact expected to result from the Proposed Project; identifies mitigation measures to reduce those impacts to the extent feasible; evaluates a range of reasonable alternatives to the Proposed Project; and includes a statement indicating the reasons for determining that any effects on the environment are not significant and, thus, have not been discussed in detail;

(j) That pursuant to CEQA Guidelines section 15132, the Final EIR consists of the Draft EIR with any revisions made following its circulation for public review, the comments received on the Draft EIR, a list of persons and entities commenting on the Draft EIR, and the City's responses to comments;

(k) That pursuant to CEQA Guidelines section 15090(a) the Final EIR was completed in compliance with CEQA and was reviewed and considered by the City Council before approval of the Proposed Project; and

(l) That the Final EIR is complete and adequate; and

(m) That pursuant to Public Resources Code section 21082.1(c)(3) and CEQA Guidelines section 15090(a)(3), the Final EIR reflects the independent judgment of the City and City Council.

Section 8. Non-Recirculation Determination

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth herein, the City Council hereby determines that the Draft EIR was not subject to recirculation since there was no "significant new information" added to a Draft EIR after the expiration of the public comment period but before certification.

Section 9. Approval and Adoption of Mitigation Measures and Mitigation Monitoring & Reporting Program

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth herein, the City Council hereby approves and adopts the Mitigation Measures and Mitigation Monitoring & Reporting Program, attached hereto as Exhibit B.

Section 10. Approval and Adoption of Statement of Overriding Considerations

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth herein, the City Council hereby approves and adopts the

Attachment: Resolution - Final Environmental Impact Report EIR [Revision 1] (6209 : Moreno Valley Trade Center/Park)

Statement of Overriding Considerations, attached hereto as Exhibit c.

Section 11. Certification of Final Environmental Impact Report

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth herein, and approval and adoption of the Mitigation Measures and Mitigation Monitoring & Reporting Program, attached hereto as Exhibit B, and the Statement of Overriding Considerations, attached hereto as Exhibit C, the City Council hereby certifies the Final Environmental Impact Report, attached hereto as Exhibit D, which is complete and adequate and reflects the independent judgment of the City and City Council.

Section 12. Notice of Determination

That pursuant to CEQA Guidelines sections 15075 and 15094, staff shall file a Notice of Determination within 5 working days after approval of the Proposed Project which shall include: a brief description of the Proposed Project; the identity of the lead agency; the identity of any project applicant or, if different from the applicant, the identity of the person undertaking the project; and statements regarding whether the Proposed Project will result in a significant environmental impact, whether any mitigation measures were adopted, and whether a mitigation monitoring and reporting plan was adopted.

Section 13. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 14. Severability

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 15. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 16. Certification

That the City Clerk shall certify to the passage of this Resolution.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

RESOLUTION NUMBER 2023-__

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, APPROVING GENERAL PLAN AMENDMENT (PEN19-0191), TENTATIVE PARCEL MAP (PEN19-0234), AND PLOT PLAN (PEN19-0193) FOR THE DEVELOPMENT OF A 1,263,271 SQUARE FOOT WAREHOUSE DISTRIBUTION/LOGISTICS CENTER KNOWN AS THE MORENO VALLEY TRADE CENTER PROJECT LOCATED AT EUCALYPTUS AVENUE, WEST OF REDLANDS BOULEVARD, NORTH OF ENCELIA AVENUE, AND EAST OF QUINCY CHANNEL

(APN'S 488-340-002 through 488-340-012)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California; and

WHEREAS, MVTC, LLC, a Delaware limited liability company ("Applicant") is proposing the development of a 1,263,271 square foot, modern light industrial building to be used as a warehouse distribution/logistics center, or, in the alternative, as an e-commerce facility, commonly known as the Moreno Valley Trade Center ("Proposed Project"), which includes associated site improvements, such as but not limited to, drive aisles, landscaping, utility infrastructure, water quality basins, exterior lighting, walls/fencing, and signage, as more fully described in the Environmental Impact Report (EIR), a copy of which is incorporated herein by this reference as though set forth in full; and

WHEREAS, the Proposed Project is located on land situated on Eucalyptus Avenue, west of Redlands Boulevard, north of Encelia Avenue, and east of Quincy Channel (APN'S 488-340-002 through 488-340-012) ("Project Site"); and

WHEREAS, the Proposed Project includes the following requested entitlements: General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193); and

WHEREAS, the purpose of General Plan Amendment (PEN19-0191) is to change the Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map from Residential 2 (R2) to Business Park (BP); and

WHEREAS, the purpose of Change of Zone (PEN19-0192) is to rezone the Project Site from Residential Agriculture 2 District (RA2) to Light Industrial District (LI), and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification; and

WHEREAS, the purpose of Tentative Parcel Map (PEN19-0234 is to merge the existing 11 parcels into a single parcel; and

WHEREAS, the purpose of Plot Plan (PEN19-0193) is to construct an

approximately 1,263,271 square foot Warehouse/Distribution building on the Project Site with associated parking, landscape improvements and off-site public improvements; and

WHEREAS, the Proposed Project was considered by the Planning Commission at a duly noticed public hearing conducted on October 28, 2021, and the Planning Commission voted 4-0 to deny the Proposed Project; and

WHEREAS, the Applicant appealed the Planning Commission's decision as set forth in Appeal Application (PAA21-0001) and a duly noticed public hearing on the appeal was conducted by the City Council on December 7, 2021; and

WHEREAS, at the public hearing held on December 7, 2021, the City Council did not rule on the appeal, but rather, after receiving public testimony unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain; and

WHEREAS, the Applicant has taken into consideration several issues raised by the Planning Commission in its denial of the Proposed Project and input it received from members of the public and the City Council at the December 7, 2021 public hearing, and submitted various revisions to the Proposed Project that the Applicant represented are responsive to the various concerns raised by members of the public, the Planning Commission and the City Council; and

WHEREAS, since none of the proposed revisions presented by the Applicant nor recommended by staff require any modifications or revisions to General Plan Amendment (PEN19-0191) and Change of Zone (PEN19-0192), as originally presented on October 28, 2021, at the Planning Commission public hearing and on December 7, 2021 City Council public hearing, the City Council is not required to refer the Proposed Project back to the Planning Commission for a recommendation prior to taking final action of the Proposed Project, as revised; and

WHEREAS, on June 21, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on November 15, 2022, the item was scheduled for consideration by the City Council; however, the meeting was canceled and adjourned to December 6, 2022, with no action being taken; and

WHEREAS, on December 6, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on April 18, 2023, the City Council conducted a duly noticed continued public hearing on the Proposed Project, as revised, and considered the Proposed Project's Environmental Impact Report and related Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations; and

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

WHEREAS, on April 18, 2023, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the City Council considered and approved Resolution No. 2023-____ certifying the Proposed Project's Environmental Impact Report, adopting a Mitigation Monitoring and Reporting Program and approving a Statement of Overriding Considerations.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached Exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the Proposed Project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the City Council has considered all of the evidence submitted into the administrative record for the Proposed Project, including, but not limited to, the following:

(a) Moreno Valley General Plan and all other relevant provisions contained therein;
(b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein;
(c) Applications for 1) General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19- 0193) and all documents, records and references contained therein;
(d) Proposed Project's Environmental Impact Report and related Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations;
(e) Proposed conditions of approval for the Proposed Project;
(f) Staff Reports prepared for the Planning Commission for its October 28, 2021 public hearing and the City Council for its December 7, 2021 public hearing;
(g) Staff Reports prepared for the City Council for the June 21, 2022 public hearing;
(h) Staff Reports prepared for the City Council for the November 15, 2022 public hearing;
(i) Staff Reports prepared for the City Council for the December 6, 2022 public hearing;
(j) Staff Reports prepared for the City Council for the April 18, 2023 public

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

hearing;

(k) Staff's presentation at the December 7, 2021 and April 18, 2023 City Council public hearings;

(l) Testimony and/or comments from Applicant and its representatives during the December 7, 2021 and April 18, 2023 public hearings; and

(m) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the December 7, 2021, June 21, 2022, November 15, 2022, December 6, 2022, and April 18, 2023 public hearings.

Section 4. Findings

That based on the foregoing Recitals and the Evidence, the City Council makes the following findings:

(a) That General Plan Amendment (PEN19-0191) is consistent with existing goals, objectives, policies and programs of the 2040 General Plan and will not adversely affect the public health, safety or general welfare;

(b) That the Proposed Project, which includes Plot Plan (PEN19-0193), is consistent with the goals, objectives, policies and programs of the 2040 General Plan; complies with all applicable zoning and other regulations and will not be detrimental to the public health, safety or welfare or materially injurious to properties or improvements in the vicinity; and the location, design and operation of the Proposed Project will be compatible with existing and planned land uses in the vicinity; and

(c) That Tentative Parcel Map (PEN19-0234) involves at least one parcel that is undeveloped by any structure for which a building permit was issued and is consistent with the 2040 General Plan.

Section 5. Approval

That based on the foregoing Recitals, Evidence contained in the Administrative Record and Findings set forth above, the City Council hereby approves 1) General Plan Amendment (PEN19-0191), 2) Tentative Parcel Map (PEN19-0234), and 3) Plot Plan (PEN19-0193) subject to the respective conditions of approval as set forth in Exhibit A, attached hereto, and the mitigation measures set forth in the Mitigation Monitoring and Reporting Program approved by the City Council through the adoption of Resolution No.2023-___.

Section 6. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 7. Severability

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 8. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 9. Certification

That the City Clerk shall certify to the passage of this Resolution.

PASSED AND ADOPTED THIS 18th day of April, 2023.

CITY OF MORENO VALLEY
CONDITIONS OF APPROVAL
Tentative Parcel Map (PEN19-0234)
Plot Plan (PEN19-0193)

COMMUNITY DEVELOPMENT DEPARTMENT

Planning Division

1. A change or modification to the land use or the approved site plans may require a separate approval. Prior to any change or modification, the property owner shall contact the City of Moreno Valley Community Development Department to determine if a separate approval is required.

2. Any expansion to this use or exterior alterations will require the submittal of a separate application(s) and shall be reviewed and approved under separate permit(s). (MC 9.02.080)

3. The developer, or the developer's successor-in-interest, shall be responsible for maintaining any undeveloped portion of the site in a manner that provides for the control of weeds, erosion and dust. (MC 9.02.030)

4. This approval shall expire three years after the approval date of this project unless used or extended as provided for by the City of Moreno Valley Municipal Code; otherwise it shall become null and void and of no effect whatsoever. Use means the beginning of substantial construction contemplated by this approval within the three-year period, which is thereafter pursued to completion, or the beginning of substantial utilization contemplated by this approval. (MC 9.02.230)

5. Applicant/Developer shall defend, indemnify and hold harmless City, city council, commissions, boards, subcommittees and City's elected and appointed officials, commissioners, board members, officers, agents, consultants and employees ("City Parties") from and against any and all liabilities, demands, claims, actions or proceedings and costs and expenses incidental thereto (including costs of defense, settlement and reasonable attorneys' fees), which any or all of them may suffer, incur, be responsible for or pay out as a result of or in connection with any challenge to the legality, validity or adequacy of any of the following items: (i) any agreements by and among City and Developer including without limitation any Development Agreement, (ii) any and all permits, licenses and entitlements approved by City; (iii) any environmental determination made by City in connection with the Project Site or Project; and (iv) any proceedings or other actions undertaken by City in connection with the adoption or approval of any of the above.

6. The site shall be developed in accordance with the approved plans on file in the Community Development Department - Planning Division, the Municipal Code regulations, General Plan, and the conditions contained herein. Prior to any use of the project site or business activity being commenced thereon, all Conditions of Approval shall be completed to the satisfaction of the Planning Official. (MC 9.14.020)

7. Any signs indicated on the submitted plans are not included with this approval. Any signs, whether permanent (e.g. wall, monument) or temporary (e.g. banner, flag), require separate application and approval by the Planning Division. No signs are permitted in the public right of way. (MC 9.12)

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

8. All site plans, grading plans, landscape and irrigation plans, fence/wall plans, lighting plans and street improvement plans shall be coordinated for consistency with this approval.

Special Conditions of Approval Offered by the Project Applicant/Developer

The Project Applicant/Developer offered to provide the benefits set forth below, as enforceable special conditions of approval. As such, none of the following special conditions of approval shall be considered Mitigation Measures under CEQA.

9. Heavy Duty Electric Truck Grant Program - $125,000
Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $125,000 for the purpose of providing grants to private third parties for the purchase of at least five Class 8 Heavy Duty Electric Trucks. The Program shall prioritize grant applicants who will use their Heavy Duty Electric Trucks in the City of Moreno Valley and along the Highway 60 corridor, and shall give special priority for drayage trucks that will be used in the City of Moreno Valley and along the Highway 60 corridor. The grants shall be awarded prior to the issuance of the first Certificate of Occupancy for the Project.
The award of the Heavy Duty Electric Truck Grants shall include the following two conditions:
(1) a prohibition on the resale of the Heavy Duty Electric Truck to an entity that will operate trucks outside of California; and (2) 85% of the mileage must occur in the SCAQMD region, which shall be enforced using a geo -fencing electronic system on each Heavy Duty Electric Truck that has been funded by the Program.
(2) The Developer shall be responsible for establishing, funding and administering the Heavy Duty Electric Truck Grant Program, and provide a hyperlink to the Program that the City that may post on the City's official website for interested parties to access information about the Program.

10. Medium Duty Electric Truck Grant Program - $27,000
Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit.
$27,000 for the purpose of providing grants to private third parties for the purchase of at least two Class 6 and/or Class 7 Medium Duty Electric Trucks. The Program shall prioritize grant applicants who will use their Medium Electric Trucks in the City of Moreno Valley and along the Highway 60 corridor. Only if there is no demand for Class 6 and Class 7 Medium Duty Electric Trucks, shall the grants be provided for the purchase of Class 4 and Class 5 Medium Duty Electric Trucks, with priority given to Class 5 over Class 4 Medium Duty Electric Trucks. The grants shall be awarded prior to the issuance of the first Certificate of Occupancy for the Project.
The award of the Medium Duty Electric Truck Grants shall include the following two conditions:
(1) a prohibition on the resale of the Medium Duty Electric Truck to an entity that will operate trucks outside of California; and
(2) 85% of the mileage must occur in the SCAQMD region, which shall be enforced using a geo -fencing electronic system on each Medium Duty Electric Truck that has been funded by the Program.
The Developer shall be responsible for establishing, funding and administering the Medium Duty Electric Truck Grant Program, and provide a hyperlink to the Program that the City that may post on the City's official website for interested parties to access information about the Program.

11. Local Delivery Electric Vehicle Program - $27,000
Prior to the issuance of the first building permit for the Project, the Developer shall establish a

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

trust account or escrow account in which Developer shall deposit $27,000 for the purpose of providing grants to private third parties for the purchase of at least three Local Delivery Electric Vehicles (generally referred to as Class 1, 2, and 3 trucks) for use for deliveries within the City of Moreno Valley and the immediate vicinity.
The Program shall prioritize grant applicants who occupy buildings situated within the Project Site that are located the closest to any developed residential areas and intend to use the grant proceeds to purchase the highest class of Class 1, 2, and 3 trucks for which there is demand.
The grants shall be awarded prior to the issuance of the first Certificate of Occupancy for the Project.
The award of the Local Delivery Electric Truck Grants shall include a condition that requires that 50% of the mileage must occur in Moreno Valley and the Highway 60 corridor, which shall be enforced using a geo-fencing electronic system on each Local Delivery Electric Vehicle that has been funded by the Program.
The Developer shall be responsible for establishing, funding and administering the Local Delivery Electric Vehicle Grant Program, and provide a hyperlink to the Program that the City that may post on the City's official website for interested parties to access information about the Program.

12. Electric Passenger Vehicle Grant Program - $25,000
Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $25,000 for the purpose of providing 25 $1,000 grants to Moreno Valley residents for the purchase of electric passenger vehicles.
The Program shall prioritize grant applicants who occupy households earning not more than 150% of the Area Median Income, as calculated by the U.S. Department of Housing and Urban Development.
The Developer shall be responsible for establishing, funding and administering the Electric Passenger Vehicle Grant Program, and provide a hyperlink to the Program that the City that may post on the City's official website for interested parties to access information about the Program.

13. Electric Vehicle Advocacy Fund - $5,000
Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $ 5,000 for the purpose of contributing the proceeds to a bona fide California non -profit organization, in good standing, that focuses on informing and educating members of the general public about the environmental benefits of electric vehicles and /or provides outreach, education, and training on the maintenance of zero -emissions vehicles.
Non-profit organizations, including without limitation to labor and /or environmental organizations, that are located in the City of Moreno Valley or which provide services to Moreno Valley residents shall be prioritized.
The Developer shall be responsible for establishing, funding and administering the Electric Vehicle Advocacy Fund to ensure that the grant funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City's official website for interested parties to access information about the Fund.

14. Solar Advocacy Fund - $5,000
Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $ 5,000 for the purpose of contributing the proceeds to a bona fide California non -profit organization, in good standing, that focuses on informing and educating members of the general public about the environmental benefits of solar -generated electricity and/or provides outreach, education, and

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

training on the installation and maintenance of solar panels and equipment.
Non-profit organizations, including without limitation to labor and /or environmental organizations, that are located in the City of Moreno Valley or which provide services to Moreno Valley residents shall be prioritized.
The Developer shall be responsible for establishing, funding and administering the Solar Advocacy Fund to ensure that the grant funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City's official website for interested parties to access information about the Fund.

15. Residential Air Filtration Reimbursement Program - $40,000
Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $40,000 for the purpose of paying up to 90% of a Moreno Valley's homeowner's cost of purchasing and installing non-portable air filtration systems including any necessitated HVAC modification, not exceeding $5,000 per home, as follows: (a) the homeowner's home is an eligible home with the following address:

- 28572 Galino Court (APN: 478-400-041)
- 28602 Galino Court (APN: 478-400-016)
- 28608 Galino Court (APN: 478-400-017)
- 13020 Essen Lane (APN: 478-401-001)
- 13025 Gershwin Way (APN: 478-301-010)
- 13026 Gershwin Way (APN: 478-301-009)
- 13031 Mozart Way APN: 478-301-001)
- 28778 Strauss Lane (APN: 478-303-013)
- 28794 Strauss Lane (APN:478-303-012)
- 28810 Strauss Lane (APN: 478-303-011)
- 13031 Shubert Street (APN: 478-303-001); and

(b) the homeowner requests payment within five years of the commencement of grading or commencement of construction of the first warehouse building. In the event a homeowner has a household income less than 80% of the Area Median Income as determined by the Department of Housing and Urban Development, the Project Applicant shall pay 100% of the cost of the air filtration system, not exceeding $5,000 per home. The homeowner shall be permitted to select and contract with a contractor or installer of the homeowner's choice.

The Developer shall mail notice of the Residential Air Filtration System Reimbursement Program via registered or certified mail to homeowners of record of the eligible homes prior to the issuance of the Project's first grading or building permit and annually thereafter for four years. The notice shall identify the exact date when the five-year period starts and ends.

The Developer shall be responsible for establishing, funding and administering the Residential Air Filtration System Reimbursement Program to ensure that the reimbursement funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City's official website for interested parties to access information about the Fund.

16. Residential Noise Insulation Reimbursement Program - $64,000
Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $64,000 for the purpose of paying up to 90% of a Moreno Valley's homeowner's cost of purchasing and installing noise

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

insulation measures, not exceeding $8,000 per home, as follows:

a. the homeowner's home is an eligible home with the following address:
- 28572 Galino Court (APN: 478-400-041)
- 28602 Galino Court (APN: 478-400-016)
- 28608 Galino Court (APN: 478-400-017)
- 13020 Essen Lane (APN: 478-401-001)
- 13025 Gershwin Way (APN: 478-301-010)
- 13026 Gershwin Way (APN: 478-301-009)
- 13031 Mozart Way APN: 478-301-001)
- 28778 Strauss Lane (APN: 478-303-013)
- 28794 Strauss Lane (APN:478-303-012)
- 28810 Strauss Lane (APN: 478-303-011)
- 13031 Shubert Street (APN: 478-303-001), and

b. the homeowner requests payment within five years of the commencement of grading or commencement of construction of the first warehouse building. In the event a homeowner has a household income less than 80% of the Area Median Income as determined by the Department of Housing and Urban Development, the Project Applicant shall pay 100% of the cost of the noise insulation, not exceeding $10,000 per home. The homeowner shall be permitted to select and contract with a contractor or installer of the homeowner's choice.

The Developer shall mail notice of the Residential Noise Insulation Reimbursement Program via registered or certified mail to homeowners of record of the eligible homes prior to the issuance of the Project's first grading or building permit and annually thereafter for four years. The notice shall identify the exact date when the five-year period starts and ends.

The Developer shall be responsible for establishing, funding and administering the Residential Noise Insulation Reimbursement Program to ensure that the reimbursement funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City 's official website for interested parties to access information about the Fund.

17. Residential Exterior Pressure Washing Reimbursement Program - $4,000

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $ 4,000 for the purpose of reimbursing each homeowner for exterior pressure washings of the first two rows of homes on the south side of Encelia Avenue up to $ 500 per house during any on-site or off-site grading activities, not exceeding a total sum of $4,000.

The Developer shall be responsible for establishing, funding and administering the Residential Exterior Pressure Washing Reimbursement Program to ensure that the reimbursement funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City 's official website for interested parties to access information about the Fund.

18. Onsite EV Chargers and APU Plug-Ins

Prior to the issuance of the first Certificate of Occupancy for the Project, the Developer at its own cost shall install at a minimum, 12 onsite EV charging stations. In addition, prior to the issuance of the first Certificate of Occupancy for the Project, the Developer shall install at its own cost at least one APU plug -in for every 35 dock doors at multiple locations within the Project Site where trucks park, with signage that identifies in English and Spanish where such APU plug-ins are located. Signage at each EV parking space shall also state that the EV parking space is for EVs only and improperly parked vehicles shall be towed.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

19. LEED Silver Certification Standards
The Developer shall design the Project's main building's shell and core to meet the Leadership in Energy and Environmental Design (LEED)-equivalent "Silver" Certification standards. If the Developer advertises any building within the Project Site as having LEED Silver Certification, it shall apply for and obtain such certification prior to distributing or publishing any such advertisement. If LEED Silver Certification is granted, notice shall be provided to the City and any interested parties submitting a written request for proof of LEED Silver Certification.

20. Electrical Appliances
Only electric appliances shall be used in building office areas (e.g., electric stoves).

21. Diesel Powered Generators
The use of portable or stationary diesel powered generators shall be prohibited unless necessary due to emergency situations or constrained supply.

22. Construction Equipment
All construction equipment shall meet or be cleaner than Tier 4 standards, except if the general contractor overseeing the Project's construction certifies that it is not feasible to use exclusively Tier 4 equipment due to limited availability. In all events, at least 80% of all construction equipment shall meet or be cleaner than Tier 4 standards throughout the construction phase of the Project.
In the event that any portable or stationary diesel-powered construction equipment becomes available with improved emission control devices that reduce particulate matter emissions, including fine particulate matter, and reduces NOx emissions at commercially reasonable prices, and in sufficient quantities to be reasonably available, then the Developer may cause the use of such construction equipment. Otherwise, no stationary or portable diesel-powered generators may be used, during construction, unless necessary due to emergency situations or constrained supply.

23. Lighting Program
The Developer shall establish a Lighting Program that incorporates the following: (a) implements measures that are intended to reduce light and glare to maximum extent practicable; (b) implements a lighting program in compliance with International Dark Sky Association standards, except where doing so would violate safety requirements or federal, state, county or City regulations; (c) requires all exterior lighting, including street lights, to be 2,700 Kelvin; (d) commands the installation of motion sensors on all interior lighting consistent with applicable Title 24 regulations; (e) mandates the installation of full cut-off luminaries on all buildings and poles situated within the Project Site; (f) orders the posting of signs on-site stating that truck head lights shall be turned off within five minutes of truck parking; (g) requires all construction lighting to be shielded and directed away from the Project's property lines; and (h) limits the height of all outdoor freestanding and wall-mounted lights to no more than 20 feet within 180 feet of the centerline of any public streets, except where doing so would violate safety requirements or any federal, state, county or City regulations.

24. Landscaping Requirements
The Developer shall plant at least 599 trees at the Project Site, consistent with the following:
a. Screening: Along the perimeter edges of the Project Site facing the existing residential neighborhood, it shall be developed to screen future buildings with walls, and/or landscaping. For all buildings along the perimeter edges of the Project Site, all buildings and roof mounted equipment shall be substantially screened by walls and/or landscaping which remains in a state of maturity and non -deciduous at all times of the year. "Substantially screened" means that while there might be some view of the

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

buildings looking through the foliage, the buildings will be mostly obscured from view.

b. Large Trees: At least 50% of the trees planted along the perimeter edges of the Project Site which face the existing residential neighborhood shall be 24-inch box trees.

c. Evergreen Trees: Evergreen trees, which include all species of decorative non-deciduous trees, shall constitute 95% of all 24-inch box trees planted along the perimeter edges of the Project Site which face the existing residential neighborhood. The 24-inch box evergreen trees shall be concentrated towards the higher topographic elevations within the perimeter edges of the Project Site to maximize screening.

d. Palm Trees: Palm trees may only be planted in accent areas only.

e. Accent Elements: To the extent practicable, in order to create visual interest, site contours shall vary and accent elements, such as boulders, which shall be placed along the frontage of the perimeter edges of the Project Site facing the existing residential neighborhood.

f. Layered Effect: Along the perimeter edges of the Project Site facing the existing residential neighborhood, trees shall be planted at varied depths from the Project Site's property line so that instead of creating a uniform and linear appearance, the planted trees create a layering effect as viewed from adjacent streets so as to maximize screening of buildings.

g. Maintenance: Trees shall be maintained in their natural form and shape with minimal pruning and all dead trees shall be promptly removed and replaced with similar type and size trees.

h. Parking Area Trees: Trees planted in the Project Site's parking areas shall be capable of achieving 50% shading within ten years of planting.

i. Invasive Non-Native Vegetation: Invasive non-native vegetation, such as certain grasses, shrubs, and sub-shrubs shall be removed from the Project Site as part of the Project's regular landscaping services.

j. Entire Site. Evergreen trees, which include all species of decorative non-deciduous trees, shall constitute 50% of all trees planted within the Project Site.

25. Trucks:

a. Drive Aisle Walls: All portions of truck circulation drive aisles that are visible from any existing home within 1,000 feet of the perimeter edges of the Project Site shall be shielded by walls at least 14 feet high, upon approval of the City to ensure no traffic safety issues are created. In no case, however, shall any such walls be lower than 12 feet high.

b. Turning Measures: The Developer shall design and install on -site physical improvements, including but not limited to curbs, street humps, street bumps or textured pavement, approved by the City, that discourage truck operators from turning their trucks in the wrong direction when entering or leaving the Project Site.

c. Directional Signage: The Developer shall install on-site signage clearly stating which directions trucks must turn at all streets exiting the Project Site.

26. Construction Activities:

a. No nighttime grading or outside construction between 6:00 p.m. and 7:00 a.m. shall be conducted within 1,000 feet of any existing home across the street along the perimeter edge of the Project Site, except if necessary for concrete pours.

b. The Developer shall provide notice to residents within 100 feet of any portion of the perimeter edge of the Project Site, at least one week prior to construction between 6:00 p.m. and 7:00 a.m.

c. Construction trucks shall be prohibited from using Encelia Street., other than for

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

infrastructure construction or necessary detours.

d. Lunch vendor services shall be provided on-site during the construction phase of the construction phase of the Project.

27. Parking:
    a. The Project shall include preferential parking for carpools and vanpools equal to 5% of the total number of on-site parking spaces.
    b. The Project shall include designated parking spaces for motorcycles.
    c. The Project shall provide sufficient on-site truck parking within the on-site parking areas to enable all trucks reasonably expected to visit the Project to park on-site (as determined by a qualified transportation engineer).

28. Rooftops:
Warehouse roof areas not covered by solar panels shall be constructed with materials with an initial installation Solar Reflective Index Value of not less than 39.

29. Trash Removal:
Trash removal within and along all perimeter edges of the Project Site shall occur at least weekly or within three business day of receipt of notification to any occupant of the Project or the Project's management or community ombudsman.

30. Developer agrees to augment the sign prohibiting truck traffic southbound on Redlands (said sign currently located at the NW corner of Eucalyptus and Redlands) to a larger size and more prominent design, subject to review and approval by City staff.

31. To reduce noise associated with the use of backup alarms, either ambient-sensitive self-adjusting backup alarms or manually adjustable alarms shall be used on all equipment in use on the project site that requires a backup alarm. Ambient-sensitive self-adjusting backup alarms shall be equipped to increase or decrease their volume based on background noise levels by self-adjusting to produce a tone that is readily noticeable over ambient noise levels, which is typically a minimum of 5 decibels above the ambient noise, but not so loud as to be a constant annoyance to neighbors. Close attention shall be given to the alarm's mounting location on the machine in order to minimize engine noise interference, which can be sensed by the alarm as the ambient noise level. An alarm mounted directly behind a machine radiator shall be equipped to sense the cooling fan's noise and adjust accordingly. If ambient backup alarms are utilized, a log shall be maintained that describes the type and timing of maintenance of each piece of equipment that is essential to the effective operation of the ambient backup alarm system. If manually-adjustable alarms are used, which eliminates the machine mounting location problem of the ambient-sensitive self-adjustable backup alarms, each such alarm shall be set at the beginning of each day and night shift. If manual backup alarms are utilized, a log shall be maintained that describes the type and timing of maintenance of each piece of equipment that is essential to the effective operation of the manual backup alarm system. Alternatively, backup movements can be supervised with a guide and flagging system if permitted under applicable OSHA regulations. If a flagging system is used, a log shall be maintained that describes the type of equipment used, if any, and the name of each flag person. <u>All Logs shall be retained for a minimum of 12-months and be readily available to the City of Moreno Valley for inspection purposes during normal business hours.</u>

32. The Developer shall make a $500,000 cash contribution to the Moreno Valley Community Foundation before a final Certificate of Occupancy is issued for any building or structure on the Project Site.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

Special Conditions

33. The site has been approved for the construction of an approximate 1,263,271 square foot light industrial building with 214 dock doors with associated site and public improvements. A change or modification shall require separate approval.

34. Prior to grading plan approval, Basin fencing shall include wrought iron fencing with pilasters

35. This approval shall comply with all applicable requirements of the City of Moreno Valley Municipal Code.

36. The site shall be developed in accordance with the approved tentative parcel map on file in the Community Development Department -Planning Division, the Municipal Code regulations, General Plan, and the conditions contained herein. (MC 9.14.020)

37. A drought tolerant landscape palette shall be utilized throughout the project in compliance with the City's Landscape Requirements. (9.17)

38. Prior to recordation of the final map, final median enhancement /landscape/irrigation plans shall be submitted to and approved by the Planning Division, and Public Works Department - Special Districts Division for review and approval by each division. (GP - Circulation Master Plan)

39. If potential historic, archaeological, Native American cultural resources, or paleontological resources are uncovered during excavation or construction activities at the project site, work in the affected area must cease immediately and a qualified person (meeting the Secretary of the Interior's standards (36CFR61)) shall be consulted by the applicant to evaluate the find, and as appropriate recommend alternative measures to avoid, minimize or mitigate negative effects on the historic, prehistoric, or paleontological resource. Determinations and recommendations by the consultant shall be immediately submitted to the Planning Division for consideration, and implemented as deemed appropriate by the Community Development Director, in consultation with the State Historic Preservation Officer (SHPO) and any and all affected Native American Tribes before any further work commences in the affected area.
If human remains are discovered during grading and other construction excavation, no further disturbance shall occur until the County Coroner has made necessary findings as to origin. If the County Coroner determines that the remains are potentially Native American, the California Native American Heritage Commission shall be notified within 5-days of the published finding to be given a reasonable opportunity to identify the "most likely descendant." The "most likely descendant" shall then make recommendations, and engage in consultations concerning the treatment of the remains (California Public Resources Code 5097.98). (GP Objective 23.3, CEQA).

40. All landscaped areas in perpetuity shall be maintained in a healthy and thriving condition, free from weeds, trash and debris. (MC 9.02.030)

41. Prior to issuance of building permit issuance, landscape plans (trees, shrubs and groundcover) for basins maintained by an HOA or other private entity shall be submitted to and approved by the Planning Division for the sides and /or slopes. A hydroseed mix w/irrigation is acceptable for the bottom of all the basin areas. All detention basins shall include trees, shrubs and groundcover up to the concreted portion of the basin. A solid decorative (e.g. split face, color variation, pattern variation, or as approved by the Planning Official) wall with pilasters, tubular steel fence with pilasters or other fence or wall approved by the Planning Official is required to

secure all water quality and detention basins more than 18 inches in depth.

42. This tentative map shall expire three years after the approval date of this tentative map unless extended as provided by the City of Moreno Valley Municipal Code; otherwise it shall become null and void and of no effect whatsoever in the event the applicant or any successor in interest fails to properly file a final map before the date of expiration. (MC 9.02.230, 9.14.050, 080)

43. Prior to the issuance of grading permits, mitigation measures contained in the Mitigation Monitoring Program approved with this project shall be implemented as provided therein.

44. Prior to any site disturbance and/or grading plan submittal, and or final map recordation, a mitigation monitoring fee, as provided by City ordinance, shall be paid by the applicant/owner. No City permit or approval shall be issued until such fee is paid. (CEQA)

45. Prior to issuance of a building permit, the developer/property owner or developer's successor-in-interest shall pay all applicable impact fees due at permit issuance, including but not limited to Multi-species Habitat Conservation Plan (MSHCP) mitigation fees. (Ord.)

46. Prior to approval of any grading plan, local and master-planned multi-use trail easements shall be shown on the rough and precise grading plans in accordance with the City's Master Trail Plan.

47. Prior to final map recordation, or building permit issuance, subdivision phasing (including any proposed common open space or improvement phasing, if applicable), shall be subject to a separate Phasing Plan submittal for Planning Division approval. Any proposed phasing shall provide for adequate vehicular access to all lots in each phase as determined by the City Transportation Engineer or designee and shall substantially conform to all intent and purpose of the subdivision approval. (MC 9.14.080)

48. Prior to the issuance of any grading permits and prior to any physical disturbance of any natural drainage course, or any wetland determined to contain riparian vegetation, the applicant shall obtain a stream bed alteration agreement or permit, or a written waiver of the requirement for such an agreement or permit, from both the California Department of Fish and Game and the U.S. Army Corps of Engineers. Written verification of such a permit or waiver shall be provided to both the Planning Division and the Public Works Department - Land Development Division. (CEQA, State and Federal codes)

49. Prior to final map recordation any required trail easements shall be provided.

50. Prior to approval of a grading plan, a detailed trail plan shall be submitted to and approved by the Planning Division. The plan shall indicate widths, maximum slopes, physical conditions, fencing, walls, and/or amenities in accordance with City standards.

51. Prior to approval of any grading permit, a tree plan shall be submitted to and approved by the Planning Division. The plan shall identify all mature trees (4 inch trunk diameter or larger) on the subject property and City right -of-way. Using the grading plan as a base, the plan shall indicate trees to be relocated, retained, and removed. Replacement trees shall be shown on the plan, be a minimum size of 24 inch box, and meet a ratio of three replacement trees for each mature tree removed or as approved by the Planning Official. (GP Objective 4.4, 4.5, DG)

Prior to Building Permit

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

52. Prior to issuance of any grading permit, all Conditions of Approval, and Mitigation Measures shall be printed on the building plans.

53. Prior to the issuance of building permits, the developer shall provide documentation that contact was made to the U.S. Postal Service to determine the appropriate type and location of mailboxes.

54. Prior to the issuance of building permits, proposed covered trash enclosures shall be included in the Planning review of the Fence and Wall plan or separate Planning submittal. The trash enclosure(s), including the roof materials, shall be compatible with the architecture, color and materials of the building (s) design. Trash enclosure areas shall include landscaping on three sides. Approved design plans shall be included in a Building submittal (Fence and Wall or building design plans). (GP Objective 43.6, DG)

55. Prior to issuance of any building permits, final landscaping and irrigation plans shall be submitted for review and approved by the Planning Division. After the third plan check review for landscape plans, an additional plan check fee shall apply. The plans shall be prepared in accordance with the City's Landscape Requirements and shall include:
    a. A three (3) foot high decorative wall, solid hedge or berm shall be placed in any setback areas between a public right of way and a parking lot for screening.
    b. Finger and end planters with required step outs and curbing shall be provided every 12 parking stalls as well as at the terminus of each aisle.
    c. Diamond planters shall be provided every 3 parking stalls.
    d. Drought tolerant landscape shall be used. Sod shall be limited to gathering areas.
    e. Street trees shall be provided every 40 feet on center in the right of way.
    f. On-site trees shall be planted at an equivalent of one (1) tree per thirty (30) linear feet of the perimeter of a parking lot and per thirty linear feet of a building dimension for the portions of the building visible from a parking lot or right of way. Trees may be massed for pleasing aesthetic effects.
    g. Enhanced landscaping shall be provided at all driveway entries and street corner locations The review of all utility boxes, transformers etc. shall be coordinated to provide adequate screening from public view.
    h. Landscaping on three sides of any trash enclosure.
    i. All site perimeter and parking lot landscape and irrigation shall be installed prior to the release of certificate of any occupancy permits for the site or pad in question.

56. Prior to issuance of building permits, the Planning Division shall review and approve the location and method of enclosure or screening of transformer cabinets, commercial gas meters and back flow preventers as shown on the final working drawings. Location and screening shall comply with the following criteria : transformer cabinets and commercial gas meters shall not be located within required setbacks and shall be screened from public view either by architectural treatment or landscaping; multiple electrical meters shall be fully enclosed and incorporated into the overall architectural design of the building (s); back-flow preventers shall be screened by landscaping. (GP Objective 43.30)

57. Prior to issuance of a building permit, the developer/property owner or developer's successor-in-interest shall pay all applicable impact fees due at permit issuance, including but not limited to Multi-species Habitat Conservation Plan (MSHCP) mitigation fees. (Ord)

58. Prior to issuance of building permits, for projects that will be phased, a phasing plan shall be submitted to and approved by the Planning Division if occupancy is proposed to be phased.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

59. Prior to or at building plan check submittal, the elevation plans shall include decorative lighting sconces on all sides of the buildings of the complex facing a parking lot, courtyard or plaza, or public right of way or open space to provide up-lighting and shadowing on the structures. Include drawings of the sconce details for each building within the elevation plans, approved by the Planning Division prior to building permit issuance.

60. Detailed, on-site, computer generated, point-by-point comparison lighting plan, including exterior building, parking lot, and landscaping lighting, shall be included in the Building Plans for review by the Planning Division. The lighting plan shall be generated on the plot plan and shall be integrated with the final landscape plan. The plan shall indicate the manufacturer's specifications for light fixtures used, shall include style, illumination, location, height and method of shielding per the City's Municipal Code requirements. After the third plan check review for lighting plans, an additional plan check fee will apply. (MC 9.08.100, 9.16.280)

61. Prior to issuance of building permits, screening details shall be addressed on the building plans for roof top equipment submitted for Planning Division review and approval through the building plan check process. All equipment shall be completely screened so as not to be visible from public view, and the screening shall be an integral part of the building.

62. Prior to issuance of building permits, proposed covered trash enclosure (s) shall be included in the Planning review of the Fence and Wall plans. The trash enclosure (s), including the roof materials, shall be compatible with the architecture, color and materials of the building(s) design. Trash enclosure areas shall include landscaping on three sides unless located within the truck loading area. Approved design plans shall be included in a Building submittal (Fence and walls or building design plans). (GP Objective 43.6, DG)

63. At least thirty days prior to issuance of any grading permit, the developer shall retain a qualified archaeologist, provide a letter identifying the name and qualifications of the archaeologist to the Planning Division for approval, to monitor all ground disturbing activities in an effort to identify any unknown archaeological resources and to evaluate and recommend appropriate actions for any archaeological deposits exposed by construction activity.
At least thirty days prior to issuance of a grading permit, the applicant shall provide evidence that contact has been established with the appropriate Native American Tribe(s), providing notification of grading, excavation and the proposed monitoring program and to coordinate with the City and Tribe(s) to develop a cultural resources treatment and monitoring agreement. The agreement shall address treatment of known cultural resources, the designation, responsibilities and participation of Tribal monitors during grading, excavation and ground disturbing activities; project grading and development scheduling; terms of compensation; and treatment and final disposition of any cultural resources, sacred sites, and human remains discovered on the site.
A report documenting the proposed methodology for grading monitoring shall be submitted to and approved by the Planning Division prior to issuance of any grading permit. The monitoring archaeologist shall be empowered to stop and redirect grading in the vicinity of an exposed archaeological deposit until that deposit can be fully evaluated. The archaeologist shall consult with affected Tribe (s) to evaluate any archaeological resources discovered on the project site. Tribal monitors shall be allowed to monitor all grading, excavation and groundbreaking activities, and shall also have authority to stop and redirect grading activities in consultation with the project archaeologist.
The property owner shall relinquish ownership to the Tribe (s) of all Native American cultural resources, including sacred items, burial goods and all archaeological artifacts that are found on the project site for proper treatment and disposition. All sacred sites, should they be encountered with the project site, shall be avoided and preserved as the preferred mitigation.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

If any inadvertent discoveries of subsurface archaeological or cultural resources occur during grading, the applicant, project archaeologist, and Tribe (s) shall assess the significance of such resources and shall meet and confer regarding mitigation of such resources. Avoidance is the preferred method of preservation of archaeological resources. If the applicant, project archaeologist and Tribe (s) cannot agree on the significance or mitigation for such resources, the issue (s) will be presented to the Planning Official with adequate documentation. The Official shall make a determination based on the provisions of CEQA and consideration of the religious beliefs, customs and practices of the Tribe(s).

64. Prior to issuance of any grading permit, all Conditions of Approval, and Mitigation Measures shall be printed on the grading plans.

65. Prior to the issuance of grading permits, decorative (e.g. colored/scored concrete or as approve by the Planning Official) pedestrian pathways across circulation aisles/paths shall be provided throughout the development to connect dwellings with open spaces and/or recreational uses or commercial/industrial buildings with open space and/or parking and/or the public right-of-way. The pathways shall be shown on the precise grading plan. (GP Objective 46.8, DG)

66. Prior to approval of any grading permits, final median enhancement/landscape/irrigation plans shall be submitted to the Planning Division and Public Works Department - Special Districts for review and approval by each division. (GP - Circulation Master Plan) Timing of installation shall be determined by PW-Special Districts.

67. Prior to approval of any grading plan, local and master-planned multi-use trail easements shall be shown on the rough and precise grading plans in accordance with the City's Master Trail Plan.

68. Prior to issuance of any grading permits, mitigation measures contained in the Mitigation Monitoring Program approved with this project shall be implemented as provided therein. A mitigation monitoring fee, as provided by City ordinance, shall be paid by the applicant within 30 days of project approval. No City permit or approval shall be issued until such fee is paid. (CEQA)

69. Prior to the issuance of any grading permits and prior to any physical disturbance of any natural drainage course, for any area determined to contain riparian vegetation, the applicant shall obtain a stream bed alteration agreement or permit, or a written waiver of the requirement for such an agreement or permit, from both the California Department of Fish and Wildlife and the U.S. Army Corps of Engineers. Written verification of such a permit or waiver shall be provided to the Planning Division and the Public Works Department - Land Development Division. (CEQA, State and Federal codes)

70. Prior to issuance of grading permits, the developer shall pay the applicable Stephens' Kangaroo Rat (SKR) Habitat Conservation Plan mitigation fee. (Ord)

71. Within thirty (30) days prior to any grading or other land disturbance, a pre-construction survey for Burrowing Owls shall be conducted pursuant to the established guidelines of Multiple Species Habitat Conservation Plan. The pre-construction survey shall be submitted to the Planning Division prior to any disturbance of the site and/or grading permit issuance.

72. Prior to approval of any grading permits, the applicant shall have a qualified hazardous materials specialist examine the site to determine if there are any toxic or hazardous materials on-site which might pose a threat to human health. The examination shall include soil tests if deemed

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

necessary by the consultant. A copy of the report, including recommended remediation or other clean -up measures, shall be provided to the Planning Division and the Public Works Department - Land Development Division by the consultant prior to any grading permits being issued. (Ord,)

73. Prior to approval of any grading permits, plans for any security gate system shall be submitted to and approved by to the Planning Division.

74. Prior to the issuance of grading permits, the site plan and grading plans shall show decorative hardscape (e.g. colored concrete, stamped concrete, pavers or as approved by the Planning Official) consistent and compatible with the design, color and materials of the proposed development for all driveway ingress /egress locations of the project. [apply to commercial and multi-family project, and major entry driveways for industrial]

75. Prior to the issuance of grading permits, a temporary project identification sign shall be erected on the site in a secure and visible manner. The sign shall be conspicuously posted at the site and remain in place until occupancy of the project.
The sign shall include the following:
a. The name (if applicable) and address of the development.
b. The developer's name, address, and a 24-hour emergency telephone number.

76. Prior to issuance of grading permits, the location of the trash enclosure shall be included on the plans.

77. Prior to approval of any grading permit, the tree plan shall be submitted to and approved by the Planning Division. The plan shall identify all mature trees (4 inch trunk diameter or larger) on the subject property and City right -of-way. Using the grading plan as a base, the plan shall indicate trees to be relocated, retained, and removed. Replacement trees shall be shown on the plan, be a minimum size of 24 inch box, and meet a ratio of three replacement trees for each mature tree removed or as approved by the Planning Official. (GP Objective 4.4, 4.5, DG)

Prior to Building Final or Occupancy

78. Prior to building final, all required landscaping and irrigation shall be installed per plan, certified by the Landscape Architect and inspected by the Planning Division. (MC 9.03.040, MC 9.17).

79. Prior to building final, Planning approved/stamped landscape plans shall be provided to the Community Development Department – Planning Division on a CD disk.

80. Prior to building final, all required and proposed fences and walls shall be constructed according to the approved plans on file in the Planning Division. (MC 9.080.070).

81. Prior to building final or Certificate of Occupancy, the owner or owner 's representative shall provide documentation to the Planning Division that they have contacted the Moreno Valley Police Department to establish and maintain a relationship with the City of Moreno Valley Police Department and cooperate with the Problem Oriented Policing (POP) program, or its successors. [multi-family, night clubs, liquor stores]

Building Division

82. The proposed non-residential project shall comply with the latest Federal Law, Americans with

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

Disabilities Act, and State Law, California Code of Regulations, Title 24, Chapter 11B for accessibility standards for the disabled including access to the site, exits, bathrooms, work spaces, etc.

83. Contact the Building Safety Division for permit application submittal requirements.

84. All new buildings 10,000 square feet and over, shall include building commissioning in the design and construction processes of the building project to verify that the building systems and components meet the owner's or owner representative's project requirements (OPR). All requirements in The California Green Building Standards Code, sections 5.410.2 - 5.410.2.6 must be met.

85. Any construction within the city shall only be as follows: Monday through Friday seven a.m. to seven p.m. (except for holidays which occur on weekdays), eight a.m. to four p.m.; weekends and holidays (as observed by the city and described in the Moreno Valley Municipal Code Chapter 2.55), unless written approval is first obtained from the Building Official or City Engineer.

86. Building plans submitted shall be signed and sealed by a California licensed design professional as required by the State Business and Professions Code.

87. The proposed development shall be subject to the payment of required development fees as required by the City's current Fee Ordinance at the time a building application is submitted or prior to the issuance of permits as determined by the City.

88. The proposed project will be subject to approval by the Eastern Municipal Water District and all applicable fees and charges shall be paid prior to permit issuance. Contact the water district at 951.928.3777 for specific details.

89. All new structures shall be designed in conformance to the latest design standards adopted by the State of California in the California Building Code, (CBC) Part 2, Title 24, California Code of Regulations including requirements for allowable area, occupancy separations, fire suppression systems, accessibility, etc.

90. The proposed non-residential project shall comply with California Green Building Standards Code, Section 5.106.5.3, mandatory requirements for Electric Vehicle Charging Station (EVCS).

91. The proposed project's occupancy shall be classified by the Building Official and must comply with exiting, occupancy separation(s) and minimum plumbing fixture requirements. Minimum plumbing fixtures shall be provided per the California Plumbing Code, Table 422.1. The occupant load and occupancy classification shall be determined in accordance with the California Building Code.

92. Prior to permit issuance, every applicant shall submit a properly completed Waste Management Plan (WMP), as a portion of the building or demolition permit process. (MC 8.80.030)

ECONOMIC DEVELOPMENT DEPARTMENT (EDD)

93. New Moreno Valley businesses may work with the Economic Development Department to coordinate job recruitment fairs.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

94. New Moreno Valley businesses may adopt a "First Source" approach to employee recruitment that gives notice of job openings to Moreno Valley residents for one week in advance of public recruitment.

95. New Moreno Valley businesses are encouraged to hire local residents.

96. New Moreno Valley businesses are encouraged to provide a job fair flyer and /or web announcement to the City in advance of job recruitments, so that the City can assist in publicizing these events.

97. New Moreno Valley businesses may utilize the workforce recruitment services provided by the Moreno Valley Business & Employment Resource Center ("BERC").
The BERC offers free assistance to Moreno Valley businesses recruiting and training potential employees. Complimentary services include:
- Job Announcements
- Applicant testing / pre-screening
- Interviewing
- Job Fair support
- Training space

FIRE DEPARTMENT

Fire Prevention Bureau

98. The Fire Department emergency vehicular access road shall be (all weather surface) capable of sustaining an imposed load of 80,000 lbs. GVW, based on street standards approved by the Public Works Director and the Fire Prevention Bureau. The approved fire access road shall be in place during the time of construction. Temporary fire access roads shall be approved by the Fire Prevention Bureau. (CFC 501.4, and MV City Standard Engineering Plan 108d)

99. The angle of approach and departure for any means of Fire Department access shall not exceed 1 ft. drop in 20 ft. (0.3 m drop in 6 m), and the design limitations of the fire apparatus of the Fire Department shall be subject to approval by the AHJ. (CFC 503 and MVMC 8.36.060)

100. Prior to construction, all locations where structures are to be built shall have an approved Fire Department access based on street standards approved by the Public Works Director and the Fire Prevention Bureau. (CFC 501.4)

101. Prior to issuance of Building Permits, the applicant/developer shall provide the Fire Prevention Bureau with an approved site plan for Fire Lanes and signage. (CFC 501.3)

102. Prior to issuance of Certificate of Occupancy or Building Final, "Blue Reflective Markers" shall be installed to identify fire hydrant locations in accordance with City specifications. (CFC 509.1 and MVLT 440A-0 through MVLT 440C-0)

103. Prior to issuance of Certificate of Occupancy or Building Final, all commercial buildings shall display street numbers in a prominent location on the street side and rear access locations. The numerals shall be a minimum of twelve inches in height. (CFC 505.1, MVMC 8.36.060[I])

104. Final fire and life safety conditions will be addressed when the Fire Prevention Bureau reviews building plans. These conditions will be based on occupancy, use, California Building Code (CBC), California Fire Code (CFC), and related codes, which are in effect at the time of building plan submittal.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

105. The Fire Code Official is authorized to enforce the fire safety during construction requirements of Chapter 33. (CFC Chapter 33 & CBC Chapter 33)

106. Fire lanes and fire apparatus access roads shall have an unobstructed width of not less than twenty–four (24) feet and an unobstructed vertical clearance of not less the thirteen (13) feet six (6) inches. (CFC 503.2.1 and MVMC 8.36.060[E])

107. Prior to issuance of Certificate of Occupancy or Building Final, the applicant/developer shall install a fire sprinkler system based on square footage and type of construction, occupancy or use. Fire sprinkler plans shall be submitted to the Fire Prevention Bureau for approval prior to installation. (CFC Chapter 9, MVMC 8.36.100[D])

108. Prior to issuance of a Certificate of Occupancy or Building Final, a "Knox Box Rapid Entry System" shall be provided. The Knox-Box shall be installed in an accessible location approved by the Fire Code Official. All exterior security emergency access gates shall be electronically operated and be provided with Knox key switches for access by emergency personnel. (CFC 506.1)

109. The minimum number of fire hydrants required, as well as the location and spacing of fire hydrants, shall comply with the C.F.C., MVMC, and NFPA 24. Fire hydrants shall be located no closer than 40 feet to a building. A fire hydrant shall be located within 50 feet of the fire department connection for buildings protected with a fire sprinkler system. The size and number of outlets required for the approved fire hydrants are (6" x 4" x 2 ½" x 2 ½") (CFC 507.5.1, 507.5.7, Appendix C, NFPA 24-7.2.3, MVMC 912.2.1)

110. Plans for private water mains supplying fire sprinkler systems and /or private fire hydrants shall be submitted to the Fire Prevention Bureau for approval. (CFC 105 and CFC 3312.1)

111. The Fire Prevention Bureau is required to set a minimum fire flow for the remodel or construction of all commercial buildings per CFC Appendix B and Table B 105.1. The applicant/developer shall provide documentation to show there exists a water system capable of delivering said waterflow for 2 hour(s) duration at 20-PSI residual operating pressure. The required fire flow may be adjusted during the approval process to reflect changes in design, construction type, or automatic fire protection measures as approved by the Fire Prevention Bureau. Specific requirements for the project will be determined at time of submittal. (CFC 507.3, Appendix B)

112. Prior to issuance of Building Permits, the applicant/developer shall furnish one copy of the water system plans to the Fire Prevention Bureau for review. Plans shall: a. Be signed by a registered civil engineer or a certified fire protection engineer; b. Contain a Fire Prevention Bureau approval signature block; and c. Conform to hydrant type, location, spacing of new and existing hydrants and minimum fire flow required as determined by the Fire Prevention Bureau. The required water system, including fire hydrants, shall be installed, made serviceable, and be accepted by the Moreno Valley Fire Department prior to beginning construction. They shall be maintained accessible.

FINANCIAL & MANAGEMENT SERVICES DEPARTMENT

Moreno Valley Utility

113. This project requires the installation of electric distribution facilities. A non-exclusive easement shall be provided to Moreno Valley Utility and shall include the rights of ingress and egress for

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

the purpose of operation, maintenance, facility repair, and meter reading.

114. This project requires the installation of electric distribution facilities. The developer shall submit a detailed engineering plan showing design, location and schematics for the utility system to be approved by the City Engineer. In accordance with Government Code Section 66462, the Developer shall execute an agreement with the City providing for the installation, construction, improvement and dedication of the utility system following recordation of final map and/or concurrent with trenching operations and other improvements so long as said agreement incorporates the approved engineering plan and provides financial security to guarantee completion and dedication of the utility system.
The Developer shall coordinate and receive approval from the City Engineer to install, construct, improve, and dedicate to the City all utility infrastructure including but not limited to, conduit, equipment, vaults, ducts, wires (including fiber optic cable), switches, conductors, transformers, and "bring-up" facilities including electrical capacity to serve the identified development and other adjoining, abutting, or benefiting projects as determined by Moreno Valley Utility – collectively referred to as "utility system", to and through the development, along with any appurtenant real property easements, as determined by the City Engineer necessary for the distribution and/or delivery of any and all "utility services" to and within the project. For purposes of this condition, "utility services" shall mean electric, cable television, telecommunication (including video, voice, and data) and other similar services designated by the City Engineer. "Utility services" shall not include sewer, water, and natural gas services, which are addressed by other conditions of approval.
The City, or the City's designee, shall utilize dedicated utility facilities to ensure safe, reliable, sustainable and cost effective delivery of utility services and maintain the integrity of streets and other public infrastructure. Developer shall, at developer's sole expense, install or cause the installation of such interconnection facilities as may be necessary to connect the electrical distribution infrastructure within the project to the Moreno Valley Utility owned and controlled electric distribution system.

115. Existing Moreno Valley Utility electrical infrastructure shall be preserved in place. The developer will be responsible, at developer's expense, for any and all costs associated with the relocation of any of Moreno Valley Utility's underground electrical distribution facilities, as determined by Moreno Valley Utility, which may be in conflict with any developer planned construction on the project site.

116. This project is subject to a Reimbursement Agreement. The Developer is responsible for a proportionate share of costs associated with electrical distribution infrastructure previously installed that directly benefits the project.

PUBLIC WORKS DEPARTMENT

Land Development

117. Aggregate slurry, as defined in Section 203-5 of Standard Specifications for Public Works Construction, shall be required prior to 90% security reduction or the end of the one-year warranty period of the public streets as approved by the City Engineer. If slurry is required, a slurry mix design shall be submitted for review and approved by the City Engineer. The latex additive shall be Ultra Pave 70 (for anionic) or Ultra Pave 65 K (for cationic) or an approved equal per the geotechnical report. The latex shall be added at the emulsion plant after weighing the asphalt and before the addition of mixing water. The latex shall be added at a rate of two to two-and-one-half (2 to 2½) parts to one-hundred (100) parts of emulsion by volume. Any existing striping shall be removed prior to slurry application and replaced per City standards.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

118. The developer shall comply with all applicable City ordinances and resolutions including the City's Municipal Code (MC) and if subdividing land, the Government Code (GC) of the State of California, specifically Sections 66410 through 66499.58, said sections also referred to as the Subdivision Map Act (SMA). [MC 9.14.010]

119. The final approved conditions of approval (COAs) issued and any applicable Mitigation Measures by the Planning Division shall be photographically or electronically placed on mylar sheets and included in the Grading and Street Improvement plans.

120. The developer shall monitor, supervise and control all construction related activities, so as to prevent these activities from causing a public nuisance, including but not limited to, insuring strict adherence to the following:
    a. Removal of dirt, debris, or other construction material deposited on any public street no later than the end of each working day.
    b. Observance of working hours as stipulated on permits issued by the Land Development Division.
    c. The construction site shall accommodate the parking of all motor vehicles used by persons working at or providing deliveries to the site.
    d. All dust control measures per South Coast Air Quality Management District (SCAQMD) requirements during the grading operations.
    Violation of any condition, restriction or prohibition set forth in these conditions shall subject the owner, applicant, developer or contractor (s) to remedy as noted in City Municipal Code
    8.14.090. In addition, the City Engineer or Building Official may suspend all construction related activities for violation of any condition, restriction or prohibition set forth in these conditions until such time as it has been determined that all operations and activities are in conformance with these conditions.

121. Drainage facilities (e.g., catch basins, water quality basins, etc.) with sump conditions shall be designed to convey the tributary 100-year storm flows. Secondary emergency escape shall also be provided.

122. In the event right-of-way or offsite easements are required to construct offsite improvements necessary for the orderly development of the surrounding area to meet the public health and safety needs, the developer shall make a good faith effort to acquire the needed right-of-way in accordance with the Land Development Division's administrative policy. If unsuccessful, the Developer shall enter into an agreement with the City to acquire the necessary right-of-way or offsite easements and complete the improvements at such time the City acquires the right -of-way or offsite easements which will permit the improvements to be made. The developer shall be responsible for all costs associated with the right -of-way or easement acquisition. [GC 66462.5]

123. If improvements associated with this project are not initiated within two (2) years of the date of approval of the Public Improvement Agreement (PIA), the City Engineer may require that the engineer's estimate for improvements associated with the project be modified to reflect current City construction costs in effect at the time of request for an extension of time for the PIA or issuance of a permit. [MC 9.14.210(B)(C)]

124. The developer shall protect downstream properties from damage caused by alteration of drainage patterns (i.e. concentration or diversion of flow, etc.). Protection shall be provided by constructing adequate drainage facilities, including, but not limited to, modifying existing facilities or by securing a drainage easement. [MC 9.14.110]

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

125. Public drainage easements, when required, shall be a minimum of 25 feet wide and shall be shown on the map and plan, and noted as follows: “Drainage Easement – no structures, obstructions, or encroachments by land fills are allowed.” In addition, the grade within the easement area shall not exceed a 3:1 (H:V) slope, unless approved by the City Engineer.

126. The maintenance responsibility of the proposed storm drain line shall be clearly identified. Storm drain lines within private property will be privately maintained and those within public streets will be publicly maintained.

127. The proposed private storm drain system shall connect to the proposed 78" reinforced concrete pipe (RCP) in Redlands Boulevard. A storm drain manhole shall be placed at the right of way line to mark the beginning of the publicly maintained portion of this storm drain.

128. This project shall submit civil engineering design plans, reports and /or documents (prepared by a registered/licensed civil engineer) for review and approval by the City Engineer per the current submittal requirements, prior to the indicated threshold or as required by the City Engineer. The submittal consists of, but is not limited to, the following:
    a. Parcel Map (recordation prior to building permit issuance);
    b. Rough grading with erosion control plan (prior to grading permit issuance);
    c. Precise grading with erosion control plan (prior to grading permit issuance);
    d. Street/storm drain with striping, RCFC & WCD storm drain, and sewer/water plans (prior to encroachment permit issuance);
    e. Final drainage study (prior to grading plan approval);
    f. Final WQMP (prior to grading plan approval);
    g. Easements, dedications, vacations, etc. (prior to building permit issuance);
    h. As-Built revision for all plans (prior to occupancy release). Prior to Grading Permit

129. A receipt showing payment of the Area Drainage Plan (ADP) fee to Riverside County Flood Control and Water Conservation District shall be submitted. [MC 9.14.100(O)]

130. If the developer chooses to construct the project in phases, a Construction Phasing Plan for the construction of on-site public or private improvements shall be submitted for review and approved by the City Engineer.

131. Prior to the payment of the Development Impact Fee (DIF), the developer may enter into a DIF Improvement Credit Agreement to secure credit for the construction of applicable improvements. If the developer fails to complete this agreement prior to the timing specified above, credits may not be given. The developer shall pay current DIF fees adopted by the City Council. [Ord. 695 § 1.1 (part), 2005] [MC 3.38.030, 040, 050]

132. A digital (pdf) copy of all approved grading plans shall be submitted to the Land Development Division.

133. Security, in the form of a cash deposit (preferable), bond or letter of credit shall be submitted as a guarantee of the implementation and maintenance of erosion control measures. At least twenty-five (25) percent of the required security shall be in the form of a cash deposit with the City. [MC 8.21.160(H)]

134. Security, in the form of a cash deposit (preferable), bond or letter of credit shall be submitted as a guarantee of the completion of the grading operations for the project. [MC 8.21.070]

135. The developer shall pay all applicable inspection fees.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

136. Prior to the payment of the Transportation Uniform Mitigation Fee (TUMF), the developer may enter into a TUMF Improvement Credit Agreement to secure credit for the construction of applicable improvements. If the developer fails to complete this agreement by the timing specified above, credits may not be given. The developer shall pay current TUMF fees adopted by the City Council. [Ord. 835 § 2.1, 2012] [MC 3.44.060]

Prior to Map Approval

137. All proposed street names shall be submitted for review and approved by the City Engineer, if applicable. [MC 9.14.090(E.2.k)]

138. A copy of the Covenants, Conditions and Restrictions (CC&R's) shall be submitted for review and approved by the City Engineer. The CC&R's shall include, but not be limited to, access easements, reciprocal access, private and /or public utility easements as may be relevant to the project.

139. The developer shall enter into a Cooperative Agreement with the City and Riverside County Flood Control and Water Conservation District establishing the terms and conditions covering the inspection, operation and maintenance of Master Drainage Plan facilities required to be constructed as part of the project.

140. After recordation, a digital (pdf) copy of the recorded map shall be submitted to the Land Development Division.

141. Resolution of all drainage issues shall be as approved by the City Engineer.

142. Maps (prepared by a registered civil engineer and/or licensed surveyor) shall be submitted for review and approved by the City Engineer per the current submittal requirements.

143. The developer shall guarantee the completion of all related improvements required for this project by executing a Public Improvement Agreement (PIA) with the City and posting the required security. [MC 9.14.220]

144. All public improvement plans required for this project shall be approved by the City Engineer in order to execute the Public Improvement Agreement (PIA).

145. The developer shall comply with the requirements of the City Engineer based on recommendations of the Riverside County Flood Control District regarding the construction of County Master Plan Facilities.

146. All street dedications shall be free of all encumbrances, irrevocably offered to the public and shall continue in force until the City accepts or abandons such offers, unless otherwise approved by the City Engineer.

Prior to Improvement Plan Approval

147. The developer is required to bring any existing access ramps adjacent to and fronting the project to current ADA (Americans with Disabilities Act) requirements. However, when work is required in an intersection that involves or impacts existing access ramps, all access ramps in that intersection shall be retrofitted to comply with current ADA requirements, unless otherwise approved by the City Engineer.

148. The developer shall submit clearances from all applicable agencies, and pay all applicable

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

plan check fees.

149. The street improvement plans shall comply with current City policies, plans and applicable City standards (i.e. MVSI-160 series, etc.) throughout this project.

150. The design plan and profile shall be based upon a centerline, extending beyond the project boundaries a minimum distance of 300 feet at a grade and alignment approved by the City Engineer.

151. Drainage facilities (i.e. catch basins, etc.) with sump conditions shall be designed to convey the tributary 100-year storm flows. Secondary emergency escape shall also be provided.

152. The hydrology study shall be designed to accept and properly convey all off -site drainage flowing onto or through the site. In the event that the City Engineer permits the use of streets for drainage purposes, the provisions of current City standards shall apply. Should the quantities exceed the street capacity or the use of streets be prohibited for drainage purposes, as in the case where one travel lane in each direction shall not be used for drainage conveyance for emergency vehicle access on streets classified as minor arterials and greater, the developer shall provide adequate facilities as approved by the City Engineer. [MC 9.14.110 A.2]

153. All public improvement plans (prepared by a licensed/registered civil engineer) shall be submitted for review and approved by the City Engineer per the current submittal requirements.

154. Any missing or deficient existing improvements along the project frontage shall be constructed or secured for construction. The City Engineer may require the ultimate structural section for pavement to half-street width plus 18 feet or provide core test results confirming that existing pavement section is per current City Standards; additional signing & striping to accommodate increased traffic imposed by the development, etc.

155. The plans shall indicate any restrictions on trench repair pavement cuts to reflect the City's moratorium on disturbing newly-constructed pavement less than three (3) years old and recently slurry sealed streets less than one (1) year old. Pavement cuts may be allowed for emergency repairs or as specifically approved in writing by the City Engineer. Special requirements shall be imposed for repaving, limits to be determined by the City Engineer.

156. All dry and wet utilities shall be shown on the plans and any crossings shall be potholed to determine actual location and elevation. Any conflicts shall be identified and addressed on the plans. The pothole survey data shall be submitted to Land Development with the public improvement plans for reference purposes only. The developer is responsible to coordinate with all affected utility companies and bear all costs of any utility relocation.

Prior to Encroachment Permit

157. A digital (pdf) copy of all approved improvement plans shall be submitted to the Land Development Division.

158. All applicable inspection fees shall be paid.

159. Any work performed within public right-of-way requires an encroachment permit.

Prior to Building Permit

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

160. An engineered-fill certification, rough grade certification and compaction report shall be submitted for review and approved by the City Engineer. A digital (pdf) copy of the approved compaction report shall be submitted to the Land Development Division. All pads shall meet pad elevations per approved grading plans as noted by the setting of "blue-top" markers installed by a registered land surveyor or licensed civil engineer.

161. For Commercial/Industrial projects, the owner may have to secure coverage under the State's General Industrial Activities Storm Water Permit as issued by the State Water Resources Control Board.

162. For non-subdivision projects, all street dedications shall be free of encumbrances, irrevocably offered to the public and shall continue in force until the City accepts or abandons such offers, unless otherwise approved by the City Engineer.

163. A walk through with a Land Development Inspector shall be scheduled to inspect existing improvements within public right of way along project frontage. Any missing, damaged or substandard improvements including ADA access ramps that do not meet current City standards shall be required to be installed, replaced and /or repaired. The applicant shall post security to cover the cost of the repairs and complete the repairs within the time allowed in the public improvement agreement used to secure the improvements.

164. Certification to the line, grade, flow test and system invert elevations for the water quality control BMPs shall be submitted for review and approved by the City Engineer (excluding models homes).

Prior to Occupancy

165. All outstanding fees shall be paid.

166. All required as-built plans (prepared by a registered/licensed civil engineer) shall be submitted for review and approved by the City Engineer per the current submittal requirements.

167. The final/precise grade certification shall be submitted for review and approved by the City Engineer.

168. For commercial, industrial and multi-family projects, in compliance with Proposition 218, the developer shall agree to approve the City of Moreno Valley NPDES Regulatory Rate Schedule that is in place at the time of certificate of occupancy issuance. Under the current permit for storm water activities required as part of the National Pollutant Discharge Elimination System (NPDES) as mandated by the Federal Clean Water Act, this project is subject to the following requirements:
    a. Select one of the following options to meet the financial responsibility to provide storm water utilities services for the required continuous operation, maintenance, monitoring system evaluations and enhancements, remediation and/or replacement, all in accordance with Resolution No. 2002-46.
        i. Participate in the mail ballot proceeding in compliance with Proposition 218, for the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule and pay all associated costs with the ballot process; or
        ii. Establish an endowment to cover future City costs as specified in the Common Interest, Commercial, Industrial and Quasi-Public Use NPDES Regulatory Rate Schedule.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

b. Notify the Special Districts Division of the intent to request building permits 90 days prior to their issuance and the financial option selected. The financial option selected shall be in place prior to the issuance of certificate of occupancy. [California Government Code & Municipal Code]

169. The developer shall complete all public improvements in conformance with current City standards, except as noted in the Special Conditions, including but not limited to the following:
   a. Street improvements including, but not limited to: pavement, base, curb and/or gutter, cross gutters, spandrel, sidewalks, drive approaches, pedestrian ramps, street lights (MVU: SL-2), signing, striping, under sidewalk drains, landscaping and irrigation, medians, pavement tapers/transitions and traffic control devices as appropriate.
   b. Storm drain facilities including, but not limited to: storm drain pipe, storm drain laterals, open channels, catch basins and local depressions.
   c. City-owned utilities.
   d. Sewer and water systems including, but not limited to: sanitary sewer, potable water and recycled water.
   e. Under grounding of all existing and proposed utilities adjacent to and on -site. [MC 9.14.130]
   f. Relocation of overhead electrical utility lines including, but not limited to: electrical, cable and telephone.

170. For commercial, industrial and multi-family projects, a Stormwater Treatment Device and Control Measure Access and Maintenance Covenant, Maintenance Agreement for Water Quality Improvements located in the public right of way, and a Declaration of Restrictive Covenants (encroachment on City easement) shall be recorded to provide public notice of the maintenance requirements to be implemented per the approved final project-specific WQMP. A boilerplate copy of the covenants and agreements can be obtained by contacting the Land Development Division.

171. The applicant shall ensure the following, pursuant to Section XII. I. of the 2010 NPDES Permit:
   a. Field verification that structural Site Design, Source Control and Treatment Control BMPs are designed, constructed and functional in accordance with the approved Final Water Quality Management Plan (WQMP).
   b. Certification of best management practices (BMPs) from a state licensed civil engineer. An original WQMP BMP Certification shall be submitted for review and approved by the City Engineer.

172. The Developer shall comply with the following water quality related items:
   a. Notify the Land Development Division prior to construction and installation of all structural BMPs so that an inspection can be performed.
   b. Demonstrate that all structural BMPs described in the approved final project-specific WQMP have been constructed and installed in conformance with the approved plans and specifications;
   c. Demonstrate that Developer is prepared to implement all non -structural BMPs described in the approved final project-specific WQMP; and
   d. Demonstrate that an adequate number of copies of the approved final project-specific WQMP are available for future owners/occupants.
   e. Clean and repair the water quality BMP's, including re-grading to approved civil drawing if necessary.
   f. Obtain approval and complete installation of the irrigation and landscaping.

Special Conditions

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

173. Prior to issuance of a building permit, the developer shall make a lump sum, fair share, estimated reimbursement payment of $212,100 towards the Eucalyptus Avenue and Redlands Boulevard roundabout improvement, consistent with the terms of the Reimbursement Agreement (PEN18-0254), dated 01/12/22.

174. “Prior to occupancy, the Applicant shall install a 72" reinforced concrete pipe (RCP) storm drain to join the existing 72" RCP, located in Redlands Boulevard south of Eucalyptus Avenue. The Applicant shall also make the necessary installations that will cause the proposed 72" RCP to transition to a proposed 78" RCP at Redlands Boulevard north of Encelia Avenue to be installed by the Applicant, which will terminate near Dracaea Avenue, where it will join an existing 42" RCP. Final design and sizing shall be coordinated with the City and Riverside County Flood Control and Water Conservation District (RCFC & WCD) and shall be as approved by the City Engineer.”

175. Prior to occupancy, a sheet pile wall with guard rail shall be constructed along the project's westerly property line (the easterly limits of the Quincy Channel).

176. Prior to grading plan approval, the developer shall dedicate the following right of way to accommodate the required improvements:
    a. The necessary street right of way dedication on the west side of Redlands Boulevard (110' R/W / 86' CC: 4-Lane Divided Arterial, City Standard No. MVSI-103A-0) along project frontage.
    b. The necessary street right of way dedication on the south side of Eucalyptus Avenue (100' R/W / 76’ CC: Arterial, City Standard No. MVSI-104A-0) along project frontage.
    c. The necessary street right of way dedication on the north side of Encelia Avenue (88' R/W / 64' CC: Minor Arterial, City Standard No. MVSI-105A-1) along project frontage.
    d. A 4 foot minimum pedestrian right of way dedication behind any driveway approach per City Standard No. MVSI-112C-0 on Redlands Boulevard and Eucalyptus Avenue
    e. Corner cutback right of way dedication necessary to construct the roundabout intersection improvements on the southwest corner of Redlands Boulevard and Eucalyptus Avenue, as directed by the City Engineer.
    f. Corner cutback right of way dedication per City Standard No. MVSI-165-0 on northwest corner of Redlands Boulevard and Encelia Avenue.

177. Prior to building permit issuance, the westerly 5’ of Redlands Boulevard right of way shall be vacated in order to achieve the 4-Lane Divided Arterial right of way half-width of 55’, as directed by the City Engineer.

178. Prior to occupancy, the following improvements shall be completed:
Redlands Boulevard (110' R/W / 86' CC: 4-Lane Divided Arterial, City Standard No. MVSI-103A-0) shall be constructed to achieve a half-width of 43', full-width median, plus an additional 18' of pavement, along the entire project's east frontage. Improvements shall consist of, but not be limited to, pavement, base, curb, gutter, sidewalk, driveway approaches, drainage structures, any necessary offsite improvement transition/joins to existing, street lights, pedestrian ramps, and dry and wet utilities. Prior to improvement plan approval, the developer shall provide to the City Engineer the results of coring tests confirming that said existing pavement section has been constructed per City Standard No. MVSI-103A-0. Any missing or deficient improvements along the project's east frontage shall be constructed prior to issuance of a certificate of occupancy.

179. Prior to occupancy, the following improvements shall be completed:
Eucalyptus Avenue (100' R/W / 76’ CC: Arterial, City Standard No. MVSI-104A-0) shall be

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

constructed to achieve a half-width of 38' plus an additional 18' of pavement, along the entire project's north frontage. Improvements shall consist of, but not be limited to, pavement, base, curb, gutter, sidewalk, driveway approaches, drainage structures, any necessary offsite improvement transition/joins to existing, street lights, pedestrian ramps, and dry and wet utilities. Prior to improvement plan approval, the developer shall provide to the City Engineer the results of coring tests confirming that said existing pavement section has been constructed per City Standard No. MVSI-104A-0. Any missing or deficient improvements along the project's north frontage shall be constructed prior to issuance of a certificate of occupancy.

180. Prior to occupancy, the following improvements shall be completed:
Encelia Avenue (88' R/W / 64' CC: Minor Arterial, City Standard No. MVSI-105A-1) shall be constructed to achieve a half-width of 32' plus an additional 18' of pavement, along the entire project's south frontage. Improvements shall consist of, but not be limited to, pavement, base, curb, gutter, sidewalk, drainage structures, any necessary offsite improvement transition/joins to existing, street lights, pedestrian ramps, and dry and wet utilities. Prior to improvement plan approval, the developer shall provide to the City Engineer the results of coring tests confirming that said existing pavement section has been constructed per City Standard No. MVSI-105A-1. Any missing or deficient improvements along the project's south frontage shall be constructed prior to issuance of a certificate of occupancy.

181. Prior to improvement plan approval, pavement core samples of existing pavement shall be taken and findings submitted to the City for review and consideration of pavement improvements. The City will determine the adequacy of the existing pavement structural section. If the existing pavement structural section is found to be adequate, the developer may still be required to perform a 2 inch grind and overlay or slurry seal, depending on the severity of existing pavement cracking, as required by the City Engineer. If the existing pavement section is found to be inadequate, the Developer shall replace the pavement to meet or exceed the City's pavement structural section standard.

182. Prior to improvement plan approval, the project applicant shall design the intersection of Redlands Boulevard and State Route 60 Westbound Ramps, including acquiring necessary right of way to accommodate the required improvements. Design requirements shall be per the Transportation Engineering Division’s Conditions of Approval.

183. Prior to occupancy, per the Transportation Engineering Division’s Conditions of Approval, all required improvements for the intersection of Redlands Boulevard and State Route 60 Westbound Ramps shall be constructed and fully operational per the approved plans and to the satisfaction of the City Engineer and Caltrans (as applicable).

Special Districts Division

184. NEW STREET LIGHT INSTALLATION FEES. Prior to the issuance of the first building permit for this project, the Developer shall pay New Street Light Installation Fees for all applicable Residential and Arterial Street Lights required for this development. Payment shall be made to the City of Moreno Valley and collected by the Land Development Division. Fees are based upon the Advanced Energy fee rate in place at the time of payment, as set forth in the current Listing of City Fees, Charges, and Rates adopted by City Council. The Developer shall provide a copy of the receipt to the Special Districts Division (specialdistricts@moval.org). Any change in the project which may increase the number of street lights to be installed will require payment of additional Advanced Energy fees at the then current fee. Questions may be directed to the Special Districts Division at 951.413.3480 or specialdistricts@moval.org.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

185. This project is conditioned for a proposed district to provide a funding source for the operation and maintenance of public improvements and /or services associated with new development in that territory. The Developer shall satisfy this condition with one of the options outlined below.
    a. Participate in a special election for maintenance/services and pay all associated costs of the election process and formation, if any. Financing may be structured through a Community Facilities District, Landscape and Lighting Maintenance District, or other financing structure as determined by the City; or
    b. Establish an endowment fund to cover the future maintenance and /or service costs.
    The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org when submitting the application for building permit issuance. If the first building permit is pulled prior to formation of the district, this condition will not apply. If the district has been or is in the process of being formed the Developer must inform the Special Districts Division of its selected financing option (a. or b. above). The option for participating in a special election requires 90 days to complete the special election process. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution.
    The financial option selected shall be in place prior to the issuance of the first certificate of occupancy for the project.

186. Commercial (BP) If Land Development, a Division of the Public Works Department, requires this project to supply a funding source necessary to provide for, but not limited to, stormwater utilities services for the continuous operation, remediation and/or replacement, monitoring, systems evaluations and enhancement of on -site facilities and performing annual inspections of the affected areas to ensure compliance with state mandated stormwater regulations, a funding source needs to be established. The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org of its selected financial option for the National Pollution Discharge Elimination System (NPDES) program when submitting the application for the first building permit issuance (see Land Development's related condition). Participating in a special election the process requires a 90 day period prior to the City's issuance of a building permit. This allows adequate time to be in compliance with the provisions of Article 13D of the California Constitution. (California Health and Safety Code Sections 5473 through 5473.8 (Ord. 708 Section 3.1, 2006) & City of Moreno Valley Municipal Code Title 3, Section 3.50.050.)

187. For those areas to be maintained by the City and prior to the issuance of the first Building Permit, Planning Division (Community Development Department), Special Districts Division (the Public Works Department) and Transportation Division (the Public Works Department) shall review and approve the final median, traffic circle, parkway, slope, and/or open space landscape/irrigation plans as designated on the tentative map or in these Conditions of Approval prior to the issuance of the first Building Permit.

188. This project has been identified to be included in the formation of a Community Facilities District (Mello-Roos) for Public Safety services, including but not limited to Police, Fire Protection, Paramedic Services, Park Rangers, and Animal Control services. The property owner(s) shall not protest the formation; however, they retain the right to object to the rate and method of maximum special tax. In compliance with Proposition 218, the property owner shall agree to approve the mail ballot proceeding (special election) for either formation of the CFD or annexation into an existing district. The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org when submitting the application for building permit issuance to determine the requirement for participation. If the first building permit is pulled prior to formation of the district, this condition will not apply. If the condition applies, the

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

special election will require a minimum of 90 days prior to issuance of the first building permit. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution. (California Government Code Section 53313 et. seq.)

189. MAJOR INFRASTRUCTURE FINANCING DISTRICT. This project has been identified to potentially be included in the formation of a special financing district for the construction and maintenance of major infrastructure improvements which may include but are not limited to thoroughfares, bridges, and certain flood control improvements. The property owner(s) shall participate in such district and pay any special tax, assessment, or fee levied upon the project property for such district. At the time of the public hearing to consider formation of or annexation into the district, the qualified elector(s) will not protest the formation or annexation, but will retain the right to object to any eventual tax/assessment/fee that is not equitable should the financial burden of the tax/assessment/fee not be reasonably proportionate to the benefit the affected property obtains from the improvements to be installed and /or maintained. The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org when submitting an application for the first building permit to determine whether the development will be subjected to this condition. If subject to the condition, the special election requires a minimum 90 day process in compliance with the provisions of Article 13C of the California Constitution.

190. This project is conditioned to provide a funding source for the following special financing program(s):
    a. Street Lighting Services for capital improvements, energy charges, and maintenance.
    b. Landscape Maintenance Services for parkway, open space, median, and /or traffic circle landscaping.

    The Developer's responsibility is to provide a funding source for the capital improvements and the continued maintenance. The Developer shall satisfy this condition with one of the options below.
        i. Participate in a special election (mail ballot proceeding) and pay all associated costs of the special election and formation, if any. Financing may be structured through a Community Services District zone, Community Facilities District, Landscape and Lighting Maintenance District, or other financing structure as determined by the City; or
        ii. Establish a Property Owner's Association (POA) or Home Owner's Association (HOA) which will be responsible for any and all operation and maintenance costs

    The Developer must notify the Special Districts Division at 951.413.3480 or at specialdistricts@moval.org of its selected financial option when submitting the application for building permit issuance. The option for participating in a special election requires approximately 90 days to complete the special election process. This allows adequate time to be in compliance with the provisions of Article 13C of the California Constitution.
    The financial option selected shall be in place prior to the issuance of the first certificate of occupancy for the project.

191. The Developer, or the Developer's successors or assignees shall be responsible for all parkway, median, and/or traffic circle landscape maintenance for a period of one (1) year commencing from the time all items of work have been completed to the satisfaction of Special Districts staff as per the City of Moreno Valley Public Works Department Landscape Design Guidelines, or until such time as the District accepts maintenance responsibilities.

192. Inspection fees for the monitoring of landscape installation associated with the City of Moreno Valley maintained parkways/medians/traffic circles are due prior to the required pre-

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

construction meeting. (MC 3.32.040)

193. Plans for parkway, median, traffic circle, slope, and/or open space landscape areas designated in the project's Conditions of Approval for incorporation into a City Coordinated landscape maintenance program, shall be prepared and submitted in accordance with the City of Moreno Valley Public Works Department Landscape Design Guidelines. The guidelines are available on the City's website at www.moval.org/sd or from the Special Districts Division (951.413.3480 or specialdistricts@moval.org).

194. The ongoing maintenance of any landscaping required to be installed behind the curb shall be the responsibility of the property owner.

195. Plan check fees for review of parkway/median/traffic circle landscape plans for improvements that shall be maintained by the City of Moreno Valley are due upon the first plan submittal. (MC 3.32.040)

196. PARKS MAINTENANCE FUNDING. Prior to applying for the 1st Building Permit, the qualified elector (e.g. property owner) must initiate the process (i.e. pay the annexation fee or fund an endowment) to provide an ongoing funding source for the continued maintenance, enhancement, and or retrofit of parks, open spaces, linear parks, and/or trails systems, and programs.

    This condition must be fully satisfied prior to issuance of the 1st Certificate of Occupancy. This condition will be satisfied with the successful annexation /formation (i.e. special election process) into a special financing district and payment of all costs associated with the special election process. Annexation into a special financing district requires an annual payment of the annual special tax, assessment, or fee levied against the property tax bill, or other lawful means, of the parcels of the project for such district. At the time of the public hearing to consider annexation into or formation of the district, the qualified elector(s) will not protest the annexation or formation, but will retain the right to object to any eventual tax/assessment/fee that is not equitable should the financial burden of the tax/assessment/fee not be reasonably proportionate to the benefit the affected property receives from the improvements to be installed and/or maintained or services provided. The special election requires a minimum 90-day process in compliance with the provisions of Article 13C of the California Constitution, Proposition 218, or other applicable legislation, and consistent with the scheduling for City Council meetings.

    Alternatively, the condition can be satisfied by the Developer funding an endowment in an amount sufficient to yield an annual revenue stream that meets the annual obligation. The Developer must contact Special Districts Administration at 951.413.3470 or at SDAdmin@moval.org to satisfy this condition.

197. Street Light Authorization forms for all street lights that are conditioned to be installed as part of this project must be submitted to the Special Districts Division for approval, prior to street light installation. The Street Light Authorization form can be obtained from the utility company providing electric service to the project, either Moreno Valley Utility or Southern California Edison. For questions, contact the Special Districts Division at 951.413.3480 or specialdistricts@moval.org.

198. Parkway, open space, median, and or traffic circle landscaping specified in the project's Conditions of Approval shall be constructed in compliance with the approved landscape plans and completed prior to the issuance of the first Certificate of Occupancy/Building Final for this

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

project.

199. Right of Way Water Quality BMP Maintenance. The ongoing maintenance of any water quality BMP (e.g. Bioswale) constructed in the public right of way shall be the responsibility of a property owner association or the property owner.

200. Mylars of the landscape and irrigation plans shall be submitted on hanging tab to Landscape Services.

Transportation Engineering Division

201. Driveways shall conform to City of Moreno Valley Standard Plan No. MVSI-112C-0 for Commercial Driveway Approaches. Access at the driveways shall be as follows:
    - Redlands Boulevard northerly driveway: Full access for passenger vehicles only. No truck access.
    - Redlands Boulevard southerly driveway (50-feet wide): Right-in, left-in, right-out access for passenger vehicles only. No truck access.
    - Eucalyptus Avenue westerly driveway (50-feet wide): Full access for both passenger vehicles and trucks.
    - Eucalyptus Avenue easterly driveway (50-feet wide): Right-in, right-out access for passenger vehicles only. Only right-out access for trucks.
      NOTE: Truck directional signage per the approved signing and striping plan shall be installed.

202. All proposed on-site traffic signing and striping should be accordance with the latest California Manual on Uniform Traffic Control Devices (CAMUTCD).

203. Prior to issuance of an encroachment permit for work within the public right -of-way, construction traffic control plans prepared by a qualified, registered Civil or Traffic Engineer shall be required for plan approval by the City Engineer.

204. Prior to the final approval of the street improvement plans, a signing and striping plan shall be prepared per City of Moreno Valley Standard Plans - Section 4 for Redlands Boulevard, Eucalyptus Avenue, and Encelia Avenue. Signing and striping plans shall be prepared per the latest edition of the California Manual on Uniform Traffic Control Devices (CAMUTCD) and current City of Moreno Valley Standard Plans by a qualified registered civil or traffic engineer.

205. Eucalyptus Avenue is classified as an Arterial (100'RW/76'CC) per City Standard Plan No. MVSI-104A-0. Any modifications or improvements undertaken by this project shall be consistent with the City's standards for this facility. A Class II bicycle lane shall be provided along project frontage. Additional improvements such as bicycle ramps, shared use path, or any additional bicycle treatment at the Redlands Boulevard/ Eucalyptus Avenue roundabout shall be considered during the design of street improvements.

206. Communication conduit will be required along the project's Redlands Boulevard frontage per City Standard Plan No. MVSI-186-0.

207. Prior to final approval of the landscape plans and construction plans for any type of fencing or monument sign, the project plans shall demonstrate that sight distance at the project driveways conforms to City Standard Plan No. MVSI-164A-0 through MVSI-164C-0. Trees, plants, shrubs, fencing, or monument signing shall not be located in an area that obstructs the drivers' line-of-sight.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

208. The final street improvement plans shall include a bus turnout, designed per the City of Moreno Valley Standard Plan No. MVSI-161-0, for the west side of Redlands Boulevard, south of Eucalyptus Avenue. Prior to the final approval of the street improvement plans, a median improvement plan shall be prepared by a registered civil engineer for a raised median on Redlands Boulevard along the project frontage. Restricted left-turn median opening per City of Moreno Valley Standard Plan No. MVSI-145-0 shall be designed to prohibit left-out and provide left-turn movements into the southern driveway on Redlands Boulevard. No movements shall be restricted for automobiles at the northern driveway on Redlands Boulevard. Median on Eucalyptus Avenue shall be modified to extend at least 30 feet west of the west BCR of easterly driveway on Eucalyptus Avenue.

209. Prior to the final approval of the street improvement plans, the project applicant shall design the intersection of Redlands Boulevard and State Route 60 Westbound Ramps to provide the following geometrics:
    - Northbound: One left turn lane, one through lane, one shared through/right turn lane
    - Southbound: One left turn lane, one through lane
    - Eastbound: One shared left turn/through/right turn lane
    - Westbound: One shared left turn/through/right turn lane

    NOTE: Improvements may require widening of the north leg of the intersection and traffic signal modifications. The City of Moreno Valley will aid the applicant if any right-of-way acquisition is necessary. If a traffic signal modification is necessary, prior to the final approval of the street improvement plans, a traffic signal modification plan shall be prepared for the existing traffic signal at Redlands and State Route 60 Westbound Ramps. Traffic signal modification shall be prepared per the latest edition of the California Manual on Uniform Traffic Control Devices (CAMUTCD) and current City of Moreno Valley Standard Plans by a qualified registered Civil Engineer and be submitted to California Department of Transportation (Caltrans) District 8 for their review and approval. The developer is responsible for obtaining a Caltrans encroachment permit prior to performing any work within Caltrans right-of-way.

210. Prior to issuance of a building permit, the project applicant shall pay all applicable DIF and TUMF. Payment of these fees cover the project's payment towards any future improvement for the intersections of Moreno Beach Drive and State Route 60 Eastbound Ramps, segment of Moreno Beach Drive from State Route 60 Westbound Ramps to State Route 60 Eastbound Ramps, intersection of Redlands Boulevard and State Route 60 Eastbound Ramps, segment of Redlands Boulevard from State Route 60 Westbound Ramps to State Route 60 Eastbound Ramps, as identified in the approved Traffic Impact Analysis, dated November 2020 and Environmental Impact Report, and future signalization of the Redlands Boulevard and Encelia Avenue intersections.

211. Prior to issuance of Certificate of Occupancy, all approved street improvements shall be installed to the satisfaction of the City Engineer.

212. Prior to issuance of Certificate of Occupancy, all approved signing and striping shall be installed per current City Standards and approved plans.

213. Prior to issuance of Certificate of Occupancy, raised median improvements and the bus turnout shall be completed and fully operational per the approved plans to the satisfaction of the City Engineer.

214. Prior to issuance of Certificate of Occupancy, all required improvements for the intersection of Redlands Boulevard and State Route 60 Westbound Ramps shall be completed and fully

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

operational per the conditions of approval and approved plans to the satisfaction of the City Engineer and Caltrans (if applicable).

215. Any gated entrance shall be provided with the following:
    - A storage lane with sufficient queuing length for entering commercial trucks.
    - Signing and striping in front of the gate.

    All of these features must be kept in working order.

216. Sight distance at the proposed roadways and driveways shall conform to City of Moreno Valley Standard No. MVSI-164A, B, C-0 at the time of preparation of final grading, landscape, and street improvement plans.

217. Redlands Boulevard is classified as a 4-Lane Divided Arterial (110'RW/86'CC) per City Standard Plan No. MVSI-103A-0 with any necessary roadway transitions south of this project. Any modifications or improvements undertaken by this project shall be consistent with the City's standards for this facility. A Class II bicycle lane shall be provided along project frontage. Additional improvements such as bicycle ramps, shared use path, or any additional bicycle treatment at the Redlands Boulevard / Eucalyptus Avenue roundabout shall be considered during the design of street improvements.

218. Encelia Avenue is classified as a Minor Arterial (88'RW/64'CC) per City Standard Plan No. MVSI-105A-1. Any modifications or improvements undertaken by this project shall be consistent with the City's standards for this facility.

219. In the event the applicant requests a traffic signal at the intersection of Redlands Boulevard and the northerly driveway on Redlands, the applicant shall initiate the process and prepare any necessary studies and improvement plans, as requested by the City, for review and approval of the City Engineer. The applicant shall be responsible for all costs associated with the construction of the traffic signal and shall enter into a maintenance agreement with the City.

220. Conditions of approval may be modified or added if a phasing plan is submitted for this development.

PARKS & COMMUNITY SERVICES DEPARTMENT

221. This project is subject to current Development Impact Fees.

222. Multi-use trail to be constructed in accordance with City's Master Plan of Trail and City standard drawings.

Standard Conditions

223. Detailed final plans (mylars, PDF, and AutoCAD file on a DVD-R) for parks, trails/bikeways, fencing, and adjoining landscaped areas shall be submitted to and approved by the Director of Parks and Community Services, or his /her designee, prior to the issuance of any building permits. All plans are to include a profile showing grade changes.

224. Within the improvements for PCS, the applicant shall show all existing and planned easements on all maps and plans. Easements on City/CSD owned or maintained parks, trails, bikeways, and landscape shall be identified on each of these plans with the instrument number of the recorded easement.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

225. Prior to grading permit, the applicant shall post security to guarantee construction or modification of parks, trails and/or bikeways for the City/CSD. Copies of said documentation shall be provided to PCS.

226. Applicable plan check and inspection fees shall be paid, per the approved City fee schedule.

227. The following plans require PCS written approval: Tentative tract/parcel maps; rough grading plans (including all Delta changes); Final Map; precise grading plans; street improvement plans; traffic signal plans; fence and wall plans; landscape plans for areas adjacent to bikeways; trail improvement plans. PCS will not approve any permits without review and approval of the above items.

Attachment: Resolution - General Plan Amendment - Tentative Parcel Map - Plot Plan [Revision 1] (6209 : Moreno Valley Trade Center/Park)

RESOLUTION NUMBER 2023-__

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, FINDING AND DETERMINING PURSUANT TO SENATE BILL NO. 330 THAT APPROVAL OF THE MORENO VALLEY TRADE CENTER PROJECT LOCATED ON LAND SITUATED ON EUCALYPTUS AVENUE, WEST OF REDLANDS BOULEVARD, NORTH OF ENCELIA AVENUE, AND EAST OF QUINCY CHANNEL SHALL NOT RESULT IN A NET LOSS IN RESIDENTIAL CAPACITY
(APN'S 488-340-002 through 488-340-012)

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California; and

WHEREAS, MVTC, LLC, a Delaware limited liability company ("Applicant") is proposing the development of a 1,263,271 square foot, modern light industrial building to be used as a warehouse distribution/logistics center, or, in the alternative, as an e-commerce facility, commonly known as the Moreno Valley Trade Center ("Proposed Project"), which includes associated site improvements, such as but not limited to, drive aisles, landscaping, utility infrastructure, water quality basins, exterior lighting, walls/fencing, and signage, as more fully described in the Environmental Impact Report (EIR), a copy of which is incorporated herein by this reference as though set forth in full; and

WHEREAS, the Proposed Project is located on land situated on Eucalyptus Avenue, west of Redlands Boulevard, north of Encelia Avenue, and east of Quincy Channel (APN'S 488-340-002 through 488-340-012) ("Project Site"); and

WHEREAS, the Proposed Project includes the following requested entitlements: 1) General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193); and

WHEREAS, the purpose of General Plan Amendment (PEN19-0191) is to change the Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map from Residential 2 (R2) to Business Park (BP); and

WHEREAS, the purpose of Change of Zone (PEN19-0192) is to rezone the Project Site from Residential Agriculture 2 District (RA2) to Light Industrial District (LI), and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification; and

WHEREAS, the purpose of Tentative Parcel Map (PEN19-0234) is to merge the existing 11 parcels into a single parcel; and

WHEREAS, the purpose of Plot Plan (PEN19-0193) is to construct an approximately 1,263,271 square foot Warehouse/Distribution building on the Project Site

Attachment: Resolution - No Net Loss (6209 : Moreno Valley Trade Center/Park)

with associated parking, landscape improvements and off-site public improvements; and

WHEREAS, the Proposed Project was considered by the Planning Commission at a duly noticed public hearing conducted on October 28, 2021, and the Planning Commission voted 4-0 to deny the Proposed Project; and

WHEREAS, the Applicant appealed the Planning Commission's decision as set forth in Appeal Application (PAA21-0001) and a duly noticed public hearing on the appeal was conducted by the City Council on December 7, 2021; and

WHEREAS, at the public hearing held on December 7, 2021, the City Council did not rule on the appeal, but rather, after receiving public testimony unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain; and

WHEREAS, the Applicant has taken into consideration several issues raised by the Planning Commission in its denial of the Proposed Project and input it received from members of the public and the City Council at the December 7, 2021 public hearing, and submitted various revisions to the Proposed Project that the Applicant represented are responsive to the various concerns raised by members of the public, the Planning Commission and the City Council; and

WHEREAS, since none of the proposed revisions presented by the Applicant nor recommended by staff require any modifications or revisions to General Plan Amendment (PEN19-0191) and Change of Zone (PEN19-0192), as originally presented on October 28, 2021, at the Planning Commission public hearing and on December 7, 2021 City Council public hearing, the City Council is not required to refer the Proposed Project back to the Planning Commission for a recommendation prior to taking final action of the Proposed Project, as revised; and

WHEREAS, on June 21, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on November 15, 2022, the item was scheduled for consideration by the City Council; however, the meeting was canceled and adjourned to December 6, 2022, with no action being taken; and

WHEREAS, on December 6, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on November 15, 2022, the City Council conducted a duly noticed continued public hearing on the Proposed Project, as revised, and considered the Proposed Project's Environmental Impact Report and related Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations; and

WHEREAS, on April 18, 2023, in accordance with the provisions of the California

Attachment: Resolution - No Net Loss (6209 : Moreno Valley Trade Center/Park)

Environmental Quality Act (CEQA) and CEQA Guidelines, the City Council considered and approved Resolution No. 2023-__ certifying the Proposed Project's Environmental Impact Report, adopting a Mitigation Monitoring and Reporting Program and approving a Statement of Overriding Considerations.

WHEREAS, on October 9, 2019, the California Legislature adopted Senate Bill 330 (SB330), which was codified as Government Code Section 66300 and became effective January 1, 2020, declared a housing crisis in the State of California and imposed certain requirements designed to streamline the construction of new housing, and prevent the loss of existing housing and land available for future residential use, unless replaced in other areas of the affected jurisdiction to ensure that there is no net loss in the City's residential capacity; and

WHEREAS, in pertinent part, Government Code section 66300(h)(2)(i)(1) provides as follows:

> "This section does not prohibit an affected ... city from changing a land use designation or zoning ordinance to a less intensive use if the city ... concurrently changes the development standards, policies, and conditions applicable to other parcels within the jurisdiction to ensure that there is no net loss in residential capacity."; and

WHEREAS, in order to ensure its compliance with SB330, the City Council adopted Ordinance No. 965 amending Chapter 9.03 (Residential Districts) of Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code which added Section 9.03.065 (Density bonus program for SB330) to establish a density bonus program for certain residential projects; and

WHEREAS, Section 9.03.065 (Density bonus program for SB330) provides that, concurrent with the approval of any change in zone from a residential use to a less intensive or non-residential use, a density bonus will become available to project applicants subsequently seeking to develop property for residential use within the City, which ensures that there will not be any net loss of residential capacity within the City as mandated by SB330 to ensure development opportunities remain available throughout the planning period to accommodate the City's regional housing need allocation (RHNA), especially for lower- and moderate- income households.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given

Attachment: Resolution - No Net Loss (6209 : Moreno Valley Trade Center/Park)

that the proposed Project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the City Council has considered all of the evidence submitted into the administrative record for the Proposed Project, including, but not limited to, the following:

(a) Moreno Valley General Plan and all other relevant provisions contained therein;

(b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein, including without limitation Section 9.03.065 (Density bonus program for SB330) of Chapter 9.03 (Residential Districts) of Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code;

(c) Applications for 1) General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193) and all documents, records and references contained therein;

(d) Proposed Project's Environmental Impact Report and related Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations;

(e) Proposed conditions of approval for the Proposed Project;

(f) Staff Reports prepared for the Planning Commission for its October 28, 2021 public hearing and the City Council for its December 7, 2021 public hearing;

(g) Staff Reports prepared for the City Council for the June 21, 2022 public hearing;

(h) Staff Reports prepared for the City Council for the November 15, 2022 public hearing;

(i) Staff Reports prepared for the City Council for the December 6, 2022 public hearing;

(j) Staff Reports prepared for the City Council for the April 18, 2023 public hearing;

(k) Staff's presentation at the December 7, 2021 and April 18, 2023 City Council public hearings;

(l) Testimony and/or comments from Applicant and its representatives during the December 7, 2021 and April 18, 2023 public hearings; and

(m) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the December 7, 2021, June 21, 2022, November 15, 2022, December 6, 2022, and April 18, 2023 public hearings.

Section 4. Findings and Determination of No Net Loss of Residential Capacity

That based on the foregoing Recitals and the Evidence, the City Council finds and determines that the estimated reduction of 145 potential dwelling units caused by or

Attachment: Resolution - No Net Loss (6209 : Moreno Valley Trade Center/Park)

resulting from General Plan Amendment (PEN19-0191) which changes the Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map from Residential 2 (R2) to Business Park (BP) and Change of Zone (PEN19-0192) which rezones the Project Site from Residential Agriculture 2 District (RA2) to Light Industrial District (LI) and removes the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification will not result in a net loss in the number of potential residential units within the City of Moreno Valley since the number of dwelling units that will presumably be lost due to General Plan Amendment (PEN19-0191) and Change of Zone (PEN19-0192) shall be made available for development pursuant to the City's residential density bonus programs, as codified in Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code, which will ensure development opportunities remain available throughout the planning period to accommodate the City's regional housing need allocation (RHNA), especially for lower- and moderate-income households.

Section 5. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 6. Severability

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 7. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 8. Certification

That the City Clerk shall certify to the passage of this Resolution.

Attachment: Resolution - No Net Loss (6209 : Moreno Valley Trade Center/Park)

ORDINANCE NO. 2023-__

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, AMENDING THE OFFICIAL ZONING ATLAS OF THE CITY OF MORENO VALLEY REZONING THE PARCELS IDENTIFIED AS ASSESSOR PARCEL NUMBERS 488-340-002 THROUGH 488-340-012 FROM RESIDENTIAL AGRICULTURE 2 DISTRICT (RA2) TO LIGHT INDUSTRIAL DISTRICT (LI) AND REMOVING SAID PARCELS' PRIMARY ANIMAL KEEPING OVERLAY (PAKO) OVERLAY CLASSIFICATION

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California; and

WHEREAS, MVTC, LLC, a Delaware limited liability company ("Applicant") is proposing the development of a 1,263,271square-foot, modern light industrial building to be used as a warehouse distribution/logistics center, or, in the alternative, as an e-commerce facility, commonly known as the Moreno Valley Trade Center ("Proposed Project"), which includes associated site improvements, such as but not limited to, drive aisles, landscaping, utility infrastructure, water quality basins, exterior lighting, walls/fencing, and signage, as more fully described in the Environmental Impact Report (EIR), a copy of which is incorporated herein by this reference as though set forth in full; and

WHEREAS, the Proposed Project is located on land situated on Eucalyptus Avenue, west of Redlands Boulevard, north of Encelia Avenue, and east of Quincy Channel (APN'S 488-340-002 through 488-340-012) ("Project Site"); and

WHEREAS, the Proposed Project includes the following requested entitlements: General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193); and

WHEREAS, the purpose of General Plan Amendment (PEN19-0191) is to change the Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map from Residential 2 (R2) to Business Park (BP); and

WHEREAS, the purpose of Change of Zone (PEN19-0192) is to rezone the Project Site from Residential Agriculture 2 District (RA2) to Light Industrial District (LI), and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification; and

WHEREAS, the purpose of Tentative Parcel Map (PEN19-0234) is to merge the existing 11 parcels into a single parcel; and

WHEREAS, the purpose of Plot Plan (PEN19-0193) is to construct an approximately 1,263,271 square foot Warehouse/Distribution building on the Project Site with associated parking, landscape improvements and off-site public improvements; and

Attachment: Ordinance - Zone Change (6209 : Moreno Valley Trade Center/Park)

WHEREAS, the Proposed Project was considered by the Planning Commission at a duly noticed public hearing conducted on October 28, 2021, and the Planning Commission voted 4-0 to deny the Proposed Project; and

WHEREAS the Applicant appealed the Planning Commission's decision as set forth in Appeal Application (PAA21-0001) and a duly noticed public hearing on the appeal was conducted by the City Council on December 7, 2021; and

WHEREAS, Section 9.02.050 (Amendments to zoning districts or other provisions of Title 9) of Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code provides that following appeal of a decision by the Planning Commission to disapprove a proposed amendment to Title 9, including amendments to the Zoning Atlas, the City Council may approve, approve with modifications, or disapprove any proposed amendment, provided that prior to City Council action, any modification not previously considered by the Planning Commission shall first be referred to the Planning Commission for report and recommendation; and

WHEREAS, at the public hearing held on December 7, 2021, the City Council did not rule on the appeal, but rather, after receiving public testimony unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain; and

WHEREAS, the Applicant has taken into consideration several issues raised by the Planning Commission in its denial of the Proposed Project and input it received from members of the public and the City Council at the December 7, 2021 public hearing, and submitted various revisions to the Proposed Project that the Applicant represented are responsive to the various concerns raised by members of the public, the Planning Commission and the City Council; and

WHEREAS, since none of the proposed revisions presented by the Applicant nor recommended by staff require any modifications or revisions to General Plan Amendment (PEN19-0191) and Change of Zone (PEN19-0192), as originally presented on October 28, 2021, at the Planning Commission public hearing and on December 7, 2021 City Council public hearing, the City Council is not required to refer the Proposed Project back to the Planning Commission for a recommendation prior to taking final action of the Proposed Project, as revised; and

WHEREAS, on June 21, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on November 15, 2022, the item was scheduled for consideration by the City Council; however, the meeting was canceled and adjourned to December 6, 2022, with no action being taken; and

WHEREAS, on December 6, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

Attachment: Ordinance - Zone Change (6209 : Moreno Valley Trade Center/Park)

WHEREAS, on April 18, 2023, the City Council conducted a duly noticed continued public hearing on the Proposed Project, as revised, and considered the Proposed Project's Environmental Impact Report and related Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations; and

WHEREAS, on April 18, 2023, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the City Council considered and approved Resolution No. 2023-__ certifying the Proposed Project's Environmental Impact Report, adopting a Mitigation Monitoring and Reporting Program and approving a Statement of Overriding Considerations.

THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY ORDAIN AS FOLLOWS:

Section 1. Recitals

That the above recitals are true and correct and are incorporated herein by this reference.

Section 2. Notice

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the Proposed Project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the City Council has considered all of the evidence submitted into the administrative record for the Proposed Project, including, but not limited to, the following:

(a) Moreno Valley General Plan and all other relevant provisions contained therein;
(b) Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein;
(c) Applications for 1) General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193) and all documents, records and references contained therein;
(d) Proposed Project's Environmental Impact Report and related Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations;
(e) Proposed conditions of approval for the Proposed Project;
(f) Staff Reports prepared for the Planning Commission for its October 28, 2021 public hearing and the City Council for its December 7, 2021 public hearing;
(g) Staff Reports prepared for the City Council for the June 21, 2022 public hearing;
(h) Staff Reports prepared for the City Council for the November 15, 2022

Attachment: Ordinance - Zone Change (6209 : Moreno Valley Trade Center/Park)

public hearing;

(i) Staff Reports prepared for the City Council for the December 6, 2022 public hearing;

(j) Staff Reports prepared for the City Council for the April 18, 2023 public hearing;

(k) Staff's presentation at the December 7, 2021 and April 18, 2023 City Council public hearings;

(l) Testimony and/or comments from Applicant and its representatives during the December 7, 2021 and April 18, 2023 public hearings; and

(m) Testimony and/or comments from all persons that was provided in written format or correspondence, at, or prior to, the December 7, 2021, June 21, 2022, November 15, 2022, December 6, 2022, and April 18, 2023 public hearings.

Section 4. Findings

That based on the foregoing Recitals and the Evidence, the City Council makes the following findings:

(a) That General Plan Amendment (PEN19-0191) is consistent with existing goals, objectives, policies and programs of the 2040 General Plan and will not adversely affect the public health, safety or general welfare;

(b) That the Proposed Project, which includes Plot Plan (PEN19-0193), is consistent with the goals, objectives, policies and programs of the 2040 General Plan; complies with all applicable zoning and other regulations and will not be detrimental to the public health, safety or welfare or materially injurious to properties or improvements in the vicinity; and the location, design and operation of the Proposed Project will be compatible with existing and planned land uses in the vicinity;

(c) That Tentative Parcel Map (PEN19-0234) involves at least one parcel that is undeveloped by any structure for which a building permit was issued and is consistent with the 2040 General Plan; and

(d) That Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas is consistent with the 2040 General Plan and its goals, objectives, policies, and programs; will not adversely affect the public health, safety or general welfare; and is consistent with the purposes and intent of Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code.

Section 5. Severability

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Ordinance be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Ordinance as hereby adopted shall remain in full force and effect.

Attachment: Ordinance - Zone Change (6209 : Moreno Valley Trade Center/Park)

Section 6. Repeal of Conflicting Provisions

That all the provisions heretofore adopted by the City Council that are in conflict with the provisions of this Ordinance, are hereby repealed.

Section 7. Effective Date

That this Ordinance shall take effect thirty (30) days after its second reading.

Section 8. Certification

That the City Clerk shall certify to the passage and adoption of this Ordinance, enter the same in the book for original ordinances of the City, and make a minute of passage and adoption thereof in the records of the proceedings of the City Council, in the minutes of the meeting at which this Ordinance is passed and adopted.

PASSED AND ADOPTED THIS 18th day of April, 2023.

RESOLUTION NUMBER 2023-__

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, ACCEPTING THE COMMUNITY BENEFITS VOLUNTARILY OFFERED BY MVTC, LLC WHICH ARE NOT CONDITIONS OF APPROVAL OR MITIGATION MEASURES IMPOSED BY THE CITY FOR THE MORENO VALLEY TRADE CENTER PROJECT

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California; and

WHEREAS, MVTC, LLC, a Delaware limited liability company ("Applicant") is proposing the development of a 1,263,271 square foot, modern light industrial building to be used as a warehouse distribution/logistics center, or, in the alternative, as an e-commerce facility, commonly known as the Moreno Valley Trade Center ("Proposed Project"), which includes associated site improvements, such as but not limited to, drive aisles, landscaping, utility infrastructure, water quality basins, exterior lighting, walls/fencing, and signage, as more fully described in the Environmental Impact Report (EIR), a copy of which is incorporated herein by this reference as though set forth in full; and

WHEREAS, the Proposed Project is located on land situated on Eucalyptus Avenue, west of Redlands Boulevard, north of Encelia Avenue, and east of Quincy Channel (APN'S 488-340-002 through 488-340-012) ("Project Site"); and

WHEREAS, the Proposed Project includes the following requested entitlements: 1) General Plan Amendment (PEN19-0191), 2) Change of Zone (PEN19-0192) and corresponding amendment to the City's Zoning Atlas, 3) Tentative Parcel Map (PEN19-0234), and 4) Plot Plan (PEN19-0193); and

WHEREAS, the purpose of General Plan Amendment (PEN19-0191) is to change the Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map from Residential 2 (R2) to Business Park (BP); and

WHEREAS, the purpose of Change of Zone (PEN19-0192) is to rezone the Project Site from Residential Agriculture 2 District (RA2) to Light Industrial District (LI), and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" overlay classification; and

WHEREAS, the purpose of Tentative Parcel Map (PEN19-0234) is to merge the existing 11 parcels into a single parcel; and

WHEREAS, the purpose of Plot Plan (PEN19-0193) is to construct an approximately 1,263,271 square foot Warehouse/Distribution building on the Project Site with associated parking, landscape improvements and off-site public improvements; and

WHEREAS, the Proposed Project was considered by the Planning Commission at

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

a duly noticed public hearing conducted on October 28, 2021, and the Planning Commission voted 4-0 to deny the Proposed Project; and

WHEREAS, the Applicant appealed the Planning Commission's decision as set forth in Appeal Application (PAA21-0001) and a duly noticed public hearing on the appeal was conducted by the City Council on December 7, 2021; and

WHEREAS, at the public hearing held on December 7, 2021, the City Council did not rule on the appeal, but rather, after receiving public testimony unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain; and

WHEREAS, the Applicant has taken into consideration several issues raised by the Planning Commission in its denial of the Proposed Project and input it received from members of the public and the City Council at the December 7, 2021 public hearing, and submitted various revisions to the Proposed Project that the Applicant represented are responsive to the various concerns raised by members of the public, the Planning Commission and the City Council; and

WHEREAS, since none of the proposed revisions presented by the Applicant nor recommended by staff require any modifications or revisions to General Plan Amendment (PEN19-0191) and Change of Zone (PEN19-0192), as originally presented on October 28, 2021, at the Planning Commission public hearing and on December 7, 2021 City Council public hearing, the City Council is not required to refer the Proposed Project back to the Planning Commission for a recommendation prior to taking final action of the Proposed Project, as revised; and

WHEREAS, on June 21, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on November 15, 2022, the item was scheduled for consideration by the City Council; however, the meeting was canceled and adjourned to December 6, 2022, with no action being taken; and

WHEREAS, on December 6, 2022, the City Council did not rule on the appeal, but rather, unanimously voted to continue the public hearing regarding the Draft EIR and the Proposed Project to a date uncertain prior to reopening the public hearing; and

WHEREAS, on April 18, 2023, the City Council conducted a duly noticed continued public hearing on the Proposed Project, as revised, and considered the Proposed Project's Environmental Impact Report and related Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations; and

WHEREAS, on April 18, 2023, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the City Council considered and approved Resolution No. 2023-__ certifying the Proposed Project's Environmental Impact Report, adopting a Mitigation Monitoring and Reporting Program and approving a

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Statement of Overriding Considerations; and

WHEREAS, in addition to the CEQA-related Mitigation Measures and the Conditions of Approval related to the requested entitlements, the Applicant has offered numerous "Community Benefits," as described in the letter attached hereto as Exhibit A, that fall beyond the City's legal authority to approve as CEQA-related Mitigation Measures or as the Conditions of Approval related to the requested entitlement since there is not a sufficient nexus to the potential impacts of the Proposed Project; and

WHEREAS, notwithstanding above, the Applicant has agreed that the Community Benefits be memorialized as enforceable conditions of approval; and

WHEREAS, the Community Benefits offered by the Applicant include providing up to $204,000 to fund and administer several electric vehicle grant programs, that will include funding for Heavy Duty Electric Trucks, Medium Duty Electric Trucks, Local Delivery Electric Vehicles and Electric Passenger Vehicles which the Applicant shall be responsible for establishing, funding and administering; and

WHEREAS, the Applicant has also offered to provide $113,000 to fund a Solar Advocacy Fund, Residential Air Filtration Reimbursement Program, Residential Noise Insulation Reimbursement Program and Residential Exterior Pressure Washing Reimbursement Program, in addition to installing additional onsite EV charging stations and at least one APU plug-in for every 35 dock doors at multiple locations within the Project Site where trucks are proposed to park; and

WHEREAS, the Applicant has further offered that only electrical appliances shall be used in building office areas, and the use of portable or stationary diesel powered generators shall be prohibited unless necessary due to emergency situations or constrained supply, and that all construction equipment shall meet or be cleaner than Tier 4 standards, except if the general contractor overseeing the Proposed Project's construction certifies that it is not feasible to use exclusively Tier 4 equipment due to limited availability; and

WHEREAS, in addition to the above-referenced Community Benefits, the Applicant has offered to develop and construct an 18-acre park facility, accommodating two full-size size fully lighted soccer fields, a fully lighted baseball field, a snack bar/concession, public restrooms, a walking path, playground, exercise equipment, landscaping and related parking, as more particularly described in the Community Park Acquisition and Improvement Agreement, attached hereto as Exhibit B; and

WHEREAS, all of the Community Benefits referenced above, and the development of the Community Park are neither CEQA-related mitigation measures nor conditions of approval that the City has the legal authority to unilaterally impose on the Applicant or the Proposed Project, due to the lack of the requisite nexus that is otherwise required in order to unilaterally impose as environmental mitigation measures or conditions of approval on an applicant or a proposed development project that requires discretionary approval; and

WHEREAS, notwithstanding above, the Applicant has agreed that everything

being offered by the Applicant be memorialized as enforceable conditions which means the City will be able to use code and permit enforcement procedures to ensure implementation; and

WHEREAS, section 37354 of the Government Code permits the City Council to accept or reject any gift, bequest, or devise made to the City, subject to any limitations imposed by the donor.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached Exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Acceptance of Community Benefits

That pursuant to section 37354 of the Government Code, the City Council hereby accepts, on behalf of the City of Moreno Valley, the Community Benefits, as described in Exhibit A, and the offer to develop a Community Park pursuant to the Community Park Acquisition and Improvement Agreement attached hereto as Exhibit B.

Section 3. Authority to Execute Agreement

That the City Manager is hereby directed and authorized to execute the Community Park Acquisition and Improvement Agreement attached hereto as Exhibit B. Agreement and to approve any subsequent amendments, subject to the consent of the City Attorney, consistent with the intent and purposes of the Agreement.

Section 4. Enforceability

That as offered by the Applicant, the Community Benefits hereby offered by the Applicant and accepted by the City, as set forth in Exhibit A, shall be memorialized as enforceable conditions which shall permit the City to use code and permit enforcement procedures to ensure implementation of each of the Community Benefits.

Section 5. Repeal of Conflicting Provisions

That all the provisions as heretofore adopted by the City Council that are in conflict with the provisions of this Resolution are hereby repealed.

Section 6. Severability

That the City Council declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as

hereby adopted shall remain in full force and effect.

Section 7. Effective Date

That this Resolution shall take effect immediately upon the date of adoption.

Section 8. Certification

That the City Clerk shall certify to the passage of this Resolution.

PASSED AND ADOPTED THIS 18th day of April, 2023.

VIA FEDERAL EXPRESS AND
E-MAIL – CityClerk@moval.org

Honorable Mayor and Members of the City Council
City of Moreno Valley
14177 Frederick Street
Moreno Valley, CA 92553

Dear Honorable Mayor and Members of the City Council:

MVTC, LLC, ("Hillwood") presents this letter as a commitment to the City of Moreno Valley to integrate the below Community Benefits into our proposed Moreno Valley Trade Center project ("Project") as either Project design features, minimization measures and/or similar mechanisms, conditioned only on Project approval. The Project is currently before the City as application PEN19-0191 (General Plan Amendment); PEN19-0192 (Change of Zone); PEN19-0193 (Plot Plan); and PEN 19-0234 (Tentative Parcel Map). Key components of this commitment include:

- Heavy Duty Truck Grants Quantity 5 Value: $125,000
- Medium Duty Truck Grants Quantity 2 Value: $27,000
- Local Delivery Truck Grants Quantity 3 Value: $27,000
- Local Community Passenger Vehicle & Zero Emission Transportation Grants Quantity: 25 Value $25,000
- Donation to Electric Vehicle Advocacy Fund Value $5,000
- Donation to Solar Advocacy Fund $5,000
- Install minimum of 12 onsite EV Chargers
- Residential Air Filtration Reimbursement Program Value $40,000
- Residential Noise Insulation Reimbursement Program Value: $64,000
- Residential Exterior Pressure Washing Reimbursement Value: $4,000
- Design the Building to achieve LEED Silver certification standards
- Provide setback from residences (434' from Building to centerline of Encelia) and landscape screening (599 trees total on site, focusing on large specimen-24" box-, evergreen and California native trees)
- Install 14 foot-tall walls for noise mitigation
- Provide enhanced architecture (glass, metal articulation, variety of colors and textures)
- Install new, multi-purpose trails along east and west sides of project site
- Install above-standard offsite storm drain – 78" pipe from Encelia Avenue south to Dracaea allowing system to satisfy master plan

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

We look forward to contributing to the betterment of the Moreno Valley community.

Sincerely,

MCTV, LLC
a Delaware limited liability company

COMMUNITY BENEFITS

The Project Applicant/Developer offered to provide the benefits set forth below, as enforceable special conditions of approval. As such, none of the following special conditions of approval shall be considered Mitigation Measures under CEQA.

1. **Heavy Duty Electric Truck Grant Program - $125,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $125,000 for the purpose of providing grants to private third parties for the purchase of at least five Class 8 Heavy Duty Electric Trucks. The Program shall prioritize grant applicants who will use their Heavy Duty Electric Trucks in the City of Moreno Valley and along the Highway 60 corridor, and shall give special priority for drayage trucks that will be used in the City of Moreno Valley and along the Highway 60 corridor. The grants shall be awarded prior to the issuance of the first Certificate of Occupancy for the Project.
The award of the Heavy Duty Electric Truck Grants shall include the following two conditions:

(1) A prohibition on the resale of the Heavy Duty Electric Truck to an entity that will operate trucks outside of California; and

(2) 85% of the mileage must occur in the SCAQMD region, which shall be enforced using a geo -fencing electronic system on each Heavy Duty Electric Truck that has been funded by the Program.

The Developer shall be responsible for establishing, funding and administering the Heavy Duty Electric Truck Grant Program, and provide a hyperlink to the Program that the City that may post on the City's official website for interested parties to access information about the Program.

2. **Medium Duty Electric Truck Grant Program - $27,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit.
$27,000 for the purpose of providing grants to private third parties for the purchase of at least two Class 6 and/or Class 7 Medium Duty Electric Trucks. The Program shall prioritize grant applicants who will use their Medium Electric Trucks in the City of Moreno Valley and along the Highway 60 corridor. Only if there is no demand for Class 6 and Class 7 Medium Duty Electric Trucks, shall the grants be provided for the purchase of Class 4 and Class 5 Medium Duty Electric Trucks, with priority given to Class 5 over Class 4 Medium Duty Electric Trucks. The grants shall be awarded prior to the issuance of the first Certificate of Occupancy for the Project.

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

The award of the Medium Duty Electric Truck Grants shall include the following two conditions:

(1) A prohibition on the resale of the Medium Duty Electric Truck to an entity that will operate trucks outside of California; and

(2) 85% of the mileage must occur in the SCAQMD region, which shall be enforced using a geo -fencing electronic system on each Medium Duty Electric Truck that has been funded by the Program.

The Developer shall be responsible for establishing, funding and administering the Medium Duty Electric Truck Grant Program, and provide a hyperlink to the Program that the City that may post on the City's official website for interested parties to access information about the Program.

3. **Local Delivery Electric Vehicle Program - $27,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $27,000 for the purpose of providing grants to private third parties for the purchase of at least three Local Delivery Electric Vehicles (generally referred to as Class 1, 2, and 3 trucks) for use for deliveries within the City of Moreno Valley and the immediate vicinity.

The Program shall prioritize grant applicants who occupy buildings situated within the Project Site that are located the closest to any developed residential areas and intend to use the grant proceeds to purchase the highest class of Class 1, 2, and 3 trucks for which there is demand. The grants shall be awarded prior to the issuance of the first Certificate of Occupancy for the Project.

The award of the Local Delivery Electric Truck Grants shall include a condition that requires that 50% of the mileage must occur in Moreno Valley and the Highway 60 corridor, which shall be enforced using a geo-fencing electronic system on each Local Delivery Electric Vehicle that has been funded by the Program.

The Developer shall be responsible for establishing, funding and administering the Local Delivery Electric Vehicle Grant Program, and provide a hyperlink to the Program that the City that may post on the City's official website for interested parties to access information about the Program.

4. **Electric Passenger Vehicle Grant Program - $25,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $25,000 for the purpose of providing 25 $1,000 grants to Moreno Valley residents for the purchase of electric passenger vehicles.

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

The Program shall prioritize grant applicants who occupy households earning not more than 150% of the Area Median Income, as calculated by the U.S. Department of Housing and Urban Development.

The Developer shall be responsible for establishing, funding and administering the Electric Passenger Vehicle Grant Program, and provide a hyperlink to the Program that the City that may post on the City's official website for interested parties to access information about the Program.

5. **Electric Vehicle Advocacy Fund - $5,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $ 5,000 for the purpose of contributing the proceeds to a bona fide California non - profit organization, in good standing, that focuses on informing and educating members of the general public about the environmental benefits of electric vehicles and /or provides outreach, education, and training on the maintenance of zero - emissions vehicles.

Non-profit organizations, including without limitation to labor and /or environmental organizations, that are located in the City of Moreno Valley or which provide services to Moreno Valley residents shall be prioritized.

The Developer shall be responsible for establishing, funding and administering the Electric Vehicle Advocacy Fund to ensure that the grant funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City's official website for interested parties to access information about the Fund.

6. **Solar Advocacy Fund - $5,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $ 5,000 for the purpose of contributing the proceeds to a bona fide California non - profit organization, in good standing, that focuses on informing and educating members of the general public about the environmental benefits of solar -generated electricity and/or provides outreach, education, and training on the installation and maintenance of solar panels and equipment.

Non-profit organizations, including without limitation to labor and /or environmental organizations, that are located in the City of Moreno Valley or which provide services to Moreno Valley residents shall be prioritized.

The Developer shall be responsible for establishing, funding and administering the Solar Advocacy Fund to ensure that the grant funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

may post on the City's official website for interested parties to access information about the Fund.

7. **Residential Air Filtration Reimbursement Program - $40,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $40,000 for the purpose of paying up to 90% of a Moreno Valley's homeowner's cost of purchasing and installing non-portable air filtration systems including any necessitated HVAC modification, not exceeding $5,000 per home, as follows:

(a) The homeowner's home is an eligible home with the following address:

- 28572 Galino Court (APN: 478-400-041)
- 28602 Galino Court (APN: 478-400-016)
- 28608 Galino Court (APN: 478-400-017)
- 13020 Essen Lane (APN: 478-401-001)
- 13025 Gershwin Way (APN: 478-301-010)
- 13026 Gershwin Way (APN: 478-301-009)
- 13031 Mozart Way APN: 478-301-001)
- 28778 Strauss Lane (APN: 478-303-013)
- 28794 Strauss Lane (APN:478-303-012)
- 28810 Strauss Lane (APN: 478-303-011)
- 13031 Shubert Street (APN: 478-303-001); and

(b) The homeowner requests payment within five years of the commencement of grading or commencement of construction of the first warehouse building. In the event a homeowner has a household income less than 80% of the Area Median Income as determined by the Department of Housing and Urban Development, the Project Applicant shall pay 100% of the cost of the air filtration system, not exceeding $5,000 per home. The homeowner shall be permitted to select and contract with a contractor or installer of the homeowner's choice.

The Developer shall mail notice of the Residential Air Filtration System Reimbursement Program via registered or certified mail to homeowners of record of the eligible homes prior to the issuance of the Project's first grading or building permit and annually thereafter for four years. The notice shall identify the exact date when the five-year period starts and ends.

The Developer shall be responsible for establishing, funding and administering the Residential Air Filtration System Reimbursement Program to ensure that the reimbursement funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City's official website for interested parties to access information about the Fund.

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

8. **Residential Noise Insulation Reimbursement Program - $64,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $64,000 for the purpose of paying up to 90% of a Moreno Valley's homeowner's cost of purchasing and installing noise insulation measures, not exceeding $8,000 per home, as follows:

a. The homeowner's home is an eligible home with the following address:

- 28572 Galino Court (APN: 478-400-041)
- 28602 Galino Court (APN: 478-400-016)
- 28608 Galino Court (APN: 478-400-017)
- 13020 Essen Lane (APN: 478-401-001)
- 13025 Gershwin Way (APN: 478-301-010)
- 13026 Gershwin Way (APN: 478-301-009)
- 13031 Mozart Way APN: 478-301-001)
- 28778 Strauss Lane (APN: 478-303-013)
- 28794 Strauss Lane (APN:478-303-012)
- 28810 Strauss Lane (APN: 478-303-011)
- 13031 Shubert Street (APN: 478-303-001), and

b. The homeowner requests payment within five years of the commencement of grading or commencement of construction of the first warehouse building. In the event a homeowner has a household income less than 80% of the Area Median Income as determined by the Department of Housing and Urban Development, the Project Applicant shall pay 100% of the cost of the noise insulation, not exceeding $10,000 per home. The homeowner shall be permitted to select and contract with a contractor or installer of the homeowner's choice.

The Developer shall mail notice of the Residential Noise Insulation Reimbursement Program via registered or certified mail to homeowners of record of the eligible homes prior to the issuance of the Project's first grading or building permit and annually thereafter for four years. The notice shall identify the exact date when the five-year period starts and ends.
The Developer shall be responsible for establishing, funding and administering the Residential Noise Insulation Reimbursement Program to ensure that the reimbursement funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City 's official website for interested parties to access information about the Fund.

9. **Residential Exterior Pressure Washing Reimbursement Program - $4,000**

Prior to the issuance of the first building permit for the Project, the Developer shall establish a trust account or escrow account in which Developer shall deposit $

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

4,000 for the purpose of reimbursing each homeowner for exterior pressure washings of the first two rows of homes on the south side of Encelia Avenue up to $ 500 per house during any on-site or off-site grading activities, not exceeding a total sum of $4,000.

The Developer shall be responsible for establishing, funding and administering the Residential Exterior Pressure Washing Reimbursement Program to ensure that the reimbursement funds are properly used, and provide a hyperlink to information regarding the availability of the funds that the City that may post on the City 's official website for interested parties to access information about the Fund.

10. **Onsite EV Chargers and APU Plug-Ins**

Prior to the issuance of the first Certificate of Occupancy for the Project, the Developer at its own cost shall install at a minimum, 12 onsite EV charging stations. In addition, prior to the issuance of the first Certificate of Occupancy for the Project, the Developer shall install at its own cost at least one APU plug -in for every 35 dock doors at multiple locations within the Project Site where trucks park, with signage that identifies in English and Spanish where such APU plug-ins are located. Signage at each EV parking space shall also state that the EV parking space is for EVs only and improperly parked vehicles shall be towed.

11. **LEED Silver Certification Standards**

The Developer shall design the Project's main building's shell and core to meet the Leadership in Energy and Environmental Design (LEED)-equivalent "Silver" Certification standards. If the Developer advertises any building within the Project Site as having LEED Silver Certification, it shall apply for and obtain such certification prior to distributing or publishing any such advertisement. If LEED Silver Certification is granted, notice shall be provided to the City and any interested parties submitting a written request for proof of LEED Silver Certification.

12. **Electrical Appliances**

Only electric appliances shall be used in building office areas (e.g., electric stoves).

13. **Diesel Powered Generators**

The use of portable or stationary diesel powered generators shall be prohibited unless necessary due to emergency situations or constrained supply.

14. **Construction Equipment**

All construction equipment shall meet or be cleaner than Tier 4 standards, except if the general contractor overseeing the Project's construction certifies that it is not

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

feasible to use exclusively Tier 4 equipment due to limited availability. In all events, at least 80% of all construction equipment shall meet or be cleaner than Tier 4 standards throughout the construction phase of the Project.
In the event that any portable or stationary diesel-powered construction equipment becomes available with improved emission control devices that reduce particulate matter emissions, including fine particulate matter, and reduces NOx emissions at commercially reasonable prices, and in sufficient quantities to be reasonably available, then the Developer may cause the use of such construction equipment. Otherwise, no stationary or portable diesel-powered generators may be used, during construction, unless necessary due to emergency situations or constrained supply.

15. **Lighting Program**

The Developer shall establish a Lighting Program that incorporates the following: (a) implements measures that are intended to reduce light and glare to maximum extent practicable; (b) implements a lighting program in compliance with International Dark Sky Association standards, except where doing so would violate safety requirements or federal, state, county or City regulations; (c) requires all exterior lighting, including street lights, to be 2,700 Kelvin; (d) commands the installation of motion sensors on all interior lighting consistent with applicable Title 24 regulations; (e) mandates the installation of full cut-off luminaries on all buildings and poles situated within the Project Site; (f) orders the posting of signs on-site stating that truck head lights shall be turned off within five minutes of truck parking; (g) requires all construction lighting to be shielded and directed away from the Project's property lines; and (h) limits the height of all outdoor freestanding and wall-mounted lights to no more than 20 feet within 180 feet of the centerline of any public streets, except where doing so would violate safety requirements or any federal, state, county or City regulations.

16. **Landscaping Requirements**

The Developer shall plant at least 599 trees at the Project Site, consistent with the following:

a. **Screening**: Along the perimeter edges of the Project Site facing the existing residential neighborhood, it shall be developed to screen future buildings with walls, and/or landscaping. For all buildings along the perimeter edges of the Project Site, all buildings and roof mounted equipment shall be substantially screened by walls and/or landscaping which remains in a state of maturity and non -deciduous at all times of the year. "Substantially screened" means that while there might be some view of the buildings looking through the foliage, the buildings will be mostly obscured from view.

b. **Large Trees**: At least 50% of the trees planted along the perimeter edges of the Project Site which face the existing residential neighborhood shall be

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

24-inch box trees.

c. **Evergreen Trees**: Evergreen trees, which include all species of decorative non- deciduous trees, shall constitute 95% of all 24-inch box trees planted along the perimeter edges of the Project Site which face the existing residential neighborhood. The 24-inch box evergreen trees shall be concentrated towards the higher topographic elevations within the perimeter edges of the Project Site to maximize screening.

d. **Palm Trees**: Palm trees may only be planted in accent areas only.

e. **Accent Elements**: To the extent practicable, in order to create visual interest, site contours shall vary and accent elements, such as boulders, which shall be placed along the frontage of the perimeter edges of the Project Site facing the existing residential neighborhood.

f. **Layered Effect**: Along the perimeter edges of the Project Site facing the existing residential neighborhood, trees shall be planted at varied depths from the Project Site's property line so that instead of creating a uniform and linear appearance, the planted trees create a layering effect as viewed from adjacent streets so as to maximize screening of buildings.

g. **Maintenance**: Trees shall be maintained in their natural form and shape with minimal pruning and all dead trees shall be promptly removed and replaced with similar type and size trees.

h. **Parking Area Trees**: Trees planted in the Project Site's parking areas shall be capable of achieving 50% shading within ten years of planting.

i. **Invasive Non-Native Vegetation**: Invasive non-native vegetation, such as certain grasses, shrubs, and sub-shrubs shall be removed from the Project Site as part of the Project's regular landscaping services.

j. **Entire Site**. Evergreen trees, which include all species of decorative non-deciduous trees, shall constitute 50% of all trees planted within the Project Site.

17. **Trucks**:

a. **Drive Aisle Walls**: All portions of truck circulation drive aisles that are visible from any existing home within 1,000 feet of the perimeter edges of the Project Site shall be shielded by walls at least 14 feet high, upon approval of the City to ensure no traffic safety issues are created. In no case, however, shall any such walls be lower than 12 feet high.

b. **Turning Measures**: The Developer shall design and install on -site physical

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

improvements, including but not limited to curbs, street humps, street bumps or textured pavement, approved by the City, that discourage truck operators from turning their trucks in the wrong direction when entering or leaving the Project Site.

c. **Directional Signage**: The Developer shall install on-site signage clearly stating which directions trucks must turn at all streets exiting the Project Site.

18. **Construction Activities:**

a. No nighttime grading or outside construction between 6:00 p.m. and 7:00 a.m. shall be conducted within 1,000 feet of any existing home across the street along the perimeter edge of the Project Site, except if necessary for concrete pours.

b. The Developer shall provide notice to residents within 100 feet of any portion of the perimeter edge of the Project Site, at least one week prior to construction between 6:00 p.m. and 7:00 a.m.

c. Construction trucks shall be prohibited from using Encelia Street., other than for infrastructure construction or necessary detours.

d. Lunch vendor services shall be provided on-site during the construction phase of the construction phase of the Project.

19. **Parking:**

a. The Project shall include preferential parking for carpools and vanpools equal to 5% of the total number of on-site parking spaces.

b. The Project shall include designated parking spaces for motorcycles.

c. The Project shall provide sufficient on-site truck parking within the on-site parking areas to enable all trucks reasonably expected to visit the Project to park on-site (as determined by a qualified transportation engineer).

20. **Rooftops:**

Warehouse roof areas not covered by solar panels shall be constructed with materials with an initial installation Solar Reflective Index Value of not less than 39.

21. **Trash Removal:**

Trash removal within and along all perimeter edges of the Project Site shall occur at least weekly or within three business day of receipt of notification to any occupant of the Project or the Project's management or community ombudsman.

22. **Signage:**

Developer agrees to augment the sign prohibiting truck traffic southbound on Redlands (said sign currently located at the NW corner of Eucalyptus and Redlands) to a larger size and more prominent design, subject to review and approval by City staff.

23. **Backup Alarms:**

To reduce noise associated with the use of backup alarms, either ambient-sensitive self-adjusting backup alarms or manually adjustable alarms shall be used on all equipment in use on the project site that requires a backup alarm. Ambient-sensitive self-adjusting backup alarms shall be equipped to increase or decrease their volume based on background noise levels by self-adjusting to produce a tone that is readily noticeable over ambient noise levels, which is typically a minimum of 5 decibels above the ambient noise, but not so loud as to be a constant annoyance to neighbors. Close attention shall be given to the alarm's mounting location on the machine in order to minimize engine noise interference, which can be sensed by the alarm as the ambient noise level. An alarm mounted directly behind a machine radiator shall be equipped to sense the cooling fan's noise and adjust accordingly. If ambient backup alarms are utilized, a log shall be maintained that describes the type and timing of maintenance of each piece of equipment that is essential to the effective operation of the ambient backup alarm system. If manually-adjustable alarms are used, which eliminates the machine mounting location problem of the ambient-sensitive self-adjustable backup alarms, each such alarm shall be set at the beginning of each day and night shift. If manual backup alarms are utilized, a log shall be maintained that describes the type and timing of maintenance of each piece of equipment that is essential to the effective operation of the manual backup alarm system. Alternatively, backup movements can be supervised with a guide and flagging system if permitted under applicable OSHA regulations. If a flagging system is used, a log shall be maintained that describes the type of equipment used, if any, and the name of each flag person. All Logs shall be retained for a minimum of 12-months and be readily available to the City of Moreno Valley for inspection purposes during normal business hours.

Re: Moreno Valley Community Foundation

Dear Honorable Mayor and Members of the City Council:

I am writing to you regarding Hillwood's proposed "Moreno Valley Trade Center" project located south of Eucalyptus Avenue, west of Redlands Boulevard, north of Encelia Avenue, and east of the Quincy Channel, in the eastern portion of Moreno Valley, California. This letter supersedes all other letters written by us regarding the subject.

Hillwood is desirous of creating community benefits in connection with implementation of Hillwood's proposed project in Moreno Valley.

The purpose of this letter is to advise you that Hillwood would be pleased to make a $500,000 contribution to the Foundation at the time that our project entitlements become final and non-appealable. This contribution would be made in furtherance of Hillwood's partnership with the Moreno Valley community.

Very truly yours,

MTVC, LLC,

Moreno Valley, CA 92553

RE: Hillwood Project: Moreno Valley Trade Center

Dear Mike,

By this letter, Moreno Valley Trade Center, LLC is offering the following enhancements to the Moreno Valley Trade Center Project, subject to the Project being approved and the approval being final and non-appealable:

1. MVTC will donate $1,000,000 of annual revenue to the Moreno Valley Community Foundation for the first fifteen years of the project. The first annual payment will be made twelve months following the first certificate of occupancy for the project.

2. MVTC will donate a one-time payment of $15,000,000 to the Moreno Valley Community Foundation upon the first certificate of occupancy.

3. MVTC will restrict the height of the building to 60 feet from the 100 feet previously studied, substantially reducing the mass of the building and its impact on the environment.

2. MVTC will agree to exclusively market the project for manufacturing uses for a period of one year after City Council approval.

3. MVTC will agree to add a community youth center to the park it has previously proposed. The youth center will be approximately 9,000 square feet with classrooms, multi-purpose rooms, and offices.

4. MVTC will name the previously proposed park the “Kawhi Leonard Youth Park”.

5. MVTC will partner with the Kawhi Leonard Foundation or Kawhi Leonard Academy to provide youth programs for the residents of Moreno Valley. In this effort, MVTC will donate $250,000 to Kawhi Leonard’s Academy to facilitate such programs.

6. MVTC will construct two mega tesla charger stations onsite to help speed up the adoption of electric vehicle trucks. With the first such installation in the region, this will position Moreno Valley at the forefront of early adoption of electric truck technology.

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

COMMUNITY PARK ACQUISITION AND IMPROVEMENT AGREEMENT

This COMMUNITY PARK ACQUISITION AND IMPROVEMENT AGREEMENT ("Agreement") is made and entered into as of May 26, 2022 (the "Effective Date"), by and between INDUSTRIAL VI ENTERPRISES, LLC, a Delaware limited liability company ("Developer") and THE CITY OF MORENO VALLEY ("City") (individually, a "Party" and collectively the "Parties"), with respect to the following:

RECITALS

A. Developer is proposing to construct a 1,263,271 square foot logistics facility located south of Eucalyptus Avenue, west of Redlands Boulevard, north of Encelia Avenue and east of the Quincy Channel within the City, commonly known as the "Moreno Valley Trade Center (the "Project"). The land use entitlement applications for the Project are subject to discretionary review by the City and include requests for approval of a General Plan Amendment (PEN19-0191), a Change of Zone (PEN19-0192), Tentative Parcel Map (PEN19-0234), and Plot Plan (PEN19-0193) ("Pending Entitlements").

B. Due to its significant investment within the community, Developer wishes to create enhanced community benefits within the City and has proposed to develop a new, 18 gross-acre community park ("Community Park") at the southwest corner of Redlands Boulevard and Ironwood Avenue within the City ("Park Site"), at Developer's sole cost.

NOW THEREFORE, in consideration of the mutual covenants and agreements contained in this Agreement and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Developer and City hereby agree as follows:

AGREEMENT

1. Community Park. Developer shall acquire fee title to certain real property for the development of the Community Park and construct the following Community Park improvements at its sole cost and expense:

(a) Two (2) full-size fully lighted community soccer fields, one (1) fully lighted baseball field, a playground, exercise equipment, and related landscaping;

(b) Site lighting for night security and general illumination;

(c) CMU/Stick Frame Building to house public restrooms, a snack bar/concession, and requisite Electrical Room/IDF Room and construct said facilities;

(d) Code-required ADA access walking path that is aligned in such a manner that circulates the entire Community Park and connects all public facilities and amenities within the Community Park with public parking and access from adjacent public sidewalks and any existing or proposed public trails;

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

(e) Code-required parking;

(f) Connection to public water, power, and telephone and installation of a self-contained septic system; and

(g) Offsite improvements along the Community Park street frontages.

2. No Cost to City. Fee title to the land for the Community Park will be acquired by Developer at its sole cost and all improvements shall be installed by Developer without any financial assistance, labor, equipment, or materials provided by the City.

3. Construction and Entitlement Schedule. Within sixty (60) days of execution of this Agreement, Developer and City shall negotiate, in good faith, to reach an agreed-upon development schedule (including timelines for entitlement and construction of the Community Park), which shall be in writing and included as an addendum to this Agreement. Developer agrees to use commercially reasonable efforts to expeditiously work towards completion of the Community Park in accordance with the development schedule and City agrees to utilize all reasonable efforts to expedite entitlement review and permit plancheck in order to expedite the development of the Community Park; notwithstanding, Developer and City agree that the development schedule may be amended as necessary upon written approval of each Party, which shall not be unreasonably withheld.

4. City Permits and Approvals. Within sixty (60) days of the later of Developer's Pending Entitlements for the Project becoming final and non-appealable and the expiration of all applicable statutes of limitation and/or conclusion of any litigation challenging City's approval of the Project, Developer shall submit applications to City for all necessary entitlements, permits and approvals for construction of the Community Park, including offsite improvements along the street frontage only, and shall pay all application fees associated therewith. City agrees to expeditiously process all such applications.

5. Dedication and Maintenance. Fee title to the real property for the Community Park and all improvements shall be donated by Developer to City before a final Certificate of Occupancy is issued for any building or structure within the Community Park, without any liens, mortgages, non-public utility easements, or any other encumbrances. City shall take all necessary actions to approve and authorize City's acceptance of the Community Park dedication, including the drafting and execution of all agreements and documents necessary to facilitate the dedication. Title to, and ownership of, all improvements constructed hereunder by Developer shall vest absolutely in City upon completion and acceptance of such improvements by City.

Upon issuance of all final Certificate(s) of Occupancy for the park, Developer shall have no further obligations with respect to maintenance or repair of the Community Park or any on-site or offsite improvements or utility connections, which shall become the sole responsibility of the City.

6. No Relationship to Project. The Parties agree and acknowledge that the Community Park is entirely separate from Developer's Project and is being proposed as a separate community benefit. The Community Park shall be subject to separate review and approval by the City.

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

7. Approval of Project – Condition Precedent. Notwithstanding anything herein to the contrary, Developer's obligations hereunder shall immediately terminate, and no provision of this Agreement shall have further force or effect, in the event that the Pending Entitlements for the Project are denied or appealed and overturned.

8. No Agency. Neither Developer nor any of Developer's agents, contractors, or subcontractors are or shall be considered to be agents of City in connection with the performance of Developer's obligations under this Agreement.

9. Default. Upon Developer's default hereunder, City shall serve written notice of such upon Developer. Developer shall have a period of thirty (30) business days from the receipt of such notice to cure such default, or, in the event such default takes in excess of thirty (30) business days to cure, to commence such cure and diligently prosecute such cure to completion. City shall not exercise any remedies unless Developer fails to cure such default within such thirty (30) business day period. In no event shall Developer be in default if Developer timely submits applications to the City for all necessary entitlements, permits, and approvals for development of the Community Park and, in good faith, proceeds with such applications through the standard City entitlement process, but City fails to issue the required approvals for the development of the Community Park as particularly described herein.

10. Remedies. City agrees that its sole remedies for any default by Developer hereunder shall be specific performance or suspension or revocation of any of the Pending Entitlements for the Project (that were duly approved by City) pursuant to Section 9.02.260 (Revocation of approvals or permits) of Chapter 9.02 (Permits and Approvals) of Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code based on, but not limited to, a finding that the Project's entitlements were obtained by misrepresentation or fraud; that the conditions of any of the Project's entitlements have not been met or have been exercised contrary to the terms and conditions set forth therein in violation of any statute, ordinance, law or regulation; or that the public health, safety and welfare can be served only by revocation.

11. No Damages Relief Against City. Notwithstanding anything else in this Agreement to the contrary, Developer acknowledges that the City would not have entered into this Agreement had it been exposed to damage claims from Developer for any breach hereof. As such, the parties agree that in no event shall Developer be entitled to recover damages of any kind whatsoever against City for breach of this Agreement.

12. Substitute Park Site. In the event there are any unexpected or unforeseen physical conditions discovered on the Park Site which create a situation that poses a threat to the health and safety of the prospective users of the Community Park at the Park Site, Developer shall propose an alternative park site that is suitable for development of the Community Park, as more particularly described in this Agreement, subject to the approval of City, and which shall be developed as required in this Agreement.

13. Nexus/Reasonable Relationship Challenges.

Developer consents to and waives any rights it may have now or in the future to challenge the legal validity of, the conditions or requirements set forth in this Agreement including, without

limitation, any claim that they constitute an abuse of the police power, violate substantive due process, deny equal protection of the laws, effect a taking of property without payment of just compensation, or impose an unlawful tax.

14. Civil Code Section 1542 Waiver.

Developer hereby waives any and all rights Developer or its successors and assigns may have under Article XIIIC or Article XIIID of the California Constitution and any and all rights Developer of its successors and assigns may have under any other applicable law to contest the fees, exactions and assessments and/or their amounts payable to the City under this Agreement as follows:

In furtherance of the intentions of the parties to this Agreement, Developer with and under advice of counsel, hereby expressly waives any and all right and benefit conferred upon Developer by the provisions of Civil Code Section 1542, which provides as follows:

> "A general release does not extend to claims which a creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

Developer further expressly waives any and all rights and benefits conferred upon Developer by any provision of any other state, federal or local statute, code, ordinance or law similar to Section 1542 of the Civil Code. Developer expressly consents that the waiver of rights contained in the first paragraph shall be given full force and effect, according to the express terms and provisions of the instant waiver, to unknown and unsuspected claims, demands and causes of action, if any, arising out of or relating to the waiver of rights contained in this Agreement.

Attn: City Attorney
14177 Frederick Street
P.O. Box 88005
Moreno Valley, CA 92252

16. Miscellaneous.

(a) Authority to Execute Agreement. The person or persons executing this Agreement on behalf of Developer and City warrant and represent that they have the authority to execute this Agreement and the authority to bind Developer and City, as applicable, to the performance of their respective obligations hereunder.

(b) Counterparts; Electronic Execution. This Agreement may be executed in multiple counterparts electronically including counterparts transmitted via email, each of which shall be deemed an original, but all of which, together, shall constitute one and the same instrument.

(c) No Obligations to Third Parties. The execution and delivery of this Agreement shall not be deemed to confer any rights upon, nor obligate any of the parties thereto, to any person or entity other than the parties hereto.

(d) Amendment to this Agreement. The terms of this Agreement may not be modified or amended except by an instrument in writing executed by each of the parties hereto.

(e) Waiver. The waiver or failure to enforce any provision of this Agreement shall not operate as a waiver of any future breach of any such provision or any other provision hereof.

(f) Applicable Law. This Agreement shall be governed by and construed and enforced in accordance with the laws of the State of California.

Attachment: Resolution - Accepting Community Benefits and Approving Park Agreement [Revision 3] (6209 : Moreno Valley Trade Center/Park)

(g) Venue. In the event that suit is brought by either party to this Agreement, the parties agree that venue shall be exclusively vested in the State courts of the County of Riverside, California or where appropriate, in the United States District Court, Southern District of California, Riverside, California.

(h) Severability. If any provision of this Agreement is found to be invalid or unenforceable, the remainder of this Agreement shall not be affected thereby, and each provision of this document shall be valid and enforceable to the extent permitted by law.

(i) Attorneys' Fees. In the event a dispute arises concerning the performance, meaning or interpretation of any provision of this Agreement, the defaulting party or the party not prevailing in such dispute shall pay any and all costs and expenses incurred by the other party in enforcing or establishing its rights hereunder, including, without limitation, court costs, attorneys' fees and expenses. In addition to the foregoing award of attorneys' fees and expenses to the prevailing party, the prevailing party in any lawsuit on this Agreement shall be entitled to its attorneys' fees and expenses incurred in any post judgment proceedings to collect or enforce the judgment. This provision is separate and several and shall survive the merger of this Agreement into any judgment on this Agreement, and shall survive the termination of this Agreement.

(j) Entire Agreement. This Agreement supersedes any prior agreements, negotiations and communications, oral or written.

(k) Successors and Assigns. Developer may assign this Agreement to an affiliate of Developer. This Agreement shall be binding upon and shall inure to the benefit of the successors and assigns of the Parties hereto.

(l) Ambiguities or Uncertainties. The parties hereto have mutually negotiated the terms and conditions of this Agreement and each party received independent legal advice from its attorneys with respect to the advisability of executing this Agreement and the meaning of the provisions contained herein. As such, this Agreement is a product of the joint drafting efforts of both parties and neither party shall be deemed to have solely or independently prepared or framed this Agreement. Therefore, any ambiguities or uncertainties are not to be construed against or in favor of either party.

INSTRUCTIONS FOR COMPLETING THIS FORM

This form complies with current California statutes regarding notary wording and, if needed, should be completed and attached to the document. Acknowledgments from other states may be completed for documents being sent to that state so long as the wording does not require the California notary to violate California notary law.

- State and County information must be the State and County where the document signer(s) personally appeared before the notary public for acknowledgment.
- Date of notarization must be the date that the signer(s) personally appeared which must also be the same date the acknowledgment is completed.
- The notary public must print his or her name as it appears within his or her commission followed by a comma and then your title (notary public).
- Print the name(s) of document signer(s) who personally appear at the time of notarization.
- Indicate the correct singular or plural forms by crossing off incorrect forms (i.e. ~~he/she/they,~~ is /~~are~~) or circling the correct forms. Failure to correctly indicate this information may lead to rejection of document recording.
- The notary seal impression must be clear and photographically reproducible. Impression must not cover text or lines. If seal impression smudges, re-seal if a sufficient area permits, otherwise complete a different acknowledgment form.
- Signature of the notary public must match the signature on file with the office of the county clerk.
  - Additional information is not required but could help to ensure this acknowledgment is not misused or attached to a different document.
  - Indicate title or type of attached document, number of pages and date.
  - Indicate the capacity claimed by the signer. If the claimed capacity is a corporate officer, indicate the title (i.e. CEO, CFO, Secretary).
- Securely attach this document to the signed document with a staple.

an approximately 1,328,853 square foot warehouse/distribution building.

SUMMARY

MVTC, LLC, A Delaware limited liability company ("Applicant") is requesting approval of the following: 1) a General Plan Amendment (PEN19-0191) to amend the General Plan Land Use Designation of the Project Site from Residential 2 (R2) to Business Park (BP); 2) a Change of Zone (PEN19-0192) to amend the City's Zoning Atlas to rezone the Project Site from Residential Agriculture 2 (RA2) to Light Industrial (LI) and remove the Primary Animal Keeping Overlay (PAKO) district; 3) Tentative Parcel Map (PEN19-0234) to merge 11 parcels into 1 parcel; and 4) a Plot Plan (PEN19-0193) for an approximately 1,328,853 square foot Warehouse/Distribution Building. The Project Site is located south of Eucalyptus Avenue, north of Encelia Avenue, west of Quincy Street and west or Redlands Boulevard comprising Assessor Parcel Nos. 488-340-002 through 012.

PROJECT DESCRIPTION

General Plan Amendment

The Land Use Designation of the Project Site under the City of Moreno Valley General Plan Land Use Map is Residential 2 (R2). The Applicant is requesting that the General Plan Land Use Designation be changed from Residential 2 (R2) to Business Park (BP).

The primary purpose of the Residential 2 (R2) General Plan Land Use Designation is to provide for suburban lifestyles on residential lots larger than commonly available in suburban subdivisions in the context of a rural atmosphere. The maximum allowable density under the Residential 2 (R2) General Plan Land Use Designation is 2.0 dwelling units per acre. The primary purpose of the Business Park (BP) General Plan Land Use Designation is to provide for manufacturing, research and development, warehousing and distribution, as well as office and support commercial activities. While the purpose of the two land use designations are different, the proposed General Plan Amendment, as requested by the Applicant, will be consistent with the Project Site's adjacent parcels to the northwest, north, northeast, and east. The change in the Project Site's Land Use Designation would result in a total increase of approximately 80.04-acres of the Business Park (BP) General Plan Land Use Designation and a corresponding reduction of approximately 80.04-acres of the Residential 2 (R2) General Plan Land Use Designation.

Change of Zone

The Project Site is currently zoned Residential Agriculture 2 (RA2) with a "Primary Animal Keeping Overlay (PAKO)" classification. The Applicant is requesting that the Project Site be rezone to Light Industrial District (LI), and to remove the Project Site's "Primary Animal Keeping Overlay (PAKO)" classification.

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

The primary purpose of the Residential Agriculture 2 (RA2) zone is to provide for suburban lifestyles on residential lots larger than are commonly available in suburban subdivisions and to provide for and protect the rural and agricultural atmosphere within the zone, including the keeping of animals, that have historically characterized these areas. The Residential Agriculture 2 (RA2) zone is intended as an area for development of large lot, single-family residential development at a maximum allowable density of two dwelling units (DU) per net acre.

The primary purpose of the Light Industrial District (LI) zone is to provide for light manufacturing, light industrial, research and development, warehousing, distribution and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial uses on a limited basis. The Light Industrial District (LI) Zoning District is intended as an area for light industrial uses that can meet high performance standards. While the purpose of the two zoning designations are different the proposed Change of Zone will be consistent with the Project Site's adjacent parcels to the northwest, north, and northeast.

Tentative Parcel Map

The Applicant is requesting the approval of Tentative Parcel Map 37836 to merge the existing 11 parcels into a single parcel. Staff has reviewed the proposed Tentative Parcel Map and confirmed that the proposed lot complies with the City's development standards.

Plot Plan

The Applicant is also requesting the approval of a Plot Plan to construct a 1,328,853 square foot Warehouse/Distribution building on the Project Site with associated parking, landscape improvements and off-site public improvements. An alternative land use, an E-Commerce facility, was also discussed in the Environmental Impact Report prepared for the project site. Should the applicant decide to pursue that option either an amended Plot Plan or a new Plot Plan would be required for review and approval.

Site/ Surrounding Area

The Project Site currently consists of 11 parcels, comprising Assessor Parcel Nos. 488-340-002 through 012. The Project Site consist of approximately 80.04 gross acres and is located south of Eucalyptus Avenue, north of Encelia Avenue, east of Quincy Street and west of Redlands Boulevard.

The area surrounding the Project Site includes the following: 1) to the south, existing single-family homes across Encelia Avenue on land zoned Residential Agriculture (RA2); 2) to the west, vacant land across the Quincy Channel that is zoned Residential Agriculture 2 (RA2) and Residential 5 (R5); 3) to the north, the ALDI Distribution Center warehouse and vacant land across Eucalyptus Avenue zoned Light Industrial (LI) and Community Commercial (CC); and 4) to the east, vacant land zoned World Logistics Center Specific Plan (WLC SP LD).

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

Access/Parking

Access to the Project Site is proposed to be from a total of six new driveways. Eucalyptus Avenue will have two driveways - the western driveway will provide full access for truck and passenger vehicles and the eastern driveway will provide only a right-out for both truck and passenger vehicles. Redlands Boulevard will have two driveways - the northern driveway will only be right-in and right-out for passenger vehicles and the southern driveway will be right-in for trucks and right-in and right-out for passenger vehicles only. Encelia Avenue will have two driveways providing full access for just passenger vehicles.

Staff has determined that the Project Site's driveways and interior drive aisles are adequate for the general maneuvering of trucks, including providing sufficient room for turning around delivery trucks and trash pick-up. In addition, the Project Site has been deemed acceptable for fire truck access by the Fire Prevention Bureau.

As proposed, the Project Site's proposed parking for both automobiles and trucks exceed the Municipal Code requirements. Overall, a total of 605 automobile parking spaces will be provided for the proposed Warehouse/Distribution building, where 428 automobile parking spaces are required. The proposed parking includes spaces for standard automobiles which will be ADA accessible and include EV (Electric Vehicle) spaces. The proposed parking will also include 238 truck parking spaces in the truck court areas, where 225 truck parking spaces are required. Bicycle parking will also be provided as required by the City's standards for bicycle parking.

Design/Landscaping

The proposed Warehouse/Distribution building will be constructed at a maximum height of 48 feet. It will be rectangular in shape with a contemporary modern architectural style that includes a flat roof design and vertical wall elements. The corners of the building will be occupied by offices, which will provide focal points to the building in that they will include concrete tilt-up sections, glass, and awnings, bringing an office aesthetic to the building. The color finishes include canvas tan, putty, and grays. The windows will have a blue glazing, with flat awnings above the windows to break up the massing of the building. The architectural design of the Warehouse/Distribution building strives to achieve an attractive and appealing structure as it will be visible from the following three streets: Eucalyptus Avenue, Encelia Avenue, and Redlands Boulevard.

The project has been designed with one pad elevation for the building. This produces a higher pad elevation from Encelia Avenue and a lower pad elevation from Eucalyptus Avenue The building pad elevation between 14.24 feet and 25.34 feet higher than Encelia Avenue. From Eucalyptus Avenue the building pad elevation is between 1.96 feet and 19.76 feet lower than the street.

Extensive landscaping will be provided along the building street frontages in addition to the required front set back and right of way landscaping that will include plant, ground cover, street trees and on-site trees. The project also meets the municipal code requirement of having a 250 foot setback between the residential district to the south of

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

Encelia Avenue and the project truck court. Additional landscaping has been provided in this setback area.

MAJOR DEVELOPMENT REVIEW PROCESS

Since the Applicant is requesting a General Plan Amendment, Change of Zone, Tentative Parcel Map, and Plot Plan, the Applicant's land use entitlement applications were concurrently processed and reviewed, as required under the "Major Development Review Process" provisions as set forth in Section 9.02.030 (Development Review Process) of Chapter 9.02 (Permits and Approval) of Title 9 (Planning & Zoning) of the Moreno Valley Municipal Code. Pursuant to Section 9.02.030, upon determining the applications to be complete, the proposed Project was forwarded to the Community Development Director and the Project Review Staff Committee for their respective reviews. The proposed Project was also forwarded to certain public agencies (whose operations or areas of responsibility could be affected by the proposed Project) for their review and comment. These public agencies included, but not limited to, the Santa Ana Regional Water Quality Control Board (RWQCB), the California Department of Fish and Wildlife (CDFW), and The Riverside County Department of Environmental Health.

Following review by the Community Development Director, the Project Review Staff Committee and the various public agencies, the Project's entitlement package was deemed ready for Planning Commission review and consideration.

CEQA ENVIRONMENTAL REVIEW

The City, serving as Lead Agency under CEQA and the CEQA Guidelines, provided the requisite notices related to the Project's Notice of Preparation, Notice of Completion and Notice of Public Review of the Draft EIR, as required under the California Environmental Quality Act ("CEQA") (Public Res. Code, § 21000 *et seq.*), the State CEQA Guidelines (14 CCR § 15000 *et seq.,* and the City of Moreno Valley's "Rules and Procedures for the Implementation of CEQA," as discussed below.

Notice of Preparation

There is no notice requirement for an Initial Study until the City determines that it will prepare either a Negative Declaration or an Environmental Impact Report. If the City concludes that an Environmental Impact Report is required, it must immediately send out a Notice of Preparation. (See CEQA Guidelines §15082.) The City must prepare and distribute a "Notice of Preparation" to various agencies and persons requesting such notice. (See CEQA sections 21080.4(a) and 21092.2; see also CEQA Guidelines section 15082.) In light of the foregoing, the Notice of Preparation was sent to the following: the Santa Ana Regional Water Quality Control Board (RWQCB), the California Department of Fish and Wildlife (CDFW), and The Riverside County Department of Environmental Health.

Notice of Completion

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

Once the Draft EIR has been completed, the City must file a "Notice of Completion" with the State of California Office of Planning and Research ("OPR"). (See CEQA section 21161 and CEQA Guidelines sections 15085(a) and 15372.) The Notice of Completion may be filed as a printed hard copy, in electronic form on a CD, or by e-mail. In light of the foregoing, the Notice of Completion was sent to OPR, as evidenced in the attached.

Notice of Public Review

After the Draft Environmental Impact Report has been completed, the Lead Agency must provide public notice that the Draft Environmental Impact Report is available for comment and review pursuant to CEQA section 21092 and CEQA Guidelines section 15087(a).

Notice of the period for public review of a Draft Environmental Impact Report must be provided in each of three ways: 1) provide notice to parties which have previously made a written request for such notice per CEQA section 21092(b)(3) and CEQA Guidelines section 5087(a); 2) file and post the notice with the County Clerk as required by CEQA section 21092.3 and CEQA Guidelines section 15087(d); and 3) provide notice to the general public by one or more of three procedures as set forth in CEQA section 21092(b)(3) and CEQA Guidelines section 15087(a), which include publication at least once in a newspaper of general circulation in the area affected by the project, on- and off-site posting in the area in which the project will be located; or direct mailing to occupants of contiguous property and to owners of contiguous property as shown on the latest equalized assessment roll.

In light of the foregoing, Notice of Public Review was provided to, but not limited to the following: Richard Drury, Komalpreet Toor, Stacey Obornet, George Hague, Friends of the Northern San Jacinto Valley, and Residents for a Livable Moreno Valley.

Upon completion of the Draft Environmental Impact Report, staff circulated the document for a 45-day public review period, starting on May 24, 2021, and ending on July 8, 2021.

Notice of Determination

After the Lead Agency decides to approve or carry out a project for which an Environmental Impact Report has been prepared, the City must file a Notice of Determination. (See CEQA sections 21108(a) and 21152; see also CEQA Guidelines sections 15094 and 15373.) Because the City is a local agency, within five working days after the approval becomes final, the Notice of Determination must be filed with the County Clerk. Since the proposed Project has not received final approval, there is currently no Notice of Determination.

ENVIRONMENTAL DOCUMENTS

The Draft EIR and associated environmental documents for the proposed Project were prepared by a third-party environmental consultant, T&B Planning, Inc. In practice, Lead Agencies commonly either retain a consultant to prepare the EIR or accept an EIR

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

prepared by the applicant or its consultant rather than have City staff prepare the EIR. CEQA authorizes a Lead Agency to enter into a contract for preparation of an EIR and the CEQA Guidelines permit agencies to accept EIRs prepared by project applicants or their consultants. (See CEQA section 21082.1(a)) and CEQA Guideline section 15084(d)(3).)

However, under CEQA, whatever method of preparation the Lead Agency uses, it must independently review and analyze the Draft EIR, and circulate a Draft EIR that reflects its independent judgment. (See CEQA section 21082.1 (c)(1)-(2) and CEQA Guidelines section 15084 (e).) In other words, the Lead Agency cannot avoid its legal obligation to independently review and evaluate the EIR by contracting with a consultant to prepare the EIR.

In light of the foregoing, staff independently analyzed the Draft EIR and all related documents, including but not limited to Preliminary WQMP, Hydrology Report, Noise Impact Analysis, and Traffic Impact Analysis. Relevant environmental documents were reviewed by various Departments and Divisions of the City, including without limitation, the Planning, Public Works, Engineering, Fire and the City Attorney's Office.

Draft EIR Public Comments & Responses to Comments

Fifteen public written comment letters were received during the 45-day public review period. Some of the written comments expressed concern regarding potential impacts to air quality, noise, traffic and aesthetics, while others acknowledged the Project without providing specific comments addressing potential environmental impacts of the Project.

Per CEQA and the CEQA Guidelines, the Lead Agency must evaluate comments on the Draft EIR that were received during the public review period and must include written responses to comments in the Final EIR. (See CEQA section 21091(d) and CEQA Guidelines section 15088(a).) However, the Lead Agency is only required to provide responses regarding the disposition of any "significant environmental issues" raised by commentators. (See CEQA section 21091(d)(2)(B) and CEQA Guidelines sections 15088(c), 15132(d) and 15204(a).) In other words, the Lead Agency is not required to respond to those comments that do not address environmental issues. The Lead Agency's responses to comments may be incorporated as revisions to the Draft EIR or included in a separate section in the Final EIR. (See CEQA Guidelines section 15088(d).) In either case, they must appear in the final EIR, which must include the draft EIR, with any revisions or comments on the draft EIR either verbatim or in summary, and the agency's responses to comments on significant environmental issues. (See CEQA Guidelines section 15132.)

Lead Agencies must respond to comments received during the public comment period. (See CEQA Guidelines section 15088(a).) CEQA, however, does not require that the Lead Agency respond to late comments. (See CEQA section 21091(d)(1); see also *Residents Against Specific Plan 380 v County of Riverside* (2017) 9 CA5th 941 and *Gilroy Citizens for Responsible Planning v City of Gilroy* (2006) 140 CA4th 911.). Further, the Lead Agency need not hold open the review process to prepare responses to late comments. (See CEQA section 15207; see also *City of Poway v City of San*

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

Diego (1984) 155 CA3d 1037.) Given that there is no legal duty to respond to late comments, the claimed inadequacy of responses to late comments cannot be a basis for challenging the legal adequacy of an EIR. (See *Gray v County of Madera* (2008) 167 CA4th 1099.)

In light of the foregoing, the environmental consultant, Planning staff, Public Works and Engineering staff and the City Attorney's Office prepared responses to the written comments the City received within the 45-day public review period and those written responses are included in the Final EIR. However, any written comments received after the close of the 45-day public review period are not included in Final EIR, nor are any responses thereto (if any) been included in the Final EIR.

Point-by-point responses to the individual comments, which addressed potential or alleged environmental impacts of the proposed Project were prepared with some responses to certain comments consisting of cross-references to responses to similar or related issues. (See CEQA section 21082.1.)

The purpose of staff's participation in preparing said response is to ensure that the City, as Lead Agency, independently review and analyze them so that the responses to comments and the Final EIR as a whole reflects the City's independent judgment. (See CEQA section 21082.1(c).)

Mitigation Measures and Mitigation Monitoring & Reporting Program

Mitigation measures are proposed to reduce the level of potential environmental impacts of the proposed Project. In the responses to comments, numerous mitigation measures are referenced when such references are related to the potential impact described in the respective comment. Furthermore, the mitigation measures are incorporated in the proposed Mitigation Reporting and Monitoring Program, that is included as part of the Final EIR, although the Program does not have to be included in the EIR. (See *Christward Ministry v County of San Diego* (1993) 13 CA4th 31.) The purpose of the Mitigation Reporting and Monitoring Program is to ensure that Project's mitigation measures shall be enforceable through permit conditions, agreements, or other mechanisms. (See CEQA Guidelines section 5126.4(a)(2).) Moreover, because mitigation measures will be incorporated into the Project's approval, the City will be able to use code and permit enforcement procedures to ensure implementation of each of the Project's mitigation measures. (See CEQA Guidelines section 15126.4.)

Conditions of Approval Incorporated in Entitlements

Outside the context of CEQA, the City has the legal authority to impose various conditions of approval related to the requested entitlements. For instance, pursuant to Chapter 9.14 (Land Divisions) of Title 9 (Planning & Zoning) of the Municipal Code, there are numerous standard conditions that apply to the proposed Tentative Parcel Map, which include but are not limited to: 1) The site shall be developed in accordance with the approved tentative parcel map on file in the Community Development Department -Planning Division, the Municipal Code regulations, General Plan, and the conditions contained herein. (MC 9.14.020); 2) This tentative map shall expire three

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

years after the approval date of this tentative map unless extended as provided by the City of Moreno Valley Municipal Code; otherwise it shall become null and void and of no effect whatsoever in the event the applicant or any successor in interest fails to properly file a final map before the date of expiration. (MC 9.02.230, 9.14.050, 080); 3) Prior to final map recordation any required trail easements shall be provided.

In addition, pursuant to Section 9.02.070 (Plot Plan) of Chapter 9.02 (Permits and Approvals) of Title 9 (Planning & Zoning) of the Municipal Code, when approving a plot plan, the City shall impose conditions of approval for the project regarding on-site improvements, off-site improvements, the manner in which the site is used and any other conditions as may be deemed necessary to protect the public health, safety and welfare and ensure that the project will be developed in accordance with the purpose and intent of Title 9 (Panning & Zoning). Some of these conditions of approval, include but are not limited to: 1) Prior to improvement plan approval, pavement core samples of existing pavement shall be taken and findings submitted to the City for review and consideration of pavement improvements. The City will determine the adequacy of the existing pavement structural section. If the existing pavement structural section is found to be adequate, the developer may still be required to perform a 2 inch grind and overlay or slurry seal, depending on the severity of existing pavement cracking, as required by the City Engineer. If the existing pavement section is found to be inadequate, the Developer shall replace the pavement to meet or exceed the City's pavement structural section standard; 2) Prior to building final, all required and proposed fences and walls shall be constructed according to the approved plans on file in the Planning Division. (MC 9.080.070); and 3) Prior to building final, all required landscaping and irrigation shall be installed per plan, certified by the Landscape Architect and inspected by the Planning Division. (MC 9.03.040, MC 9.17).

Moreover, like with the CEQA-established mitigation measures, since these conditions or approval will be incorporated into the Project's approval, the City will be able to use code and permit enforcement procedures to ensure implementation of each of the Project’s conditions of approval.

Community Benefits Offered by Applicant

In addition to the CEQA-related Mitigation Measures and the Conditions of Approval related to the requested entitlements, the Applicant has offered numerous “Community Benefits,” as attached to hereto, that fall beyond the City’s legal authority to approve as CEQA-related Mitigation Measures or as the Conditions of Approval related to the requested entitlements. In other words, since the Community Benefits being offered by the Applicant lack sufficient nexus to the potential impacts of the Project, the City lacks the legal authority to unilaterally imposed the Community Benefits as bona fide Mitigation Measures or Conditions of Approval. Notwithstanding above, the Applicant has agreed that the Community Benefits be memorialized as enforceable conditions of approval. As such, since these conditions or approval will be incorporated into the Project's approval, the City will be able to use code and permit enforcement procedures to ensure implementation of each of the Community Benefits offered by the Applicant.

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

As set forth in the attached list of Community Benefits, the Applicant has agreed to provide up to $204,000 to fund and administer an electric vehicle grant program, that will include funding for Heavy Duty Electric Trucks, Medium Duty Electric Trucks, Local Delivery Electric Vehicles and Electric Passenger Vehicles. The Developer shall be responsible for establishing, funding and administering each of the grant programs and provide a hyperlink to each grant program on the City's official website for interested parties to access information about the programs.

The Applicant has also offered to provide $113,000 to fund a Solar Advocacy Fund, Residential Air Filtration Reimbursement Program, Residential Noise Insulation Reimbursement Program and Residential Exterior Pressure Washing Reimbursement Program, in addition to installing additional onsite EV charging stations and at least one APU plug-in for every 35 dock doors at multiple locations within the Project Site where trucks are proposed to park. Furthermore, only electrical appliances shall be used in building office areas, the use of portable or stationary diesel powered generators shall be prohibited unless necessary due to emergency situations or constrained supply and all construction equipment shall meet or be cleaner than Tier 4 standards, except if the general contractor overseeing the Project's construction certifies that it is not feasible to use exclusively Tier 4 equipment due to limited availability. In all events, at least 80% of all construction equipment shall meet or be cleaner than Tier 4 standards throughout the construction phase of the Project. Numerous other Community Benefits are described in the list of Community Benefits attached to this Staff Report.

PUBLIC NOTICE RELATED TO THE PROJECT'S ENTITLEMENTS

Since the proposed Project involves applications for 1) a General Plan Amendment; 2) a Zone Change; 3) a Tentative Parcel Map; and 4) a Plot Plan, each proposed land use entitlement must be reviewed and considered by the Planning Commission in the context of a Public Hearing, as set forth in Sections 9.02.040 (General Plan Amendments), 9.02.050 (Amendments to Zoning Districts or Other Provisions of Title 9), 9.02.070 (Plot Plan), and 9.14.050 (Processing of Tentative Maps) of Title 9 (Planning & Zoning) of the Moreno Valley Municipal Code. Moreover, in addition to providing the notices required under CEQA and/or the CEQA Guidelines, the aforementioned Title 9 (Planning & Zoning) sections require that notice of the proposed Project's Public Hearing before the Planning Commission be provided in accordance with Section 9.02.200 (Public Hearing and Notification Procedures) of Title 9 (Planning & Zoning).

Section 9.02.200 (Public Hearing and Notification Procedures) provides in relevant part that notice of public hearings shall be given by: 1) publication in a newspaper of general circulation within the City at least ten (10) calendar days prior to the public hearing (*see attached Press Enterprise Newspaper Public Notice*); 2) mailing, at least ten (10) calendar days prior to the public hearing, to all owners of property within a radius of six hundred (600) feet from the exterior boundaries of the property involved in the application.

REVIEW AGENCY COMMENTS

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

Staff has coordinated with outside trustee and responsible agencies where applicable, as is the standard review process with these types of development applications.

Statement of Overriding Considerations

Although the Mitigation Measures are recommended to reduce the level of the potential environmental impacts of the proposed Project, after the application of all feasible mitigation measures, staff has determined that the Project would result in a few significant and unavoidable environmental effects. The following significant and unavoidable environmental impacts have been identified in the Final EIR and will require mitigation but cannot be mitigated to a level of insignificance: 1) Aesthetics: Substantial Adverse Effect on a Scenic Vista; 2) Air Quality: Air Quality Management Plan Conflict; 3) Air Quality: Criteria Pollutant Emissions; and 4) Greenhouse Gas Emissions: GHG Emissions Generation. Details of these significant unavoidable adverse impacts are discussed in the Final EIR and are summarized, or were otherwise provided in Section 5.3, *Environmental Effects Which Remain Significant and Unavoidable After Mitigation and Findings*, in the Statement of Facts and Findings.

Notwithstanding the above, when the Lead Agency approves a project with significant environmental effects that will not be avoided or substantially lessened, it must adopt a statement disclosing that because of the project's overriding benefits, it is approving the project despite its environmental harm. (See CEQA Guidelines section 15043.) The Lead Agency must set forth the reasons for its action, based on the final EIR or other information in the record. (See CEQA section 21081(b) and CEQA Guidelines section 15093(a).) This requirement reflects the statutory policy that public agencies must weigh a proposed project's benefits against its unavoidable environmental risks and may find the adverse impacts "acceptable" if the benefits outweigh those effects. (See CEQA section 21081(b) and CEQA Guidelines section 15093(a); see also *Cherry Valley Pass Acres & Neighbors v City of Beaumont* (2010) 190 CA4th 316, *Sierra Club v Contra Costa County* (1992) 10 CA4th 1212 and *San Francisco Ecology Ctr. v City & County of San Francisco* (1975) 48 CA3d 584. In other words, a statement of overriding considerations expresses the "larger, more general reasons for approving the project, such as the need to create new jobs, provide housing, generate taxes, and the like." (See *Concerned Citizens of S. Cent. L.A. v Los Angeles Unified Sch. Dist.* (1994) 24 CA4th 826.)

In light of the foregoing, staff recommends that based on balancing the benefits of the Project against the unavoidable effects which remain, the Planning Commission should recommend that the City Council find that any one of the following Project benefits standing alone would be sufficient to sustain the Statement of Overriding Considerations.

1. Approval of the Project will create maximum employment-generating opportunities for citizens of Moreno Valley and surrounding communities. Development and construction of the site will create both temporary on-site jobs as well as indirectly support local and regional jobs. Additionally, construction spending will create a one-time stimulus to the local and regional economics.

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

2. Approval of the Project will create a Class A speculative light industrial building in Moreno Valley that is designed to meet contemporary industry standards and be economically competitive with similar industrial buildings in the local area and region.
3. Approval of the Project will contribute towards maximizing employment opportunities within the City to improve the jobs-housing balance and to reduce systemic unemployment within the City. The Project will attract businesses that can expedite the delivery of essential goods to consumers and businesses in Moreno Valley and beyond the City boundary.
4. Approval of the Project will create approximately 1,000 new on-site jobs under the warehouse distribution/logistics option and 2,000 new on-site jobs under the e-commerce/fulfillment option.
5. Approval of the Project will result in the development and operation of a state-of-the-art logistics center that takes advantage of existing and planned infrastructure, is technologically feasible to construct, and in the general vicinity of similar industrial logistics and distribution center uses.
6. Approval of the Project will maximize efficient goods movement throughout the region by locating a large format logistics center in close proximity to the Ports of Los Angeles and Long Beach thereby enabling trucks servicing the site to achieve a minimum of two roundtrips per day.
7. Approval of the Project will maximize the use of a large industrial site in the region that is in close proximity to the Ports of Los Angeles and Long Beach, to realize substantial unmet demand in the region, allowing the region to compete on a domestic and international scale through the efficient and cost-effective movement of goods.
8. Approval of the Project will facilitate the development of long-standing underutilized and vacant land.

STAFF RECOMMENDATION

Staff recommends that the Planning Commission take the following actions:

A. That the Planning Commission **ADOPT** Resolution No. 2021-40, attached hereto, **RECOMMENDING** that the City Council:

   1. **APPROVE** that the Final Environmental Impact Report PEN20-0102 for the Moreno Valley Trade Center project including a General Plan Amendment PEN19-0191, a Change of Zone PEN19-0192, a Tentative Parcel Map PEN19-0234, and a Plot Plan PEN19-0193 on file with the Community Development Department, incorporated herein by this reference, has been completed in compliance with the California Environmental Quality Act, that the Planning Commission reviewed and considered the information in the Final EIR and that the Final EIR reflects the City's independent judgement and analysis; and

   2. **ADOPT** the Mitigation Monitoring and Reporting Program for the Final EIR for the proposed the Moreno Valley Trade Center project, attached as Exhibit A.

Attachment: Planning Commission October 28, 2022 Staff Report Without Attachments (All attachments may be obtained at

3. **ADOPT** the Facts, Findings and Statement of Overriding Considerations regarding the Final EIR for the Moreno Valley Trade Center project, attached hereto as Exhibit B; and

B. That the Planning Commission **ADOPT** Resolution No. 2021-41 attached hereto, **RECOMMENDING** that the City Council:

1. **APPROVE** PEN19-0191 General Plan Amendment based on the Recitals, Evidence contained in the Administrative Record and Findings set forth in Resolution No. 2021-41 and any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed changes in the zoning classification and/or redistricting associated with the General Plan Amendment.

C. That the Planning Commission **ADOPT** Resolution No. 2021-42, attached hereto, **RECOMMENDING** that the City Council:

1. **APPROVE** PEN19-0192 Change of Zone based on the Recitals, Evidence contained in the Administrative Record and Findings as set forth in Resolution No. 2021-42 and any necessary and corresponding amendment to the City's Zoning Atlas to reflect the proposed change in the zoning classification and/or redistricting associated with the Change of Zone.

D. That the Planning Commission **ADOPT** Resolution No. 2021-43, attached hereto, **RECOMMENDING** that the City Council:

1. **APPROVE** Tentative Parcel Map PEN19-0234 based on the Recitals, Evidence contained in the Administrative Records and Findings as set forth in Resolution No. 2021-43.

E. That the Planning Commission **ADOPT** Resolution No. 2021-44, attached hereto, **RECOMMENDING** that the City Council:

1. **APPROVE** Plot Plan PEN19-0193 based on the Recitals, Evidence contained in the Administrative Records and Findings as set forth in Resolution No. 2021-44.

F. That the Planning Commission **ADOPT** Resolution No. 2021-45, attached hereto, **RECOMMENDING** that the City Council:

1. **APPROVE** Resolution No. 2021-45 making 145 units available through the City's Density Bonus Program for SB330 based on the Recitals, Evidence contained in the Administrative Records and Findings as set forth in the Resolution.

G. **RECOMMEND** the City Council accept the Community Benefits offered by the Applicant.

RESOLUTION NUMBER 2021-41

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, DENYING GENERAL PLAN AMENDMENT PEN19-0191 TO AMEND THE GENERAL PLAN LAND USE MAP, CHANGING THE LAND USE DESIGNATION FROM RESIDENTIAL (R2) TO BUSINESS PARK/LIGHT INDUSTRIAL (BP) FOR THE PROPERTY LOCATED SOUTH OF EUCALYPTUS AVENUE, WEST OF REDLANDS BOULEVARD, NORTH OF ENCELIA AVENUE, AND EAST OF QUINCY CHANNEL (APN'S 488-340-002 THROUGH 488-340-012) AND THE NECESSARY AND CORRESPONDING AMENDMENTS TO THE CITY'S ZONING ATLAS

WHEREAS, the City of Moreno Valley ("City") is a general law city and a municipal corporation of the State of California, and has the authority to approve amendments to the City's General Plan and the City's Zoning Atlas and;

WHEREAS, MVTC, LLC a Delaware limited liability company (the "Applicant") is proposing the development of a 1,328,853 square-foot, modern light industrial building to be used as a warehouse distribution/logistics center, or, in the alternative, as an ecommerce facility, commonly known as the Moreno Valley Trade Center (the "Project"), which includes associated site improvements, such as but not limited to, drive aisles, landscaping, utility infrastructure, water quality basins, exterior lighting, walls/fencing, and signage, as more fully described in the Draft Environmental Impact Report (DEIR), a copy of which is incorporated herein by this reference as though set forth in full; and

WHEREAS, the proposal is to construct the Project on land situated on Eucalyptus Avenue, west of Redlands Boulevard, north of Encelia Avenue, and east of Quincy Channel (APN'S 488-340-002 through 488-340-012) ("Project Site"); and

WHEREAS, The Applicant has filed an application for the approval of General Plan Amendment PEN19-0191 ("Application") to amend the Moreno Valley General Plan to change the land use designation of the Project Site from Residential (R2) to Business Park/Light Industrial (BP), which shall also require any necessary and corresponding amendments to the City's Zoning Atlas to reflect that zoning classification and/or redistricting of the Project Site shall retain consistency between the Zoning Atlas and the General Plan land use designations; and

WHEREAS, pursuant to the provisions of Section 9.02.200 (Public Hearing and Notification Procedures) of the Moreno Valley Municipal Code and Government Code section 65905, a public hearing was scheduled for October 28, 2021, and notice thereof was duly published and posted, and mailed to all property owners of record within 600 feet of the Site; and

WHEREAS, on October 28, 2021, the public hearing to consider the Application was duly conducted by the Planning Commission at which time all interested persons were provided with an opportunity to testify and to present evidence; and

Attachment: Adopted Planning Commission Resolution No. 2021-41 General Plan Amendment (6209 : Moreno Valley Trade Center/Park)

WHEREAS, on October 28, 2021, in accordance with the provisions of the California Environmental Quality Act (CEQA) and CEQA Guidelines, the Planning Commission denied the Project.

NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY, CALIFORNIA, DOES HEREBY RESOLVE AS FOLLOWS:

Section 1. Recitals and Exhibits

That the foregoing Recitals and attached exhibits are true and correct and are hereby incorporated by this reference.

Section 2. Notice Pursuant to Government Code Section 66020

That pursuant to Government Code section 66020(d)(1), notice is hereby given that the proposed Project is subject to certain fees, dedications, reservations and other exactions as provided herein.

Section 3. Evidence

That the Planning Commission has considered all of the evidence submitted into the Administrative Record related to the Project on file with the Community Development Department, including, but not limited to, the following:

(a) Moreno Valley General Plan and all other relevant provisions contained therein;

(b) City's Zoning Atlas and Title 9 (Planning and Zoning) of the Moreno Valley Municipal Code and all other relevant provisions referenced therein;

(c) Application for General Plan Amendment PEN19-0191 to amend the Moreno Valley General Plan to change the land use designation of the Project Site from Residential (R2) to Business Park/Light Industrial (BP);

(d) Draft EIR and all related notices, studies, reports, public comments and responses thereto;

(e) Proposed Mitigation Monitoring and Reporting Program (MMRP) and the findings and determinations contained therein;

(f) Proposed Statement of Overriding Considerations and the findings and determinations contained therein;

(g) Planning Commission Staff Report and all exhibits, attachments, documents, records and references related thereto and the findings and determinations contained therein;

(h) Presentation and comments submitted at the Planning Commission Public Hearing by City staff and consultants;

(i) Testimony and/or comments submitted at the Planning Commission Public Hearing by the Applicant and its representatives; and

(j) Testimony and/or comments submitted at the Planning Commission Public Hearing by all persons that was provided in written format or correspondence, at, or prior to, the Planning Commission Public Hearing.

Section 4. Findings

Attachment: Adopted Planning Commission Resolution No. 2021-41 General Plan Amendment (6209 : Moreno Valley Trade Center/Park)

That based on the foregoing Recitals and the Evidence contained in the Administrative Record as set forth above, the Planning Commission hereby recommends the City Council finds as follows:

(a) The requested GPA is inconsistent with the existing goals, objectives, policies and programs of the current general plan; and

(b) The proposed amendment will adversely affect the public health, safety or general welfare in that after the application of all feasible mitigation measures, the Project would result in a few significant and unavoidable environmental effects, as identified in the Final EIR, which includes 1) Aesthetics: Substantial Adverse Effect on a Scenic Vista; 2) Air Quality: Air Quality Management Plan Conflict; 3) Air Quality: Criteria Pollutant Emissions; and 4) Greenhouse Gas Emissions: GHG Emissions Generation.

Section 5. **Severability**

That the Planning Commission declares that, should any provision, section, paragraph, sentence or word of this Resolution be rendered or declared invalid by any final court action in a court of competent jurisdiction or by reason of any preemptive legislation, the remaining provisions, sections, paragraphs, sentences or words of this Resolution as hereby adopted shall remain in full force and effect.

Section 6. **Effective Date**

That this Resolution shall take effect immediately upon the date of adoption.

Section 7. **Certification**

That the Secretary of the Planning Commission shall certify to the passage of this Resolution.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

OFFICIAL MINUTES OF THE PLANNING COMMISSION OF THE CITY OF MORENO VALLEY

REGULAR MEETING – 7:00 PM
October 28, 2021

CALL TO ORDER

This regular meeting of the Planning Commission of the City of Moreno Valley was called to order at 7:03 p.m., by Chairperson Korzec in the Council Chambers located at 14177 Frederick Street, Moreno Valley, California.

ROLL CALL

Planning Commission:	Patricia Korzec	Chairperson	Present
	Alvin DeJohnette	Vice Chairperson	Present
	Jeffrey Sims	Commissioner	Present
	Rafael Brugueras	Commissioner	Present
	Omar Cobian	Commissioner	Present

PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was led by Commissioner Brugueras.

APPROVAL OF AGENDA

Motion to approve the Agenda was made by Commissioner Brugueras and seconded Commissioner Sims.

Vote: 5-0
Ayes: Commissioner Brugueras, Commissioner Sims, Commissioner Cobian, Vice Chairperson DeJohnette, and Chairperson Korzec
Action: **Approved**

PUBLIC COMMENTS PROCEDURE

PUBLIC COMMENTS

No Public Comments.

CONSENT CALENDAR

1. Planning Commission - Regular Meeting - Oct 14, 2021 7:00 PM
   Motion to approve the Agenda was made by Commissioner Cobian and seconded Commissioner Brugueras.

Vote: 5-0
Ayes: Commissioner Cobian, Commissioner Brugueras, Commissioner Sims, Vice Chairperson DeJohnette, and Chairperson Korzec

* ALL PLANNING COMMISSION MEETINGS ARE VIDEO/AUDIO RECORDED. THIS RECORD IS AVAILABLE FOR REVIEW 1 BUSINESS DAY AFTER EACH MEETING AND CAN BE ACCESSED VIA THE FOLLOWING LINK http://morenovalleyca.iqm2.com/Citizens/Calendar.aspx

Attachment: Planning Commission Minutes of October 28, 2021 (6209 : Moreno Valley Trade Center/Park)

Action: **Approved**

NON-PUBLIC HEARING ITEMS

No items for discussion.

PUBLIC HEARING ITEMS

1. MORENO VALLEY TRADE CENTER, A PROPOSED GENERAL PLAN AMENDMENT, CHANGE OF ZONE, TENTATIVE PARCEL MAP 37836 TO MERGE 11 PARCELS INTO 1 PARCEL, AND PLOT PLAN FOR AN APPROXIMATELY 1,328,853 SQUARE FOOT WAREHOUSE/DISTRIBUTION BUILDING (Report of: Planning Commission)

Public Hearing Opened: 7:04 PM.

Motion to deny Resolution Number 2021-41 regarding the proposed General Plan Amendment was made by Commissioner Sims and seconded by Commissioner DeJohnette.

Vote: 4-0
Noes: Commissioner Sims, Vice Chairperson DeJohnette, Commissioner Brugueras and Chairperson Korzec.
Recused: Commissioner Cobian
Action: **Approved**

MEMORANDUM

TO: Gabriel Diaz, Associate Planner
City of Moreno Valley
14177 Frederick Street
Moreno Valley, California 92552

FROM: David Ornelas, Senior Project Manager

DATE: May 27, 2022

RE: Moreno Valley Trade Center – Revised Project Evaluation

T&B Planning, Inc. (T&B Planning) is the CEQA consulting firm that prepared the Environmental Impact (EIR) report for the proposed Moreno Valley Trade Center project (PEN19-0191, PEN19-0192, PEN19-0193, and PEN19-0234). The Project was presented to the Moreno Valley City Council on December 7, 2021, but was continued to allow the Applicant an opportunity to investigate modifications to the Project's design that may lessen its impact on the local environment. We understand that the Applicant has since made numerous changes to the design of the Project. At the request of the City of Moreno Valley Community Development Department, Planning Division, T&B Planning has prepared this memorandum to evaluate whether the changes to the Project would: 1) result in new significant environmental impacts that were not disclosed in the Draft EIR; or 2) result in significant impacts that are more severe than the impacts that were disclosed in the Draft EIR.

As supported by the discussion provided on the following pages, T&B Planning's determination is that the changes to the Project would neither result in a new significant environmental impact that was not previously disclosed nor increase the severity of a previously disclosed significant impact. Accordingly, there are no changes needed to the analysis or mitigation measures contained in the Draft EIR and re-circulation of the Draft EIR is not warranted according to the guidance set forth in Section 15088.5 of the CEQA Guidelines. Furthermore, no changes are needed to the analyses or mitigation measures contained in the Final EIR that is under consideration by the Moreno Valley City Council.

I. REVISED PROJECT DESCRIPTION

Section 3.0, *Project Description*, of the Draft EIR included a detailed description of the original Project proposal (hereinafter "Original Project"). The modifications incorporated into Project (hereinafter "Revised Project") are listed below. With the exception of the items listed below, all components of the proposed development and characteristics of proposed building's construction and operation listed in Section 3.0 of the EIR remain applicable to the Revised Project. Figure 1 illustrates the proposed site plan for the Revised Project.

- The Revised Project provides a light industrial building with approximately 1,263,271 square feet (s.f.) of interior floor area, which is a reduction of 65,582 s.f. from the original Project proposal.

Attachment: Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley Trade Center/Park)

- The Revised Project provides 97 loadings docks on the north side of the building and 117 loading docks on the south side of the building, which is a reduction of seven (7) loading docks on the north side of the building and four (4) loading docks on the south side of the building, respectively, from the original Project proposal.
- The Revised Project provides 228 trailer parking spaces, which is 10 fewer trailer spaces than provided by the original Project proposal.
- The Revised Project provides 521 passenger vehicle parking spaces, which is 86 fewer passenger vehicle parking spaces than provided by the original Project proposal.
- The Revised Project eliminates all the driveways that were originally planned along Encelia Avenue. This will eliminate any vehicular ingress and egress along Encelia Avenue. [Note: Since the Revised Project will eliminate all vehicular driveways along Encelia Avenue, the following improvements required of the Original Project will not be needed for the Revised Project: 1) the installation of rubberized asphalt on Encelia Avenue; and 2) the installation of a traffic signal at the intersection of Encelia Avenue and Redlands Avenue.]
- The Revised Project provides a finished floor elevation of 1,732.25 feet above mean seal level (amsl), which is approximately 3.25 feet lower than the finished floor elevation provided by the original Project proposal (1,735.51 amsl). The reduction to finished floor elevation would reduce the perceived height of the building.
- The Revised Project provides a 35-foot-tall, solid earthen berm at the interface between the southern Project Site boundary and Encelia Avenue. The berm would be densely landscaped with trees, shrubs, and groundcovers.
- The Revised Project requires all trucks to access the Project site via Eucalyptus Avenue, thereby eliminating the truck access point from Redlands Boulevard from the original Project proposal.
- The Revised Project provides for the installation of traffic signals at the following locations: 1) on Eucalyptus Avenue at the proposed western driveway to the Project site; and 2) on Redlands Boulevard at the proposed northern driveway to the Project site.
- The Revised Project provides a water quality/detention basin at the southeastern corner of the Project site.

Similar to the Original Project, the Revised Project includes a site design concept for a fulfillment/e-commerce user. As disclosed in the Draft EIR, the fulfillment/e-commerce design concept is not proposed by the Applicant and is not under consideration for approval by the City; the fulfillment/e-commerce design concept is disclosed for informational purposes. All of the bulleted items listed above that were incorporated into the Revised Project also were incorporated into the fulfillment/e-commerce design concept with the exception of the following: 1) Zero (0) loading docks are provided on the south side of the proposed building; 2) 104 trailer parking stalls are provided (all are located on the north side of the building); and 3) 1,381 passenger vehicle parking stalls are provided. Figure 2 illustrates the conceptual site plan for the fulfillment/e-commerce option.

II. REVISED PROJECT ENVIRONMENTAL IMPACT ANALYSIS

This section provides a comparison of the environmental impacts that were disclosed in the Draft EIR against the potential direct, indirect, and cumulatively-considerable environmental impacts that could result from the planning, construction, and/or operation of the Revised Project.

A. Aesthetics

The Draft EIR concluded that the Original Project would result in significant and unavoidable impacts related to scenic vistas. The Draft EIR disclosed that implementation of the Original Project would mostly or completely block views of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) as viewed from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Additionally, the Draft EIR disclosed that implementation of the Original Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site on the north. The Draft EIR concluded the above-listed impacts also would occur under the Original Project's fulfillment/e-commerce development concept.

The Revised Project, including its revised fulfillment/e-commerce development concept, would not avoid the significant and unavoidable impact to scenic vistas that was disclosed in the Draft EIR. The Revised Project would continue to block views of Reche Canyon, the Badlands, and San Bernardino Mountains from the Encelia Avenue segment west of Shubert Street. Notwithstanding, the Revised Project would construct a earthen berm that is covered by densely planted landscaping which would provide a more complementary visual transition to the established residential community to the south of Encelia Avenue than the relatively open view into an industrial facility offered by the Original Project. Although the perceived height of the Revised Project would be approximately three (3) feet shorter than the Original Project, due to the lowering of the proposed finished floor elevation, this change would have no effect on significant impacts to scenic views of Mount Russell and its foothills from Eucalyptus Avenue.

Other impacts to aesthetics would be identical under the Revised Project to those disclosed in the Draft EIR: 1) The Project site does not contain scenic resources and is not located within the viewshed of a scenic highway; therefore, the Revised Project would not result in the loss of scenic resources on the Project site; 2) The Revised Project would not conflict with applicable regulations governing scenic quality; and 3) The Revised Project would not introduce any design features that produce substantial light or glare and the Revised Project would be required to comply with the Moreno Valley Municipal Code requirements related to artificial lighting to preclude substantial light trespass and sky glow.

Consistent with the information disclosed in the Draft EIR, the Revised Project's effect on aesthetics would be significant and unavoidable. The Revised Project would not result in impacts to aesthetics that were not previously disclosed in the Draft EIR.

B. Air Quality

The Draft EIR concluded that construction of the Original Project would result in less than significant impacts (both direct and cumulative) from regional and localized criteria air pollutant emissions. The Revised Project would

Attachment: Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley Trade Center/Park)

result in construction activities across the entire Project site and would utilize similar construction equipment (and in similar quantities) as disclosed in the Draft EIR for the Original Project. Therefore, the peak daily construction activities and air pollutant emissions for the Revised Project, including under its revised fulfillment/e-commerce development concept, are expected to be similar to the levels disclosed in the Draft EIR despite the Revised Project resulting in the construction of a smaller building. Based on the foregoing information, the Revised Project would not result in construction-related regional or localized air quality impacts that were not disclosed in the Draft EIR. It should be noted that the Draft EIR identified several MMs for construction activities to ensure compliance with State and local air quality regulations (i.e., MMs 4.2-1 through 4.2-4) even though construction-related air quality impacts would be less than significant. MMs 4.2-1 through 4.2-4 would continue to apply to the Revised Project.

The Draft EIR disclosed that operation of the Original Project would result in a significant environmental impact (on a direct and cumulative basis) from nitrogen oxide (NO_X) emissions and a less than significant impact from volatile organic compound (VOC), carbon monoxide (CO), sulfur oxide (SO_X), and particulate matter (PM_{10} and $PM_{2.5}$) emissions. MMs were required to address the significant impact from operational NO_X emissions (i.e., MMs 4.2-5 through 4.2-11); however, the Draft EIR disclosed that these MMs would not be adequate to reduce the operational NO_X impact to a less than significant level and no additional feasible MMs were available to avoid or further lessen the impact. The consulting firm Urban Crossroads conducted an analysis of emissions that would result from operation of the Revised Project. The operational analysis of the Revised Project found that operation of the Revised Project, including its revised fulfillment/e-commerce development concept, would reduce emissions of all criteria pollutants below the levels disclosed in the Draft EIR but the emissions reductions would not be sufficient to avoid the significant and unavoidable direct and cumulative impact from NO_X emissions that was disclosed in the Draft EIR (Urban Crossroads, 2022a, p. 3; Urban Crossroads, 2022b, p. 3). The Revised Project would be required to comply with all mitigation measures from the Draft EIR that address operational NO_X emissions. Based on the information above, operation of the Revised Project would not result in regional air quality impacts that were not disclosed in the Draft EIR.

The Draft EIR disclosed that operation of the Original Project would generate less than significant localized air pollutant emissions during operation – both localized criteria pollutant emissions and localized diesel particulate matter emissions. Because the Revised Project would feature less intensive building operations – due to a smaller building size and reduced heavy truck activity – operation of the Revised Project, including its fulfillment/e-commerce development concept, would result in localized criteria pollutant emissions that are less than what was disclosed in the Draft EIR and, also, would result in health risk impacts from diesel particulate matter emissions that are lower than what was disclosed in the Draft EIR (Urban Crossroads, 2022a, p. 5; Urban Crossroads, 2022b, p. 5). Based on the information above, operation of the Revised Project would not result in localized air quality impacts that were not disclosed in the Draft EIR.

Like the Original Project, the Revised Project would generate odors during short-term construction activities (e.g., diesel equipment exhaust, architectural coatings, asphalt) and long-term operation (e.g., diesel exhaust). However, similar to the Original Project, these odors would occur intermittently, be of short-term duration, and would not be substantial. Long-term operation would not create objectionable odors affecting a substantial number of people and impacts would be less than significant with compliance with mandatory regulatory requirements. The Revised Project would not result in new significant impacts related to air quality than those previously disclosed in the Draft EIR.

Attachment: Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley Trade Center/Park)

As demonstrated by the preceding analysis, construction and operation of the Revised Project would result in similar or reduced impact to air quality when compared to the Original Project. Implementation of the Revised Project would not result in direct or cumulative air quality impacts that were not disclosed in the Draft EIR.

C. Biological Resources

The Revised Project would have an identical physical development footprint as the Original Project and, thus, the Revised Project would result in biological resources impacts that are the same as those disclosed in the Draft EIR. Therefore, the information disclosed in the Draft EIR related to biological resources impacts remains applicable to the Revised Project and the Revised Project would not result in impacts that were not previously disclosed in the Draft EIR. All mitigation measures (MMs) provided by the Draft EIR to address biological resources impacts (i.e., MMs 4.3-1 through 4.3-3) would be required for the Revised Project. With application of required mitigation, the Revised Project would result in less than significant impact to biological resources, which is the same conclusion drawn by the Draft EIR.

D. Cultural and Tribal Cultural Resources

The Revised Project would have an identical physical development footprint as the Original Project, although the Revised Project would have deeper excavations than the Original Project due to the lowering of the finished floor elevation. Implementation of the Revised Project would have no impact to known pre/proto-historic or historic archaeological resources or tribal cultural resources but would have the potential to uncover masked or buried resources during construction, which are the same conclusions made by the Draft EIR. The Revised Project would be required to comply with MMs 4.4-1 through 4.4-6 from the Draft EIR, which provide a protocol for the investigation and protection or removal of cultural and tribal cultural resources in the event such resources are discovered during construction. With application of the required mitigation, the Revised Project would result in less than significant impacts to cultural and tribal cultural resources. Based on the preceding analysis, the Revised Project would not result in impacts to cultural and/or tribal cultural resources that were not disclosed in the Draft EIR.

E. Energy

The Draft EIR concluded that the Original Project would not result in inefficient, wasteful, or unnecessary consumption of energy resources and, thus, would result in a less than significant environmental impact. The Revised Project would feature less intensive building operations than the Original Project – due to a smaller building size and reduced heavy truck activity – thus, operation of the Revised Project, including its revised fulfillment/e-commerce development concept, would consume less electricity, natural gas, and transportation fuels than the levels disclosed in the Draft EIR (Urban Crossroads, 2022a, p. 4; Urban Crossroads, 2022b, p. 4). Because the Revised Project would consume less energy resources than the Original Project, implementation of the Revised Project would not result in environmental impacts related to energy use/consumption that were not disclosed in the Draft EIR.

F. Geology & Soils

The Revised Project would have an identical physical development footprint as the Original Project, although the Revised Project would have deeper excavations than the Original Project due to the lowering of the finished floor

Attachment: Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley Trade Center/Park)

elevation. The Revised Project would have a less than significant impact related to soil erosion during its construction and operation phases due to mandatory compliance with federal, State, and local water quality standards – this is the same conclusion drawn by the Draft EIR. The Revised Project would be required to comply with the same regulatory and design requirements that were disclosed in the Draft EIR to preclude substantial hazards associated with seismic ground shaking and the Project site's geologic conditions/characteristics. The Revised Project would result in less-than-significant impacts related to geology and soils hazards, which is the same conclusion drawn by the Draft EIR.

As disclosed in the Draft EIR, the Project site is underlain by soils with a high sensitivity for paleontological resources; therefore, the Revised Project has the potential to impact paleontological resources (the Original Project had the same impact). All MMs provided by the Draft EIR to address paleontological resources impacts (i.e., MMs 4.6-1 through 4.6-4) would be required for the Revised Project. With application of required mitigation, the Revised Project would result in less than significant impacts to paleontological resources, which is the same conclusion drawn by the Draft EIR.

Based on the foregoing analysis, the Revised Project would not result in geology and soils impacts that were not already disclosed in the Draft EIR.

G. Greenhouse Gas Emissions

The Draft EIR disclosed that implementation of Original Project would result in a cumulatively considerable environmental impact from greenhouse gas (GHG) emissions. MMs were required to reduce GHG emissions from the Original Project (i.e., MMs 4.2-5 through 4.2-11); however, the Draft EIR disclosed that these MMs would not be adequate to reduce the GHG impact to a less than significant level and no additional feasible MMs were available to avoid or further lessen the impact. Urban Crossroads performed an analysis of the GHG emissions that would result from the Revised Project. The analysis fund that implementation of the Revised Project, including its fulfillment/e-commerce development concept, would reduce GHG emissions below the levels disclosed in the Draft EIR but the emissions reductions would not be sufficient to avoid the significant and unavoidable cumulative impact from GHG emissions that was disclosed in the Draft EIR (Urban Crossroads, 2022a, p. 3; Urban Crossroads, 2022b, p. 3). The Revised Project would be required to comply with all mitigation measures from the Draft EIR that address GHG emissions. Based on the information above, operation of the Revised Project would not result in a GHG emissions impacts that were not disclosed in the Draft EIR.

H. Hazards & Hazardous Materials

The Draft EIR concluded that the Original Project would not create a significant hazard to the public or the environment related to the use, handling, storage, and/or transport of hazardous materials. Notwithstanding, the Draft EIR included several MMs (i.e., MM 4.8-1 through 4.8-3) to ensure compliance with applicable federal, State, and local regulations addressing hazardous materials during demolition and construction activities on the Project Site. The Revised Project requires similar construction activities/equipment as the Original Project would operate the same land uses on the Project site as the Original Project and, therefore, would have a similar, less than significant impact related to hazards and hazardous materials. The Revised Project would be required to comply with MMs 4.8-1 through 4.8-3. The Revised Project would not result in hazards and hazardous materials impacts that were not previously disclosed in the Draft EIR.

Attachment: Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley Trade Center/Park)

I. Hydrology & Water Quality

The Draft EIR concluded that the Original Project would result in less than significant impacts to hydrology and water quality and no mitigation was required. The Revised Project would be required to implement a Storm Water Pollution Prevention Program during construction and a Water Quality Management Plan during operation to ensure that stormwater runoff does not contain substantial pollutant concentrations. The Revised Project would change the design of the Original Project's on-site water quality/detention basin system; however, the hydrology analysis performed by Thienes Engineering demonstrates that the Revised Project, including its e-commerce development concept, would not generate a volume or rate of stormwater runoff discharge that would exceed existing (i.e., pre-development) runoff volumes or rates or create a flood hazard downstream (Thienes, 2022a; Thienes, 2022b). The Revised Project would not result in impacts to hydrology and water quality that were not disclosed in the Draft EIR.

J. Land Use & Planning

The Draft EIR concluded that the Original Project would not physically divide an established community or result in significant land use and planning conflicts in the context of compliance with applicable environmental plans, policies, and regulations. Because the Revised Project would have an identical development footprint as the Original Project and proposes the same land use with a similar (but reduced intensity) development plan than the Original Project, the information disclosed in the Draft EIR and the conclusions drawn by the Draft EIR related to potential land use and planning impacts remain applicable to the Revised Project. The Revised Project would not result in impacts to land use and planning that were not already disclosed in the Draft EIR.

K. Noise

The Draft EIR concluded that the Original Project would not generate noise or vibration during construction that exceeded the standards established by the Moreno Valley Municipal Code. The Revised Project would result in construction activities across the entire Project site and would utilize similar construction equipment (and in similar quantities) as disclosed in the Draft EIR for the Original Project. Therefore, the peak daily construction activities and resulting construction noise and vibration for the Revised Project, including under its revised fulfillment/e-commerce development concept, are expected to be similar to the levels disclosed in the Draft EIR despite the Revised Project resulting in the construction of a smaller building. Based on the foregoing information, the Revised Project would not result in construction-related noise or vibration impacts that were not disclosed in the Draft EIR.

The Draft EIR also concluded that operation of the Original Project would not generate noise or vibration that exceeded the standards established by the Moreno Valley Municipal Code. The Revised Project would reduce the intensity of operations on the Project site, as compared to the Original Project, due to a reduction of building area and heavy truck activity (which results in a concomitant reduction in loading/unloading activity), which would result in lower operational noise and vibration levels than the Original Project. Based on a noise analysis performed by Urban Crossroads, the reduced intensity of operations on the Project site coupled with addition of the 35-foot-tall earthen berm along the southern Project site boundary would allow the Revised Project, including its fulfillment/e-commerce development concept, to achieve operational noise levels that are substantially lower than the Original Project – and lower than existing local ambient noise levels (Urban Crossroads, 2022c, pp. 1-2). For comparison, the established residential community located south of Encelia Avenue would experience noise

Attachment: Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley Trade Center/Park)

levels from the Revised Project that are approximately 56% less than the noise levels disclosed in the Draft EIR for the Original Project (ibid.). Accordingly, the Revised Project would not result in operational noise or vibration impacts that were not previously disclosed in the Draft EIR.

L. Transportation

The Draft EIR concluded that the Original Project would not conflict with local transportation plans and policies and, also, would generate a less than significant amount of vehicle miles traveled (VMT). The Revised Project, including its revised fulfillment/e-commerce development concept, would result in less passenger vehicle and heavy truck traffic than disclosed in the Draft EIR due to operation of a smaller (Translutions, 2022a). In addition, the Revised Project would result in different traffic patterns than disclosed in the Draft EIR due to the elimination of all access points to Encelia Avenue (which would eliminate all passenger vehicle traffic from the Project Site onto Encelia Avenue) and the elimination of a heavy truck access point on Redlands Boulevard (which would funnel all heavy trucks to the proposed driveways on Eucalyptus Avenue). According to analyses performed by the consulting firm Translutions, the revised traffic patterns of the Revised Project would not conflict with any local transportation plans and policies (Translutions, 2022b; Translutions, 2022c). Additionally, Translutions determined that the Revised Project would result in similar, less than significant impacts from VMT as the Original Project (Translutions, 2022a). Based on the information above, the Revised Project would not result in transportation impacts that were not previously disclosed in the Draft EIR.

M. Utilities & Service Systems

The Draft EIR concluded that the Original Project would result in less than significant impacts to utilities, including to wet utilities (water and sewer), storm drain facilities, dry utilities (electricity), and to public service systems, including water supply, sewer treatment, and solid waste disposal. Because the Revised Project would provide a smaller building than the Original Project (and would result in fewer employees working on the Project site), the Revised Project would have a lower demand for public utilities and service systems than the levels disclosed in the Draft EIR. Implementation of the Revised Project would not result in impacts to utilities and services that were not disclosed in the Draft EIR.

INTRODUCTION

A: PROJECT LOCATION

The project site is located at southwest corner of Eucalyptus Avenue and Redlands Boulevard in the City of Moreno Valley. Encelia Avenue is adjacent to the southerly property line. Please see the next page for vicinity map.

B: STUDY PURPOSE

The purpose of this study is to determine the existing and proposed condition peak flow rates for various storm events for the site. Discharge from the project site ultimately drains to an existing storm drain in Redlands Boulevard.

C: PROJECT STAFF:

Thienes Engineering staff involved in this study include:

DISCUSSION

The project site encompasses approximately 72.73 acres. However, several acres along the westerly property line are within an existing drainage channel (Quincy Wash) and will not be disturbed. Here, sheet piles will be constructed within the property site to protect the site from the Wash. Proposed improvements include one warehouse type building with approximately 1,328,853 square feet. There are truck yard areas on the northerly and southerly sides of the building. Vehicle parking is primarily on the easterly side of the property with some additional parking areas along the westerly drive aisle. There is a water quality/detention basin located along the southerly side of the side adjacent to Encelia Avenue. Additional landscaped areas are located adjacent to the streets and smaller areas throughout the project site.

Master Drainage Plan

The project site is tabled to a storm drain system in Redlands Boulevard (Moreno MDP Line F-2). At this time, only portions of the Master Plan Storm Drain system are constructed. Recent improvements to the north of the project site (Aldi Foods) constructed a portion of the ultimate storm drain in Redlands Boulevard. This is a 60"-72" storm drain (plans prepared by Huitt-Zollars) that connects to an existing 51" storm drain in Redlands Boulevard approximately 200' north of Eucalyptus Avenue and continues approximately 350' south of Eucalyptus Avenue to where it daylights into an existing unimproved earthen channel. This storm drain and channel is located at the easterly portion of the project site.

Runoff continues southerly in the unimproved earthen channel to an existing headwall located northerly of Dracaea Avenue. This is the upstream portion of Riverside County Flood Control and Water Conservation District storm drain Line "F-2". This is an existing 42" storm drain system that does not appear to be adequately sized for the peak flow rates specified in the recently constructed upstream storm drain system. The existing storm drain continues southerly past Brodiaea Avenue and discharges into an existing earthen channel (Line "F").

The Master Drainage Plan indicates a storm drain system in Eucalyptus Avenue (Lateral F-16). The necessary portions of this storm drain system was constructed with the Aldi Foods development to the north. In a memo dated December 23, 2020, Riverside County Flood Control and Water Conservation District (R.C.F.C.&W.C.D.) acknowledges that the "existing facility is functionally equivalent to Line F-16, and the remaining unconstructed portion is not necessary to provide flood protection." See Appendix "A" for a copy of this memo.

The Master Drainage Plan also indicates a storm drain system in Encelia Avenue (Lateral F-17) ranging from 42" to 60". The development of the project site will utilize a detention basin and onsite storm drain systems that will greatly reduce flow to Encelia Avenue such that only a shorter and smaller storm drain will be necessary in the street. In the same memo, R.C.F.C.&W.C.D. states "Since these facilities together collect and convey the

same area that was tabled to Line F-17, it is our opinion that the existing facility is functionally equivalent to Line F-17".

See Appendix "A" for reference existing storm drain plans and a portion of the Master Drainage Plan.

Existing Condition

The project site is generally a vacant lot with natural grasses and weeds. The southeasterly portion of the site is an existing plant nursery. The nursery has a few small structures and appears unpaved. The westerly portion of the property is an unimproved drainage channel (Quincy Wash) and is not tributary to the project site.

Runoff from the site generally drains from north to south to Encelia Avenue at several locations (nodes 103, 105, 106, and 107 on existing condition hydrology map). Encelia Avenue drains from west to east to Redlands Boulevard ultimately to the existing channel adjacent to Redlands Boulevard.

Runoff from Redlands Boulevard flows southerly towards the intersection with Encilia Avenue and node 107. The 100-year Rational Method peak flow rate from the project site and adjacent streets approximately 108.4 cfs.

Runoff in Eucalyptus flows west to east and is intercepted by several riser inlet structures (nodes 112, 121, and 131). The respective 100-year Rational Method flow rates to each risers are approximately 4.2 cfs, 1.6 cfs, and 0.90 cfs.

See Appendix "B" for existing condition Rational Method calculations and Appendix "D" for existing condition hydrology map.

Existing condition hydrographs were established for various storm events. These peak flow rates and volumes are summarized below in the Detention discussion.

Proposed Condition Hydrology

Runoff from the northerly portion of the building, northerly truckyard and easterly parking lots (Nodes 100-115) will be captured in a proposed onsite storm drain system and conveyed southerly to an underground CMP detention system. Runoff from the southerly and westerly portions of the site (Nodes 200-219) will be conveyed to the southerly truck yard and confluenced with the runoff from the north.

Runoff from the detention basin in the southeasterly corner of the site (Node 220) will be confluenced in the proposed system and conveyed easterly. The 100-year peak flow rate from the project site is approximately 154.7 cfs.

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Discharge from the basin will be conveyed easterly through the project site in a proposed storm drain and connect to the proposed extension of the public storm drain system in Redlands Boulevard. This will eliminate runoff to Encelia Avenue as well as the need for Master Drainage Plan Lateral "F-17", as previously mentioned in R.C.F.C.&W.C.D. memo dated December 23, 2020. The proposed public storm drain will be sized to include the ultimate peak flow rates upstream as well as the discharge from the detention basin. Final design will dictate exact pipe sizes. The public storm drain will continue south in place of the open earth channel to the existing 42" storm drain near Dracaea Avenue. The existing headwall will be removed and the proposed drain will connect to the existing system.

The existing 42" downstream storm drain system does not have the same capacity as the proposed 78" storm drain system. To avoid overburdening the existing 42" storm drain, a relief system will be designed to ensure that flow not allowed into the existing facility can discharge to the street. This will emulate existing conditions where runoff that is not currently allowed into the storm drain (via existing headwall adjacent to the Redlands Avenue) can then drain to the street. Regardless of how the storm drain systems connect, runoff exceeding the capacity of the 42" storm drain system remains on westerly surface of Redlands Avenue. The final design shall be to the satisfaction of the City Manager or City Engineer.

The landscaped areas adjacent to Encelia Avenue will sheet flow to the street and join the street runoff flowing easterly towards the intersection with Redlands Boulevard (nodes 600-604). The runoff will be intercepted by a catch basin in Encilia Avenue and will enter the proposed public storm drain in Redlands Boulevard. The 100-year Rational Method peak runoff from these areas is approximately 7.1 cfs. With the proposed onsite improvements, this is the only drainage system required in Encilia Avenue.

The landscaped frontage along Eucalyptus Avenue will also drain to the street. Catch Basins at nodes 502 and 511 will intercept street and landscape runoff and convey it to the existing 54" storm drain in Eucalyptus Avenue. The 100-year Rational Method peak runoff to these nodes will be approximately 4.4 cfs and 2.8 cfs respectively.

Runoff from Redlands Boulevard and the adjacent project frontage will flow southerly within Redlands Boulevard to a catch basin near the intersection with Encilia Avenue (nodes 520-522). The 100-year Rational Method peak runoff to node 522 will be approximately 4.9 cfs.

Approximately 2.50 acres of area adjacent to the Quincy Wash at the westerly portion of the site will remain undisturbed. The landscaped frontage along Redlands Boulevard will produce a similar amount of runoff as the existing condition and will drain directly to the street.

See Appendix "B" for proposed condition hydrology calculations and Appendix "D" for proposed condition hydrology map.

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Detention

Since downstream facilities do not appear to have capacity for the increase in peak flow and volume from the proposed commercial project, detention will be required to limit runoff to no more than that under existing conditions. Detention analysis is considered for the 2-, 5-, 10- and 100-year storm events. Riverside County allows "preliminary sizing of increased runoff basin may be based on the difference in volume between the developed condition and the pre-developed condition for the 24-hour duration event for the 10-year return frequency."

1-, 3-, 6-, and 24-hour hydrographs were established for all areas tributary to the detention basin for the 2-, 5-, 10- and 100-year events for both existing (undeveloped) and proposed conditions. For existing conditions, the land use is considered "open brush, poor cover". Proposed conditions assume all commercial development. Rainfall values are taken from the Riverside County Hydrology Manual. For the 2- and 5-year events, the loss rate is determined using an AMC I condition. For the 10-year event, AMC II was used and for the 100-year event AMC III was used.

Note that not all area of the project site drains to the detention basin, thus the areas used for the detention analysis are slightly smaller than the total project site. Areas not tributary to the detention basin are the areas to the west and south of the site. It is assumed that the landscaped areas produce about the same runoff rates and volumes as the undeveloped site.

The following table summarizes existing and proposed condition peak flow rates and volumes associated with the area to the detention basin. From the table, the largest difference in volume is approximately 12.25 acre-feet (10-year 24-hour event). The largest difference in peak flow rate is about 46.3 cfs (5-year 1-hour event). For preliminary sizing, the detention basin will be sized to detain the largest difference in volume. The preliminary underground CMP system will be sized to match this volume. The southeasterly basin meets the surface area and volume requirements necessary for water quality purposes per separate Water Quality Management Plan.

Final design will dictate the outlet features that will limit runoff from all of the above events to less than existing conditions. The landscaped areas tributary to the street would yield peak flow rates similar to existing condition and are not included in the hydrographs.

See Appendix "C" for existing and proposed condition hydrographs.

The following table summarizes existing and proposed condition hydrographs:

BASIN SUMMARY TABLE

Return Event (year)	Storm Duration (hour)	Existing Total Flow (cfs)	Existing Total Volume (ac-ft)	Proposed Total Flow (cfs)	Proposed Total Volume (ac-ft)	Peak Flow Difference (cfs)	Volume Difference (ac-ft)
100	1	131.5	5.89	177.0	6.38	45.5	0.49

Methodology

Hydrology calculations were computed using Riverside County Rational Method program (by AES software). Hydrograph were computed using CIVILD software. The soil type is "B" per Riverside County Hydrology Manual. See Appendix "A" for reference material from the Riverside County Hydrology Manual.

RIVERSIDE COUNTY FLOOD CONTROL
AND WATER CONSERVATION DISTRICT
December 23, 2020

Mr. Michael D Lloyd
Assistant City Engineer
Engineering Division
City of Moreno Valley
14177 Frederick Street
Moreno Valley, CA 92552-0805

Dear Mr. Lloyd:

Re: Thienes Engineering PEN 19-0193
Account No. 137-0-3-75325

As requested by the City of Moreno Valley (City), the Riverside County Flood Control District (District) received the following for review on December 1, 2020:

1. Letter from Moreno Valley, dated November 12, 2020
2. Preliminary Hydrology Calculations, dated October 27, 2020
3. Preliminary Grading Plan (13 sheets, with different dates)
4. PWQMP Report, dated March 5, 2020

The District has reviewed these documents as requested in the City's letter, and has also tried to identify potential areas of concern, and has the following comments:

Line-16

The City stated in their request that the developer wished to "eliminate the proposed westerly portion of Moreno Master Drainage Plan (MMDP) Line F-16 based on the premise that it is unnecessary to construct due to the existing development to the north of the MMDP line." The existing development (PM36207 on APN 488-330-040) constructed a basin which outlets to a pipe in Eucalyptus Avenue which connect to Line F-2 in Redland Boulevard. The pipe was previously accepted for maintenance by the District. Since the pipe and basin together collect and convey the same area that was tabled to Line F-16, it is our opinion that, so long as the basin is in place, the existing facility is functionally equivalent to Line F-16, and the remaining unconstructed portion is not necessary to provide flood protection.

Line F-17

The City stated in their request that the developer wished to "eliminate the proposed MMDP Line F-17, based on the premise that it is unnecessary to construct due to the proposed developer's water quality and detention facilities." The Moreno MDP proposed Line F-17 as a 42 to 60 inch RCP conveying 200 cfs to Line F-2. The developer proposed an onsite basin and a 42" HDPE within the development conveying on site flows to Line F-2, and a catch basin in Encelia conveying street runoff to Line F-2. Since these facilities together collect and convey the same area that was tabled to Line F-17, it is our opinion that the existing facility is functionally equivalent to Line F-17.

It should be noted that since the proposed pipe is within private right of way and is proposed as HDPE, the District will not maintain it. The basin and storm drain facility will be developer maintained. However, if the design is modified to meet District standards, a public agency could maintain the storm drain and/or basin. At a minimum, the storm drain would need to be moved to the street and constructing with RCP instead of HDPE, and the basin would need to handle water quality and the 100-year route down separately and otherwise be designed to meet out meet District requirements for Operation and Maintenance. See increased runoff criteria and the LID BMP handbook for basin design requirements. Link: http://rcflood.org/npdes/LIDBMP.aspx

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

City of Moreno Valley
Re: Thienes Engineering PEN 19-0193, Account No. 137-0-3-7535

235845

Also note that Line F-17 is not part of the Moreno Area Drainage Plan (ADP) and therefore is not eligible for ADP credit.

Line F-2

The developer is proposing to build a portion of Line F-2 in Redlands Avenue. The MMDP proposed Line F-2 between Eucalyptus and Encelia as a 72" RCP conveying 100-year flowrate of 535 cfs. The developer's plans don't provide details for their proposed segment of Line F-2, or even the limits of what they will be constructing, but the hydrology map identifies it as a 72" RCP. The District has not received enough information to comment on this facility. It should be noted that the existing portion of Line F-2 downstream of this project is not sized to convey the 100 year flowrate, and the MMDP proposes that it will be improved or replaced in the future to increase the current 10-year capacity to the 100 year storm.

Quincy Channel / Line G-7

The developer is proposing vinyl sheetpile along the natural Quincy wash, which the MMDP proposes as a trapezoidal channel called Line G-7. The sheetpile is proposed some distance outside of the limits of the MMDP proposed channel. While the sheetpile may protect the site from erosion, the capacity of the existing wash is unknown. The site may not be protected from the 100-year storm until the ultimate channel is constructed or erosion occurs, and therefore may not be functionally equivalent in the interim. Additionally, it should be noted that the District will not maintain the proposed sheet piles.

Hydrology Report

The City should be aware of the following District comments on the developer's hydrology study dated October 27, 2020.

1. The rainfall used should be consistent with those used in the Moreno MDP, which were based on the version of NOAA Atlas 14 that was available when the MMDP was updated. The MMDP report provides a table of rainfall values used.
2. The cover type used for node 200-204 "proposed" hydrology should be commercial cover or some other type with a high impervious percentage, since this area is proposed as a street.
3. AMC 3 was used for the 100-year basin hydrology. This is not typically recommended per the District's hydrology manual. This should be explained or corrected.

Any questions pertaining to this project may be directed to Kelly O'Sullivan of this office at 951-955-8851 or kosulliv@rivco.org.

Very truly yours,

Deborah de Chambeau

English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
EXISTING CONDITION 5-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.030
Lag time = 0.159 Hr.
Lag time = 9.56 Min.
25% of lag time = 2.39 Min.
40% of lag time = 3.82 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 5.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 2.394(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 2.394(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	76.00	0.000

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-1	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
76.0	58.2	0.488	0.000	0.488	1.000	0.488
					Sum (F) =	0.488

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

3828EX5245

Area averaged mean soil loss (F) (In/Hr) = 0.488
Minimum soil loss rate ((In/Hr)) = 0.244
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

English (in-lb) Input Units Used
English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
EXISTING CONDITION 10-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.030
Lag time = 0.159 Hr.
Lag time = 9.56 Min.
25% of lag time = 2.39 Min.
40% of lag time = 3.82 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 10.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 2.881(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 2.881(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	76.00	0.000

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-2	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
76.0	76.0	0.291	0.000	0.291	1.000	0.291
					Sum (F) =	0.291

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

3828EX102410

Area averaged mean soil loss (F) (In/Hr) = 0.291
Minimum soil loss rate ((In/Hr)) = 0.146
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
EXISTING CONDITION 100-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.030
Lag time = 0.159 Hr.
Lag time = 9.56 Min.
25% of lag time = 2.39 Min.
40% of lag time = 3.82 Min.
Unit time = 5.00 Min.
Duration of storm = 1 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	0.50	33.55

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.20	80.52

STORM EVENT (YEAR) = 100.00
Area Averaged 2-Year Rainfall = 0.500(In)
Area Averaged 100-Year Rainfall = 1.200(In)

Point rain (area averaged) = 1.200(In)
Areal adjustment factor = 99.94 %
Adjusted average point rain = 1.199(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	76.00	0.000

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-3	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
76.0	88.6	0.146	0.000	0.146	1.000	0.146
					Sum (F) =	0.146

Area averaged mean soil loss (F) (In/Hr) = 0.146
Minimum soil loss rate ((In/Hr)) = 0.073
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

Slope of intensity-duration curve for a 1 hour storm =0.5000

English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
EXISTING CONDITION 100-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.030
Lag time = 0.159 Hr.
Lag time = 9.56 Min.
25% of lag time = 2.39 Min.
40% of lag time = 3.82 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 100.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 4.500(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 4.499(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	76.00	0.000

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-3	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
76.0	88.6	0.146	0.000	0.146	1.000	0.146
					Sum (F) =	0.146

Area averaged mean soil loss (F) (In/Hr) = 0.146
Minimum soil loss rate ((In/Hr)) = 0.073
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

Riverside County Synthetic Unit Hydrology Method
RCFC & WCD Manual date - April 1978

Program License Serial Number 6400

English (in-lb) Input Units Used
English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
PROPOSED CONDITION 2-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.015
Lag time = 0.080 Hr.
Lag time = 4.78 Min.
25% of lag time = 1.19 Min.
40% of lag time = 1.91 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 2.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 1.750(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 1.750(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	56.00	0.900

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-1	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
56.0	36.0	0.706	0.900	0.134	1.000	0.134
					Sum (F) =	0.134

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Area averaged mean soil loss (F) (In/Hr) = 0.134
Minimum soil loss rate ((In/Hr)) = 0.067
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.100

U n i t H y d r o g r a p h
VALLEY S-Curve

Unit Hydrograph Data

Unit time period (hrs)		Time % of lag	Distribution Graph %	Unit Hydrograph (CFS)
1	0.083	104.614	20.612	13.939
2	0.167	209.229	48.679	32.919

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
PROPOSED CONDITION 5-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.015
Lag time = 0.080 Hr.
Lag time = 4.78 Min.
25% of lag time = 1.19 Min.
40% of lag time = 1.91 Min.
Unit time = 5.00 Min.
Duration of storm = 1 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	0.50	33.55

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.20	80.52

STORM EVENT (YEAR) = 5.00
Area Averaged 2-Year Rainfall = 0.500(In)
Area Averaged 100-Year Rainfall = 1.200(In)

Point rain (area averaged) = 0.664(In)
Areal adjustment factor = 99.94 %
Adjusted average point rain = 0.664(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	56.00	0.900

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-1	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
56.0	36.0	0.706	0.900	0.134	1.000	0.134
					Sum (F) =	0.134

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Area averaged mean soil loss (F) (In/Hr) = 0.134
Minimum soil loss rate ((In/Hr)) = 0.067
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.100

Slope of intensity-duration curve for a 1 hour storm =0.5000

TEI JOB 3828
OPTION 1 - HIGH CUBE
PROPOSED CONDITION 5-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.015
Lag time = 0.080 Hr.
Lag time = 4.78 Min.
25% of lag time = 1.19 Min.
40% of lag time = 1.91 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 5.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 2.394(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 2.394(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	56.00	0.900

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-1	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
56.0	36.0	0.706	0.900	0.134	1.000	0.134
					Sum (F) =	0.134

Attachment: Preliminary Hydrology Report (High Cube) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Area averaged mean soil loss (F) (In/Hr) = 0.134
Minimum soil loss rate ((In/Hr)) = 0.067
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.100

English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
PROPOSED CONDITION 100-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.015
Lag time = 0.080 Hr.
Lag time = 4.78 Min.
25% of lag time = 1.19 Min.
40% of lag time = 1.91 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 100.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 4.500(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 4.499(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	56.00	0.900

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-3	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
56.0	74.8	0.305	0.900	0.058	1.000	0.058
					Sum (F) =	0.058

Area averaged mean soil loss (F) (In/Hr) = 0.058
Minimum soil loss rate ((In/Hr)) = 0.029
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.100

U n i t H y d r o g r a p h
VALLEY S-Curve

Unit Hydrograph Data

Unit time period (hrs)		Time % of lag	Distribution Graph %	Unit Hydrograph (CFS)
1	0.083	104.614	20.612	13.939

INTRODUCTION

A: PROJECT LOCATION

The project site is located at southwest corner of Eucalyptus Avenue and Redlands Boulevard in the City of Moreno Valley. Encelia Avenue is adjacent to the southerly property line. Please see the next page for vicinity map.

B: STUDY PURPOSE

The purpose of this study is to determine the existing and proposed condition peak flow rates for various storm events for the site. Discharge from the project site ultimately drains to an existing storm drain in Redlands Boulevard.

Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

DISCUSSION

The project site encompasses approximately 72.73 acres. However, several acres along the westerly property line are within an existing drainage channel (Quincy Wash) and will not be disturbed. Here, sheet piles will be constructed within the property site to protect the site from the Wash. Proposed improvements include one warehouse type building with approximately 1,328,853 square feet. There are truck yard areas on the northerly and southerly sides of the building. Vehicle parking is primarily on the easterly side of the property with some additional parking areas along the westerly drive aisle. There is a water quality/detention basin located along the southerly side of the side adjacent to Encelia Avenue. Additional landscaped areas are located adjacent to the streets and smaller areas throughout the project site.

Master Drainage Plan

The project site is tabled to a storm drain system in Redlands Boulevard (Moreno MDP Line F-2). At this time, only portions of the Master Plan Storm Drain system are constructed. Recent improvements to the north of the project site (Aldi Foods) constructed a portion of the ultimate storm drain in Redlands Boulevard. This is a 60"-72" storm drain (plans prepared by Huitt-Zollars) that connects to an existing 51" storm drain in Redlands Boulevard approximately 200' north of Eucalyptus Avenue and continues approximately 350' south of Eucalyptus Avenue to where it daylights into an existing unimproved earthen channel. This storm drain and channel is located at the easterly portion of the project site.

Runoff continues southerly in the unimproved earthen channel to an existing headwall located northerly of Dracaea Avenue. This is the upstream portion of Riverside County Flood Control and Water Conservation District storm drain Line "F-2". This is an existing 42" storm drain system that does not appear to be adequately sized for the peak flow rates specified in the recently constructed upstream storm drain system. The existing storm drain continues southerly past Brodiaea Avenue and discharges into an existing earthen channel (Line "F").

The Master Drainage Plan indicates a storm drain system in Eucalyptus Avenue (Lateral F-16). The necessary portions of this storm drain system was constructed with the Aldi Foods development to the north. In a memo dated December 23, 2020, Riverside County Flood Control and Water Conservation District (R.C.F.C.&W.C.D.) acknowledges that the "existing facility is functionally equivalent to Line F-16, and the remaining unconstructed portion is not necessary to provide flood protection." See Appendix "A" for a copy of this memo.

The Master Drainage Plan also indicates a storm drain system in Encelia Avenue (Lateral F-17) ranging from 42" to 60". The development of the project site will utilize a detention basin and onsite storm drain systems that will greatly reduce flow to Encelia Avenue such that only a shorter and smaller storm drain will be necessary in the street. In the same memo, R.C.F.C.&W.C.D. states "Since these facilities together collect and convey the

same area that was tabled to Line F-17, it is our opinion that the existing facility is functionally equivalent to Line F-17".

See Appendix "A" for reference existing storm drain plans and a portion of the Master Drainage Plan.

Existing Condition

The project site is generally a vacant lot with natural grasses and weeds. The southeasterly portion of the site is an existing plant nursery. The nursery has a few small structures and appears unpaved. The westerly portion of the property is an unimproved drainage channel (Quincy Wash) and is not tributary to the project site.

Runoff from the site generally drains from north to south to Encelia Avenue at several locations (nodes 103, 105, 106, and 107 on existing condition hydrology map). Encelia Avenue drains from west to east to Redlands Boulevard ultimately to the existing channel adjacent to Redlands Boulevard.

Runoff from Redlands Boulevard flows southerly towards the intersection with Encilia Avenue and node 107. The 100-year Rational Method peak flow rate from the project site and adjacent streets approximately 108.4 cfs.

Runoff in Eucalyptus flows west to east and is intercepted by several riser inlet structures (nodes 112, 121, and 131). The respective 100-year Rational Method flow rates to each risers are approximately 4.2 cfs, 1.6 cfs, and 0.90 cfs.

See Appendix "B" for existing condition Rational Method calculations and Appendix "D" for existing condition hydrology map.

Existing condition hydrographs were established for various storm events. These peak flow rates and volumes are summarized below in the Detention discussion.

Proposed Condition Hydrology

Runoff from the northerly portion of the building, northerly truckyard and easterly parking lots (Nodes 100-115) will be captured in a proposed onsite storm drain system and conveyed southerly to an underground CMP detention system. Runoff from the southerly and westerly portions of the site (Nodes 200-219) will be conveyed to the southerly truck yard and confluenced with the runoff from the north.

Runoff from the detention basin in the southeasterly corner of the site (Node 220) will be confluenced in the proposed system and conveyed easterly. The 100-year peak flow rate from the project site is approximately 154.7 cfs.

Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Discharge from the basin will be conveyed easterly through the project site in a proposed storm drain and connect to the proposed extension of the public storm drain system in Redlands Boulevard. This will eliminate runoff to Encelia Avenue as well as the need for Master Drainage Plan Lateral "F-17", as previously mentioned in R.C.F.C.&W.C.D. memo dated December 23, 2020. The proposed public storm drain will be sized to include the ultimate peak flow rates upstream as well as the discharge from the detention basin. Final design will dictate exact pipe sizes. The public storm drain will continue south in place of the open earth channel to the existing 42" storm drain near Dracaea Avenue. The existing headwall will be removed and the proposed drain will connect to the existing system.

The existing 42" downstream storm drain system does not have the same capacity as the proposed 78" storm drain system. To avoid overburdening the existing 42" storm drain, a relief system will be designed to ensure that flow not allowed into the existing facility can discharge to the street. This will emulate existing conditions where runoff that is not currently allowed into the storm drain (via existing headwall adjacent to the Redlands Avenue) can then drain to the street. Regardless of how the storm drain systems connect, runoff exceeding the capacity of the 42" storm drain system remains on westerly surface of Redlands Avenue. The final design shall be to the satisfaction of the City Manager or City Engineer.

The landscaped areas adjacent to Encelia Avenue will sheet flow to the street and join the street runoff flowing easterly towards the intersection with Redlands Boulevard (nodes 600-604). The runoff will be intercepted by a catch basin in Encilia Avenue and will enter the proposed public storm drain in Redlands Boulevard. The 100-year Rational Method peak runoff from these areas is approximately 7.1 cfs. With the proposed onsite improvements, this is the only drainage system required in Encilia Avenue.

The landscaped frontage along Eucalyptus Avenue will also drain to the street. Catch Basins at nodes 502 and 511 will intercept street and landscape runoff and convey it to the existing 54" storm drain in Eucalyptus Avenue. The 100-year Rational Method peak runoff to these nodes will be approximately 4.4 cfs and 2.8 cfs respectively.

Runoff from Redlands Boulevard and the adjacent project frontage will flow southerly within Redlands Boulevard to a catch basin near the intersection with Encilia Avenue (nodes 520-522). The 100-year Rational Method peak runoff to node 522 will be approximately 4.9 cfs.

Approximately 2.50 acres of area adjacent to the Quincy Wash at the westerly portion of the site will remain undisturbed. The landscaped frontage along Redlands Boulevard will produce a similar amount of runoff as the existing condition and will drain directly to the street.

See Appendix "B" for proposed condition hydrology calculations and Appendix "D" for proposed condition hydrology map.

Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Detention

Since downstream facilities do not appear to have capacity for the increase in peak flow and volume from the proposed commercial project, detention will be required to limit runoff to no more than that under existing conditions. Detention analysis is considered for the 2-, 5-, 10- and 100-year storm events. Riverside County allows "preliminary sizing of increased runoff basin may be based on the difference in volume between the developed condition and the pre-developed condition for the 24-hour duration event for the 10-year return frequency."

1-, 3-, 6-, and 24-hour hydrographs were established for all areas tributary to the detention basin for the 2-, 5-, 10- and 100-year events for both existing (undeveloped) and proposed conditions. For existing conditions, the land use is considered "open brush, poor cover". Proposed conditions assume all commercial development. Rainfall values are taken from the Riverside County Hydrology Manual. For the 2- and 5-year events, the loss rate is determined using an AMC I condition. For the 10-year event, AMC II was used and for the 100-year event AMC III was used.

Note that not all area of the project site drains to the detention basin, thus the areas used for the detention analysis are slightly smaller than the total project site. Areas not tributary to the detention basin are the areas to the west and south of the site. It is assumed that the landscaped areas produce about the same runoff rates and volumes as the undeveloped site.

The following table summarizes existing and proposed condition peak flow rates and volumes associated with the area to the detention basin. From the table, the largest difference in volume is approximately 12.25 acre-feet (10-year 24-hour event). The largest difference in peak flow rate is about 46.3 cfs (5-year 1-hour event). For preliminary sizing, the detention basin will be sized to detain the largest difference in volume. The preliminary underground CMP system will be sized to match this volume. The southeasterly basin meets the surface area and volume requirements necessary for water quality purposes per separate Water Quality Management Plan.

Final design will dictate the outlet features that will limit runoff from all of the above events to less than existing conditions. The landscaped areas tributary to the street would yield peak flow rates similar to existing condition and are not included in the hydrographs.

See Appendix "C" for existing and proposed condition hydrographs.

The following table summarizes existing and proposed condition hydrographs:

BASIN SUMMARY TABLE

Return Event (year)	Storm Duration (hour)	Existing Total Flow (cfs)	Existing Total Volume (ac-ft)	Proposed Total Flow (cfs)	Proposed Total Volume (ac-ft)	Peak Flow Difference (cfs)	Volume Difference (ac-ft)
100	1	131.5	5.89	177.0	6.38	45.5	0.49

Methodology

Hydrology calculations were computed using Riverside County Rational Method program (by AES software). Hydrograph were computed using CIVILD software. The soil type is "B" per Riverside County Hydrology Manual. See Appendix "A" for reference material from the Riverside County Hydrology Manual.

RIVERSIDE COUNTY FLOOD CONTROL
AND WATER CONSERVATION DISTRICT
December 23, 2020

Mr. Michael D Lloyd
Assistant City Engineer
Engineering Division
City of Moreno Valley
14177 Frederick Street
Moreno Valley, CA 92552-0805

Dear Mr. Lloyd:

Re: Thienes Engineering PEN 19-0193
Account No. 137-0-3-75325

As requested by the City of Moreno Valley (City), the Riverside County Flood Control District (District) received the following for review on December 1, 2020:

1. Letter from Moreno Valley, dated November 12, 2020
2. Preliminary Hydrology Calculations, dated October 27, 2020
3. Preliminary Grading Plan (13 sheets, with different dates)
4. PWQMP Report, dated March 5, 2020

The District has reviewed these documents as requested in the City's letter, and has also tried to identify potential areas of concern, and has the following comments:

Line-16

The City stated in their request that the developer wished to "eliminate the proposed westerly portion of Moreno Master Drainage Plan (MMDP) Line F-16 based on the premise that it is unnecessary to construct due to the existing development to the north of the MMDP line." The existing development (PM36207 on APN 488-330-040) constructed a basin which outlets to a pipe in Eucalyptus Avenue which connect to Line F-2 in Redland Boulevard. The pipe was previously accepted for maintenance by the District. Since the pipe and basin together collect and convey the same area that was tabled to Line F-16, it is our opinion that, so long as the basin is in place, the existing facility is functionally equivalent to Line F-16, and the remaining unconstructed portion is not necessary to provide flood protection.

Line F-17

The City stated in their request that the developer wished to "eliminate the proposed MMDP Line F-17, based on the premise that it is unnecessary to construct due to the proposed developer's water quality and detention facilities." The Moreno MDP proposed Line F-17 as a 42 to 60 inch RCP conveying 200 cfs to Line F-2. The developer proposed an onsite basin and a 42" HDPE within the development conveying on site flows to Line F-2, and a catch basin in Encelia conveying street runoff to Line F-2. Since these facilities together collect and convey the same area that was tabled to Line F-17, it is our opinion that the existing facility is functionally equivalent to Line F-17.

It should be noted that since the proposed pipe is within private right of way and is proposed as HDPE, the District will not maintain it. The basin and storm drain facility will be developer maintained. However, if the design is modified to meet District standards, a public agency could maintain the storm drain and/or basin. At a minimum, the storm drain would need to be moved to the street and constructing with RCP instead of HDPE, and the basin would need to handle water quality and the 100-year route down separately and otherwise be designed to meet out meet District requirements for Operation and Maintenance. See increased runoff criteria and the LID BMP handbook for basin design requirements. Link: http://rcflood.org/npdes/LIDBMP.aspx

Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Also note that Line F-17 is not part of the Moreno Area Drainage Plan (ADP) and therefore is not eligible for ADP credit.

Line F-2

The developer is proposing to build a portion of Line F-2 in Redlands Avenue. The MMDP proposed Line F-2 between Eucalyptus and Encelia as a 72" RCP conveying 100-year flowrate of 535 cfs. The developer's plans don't provide details for their proposed segment of Line F-2, or even the limits of what they will be constructing, but the hydrology map identifies it as a 72" RCP. The District has not received enough information to comment on this facility. It should be noted that the existing portion of Line F-2 downstream of this project is not sized to convey the 100 year flowrate, and the MMDP proposes that it will be improved or replaced in the future to increase the current 10-year capacity to the 100 year storm.

Quincy Channel / Line G-7

The developer is proposing vinyl sheetpile along the natural Quincy wash, which the MMDP proposes as a trapezoidal channel called Line G-7. The sheetpile is proposed some distance outside of the limits of the MMDP proposed channel. While the sheetpile may protect the site from erosion, the capacity of the existing wash is unknown. The site may not be protected from the 100-year storm until the ultimate channel is constructed or erosion occurs, and therefore may not be functionally equivalent in the interim. Additionally, it should be noted that the District will not maintain the proposed sheet piles.

Hydrology Report

The City should be aware of the following District comments on the developer's hydrology study dated October 27, 2020.

1. The rainfall used should be consistent with those used in the Moreno MDP, which were based on the version of NOAA Atlas 14 that was available when the MMDP was updated. The MMDP report provides a table of rainfall values used.
2. The cover type used for node 200-204 "proposed" hydrology should be commercial cover or some other type with a high impervious percentage, since this area is proposed as a street.
3. AMC 3 was used for the 100-year basin hydrology. This is not typically recommended per the District's hydrology manual. This should be explained or corrected.

Any questions pertaining to this project may be directed to Kelly O'Sullivan of this office at 951-955-8851 or kosulliv@rivco.org.

Very truly yours,

Deborah de Chambeau

  FILE NAME: W:\3828\P100.DAT
  TIME/DATE OF STUDY: 09:52 04/05/2022
----------------------------------------------------------------------
  USER SPECIFIED HYDROLOGY AND HYDRAULIC MODEL INFORMATION:
----------------------------------------------------------------------
  USER SPECIFIED STORM EVENT(YEAR) =  100.00
  SPECIFIED MINIMUM PIPE SIZE(INCH) =  12.00
  SPECIFIED PERCENT OF GRADIENTS(DECIMAL) TO USE FOR FRICTION SLOPE = 0.95
  10-YEAR STORM 10-MINUTE INTENSITY(INCH/HOUR) =  2.010
  10-YEAR STORM 60-MINUTE INTENSITY(INCH/HOUR) =  0.820
  100-YEAR STORM 10-MINUTE INTENSITY(INCH/HOUR) =  2.940
  100-YEAR STORM 60-MINUTE INTENSITY(INCH/HOUR) =  1.200
  SLOPE OF 10-YEAR INTENSITY-DURATION CURVE =  0.5003939
  SLOPE OF 100-YEAR INTENSITY-DURATION CURVE =  0.5001161
  COMPUTED RAINFALL INTENSITY DATA:
  STORM EVENT =  100.00   1-HOUR INTENSITY(INCH/HOUR) =   1.200
  SLOPE OF INTENSITY DURATION CURVE = 0.5001
  RCFC&WCD HYDROLOGY MANUAL "C"-VALUES USED FOR RATIONAL METHOD
  NOTE: CONSIDER ALL CONFLUENCE STREAM COMBINATIONS
        FOR ALL DOWNSTREAM ANALYSES
  *USER-DEFINED STREET-SECTIONS FOR COUPLED PIPEFLOW AND STREETFLOW MODEL*
     HALF-  CROWN TO   STREET-CROSSFALL:   CURB  GUTTER-GEOMETRIES:  MANNING

English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
EXISTING CONDITION 2-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.030
Lag time = 0.159 Hr.
Lag time = 9.56 Min.
25% of lag time = 2.39 Min.
40% of lag time = 3.82 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 2.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 1.750(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 1.750(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	76.00	0.000

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-1	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
76.0	58.2	0.488	0.000	0.488	1.000	0.488
					Sum (F) =	0.488

Area averaged mean soil loss (F) (In/Hr) = 0.488
Minimum soil loss rate ((In/Hr)) = 0.244
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
EXISTING CONDITION 5-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.030
Lag time = 0.159 Hr.
Lag time = 9.56 Min.
25% of lag time = 2.39 Min.
40% of lag time = 3.82 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 5.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 2.394(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 2.394(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	76.00	0.000

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-1	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
76.0	58.2	0.488	0.000	0.488	1.000	0.488
					Sum (F) =	0.488

Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Area averaged mean soil loss (F) (In/Hr) = 0.488
Minimum soil loss rate ((In/Hr)) = 0.244
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

English (in-lb) Input Units Used
English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
EXISTING CONDITION 10-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.030
Lag time = 0.159 Hr.
Lag time = 9.56 Min.
25% of lag time = 2.39 Min.
40% of lag time = 3.82 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 10.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 2.881(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 2.881(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	76.00	0.000

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-2	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
76.0	76.0	0.291	0.000	0.291	1.000	0.291
					Sum (F) =	0.291

3828EX102410

Area averaged mean soil loss (F) (In/Hr) = 0.291
Minimum soil loss rate ((In/Hr)) = 0.146
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

English (in-lb) Input Units Used
English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
EXISTING CONDITION 100-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.030
Lag time = 0.159 Hr.
Lag time = 9.56 Min.
25% of lag time = 2.39 Min.
40% of lag time = 3.82 Min.
Unit time = 5.00 Min.
Duration of storm = 1 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	0.50	33.55

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.20	80.52

STORM EVENT (YEAR) = 100.00
Area Averaged 2-Year Rainfall = 0.500(In)
Area Averaged 100-Year Rainfall = 1.200(In)

Point rain (area averaged) = 1.200(In)
Areal adjustment factor = 99.94 %
Adjusted average point rain = 1.199(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	76.00	0.000

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-3	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
76.0	88.6	0.146	0.000	0.146	1.000	0.146
					Sum (F) =	0.146

Area averaged mean soil loss (F) (In/Hr) = 0.146
Minimum soil loss rate ((In/Hr)) = 0.073
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

Slope of intensity-duration curve for a 1 hour storm =0.5000
