Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Area averaged mean soil loss (F) (In/Hr) = 0.146
Minimum soil loss rate ((In/Hr)) = 0.073
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.900

RCFC & WCD Manual date - April 1978

Program License Serial Number 6400

English (in-lb) Input Units Used
English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
PROPOSED CONDITION 2-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.015
Lag time = 0.080 Hr.
Lag time = 4.78 Min.
25% of lag time = 1.19 Min.
40% of lag time = 1.91 Min.
Unit time = 5.00 Min.
Duration of storm = 1 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	0.50	33.55

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.20	80.52

STORM EVENT (YEAR) = 2.00
Area Averaged 2-Year Rainfall = 0.500(In)
Area Averaged 100-Year Rainfall = 1.200(In)

Point rain (area averaged) = 0.500(In)
Areal adjustment factor = 99.94 %
Adjusted average point rain = 0.500(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	56.00	0.900

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-1	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
56.0	36.0	0.706	0.900	0.134	1.000	0.134
					Sum (F) =	0.134

Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Area averaged mean soil loss (F) (In/Hr) = 0.134
Minimum soil loss rate ((In/Hr)) = 0.067
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.100

Slope of intensity-duration curve for a 1 hour storm =0.5000

TEI JOB 3828
OPTION 1 - HIGH CUBE
PROPOSED CONDITION 10-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.015
Lag time = 0.080 Hr.
Lag time = 4.78 Min.
25% of lag time = 1.19 Min.
40% of lag time = 1.91 Min.
Unit time = 5.00 Min.
Duration of storm = 1 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	0.50	33.55

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.20	80.52

STORM EVENT (YEAR) = 10.00
Area Averaged 2-Year Rainfall = 0.500(In)
Area Averaged 100-Year Rainfall = 1.200(In)

Point rain (area averaged) = 0.788(In)
Areal adjustment factor = 99.94 %
Adjusted average point rain = 0.788(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	56.00	0.900

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-2	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
56.0	56.0	0.511	0.900	0.097	1.000	0.097
					Sum (F) =	0.097

Attachment: Preliminary Hydrology Report (E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

Area averaged mean soil loss (F) (In/Hr) = 0.097
Minimum soil loss rate ((In/Hr)) = 0.049
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.100

Slope of intensity-duration curve for a 1 hour storm =0.5000

TEI JOB 3828
OPTION 1 - HIGH CUBE
PROPOSED CONDITION 10-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.015
Lag time = 0.080 Hr.
Lag time = 4.78 Min.
25% of lag time = 1.19 Min.
40% of lag time = 1.91 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 10.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 2.881(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 2.881(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	56.00	0.900

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-2	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
56.0	56.0	0.511	0.900	0.097	1.000	0.097
					Sum (F) =	0.097

Area averaged mean soil loss (F) (In/Hr) = 0.097
Minimum soil loss rate ((In/Hr)) = 0.049
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.100

English (in-lb) Input Units Used
English Rainfall Data (Inches) Input Values Used

English Units used in output format

TEI JOB 3828
OPTION 1 - HIGH CUBE
PROPOSED CONDITION 100-YEAR STORM EVENT

Drainage Area = 67.10(Ac.) = 0.105 Sq. Mi.
Drainage Area for Depth-Area Areal Adjustment = 67.10(Ac.) = 0.105 Sq. Mi.
Length along longest watercourse = 3400.00(Ft.)
Length along longest watercourse measured to centroid = 1280.00(Ft.)
Length along longest watercourse = 0.644 Mi.
Length along longest watercourse measured to centroid = 0.242 Mi.
Difference in elevation = 44.00(Ft.)
Slope along watercourse = 68.3294 Ft./Mi.
Average Manning's 'N' = 0.015
Lag time = 0.080 Hr.
Lag time = 4.78 Min.
25% of lag time = 1.19 Min.
40% of lag time = 1.91 Min.
Unit time = 5.00 Min.
Duration of storm = 24 Hour(s)
User Entered Base Flow = 0.00(CFS)

2 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	1.75	117.42

100 YEAR Area rainfall data:

Area(Ac.)[1]	Rainfall(In)[2]	Weighting[1*2]
67.10	4.50	301.95

STORM EVENT (YEAR) = 100.00
Area Averaged 2-Year Rainfall = 1.750(In)
Area Averaged 100-Year Rainfall = 4.500(In)

Point rain (area averaged) = 4.500(In)
Areal adjustment factor = 99.99 %
Adjusted average point rain = 4.499(In)

Sub-Area Data:

Area(Ac.)	Runoff Index	Impervious %
67.100	56.00	0.900

Total Area Entered = 67.10(Ac.)

RI AMC2	RI AMC-3	Infil. Rate (In/Hr)	Impervious (Dec.%)	Adj. Infil. Rate (In/Hr)	Area% (Dec.)	F (In/Hr)
56.0	74.8	0.305	0.900	0.058	1.000	0.058
					Sum (F) =	0.058

Area averaged mean soil loss (F) (In/Hr) = 0.058
Minimum soil loss rate ((In/Hr)) = 0.029
(for 24 hour storm duration)
Soil low loss rate (decimal) = 0.100

U n i t H y d r o g r a p h
VALLEY S-Curve

Unit Hydrograph Data

Unit time period (hrs)		Time % of lag	Distribution Graph %	Unit Hydrograph (CFS)

translutions
the transportation solutions company...

memorandum

DATE: April 22, 2022

TO: David Ornelas, T&B Planning

FROM: Sandipan Bhattacharjee, P.E., T.E., AICP, ENV-SP

SUBJECT: Moreno Valley Trade Center Trip Generation Comparison (E-Commerce & Warehouse Scenarios)

Translutions, Inc. (Translutions) is pleased to provide this memorandum discussing the trip generation included in the Moreno Valley Trade Center Traffic Impact Analyses (TIA) and the proposed trip generation that includes High-Cube Cold Storage warehouse facilities.

Background. In November 2020, Translutions submitted a TIA for the Moreno Valley Trade Center project in the City of Moreno Valley. The project included the construction of approximately 1,332,380 square feet of E-Commerce warehouse uses. Subsequently, the project site plan was changed to 1,263,270 square feet with change in project access, eliminating all traffic from Encilia Avenue. A revised analysis was conducted in April 2022, and the levels of service under the revised project were not worse than those in the previous analysis.

The project's EIR also evaluates options where 50,000 square feet of each alternative would include High-Cube Cold Storage facilities.

Trip Generation from Original TIA. As stated earlier, the TIA for the original project was submitted to the City in November 2020. The trip generation used for the analysis was based on surveyed rated from similar E-Commerce facilities in the Inland Empire. Tables A and B show the project trip generation from the approved TIA. As shown in Table A, the original project is forecast to generate 554 PCE trips in the a.m. peak hour, 1,118 PCE trips in the p.m. peak hour, and 7,903 PCE daily trips for the e-commerce scenario. As shown in Table B, the original project is forecast to generate 363 PCE trips in the a.m. peak hour, 404 PCE trips in the p.m. peak hour, and 3,665 PCE daily trips for the warehouse scenario.

Trip Generation from Revised TIA. As stated earlier, the revised TIA was revised in April 2022. Tables C and D show the project trip generation from the revised TIA. As shown in Table C, the revised project is forecast to generate 524 PCE trips in the a.m. peak hour, 1,061 PCE trips in the p.m. peak hour, and 7,494 PCE daily trips for the e-commerce scenario. As shown in Table E, the revised project is forecast to generate 342 PCE trips in the a.m. peak hour, 383 PCE trips in the p.m. peak hour, and 3,474 PCE daily trips for the warehouse scenario. Therefore, under both scenarios, the revised project generates fewer trips.

Trip Generation for Cold Storage. The air quality analysis evaluates a scenario where up to 50,000 square feet of each scenario is developed for cold storage. The trip generation for the cold storage portion of the warehouse is based on trip generation rates for Land Use 157 "High-Cube Cold Storage Warehouse" from Institute of Transportation Engineers' (ITE) Trip Generation (10th Edition). Table E shows the trip generation for the proposed High-Cube Cold Storage portion. Table F summarizes the proposed project trip generation for the remaining portion for the E-Commerce scenario. Table G summarizes the proposed project trip generation for the E-Commerce scenario with cold storage. Table H summarizes the proposed project trip generation for the remaining portion for the warehouse scenario. Table I summarizes the proposed project trip generation for the warehouse scenario with cold storage. As shown in Table H, the revised project is forecast to generate 518 PCE trips in the a.m. peak hour, 1,033 PCE trips in the p.m. peak hour, and 7,377 PCE daily trips for the e-commerce with cold storage scenario. As shown in Table I, the revised project is forecast to generate 343 PCE trips in the a.m. peak hour, 382 PCE trips in the p.m. peak hour, and 3,518 PCE daily trips for the e-commerce with cold storage scenario.

Trip Generation Comparison. Table J summarizes the trip generations for the various alternatives. As seen on Table J, the trip generation for the revised project under all scenarios are less than those for the previous project.

VMT Evaluation. The revised building footprint is approximately 69,000 square feet less than the previous building footprint, or approximately 5% less. This is a minor reduction, and the employee numbers are anticipated to remain the same as before or reduce slightly. Since VMT impacts are based on VMT per employee, if the number of employees remain the same or decrease slightly, the per employee home-based work VMT will remain the same or decrease slightly. Therefore, the VMT impacts are unlikely to change from the previous project.

Conclusion. Since the trip generation of the proposed project during the a.m. peak hour, p.m. peak hour, and daily are lower than those disclosed in the TIA submitted in November 2020, the impacts from the proposed project are anticipated to be less than those disclosed in the November 2020 TIA and addressed in the prior CEQA analyses.

Attachment: Trip Generation Comparison Memorandum for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley

translutions
the transportation solutions company...

memorandum

DATE: April 9, 2022

TO: John Grace, Vice President - Development, Hillwood

FROM: Sandipan Bhattacharjee, Translutions, Inc.

SUBJECT: Moreno Valley Trade Center – Warehouse Scenario - Traffic Impact Analysis Evaluation

Translutions, Inc. (Translutions) is pleased to provide this memorandum discussing the changes to the traffic impact analysis associated with the updated site plan for the Moreno Valley Trade Center Warehouse development project. The project is located on the southwest corner of Redlands Boulevard and Eucalyptus Avenue in the City of Moreno Valley.

BACKGROUND

Translutions submitted a TIA in November 2020 to the City of Moreno Valley that included the analysis of a proposed 1,332,380 square foot warehouse development. Since then, the project description has been revised to include a 1,263,270 square foot warehouse building and several modifications to the site plan. This memorandum compares the findings from the traffic impact analysis in November 2020 to what is being proposed now. Figure 1 illustrates the revised site plan.

REVISED PROJECT DESCRIPTION

As stated above, the project description has been modified to now include a reduction in square footage for the warehouse building from 1,332,380 square feet to 1,263,270 square feet. Access to the site has been modified for both autos and trucks. For autos, access to the site from Encilia Avenue has been removed. Autos will access the site via the two driveways on Eucalyptus Avenue and the two driveways on Redlands Boulevard. The northern driveway on Redlands Boulevard now includes full-access inbound/outbound movements for autos and will include a traffic signal as a project design feature. The analysis includes the signal as a project constructed improvement. Trucks will access the site via the two driveways on Eucalyptus Avenue and are prohibited on Redlands Boulevard south of Eucalyptus Avenue.

PROJECT TRIP GENERATION COMPARISON

The project trip generation disclosed in the previous TIA from 2020 was compared to the trip generation for the proposed project. Table A summarizes the trip generation comparison. As shown in Table A, the proposed project would result in a net decrease in project trips of -21 a.m. peak hour PCE trips, -21 p.m. peak hour PCE trips, and -191 daily PCE trips, when compared to the previous study's trip generation.

Table A - Project Trip Generation Comparison

	Peak Hour						Daily
	AM Peak Hour			PM Peak Hour			
Units	In	Out	Total	In	Out	Total	
Trip Generation from Previous Traffic Impact Analysis (November 2020)							
Passenger Cars	109	32	141	43	114	157	1,436
Total PCE	280	83	363	114	290	404	3,665
Trip Generation (Proposed Project)							
Passenger Cars	102	31	133	41	108	149	1,361
Total PCE	265	77	342	108	275	383	3,474
Net Change in Total PCE	-15	-6	-21	-6	-15	-21	-191

Attachment: Traffic Memorandums (Warehouse and E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno

REDUCTION IN AUTO TRIPS ON ENCILIA AVENUE

The trip distribution for the proposed project trips were developed using the same trip distribution patterns for autos from the November 2020 TIA and adjusted to reflect the changes in access for autos included in the project description such as the removal of the project driveways on Encilia Avenue. With the removal of the project driveways on Encilia Avenue, a reduction in project trips is anticipated on Encilia Avenue. Table B compares the project trips on Encilia Avenue from the previous TIA to the proposed project. As shown in Table B, the proposed project would result in a net decrease in project trips on Encilia Avenue of -63 a.m. peak hour trips, -70 p.m. peak hour trips, and -639 daily trips.

Table B - Project Trip Comparison on Encilia Avenue

	Peak Hour						Daily
	AM Peak Hour			PM Peak Hour			
Units	In	Out	Total	In	Out	Total	
Project Trips on Encilia Avenue from Previous Traffic Impact Analysis (November 2020)							
Total Trips	48	15	63	19	51	70	639
Project Trips on Encilia Avenue (Proposed Project)							
Total Trips	0	0	0	0	0	0	0
Net Change in Trips on Encilia Avenue	-48	-15	-63	-19	-51	-70	-639

REDUCTION IN TRUCK TRIPS ON REDLANDS BOULEVARD SOUTH OF EUCALYPTUS AVENUE

The trip distribution for the proposed project trips were developed using the same trip distribution patterns for trucks from the November 2020 TIA and adjusted to reflect the changes in access for trucks included in the project description such as the prohibition of trucks on Redlands Boulevard south of Eucalyptus Avenue. With trucks prohibited on Redlands Boulevard south of Eucalyptus Avenue, a reduction in trucks trips is shown in Table C. Table C compares the trucks trips on Redlands Boulevard south of Eucalyptus Avenue from the previous TIA to the proposed project. As shown in Table C, the proposed project would result in a net decrease in truck PCE trips on Redlands Boulevard south of Eucalyptus Avenue of -5 a.m. peak hour PCE trips, -21 p.m. peak hour PCE trips, and -334 daily PCE trips.

Table C - Truck Trip Comparison on Redlands Boulevard south of Eucalyptus Avenue

	Peak Hour						Daily
	AM Peak Hour			PM Peak Hour			
Units	In	Out	Total	In	Out	Total	
Truck Trips on Redlands Blvd. south of Eucalyptus Ave. from Previous Traffic Impact Analysis (November 2020)							
Total Trips	5	0	5	21	0	21	334
Truck Trips on Redlands Blvd. south of Eucalyptus Ave. (Proposed Project)							
Total Trips	0	0	0	0	0	0	0
Net Change in Trips on Encilia Avenue	-5	0	-5	-21	0	-21	-334

LEVEL OF SERVICE COMPARISON

As stated previously, the trip distribution for the proposed project trips were developed using the same trip distribution patterns for autos and trucks from the November 2020 TIA. With the trip generation reduction shown in Table A of -21 a.m. peak hour PCE trips, -21 p.m. peak hour PCE trips, and -191 daily PCE trips, it was anticipated that the levels of service at the study area intersections would generally improve or remain the same under existing, opening year, and general plan build out conditions at the study area intersections and roadways segments. A full analysis has been conducted and available for

Attachment: Traffic Memorandums (Warehouse and E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno

review, and as anticipated, the operations under the revised project are better than the previous project. Summary LOS tables are attached.

CONCLUSION

Based on the changes to the project description, the proposed project would result in a net decrease in project trips of -21 a.m. peak hour PCE trips, -21 p.m. peak hour PCE trips, and -191 daily PCE trips, when compared to the previous study's trip generation. A full analysis was conducted, and the results are summarized in this memorandum. The project will not result in any new operational deficiencies that were not disclosed in the previous TIA from November 2020.

memorandum

DATE: April 9, 2022

TO: John Grace, Vice President - Development, Hillwood

FROM: Sandipan Bhattacharjee, Translutions, Inc.

SUBJECT: Moreno Valley Trade Center – E-Commerce Scenario - Traffic Impact Analysis Evaluation

Translutions, Inc. (Translutions) is pleased to provide this memorandum discussing the changes to the traffic impact analysis associated with the updated site plan for the Moreno Valley Trade Center E-Commerce development project. The project is located on the southwest corner of Redlands Boulevard and Eucalyptus Avenue in the City of Moreno Valley.

BACKGROUND

Translutions submitted a TIA in November 2020 to the City of Moreno Valley that included the analysis of a proposed 1,332,380 square foot E-Commerce warehouse development. Since then, the project description has been revised to include a 1,263,270 square foot E-Commerce building and several modifications to the site plan. This memorandum compares the findings from the traffic impact analysis in November 2020 to what is being proposed now. Figure 1 illustrates the revised site plan.

REVISED PROJECT DESCRIPTION

As stated above, the project description has been modified to now include a reduction in square footage for the E-Commerce building from 1,332,380 square feet to 1,263,270 square feet. Access to the site has been modified for both autos and trucks. For autos, access to the site from Encilia Avenue has been removed. Autos will access the site via the two driveways on Eucalyptus Avenue and the two driveways on Redlands Boulevard. The northern driveway on Redlands Boulevard now includes full-access inbound/outbound movements for autos and will include a traffic signal as a project design feature. The analysis includes the signal as a project constructed improvement. Trucks will access the site via the two driveways on Eucalyptus Avenue and are prohibited on Redlands Boulevard south of Eucalyptus Avenue.

PROJECT TRIP GENERATION COMPARISON

The project trip generation disclosed in the previous TIA from 2020 was compared to the trip generation for the proposed project. Table A summarizes the trip generation comparison. As shown in Table A, the proposed project would result in a net decrease in project trips of -30 a.m. peak hour PCE trips, -57 p.m. peak hour PCE trips, and -409 daily PCE trips, when compared to the previous study's trip generation.

Table A - Project Trip Generation Comparison

	Peak Hour						Daily
	AM Peak Hour			PM Peak Hour			
Units	In	Out	Total	In	Out	Total	
Trip Generation from Previous Traffic Impact Analysis (November 2020)							
Passenger Cars	373	79	452	533	497	1,030	5,750
Total PCE	413	122	554	567	550	1,118	7,903
Trip Generation (Proposed Project)							
Passenger Cars	354	75	429	505	472	977	5,452
Total PCE	389	118	524	536	525	1,061	7,494
Net Change in Total PCE	-24	-4	-30	-31	-25	-57	-409

Attachment: Traffic Memorandums (Warehouse and E-Commerce) for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno

REDUCTION IN AUTO TRIPS ON ENCILIA AVENUE

The trip distribution for the proposed project trips were developed using the same trip distribution patterns for autos from the November 2020 TIA and adjusted to reflect the changes in access for autos included in the project description such as the removal of the project driveways on Encilia Avenue. With the removal of the project driveways on Encilia Avenue, a reduction in project trips is anticipated on Encilia Avenue. Table B compares the project trips on Encilia Avenue from the previous TIA to the proposed project. As shown in Table B, the proposed project would result in a net decrease in project trips on Encilia Avenue of -200 a.m. peak hour trips, -459 p.m. peak hour trips, and -2,559 daily PCE trips.

Table B - Project Trip Comparison on Encilia Avenue

	Peak Hour						Daily
	AM Peak Hour			PM Peak Hour			
Units	In	Out	Total	In	Out	Total	
Project Trips on Encilia Avenue from Previous Traffic Impact Analysis (November 2020)							
Total Trips	165	35	200	235	224	459	2,559
Project Trips on Encilia Avenue (Proposed Project)							
Total Trips	0	0	0	0	0	0	0
Net Change in Trips on Encilia Avenue	-165	-35	-200	-235	-224	-459	-2559

REDUCTION IN TRUCK TRIPS ON ENCILIA AVENUE

The trip distribution for the proposed project trips were developed using the same trip distribution patterns for trucks from the November 2020 TIA and adjusted to reflect the changes in access for trucks included in the project description such as the prohibition of trucks on Redlands Boulevard south of Eucalyptus Avenue. With trucks prohibited on Redlands Boulevard south of Eucalyptus Avenue, a reduction in trucks trips is shown in Table C. Table C compares the trucks trips on Redlands Boulevard south of Eucalyptus Avenue from the previous TIA to the proposed project. As shown in Table C, the proposed project would result in a net decrease in truck PCE trips on Redlands Boulevard south of Eucalyptus Avenue of -12 a.m. peak hour PCE trips, -10 p.m. peak hour PCE trips, and -323 daily PCE trips.

Table C - Truck Trip Comparison on Redlands Boulevard south of Eucalyptus Avenue

	Peak Hour						Daily
	AM Peak Hour			PM Peak Hour			
Units	In	Out	Total	In	Out	Total	
Truck Trips on Redlands Blvd. south of Eucalyptus Ave. from Previous Traffic Impact Analysis (November 2020)							
Total Trips	12	0	12	10	0	10	323
Truck Trips on Redlands Blvd. south of Eucalyptus Ave. (Proposed Project)							
Total Trips	0	0	0	0	0	0	0
Net Change in Trips on Encilia Avenue	-12	0	-12	-10	0	-10	-323

LEVEL OF SERVICE COMPARISON

As stated previously, the trip distribution for the proposed project trips were developed using the same trip distribution patterns for autos and trucks from the November 2020 TIA. With the trip generation reduction shown in Table A of -30 a.m. peak hour PCE trips, -57 p.m. peak hour PCE trips, and -409 daily PCE trips, it was anticipated that the levels of service at the study area intersections would generally improve or remain the same under existing, opening year, and general plan build out conditions at the study area intersections and roadways segments. A full analysis has been conducted and available for

review, and as anticipated, the operations under the revised project are better than the previous project. Summary LOS tables are attached.

CONCLUSION

Based on the changes to the project description, the proposed project would result in a net decrease in project trips of -30 a.m. peak hour PCE trips, -57 p.m. peak hour PCE trips, and -409 daily PCE trips, when compared to the previous study's trip generation. A full analysis was conducted, and the results are summarized in this memorandum. The project will not result in any new operational deficiencies that were not disclosed in the previous TIA from November 2020.

MORENO VALLEY TRADE CENTER (WAREHOUSE SCENARIO) AIR QUALITY, GREENHOUSE GAS, AND HEALTH RISK ASSESSMENT EVALUATION

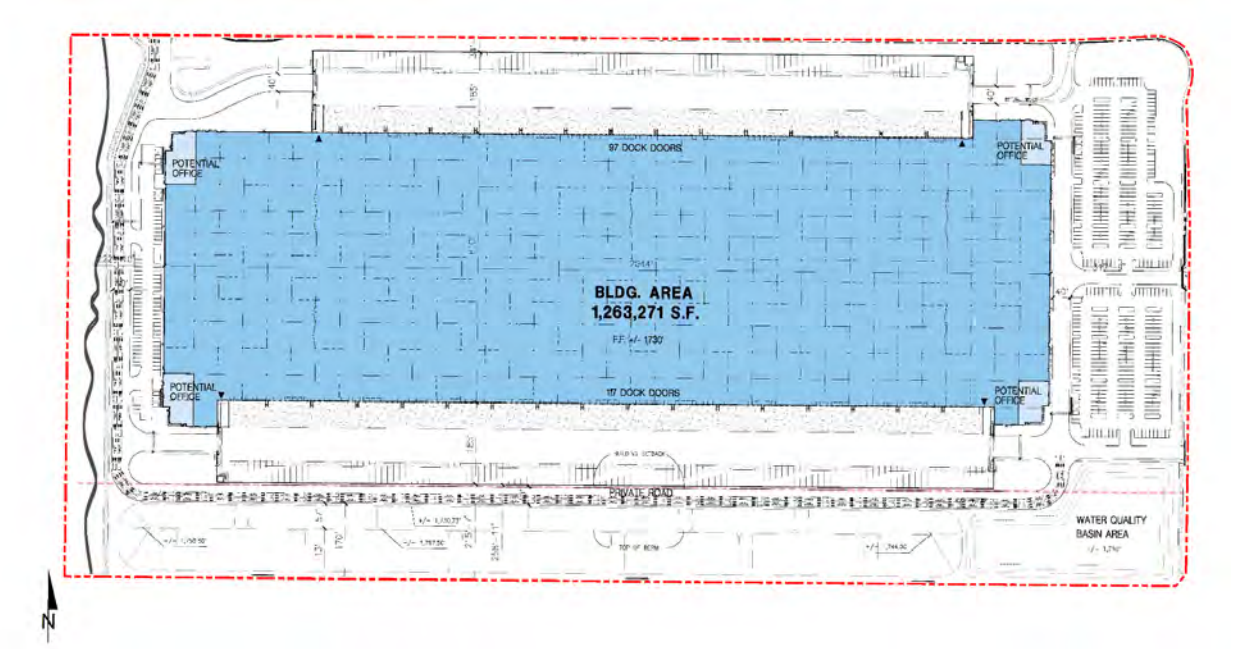
Mr. John Grace,

Urban Crossroads, Inc. is pleased to provide the following Air Quality (**AQ**), Greenhouse Gas (**GHG**), and Health Risk Assessment (**HRA**) Evaluation for the Moreno Valley Trade Center (Warehouse Scenario) development which is located in the City of Moreno Valley. The purpose of this work effort is to assess the potential changes in air quality, greenhouse gas, and health risks associated with the updated site plan for the Project.

BACKGROUND

On October 9, 2020, Urban Crossroads, Inc. prepared an AQ, GHG, and HRA Evaluation for the proposed Moreno Valley Trade Center Warehouse development (1). At the time the study was prepared, the proposed Project included the construction of approximately 50,000 sf of High-Cube Cold Storage facilities and 1,282,380 sf of E-Commerce facilities. Since then, the Project now proposes approximately 50,000 sf of High-Cube Cold Storage facilities and 1,213,271 sf of warehouse facilities (as illustrated on Exhibit 1). Therefore, for purposes of analysis in this memorandum, the Project now includes a reduction of 69,109 sf of building space. This memorandum includes the comparison of the emissions totals in the prior evaluation to what is now being proposed.

EXHIBIT 1: PRELIMINARY SITE PLAN



Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for Moreno Valley Trade Center - Revised

AIR QUALITY AND GREENHOUSE GAS EMISSIONS

A comparison of the operational-source emissions disclosed in the previous technical study compared to emissions anticipated from the Proposed Project are summarized on Tables 1 and 2.

TABLE 1: PREVIOUSLY ANALYZED LAND USE AIR QUALITY EMISSIONS

Source	Emissions (lbs/day)					
	VOC	NO_X	CO	SO_X	PM_{10}	$PM_{2.5}$
Summer						
Previous Technical Study	39.80	194.89	94.88	1.04	53.25	16.67
Proposed Project	37.80	184.22	90.11	0.99	50.36	15.77
Net Emissions	-2.00	-10.67	-4.77	-0.05	-2.89	-0.90
Winter						
Previous Technical Study	39.52	202.58	83.68	1.03	53.22	16.67
Proposed Project	37.53	191.47	79.49	0.98	50.34	15.77
Net Emissions	-1.99	-11.11	-4.19	-0.06	-2.88	-0.90

TABLE 2: GHG EMISSIONS SUMMARY

Emissions Source	Emissions (MT/yr)
	Total CO2e
Previous Technical Study	17,552.30
Proposed Project	16,500.94
Net Emissions	-1,051.36

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for Moreno Valley Trade Center - Revised

ENERGY DEMAND COMPARISON

Tables 3 and 4 summarize the net transportation and facility energy demands associated with the Proposed Project.

TABLE 3: NET TRANSPORTATION ENERGY DEMAND

	Annual VMT	Annual Fuel Consumption
Previous Technical Study	16,244,612	1,395,481
Proposed Project	15,382,736	1,321,442
Net Emissions	-861,876	-74,039

TABLE 4: NET FACILITY ENERGY DEMAND

Natural Gas	kBTU/year
Previous Technical Study	4,373,300
Proposed Project	4,274,480
Net Change	-98,820
Electricity Demand	kWH/year
Previous Technical Study	4,471,700
Proposed Project	4,340,390
Net Change	-131,310

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for Moreno Valley Trade Center - Revised

HEALTH RISK COMPARISON

Table 5 compares the maximum lifetime cancer risk for the Proposed Project with risks generated by the Previous Technical Study. As indicated at Table 5, the Proposed Project would result in a net decrease of 0.11 risks per million for the 30-year exposure time period.

TABLE 5: NET HEALTH RISKS

	30 Year Exposure Risk
Previous Technical Study	7.25
Proposed Project	7.14
Net Change	-0.11
	25 Year Exposure Risk
Previous Technical Study	0.57
Proposed Project	0.55
Net Change	-0.02

CONCLUSION

The Proposed Project would not result in any impacts beyond what have previously been disclosed. In fact, the Proposed Project results in a net reduction in air quality, greenhouse gas, and health risk impacts.

Respectfully submitted,

URBAN CROSSROADS, INC.

Haseeb Qureshi
Principal

Project Characteristics -

Land Use - Total Project Area is 71.65 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Traffic Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the ratio of the vehicle classes in CalEEMod default fleet mix.

Area Coating -

Solid Waste -

Water And Wastewater -

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Traffic Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the ratio of the vehicle classes in CalEEMod default fleet mix.

Area Coating -

Solid Waste -

Water And Wastewater -

Moreno Valley Trade Center - Warehouse (Operations - Passenger Cars)

Riverside-South Coast County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Refrigerated Warehouse-No Rail	50.00	1000sqft	1.15	50,000.00	0
Unrefrigerated Warehouse-No Rail	1,213.27	1000sqft	29.00	1,213,270.00	0
Other Asphalt Surfaces	1,534.11	1000sqft	35.22	1,534,105.00	0
Parking Lot	521.00	Space	7.29	254,800.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Traffic Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the ratio of the vehicle classes in CalEEMod default fleet mix.

Area Coating -

Solid Waste -

Water And Wastewater -

Moreno Valley Trade Center - Warehouse (Operations - Trucks)

Riverside-South Coast County, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Refrigerated Warehouse-No Rail	50.00	1000sqft	1.15	50,000.00	0
Unrefrigerated Warehouse-No Rail	1,213.27	1000sqft	29.00	1,213,270.00	0
Other Asphalt Surfaces	1,534.11	1000sqft	35.22	1,534,105.00	0
Parking Lot	521.00	Space	7.29	254,800.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Traffic Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Memorandum.

Area Coating -

Water And Wastewater -

Solid Waste -

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Refrigerated Warehouse-No Rail	50.00	1000sqft	1.15	50,000.00	0
Unrefrigerated Warehouse-No Rail	1,213.27	1000sqft	29.00	1,213,270.00	0
Other Asphalt Surfaces	1,534.11	1000sqft	35.22	1,534,105.00	0
Parking Lot	521.00	Space	7.29	254,800.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Traffic Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Memorandum.

Area Coating -

Water And Wastewater -

Solid Waste -

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres.

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Traffic Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Memorandum.

Area Coating -

Water And Wastewater -

Solid Waste -

[a] Vehicle miles traveled are for modeled truck route only.

[b] Emission rates determined using EMFAC 2017. Idle emission rates are expressed in grams per idle hour rather than grams per mile.

[c] This column includes the total truck travel and truck idle emissions. For idle emissions this column includes emissions based on the assumption that each truck idles for 15 minutes.

** Key to Toxicological Endpoints

RESP	Respiratory System
CNS/PNS	Central/Peripheral Nervous System
CV/BL	Cardiovascular/Blood System
IMMUN	Immune System
KIDN	Kidney
GI/LV	Gastrointestinal System/Liver
REPRO	Reproductive System (e.g. teratogenic and developmental effects)
EYES	Eye irritation and/or other effects

Note: Exposure factors used to calculate contaminant intake

exposure frequency (days/year)	250
exposure duration (years)	25
inhalation rate (L/kg-day))	230
inhalation absorption factor	1
averaging time (years)	70

  ***
 - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -
- - - - - - - - - - - - - - - - - - - - - -

 **Model Is Setup For Calculation of Average CONCentration Values.

   --  DEPOSITION LOGIC  --
 **NO GAS DEPOSITION Data Provided.
 **NO PARTICLE DEPOSITION Data Provided.
 **Model Uses NO DRY DEPLETION.  DRYDPLT  =  F
 **Model Uses NO WET DEPLETION.  WETDPLT  =  F

 **Model Uses URBAN Dispersion Algorithm for the SBL for   922 Source(s),
   for Total of    1 Urban Area(s):
   Urban Population =   2189641.0 ;  Urban Roughness Length =  1.000 m

 **Model Uses Regulatory DEFAULT Options:
        1. Stack-tip Downwash.
        2. Model Accounts for ELEVated Terrain Effects.
```

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for Moreno Valley Trade Center - Revised

```
         3. Use Calms Processing Routine.
         4. Use Missing Data Processing Routine.
         5. No Exponential Decay.
         6. Urban Roughness Length of 1.0 Meter Assumed.

 **Other Options Specified:
         ADJ_U*   - Use ADJ_U* option for SBL in AERMET
         CCVR_Sub - Meteorological data includes CCVR substitutions
         TEMP_Sub - Meteorological data includes TEMP substitutions

 **Model Assumes No FLAGPOLE Receptor Heights.

 **The User Specified a Pollutant Type of:  OTHER

 **Model Calculates ANNUAL Averages Only

 **This Run Includes:    922 Source(s);       1 Source Group(s); and      19
Receptor(s)

                with:      0 POINT(s), including
                           0 POINTCAP(s) and      0 POINTHOR(s)
                 and:    922 VOLUME source(s)
                 and:      0 AREA type source(s)
                 and:      0 LINE source(s)
                 and:      0 RLINE/RLINEXT source(s)
                 and:      0 OPENPIT source(s)
                 and:      0 BUOYANT LINE source(s) with a total of     0 line(s)

 **Model Set To Continue RUNning After the Setup Testing.

 **The AERMET Input Meteorological Data Version Date:  16216

 **Output Options Selected:
          Model Outputs Tables of ANNUAL Averages by Receptor
          Model Outputs External File(s) of High Values for Plotting (PLOTFILE
Keyword)
          Model Outputs Separate Summary File of High Ranked Values (SUMMFILE
Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing
Hours
                                                                 b for Both Calm
and Missing Hours

 **Misc. Inputs:  Base Elev. for Pot. Temp. Profile (m MSL) =   442.00 ;  Decay
Coef. =    0.000     ;  Rot. Angle =     0.0
                  Emission Units = GRAMS/SEC                                ;
Emission Rate Unit Factor =   0.10000E+07
```

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (Warehouse) for Moreno Valley Trade Center - Revised

Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 3.9 MB of RAM.

**Input Runstream File: aermod.inp

**Output Print File: aermod.out

**Detailed Error/Message File: 12974 HCW.err

**File for Summary of Results: 12974 HCW.sum

MORENO VALLEY TRADE CENTER (E-COMMERCE SCENARIO) AIR QUALITY, GREENHOUSE GAS, AND HEALTH RISK ASSESSMENT EVALUATION

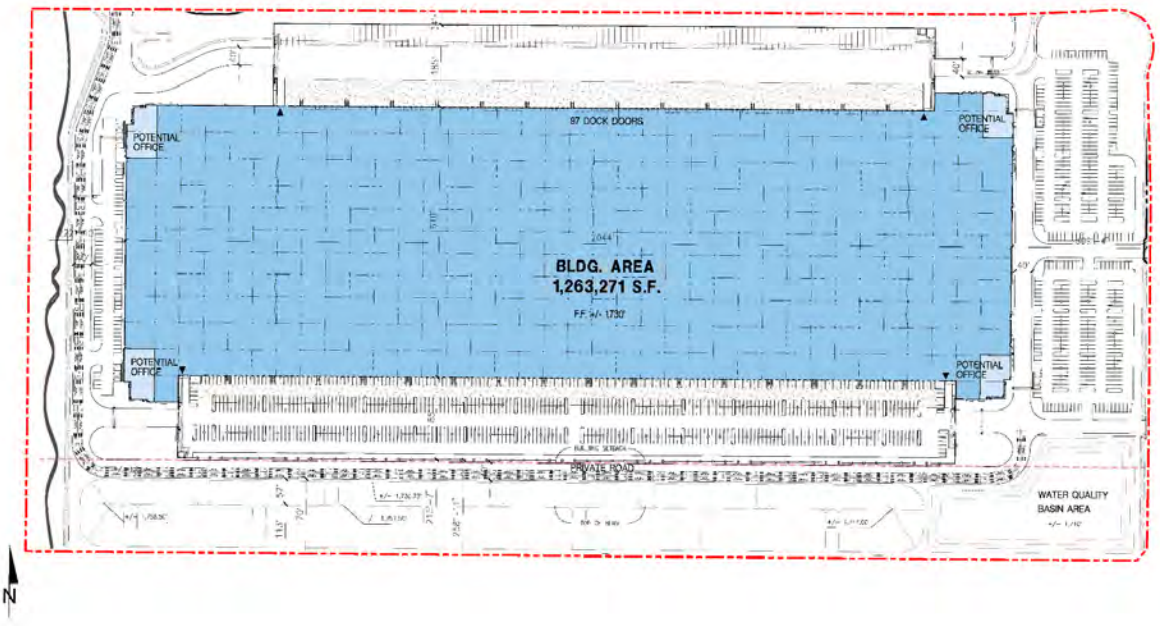
Mr. John Grace,

Urban Crossroads, Inc. is pleased to provide the following Air Quality (**AQ**), Greenhouse Gas (**GHG**), and Health Risk Assessment (**HRA**) Evaluation for the Moreno Valley Trade Center (E-Commerce Scenario) development which is located in the City of Moreno Valley. The purpose of this work effort is to assess the potential changes in air quality, greenhouse gas, and health risks associated with the updated site plan for the Project.

BACKGROUND

On October 9, 2020, Urban Crossroads, Inc. prepared an AQ, GHG, and HRA Evaluation for the proposed Moreno Valley Trade Center E-Commerce development (1). At the time the study was prepared, the proposed Project included the construction of approximately 50,000 sf of High-Cube Cold Storage facilities and 1,282,380 sf of E-Commerce facilities. Since then, the Project now proposes approximately 50,000 sf of High-Cube Cold Storage facilities and 1,213,271 sf of E-Commerce facilities (as illustrated on Exhibit 1). Therefore, for purposes of analysis in this memorandum, the Project now includes a reduction of 69,109 sf of building space. This memorandum includes the comparison of the emissions totals in the prior evaluation to what is now being proposed.

EXHIBIT 1: PRELIMINARY SITE PLAN



Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for Moreno Valley Trade Center - Revised

AIR QUALITY AND GREENHOUSE GAS EMISSIONS

A comparison of the operational-source emissions disclosed in the previous technical study compared to emissions anticipated from the Proposed Project are summarized on Tables 1 and 2.

TABLE 1: PREVIOUSLY ANALYZED LAND USE AIR QUALITY EMISSIONS

Source	Emissions (lbs/day)					
	VOC	NO_X	CO	SO_X	PM_{10}	$PM_{2.5}$
Summer						
Previous Technical Study	49.91	199.53	246.83	1.49	104.46	30.22
Proposed Project	47.25	189.06	234.00	1.41	98.94	28.63
Net Emissions	-2.66	-10.47	-12.83	-0.08	-5.52	-1.59
Winter						
Previous Technical Study	49.11	207.58	213.27	1.44	104.44	30.21
Proposed Project	46.49	196.67	202.21	1.36	98.91	28.62
Net Emissions	-2.62	-10.91	-11.06	-0.08	-5.53	-1.59

TABLE 2: GHG EMISSIONS SUMMARY

Emissions Source	Emissions (MT/yr) Total CO2e
Previous Technical Study	29,006.27
Proposed Project	27,327.57
Net Emissions	-1,678.70

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for Moreno Valley Trade Center - Revised

ENERGY DEMAND COMPARISON

Tables 3 and 4 summarize the net transportation and facility energy demands associated with the Proposed Project.

TABLE 3: NET TRANSPORTATION ENERGY DEMAND

	Annual VMT	Annual Fuel Consumption
Previous Technical Study	46,498,237	2,695,350
Proposed Project	44,037,350	2,552,700
Net Emissions	-2,460,887	-142,650

TABLE 4: NET FACILITY ENERGY DEMAND

Natural Gas	kBTU/year
Previous Technical Study	4,373,300
Proposed Project	4,274,480
Net Change	-98,820
Electricity Demand	kWH/year
Previous Technical Study	4,674,560
Proposed Project	4,444,550
Net Change	-230,010

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for Moreno Valley Trade Center - Revised

HEALTH RISK COMPARISON

Table 5 compares the maximum lifetime cancer risk for the Proposed Project with risks generated by the Previous Technical Study. As indicated at Table 5, the Proposed Project would result in a net decrease of 0.12 risks per million and 0.02 risks per million for the 30-year exposure and 25-year exposure time periods, respectively.

TABLE 5: NET HEALTH RISKS

	30 Year Exposure Risk
Previous Technical Study	2.29
Proposed Project	2.17
Net Change	-0.12
	25 Year Exposure Risk
Previous Technical Study	0.44
Proposed Project	0.42
Net Change	-0.02

CONCLUSION

The Proposed Project would not result in any impacts beyond what have previously been disclosed. In fact, the Proposed Project results in a net reduction in air quality, greenhouse gas, and health risk impacts.

Respectfully submitted,

URBAN CROSSROADS, INC.

Haseeb Qureshi

Refrigerated Warehouse-No Rail	50.00	1000sqft	1.15	50,000.00	0
Unrefrigerated Warehouse-No Rail	1,213.27	1000sqft	27.85	1,213,270.00	0
Other Asphalt Surfaces	954.50	1000sqft	21.91	954,505.00	0
Parking Lot	1,381.00	Space	21.75	552,400.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2022
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Area Coating -

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Water And Wastewater -

Solid Waste -

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the ratio of the vehicle classes in CalEEMod default fleet mix.

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Area Coating -

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Water And Wastewater -

Solid Waste -

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the ratio of the vehicle classes in CalEEMod default fleet mix.

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Area Coating -

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Water And Wastewater -

Solid Waste -

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Passenger Car Fleet Mix estimated based on the ratio of the vehicle classes in CalEEMod default fleet mix.

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Memorandum

Area Coating -

Solid Waste -

Water And Wastewater -

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Memorandum

Area Coating -

Solid Waste -

Water And Wastewater -

1.3 User Entered Comments & Non-Default Data

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for

Project Characteristics -

Land Use - Total Project Area is 71.65 acres

Construction Phase - Operations Run Only.

Off-road Equipment - Operations Run Only.

Trips and VMT - Operations Run Only.

Vehicle Trips - Trip Characteristics based on information provided in the Moreno Valley Trade Center Memorandum by Translutions, Inc.

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Vehicle Emission Factors - EMFAC2017

Energy Use - The Project will design building shells and building components to meet 2019 Title 24 Standards which expects 30% less energy for nonresidential uses

Operational Off-Road Equipment - Based on SCAQMD High Cube Warehouse Truck Trip Study White Paper Summary of Busniess Survey Results (2014)

Fleet Mix - Truck Fleet Mix estimated by rationing the Trip Rates for each truck type based on information provided in the Traffic Memorandum

Area Coating -

Solid Waste -

Water And Wastewater -

- - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -
- - - - - - - - - - - - - - - - - - - - - - -

 **Model Is Setup For Calculation of Average CONCentration Values.

   --  DEPOSITION LOGIC  --
 **NO GAS DEPOSITION Data Provided.
 **NO PARTICLE DEPOSITION Data Provided.
 **Model Uses NO DRY DEPLETION.  DRYDPLT  =  F
 **Model Uses NO WET DEPLETION.  WETDPLT  =  F

 **Model Uses URBAN Dispersion Algorithm for the SBL for   759 Source(s),
   for Total of    1 Urban Area(s):
   Urban Population =   2189641.0 ;  Urban Roughness Length =  1.000 m

 **Model Uses Regulatory DEFAULT Options:
        1. Stack-tip Downwash.
```

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for Moreno Valley Trade Center - Revised

```
         2. Model Accounts for ELEVated Terrain Effects.
         3. Use Calms Processing Routine.
         4. Use Missing Data Processing Routine.
         5. No Exponential Decay.
         6. Urban Roughness Length of 1.0 Meter Assumed.

 **Other Options Specified:
         ADJ_U*   - Use ADJ_U* option for SBL in AERMET
         CCVR_Sub - Meteorological data includes CCVR substitutions
         TEMP_Sub - Meteorological data includes TEMP substitutions

 **Model Assumes No FLAGPOLE Receptor Heights.

 **The User Specified a Pollutant Type of:  OTHER

 **Model Calculates ANNUAL Averages Only

 **This Run Includes:    759 Source(s);       1 Source Group(s); and      19
Receptor(s)

                with:      0 POINT(s), including
                           0 POINTCAP(s) and      0 POINTHOR(s)
                 and:    759 VOLUME source(s)
                 and:      0 AREA type source(s)
                 and:      0 LINE source(s)
                 and:      0 RLINE/RLINEXT source(s)
                 and:      0 OPENPIT source(s)
                 and:      0 BUOYANT LINE source(s) with a total of     0 line(s)

 **Model Set To Continue RUNning After the Setup Testing.

 **The AERMET Input Meteorological Data Version Date:  16216

 **Output Options Selected:
          Model Outputs Tables of ANNUAL Averages by Receptor
          Model Outputs External File(s) of High Values for Plotting (PLOTFILE
Keyword)
          Model Outputs Separate Summary File of High Ranked Values (SUMMFILE
Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing
Hours
                                                                 b for Both Calm
and Missing Hours

 **Misc. Inputs:  Base Elev. for Pot. Temp. Profile (m MSL) =   442.00 ;  Decay
Coef. =    0.000     ;  Rot. Angle =     0.0
                  Emission Units = GRAMS/SEC                                ;
```

Attachment: Air Quality, Greenhouse Gas, and Health Risk Assessment Evaluation (E-Commerce) for Moreno Valley Trade Center - Revised

Emission Rate Unit Factor = 0.10000E+07
Output Units = MICROGRAMS/M**3

**Approximate Storage Requirements of Model = 3.8 MB of RAM.

**Input Runstream File: aermod.inp

**Output Print File: aermod.out

**Detailed Error/Message File: 12974 FC.ERR

**File for Summary of Results: 12974 FC.SUM

SUBJECT: MORENO VALLEY TRADE CENTER WAREHOUSE NOISE SUMMARY

Dear Mr. John Grace:

Urban Crossroads, Inc. is pleased to provide the following Noise Summary for the Moreno Valley Trade Center Warehouse development (referred to as "Project") located in the City of Moreno Valley. The purpose of this Noise Summary is to describe the changes in operational noise levels associated with the updated site plan for the Proposed Project as shown on Exhibit A.

EXECUTIVE SUMMARY

On January 10, 2021, Urban Crossroads, Inc. prepared a previous technical Noise Impact Analysis for the proposed Moreno Valley Trade Center Warehouse development (1). At the time the previous noise study was prepared, the proposed Project included the construction of 1,332,380 square feet of warehouse use and a planned 14-foot-high screen wall surrounding the southern loading dock area. The current proposed building is 1,263,271 square feet, for a reduction of 65,582 square feet. Truck access to and from the project site will be restricted to the two driveways on Eucalyptus Avenue.

In addition, to reduce the potential Project related noise levels in the residential community to the south, the Proposed Project site plan and noise impact analysis was revised to include a planned berm in addition to the planned 14-foot-high screen wall. The berm was designed to fully screen and block the line of sight of the Project from the homes to the south on Encelia Avenue.

Consistent with the January 10, 2021, Urban Crossroads, Inc. technical Noise Impact Analysis, the proposed Project will satisfy the City of Moreno Valley 65 dBA L_{eq} daytime and 60 dBA L_{eq} nighttime exterior noise level standards. In addition, the analysis shows that the Project will not produce a measurable daytime or nighttime noise increase at the nearby receiver locations or at 200 feet from the property line of the source. In summary,

- The proposed 14' concrete wall reduces the Project operational noise by approximately 30% on Encelia Avenue at the northly end of the neighborhood.
- The addition of the berm reduces the Project operational noise levels by an additional 26%.
- The 14' concrete wall and berm provide a combined Project Operational noise reduction of 56%
- The estimated project noise levels are lower than the ambient noise levels that exist today within the residential neighborhood to south on Encelia Avenue.

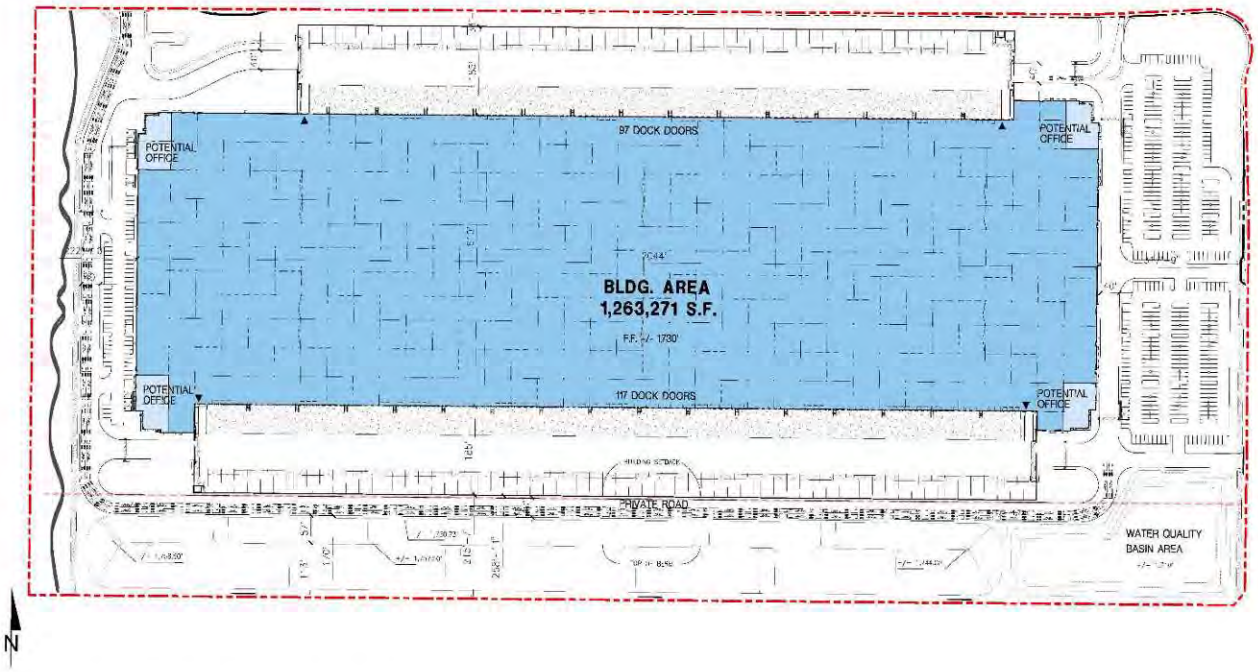
EXHIBIT A: SITE PLAN



SENSITIVE RECEIVER LOCATIONS

To assess the potential for long-term operational and short-term construction noise impacts, the following sensitive receiver locations, as shown on Exhibit B, were identified as representative locations for analysis. To describe the potential off-site Project noise levels, three receiver locations in the vicinity of the Project site were identified.

R1: Location R1 represents the existing noise sensitive residence at 21969 Spruce Avenue, approximately 1,621 feet north of the Project site.

R2: Location R2 represents the existing noise sensitive residence at 13031 Shubert Street, approximately 126 feet south of the Project site.

R3: Location R3 represents the existing noise sensitive residence at 13020 Essen Lane, approximately 118 feet south of the Project site.

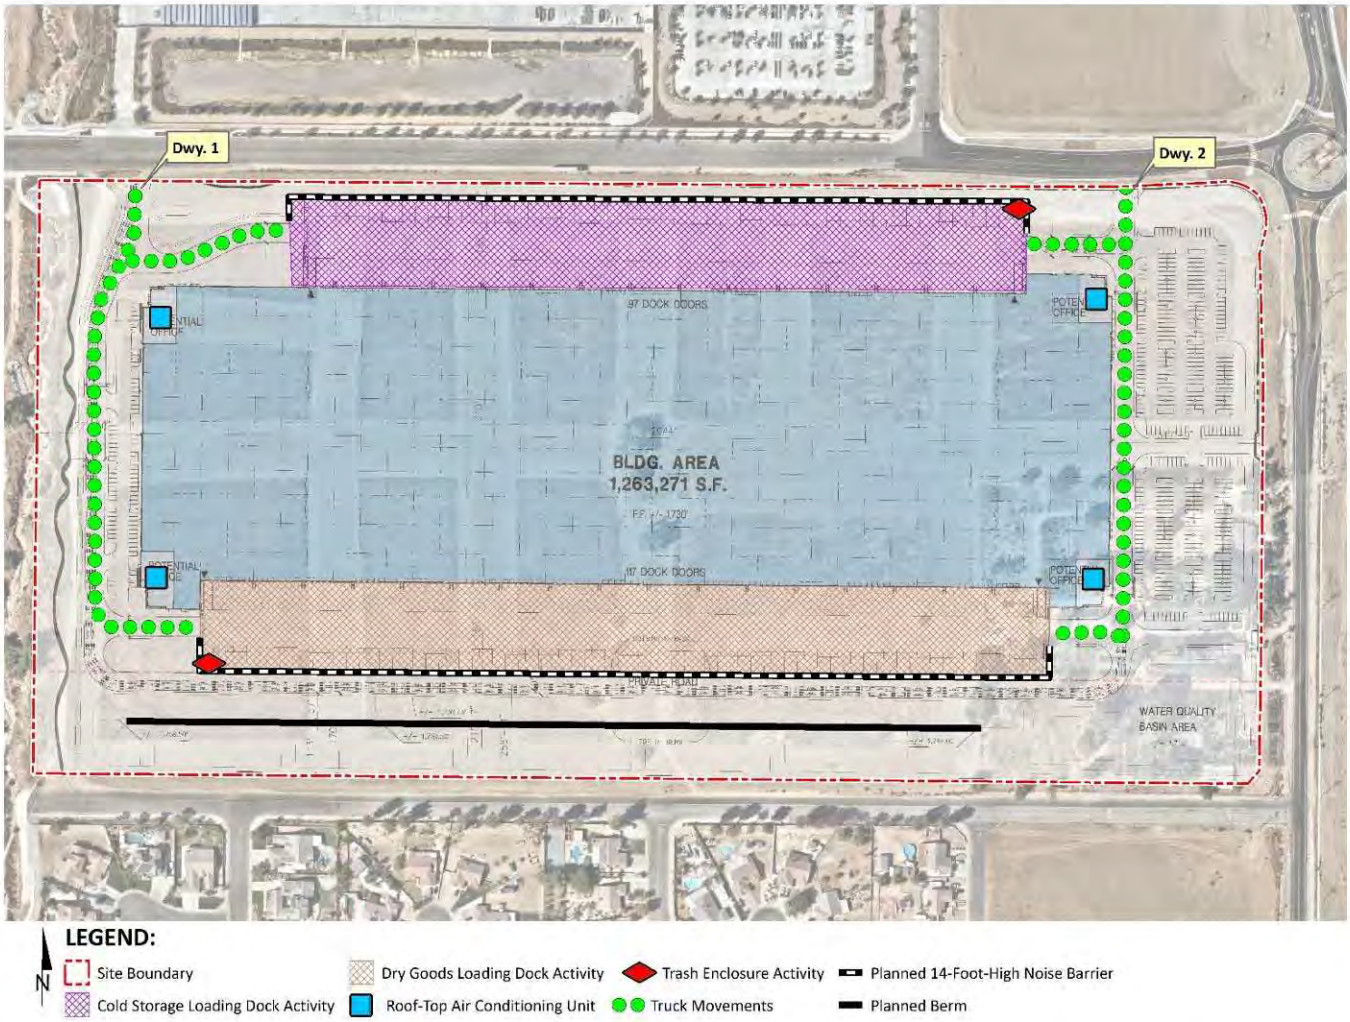
OPERATIONAL NOISE ANALYSIS

Using reference noise levels to represent the expected noise sources from the Moreno Valley Trade Center Warehouse site, the operational analysis estimates the Project-related stationary-source noise hourly average L_{eq} levels at nearby sensitive receiver locations. The typical activities associated with the proposed Moreno Valley Trade Center Warehouse are anticipated to include loading dock activity, roof-top, air-conditioning units, parking lot vehicle movements, trash enclosure activity, and truck movements.. Exhibit C identifies the representative noise source locations used to assess the Proposed Project operational noise levels.

EXHIBIT C: OPERATIONAL NOISE SOURCE LOCATIONS



Appendix A includes the detailed noise model inputs including the planned 14-foot-high screen wall used to estimate the Project operational noise levels presented in this section. Consistent with the January 10, 2021, Noise Impact Analysis, the operational noise analysis for the updated site plan shows

Attachment: Warehouse Noise Summary for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley Trade Center/Park)

that the Project will satisfy the City of Moreno Valley stationary-source exterior hourly average L_{eq} noise levels of 65 dBA L_{eq} daytime and 60 dBA L_{eq} nighttime noise level standards at all nearby receiver locations and at 200 feet from the property line of the source. Therefore, the Project-related operational noise level impacts are considered *less than significant*. Table 1 provides a comparison of the daytime operational noise levels disclosed in the previous technical study compared to noise levels anticipated from the updated Project site plan. Table 1 shows that the Proposed Project with the planned berm and planned 14-foot-high screen will reduce the daytime noise levels more than 4 dBA when compared to the previous Noise Impact Analysis.

TABLE 1: DAYTIME OPERATIONAL NOISE LEVEL COMPARISON

Receiver Location[1]	Project Operational Noise Levels (dBA Leq)		Noise Level Reduction (dBA Leq)[4]
	Previous Technical Study[2]	Proposed Project[3]	
R1	44.3	37.6	-6.8
R2	40.1	35.8	-4.3
R3	41.0	35.5	-5.5
at 200'	40.0	35.1	-4.9

[1] See Exhibit B for the receiver locations.
[2] January 10, 2021, Moreno Valley Trade Center Warehouse Noise Impact Analysis prepared by Urban Crossroads.
[3] Proposed Project CadnaA noise model calculations are included in Appendix A. While Receiver R1 does not benefit from the planned berm, the Proposed Project operational noise analysis now includes the ALDI Distribution Center Building that acts a noise barrier resulting in the Proposed Project operational noise level decrease.
[4] Noise level reduction with the planned berm in addition to the planned 14-foot-high screen wall.

Table 2 provides a comparison of the nighttime operational noise levels disclosed in the previous technical study compared to noise levels anticipated from the updated Project site plan. Table 2 shows that the Proposed Project with the planned berm and planned 14-foot-high screen will reduce the nighttime noise levels more than 4 dBA when compared to the previous Noise Impact Analysis.

TABLE 2: NIGHTTIME OPERATIONAL NOISE LEVEL COMPARISON

Receiver Location[1]	Project Operational Noise Levels (dBA Leq)		Noise Level Reduction (dBA Leq)[4]
	Previous Technical Study[2]	Proposed Project[3]	
R1	44.1	37.5	-6.6
R2	39.7	35.6	-4.1
R3	39.8	35.3	-4.5
at 200'	39.3	34.9	-4.4

[1] See Exhibit B for the receiver locations.
[2] January 10, 2021, Moreno Valley Trade Center Warehouse Noise Impact Analysis prepared by Urban Crossroads.
[3] Proposed Project CadnaA noise model calculations are included in Appendix A. While Receiver R1 does not benefit from the planned berm, the Proposed Project operational noise analysis now includes the ALDI Distribution Center Building that acts a noise barrier

Attachment: Warehouse Noise Summary for Moreno Valley Trade Center - Revised Project Evaluation (6209 : Moreno Valley Trade Center/Park)

resulting in the Proposed Project operational noise level decrease.
[4] Noise level reduction with the planned berm in addition to the planned 14-foot-high screen wall.

CONCLUSION

The Proposed Project would not result in any impacts beyond what have previously been disclosed. In fact, the updated site plan now includes a planned berm in addition to the planned 14-foot-high screen wall is expected to further reduce the Project noise levels by an additional 26%. If you have any questions, please contact me directly at (949) 584-3148.

Respectfully submitted,

URBAN CROSSROADS, INC.

Bill Lawson, P.E., INCE
Principal

Total	521	stalls
TRAILER PARKING REQUIRED		
1 per dock door	214	stalls
TRAILER PARKING PROVIDED		
Trailer (14' x 50')	228	stalls
MAXIMUM FLOOR AREA RATIO		
FAR - to be verified		
ZONING ORDINACE FOR CITY		
Existing - Residential agriculture 2 dwellings (RA2)		
Proposed - Industrial (I)		
SETBACK		
Building	Landscape	
Front /Street- 20'	10'	
Interior side - 3'		
Rear - 3'		
Note: when any Industrial district abuts a property in any residential, a min. bldg. setback equal to the bldg. height, but not less than 20' shall be required from such residential district. Further, the 10' of such setback nearest the district boundary line shall be landscape.		

site plan general notes

1. THE SOILS REPORT IS TO BE PART OF THESE CONTRACT DOCUMENTS
2. IF SOILS ARE EXPANSIVE IN NATURE, USE STEEL REINFORCING FOR ALL SITE CONCRETE
3. ALL DIMENSIONS ARE TO THE FACE OF CONCRETE WALL, FACE OF CONCRETE CURB OR GRID LINE U.N.O.
4. SEE "C" PLANS FOR ALL CONCRETE CURBS, GUTTERS AND SWALES.
5. THE ENTIRE PROJECT SHALL BE PERMANENTLY MAINTAINED WITH AN AUTOMATIC IRRIGATION SYSTEM. PRIOR TO INSTALLATION & AT LEAST 60 DAYS BEFORE BLDG. COMPLETION.
6. SEE "C" DRAWINGS FOR POINT OF CONNECTIONS TO OFF-SITE UTILITIES. CONTRACTOR SHALL VERIFY ACTUAL UTILITY LOCATIONS.
7. PROVIDE POSITIVE DRAINAGE AWAY FROM BLDG. SEE "C" DRAWINGS.
8. CONTRACTOR TO REFER TO "C" DRAWINGS FOR ALL HORIZONTAL CONTROL DIMENSIONS.
9. SITE PLANS ARE FOR GUIDANCE AND STARTING LAYOUT POINTS. SEE "C"DRAWINGS FOR FINISH GRADE ELEVATIONS.
10. CONCRETE SIDEWALKS TO BE A MINIMUM OF 4" THICK W/ TOOLED JOINTS AT 6' O.C. EXPANSION/CONSTRUCTION JOINTS SHALL BE A MAXIMUM 12' EA. WAY W/ 1:20 MAX. SLOPE. EXPANSION JOINTS TO HAVE COMPRESSIVE EXPANSION FILLER MATERIAL OF 1/4". SEE "L" DRAWINGS FOR FINISH.
11. PAINT CURBS AND PROVIDE SIGNS TO INFORM OF FIRE LANES AS REQUIRED BY FIRE DEPARTMENT.
12. CONSTRUCTION DOCUMENTS PERTAINING TO THE LANDSCAPE AND IRRIGATION OF THE ENTIRE PROJECT SITE SHALL BE SUBMITTED TO THE PLANNING DIVISION AND APPROVED BY PUBLIC FACILITIES DEVELOPMENT PRIOR TO ISSUANCE OF BUILDING PERMITS.
13. PRIOR TO FINAL CITY INSPECTION, THE LANDSCAPE ARCHITECT SHALL SUBMIT A CERTIFICATE OF COMPLETION TO PLANNING DIVISION.
14. ALL LANDSCAPE AND IRRIGATION DESIGNS SHALL MEET CURRENT CITY STANDARDS AS LISTED IN GUIDELINES OR AS OBTAINED FROM PLANNING DIVISION.
15. LANDSCAPED AREAS SHALL BE DELINEATED WITH A MINIMUM SIX INCHES (6") HIGH CURB
16. APPROVED CONCEPTUAL LANDSCAPE PLAN PRIOR TO GRADING PERMIT
17. ALL ROOF DRAINS SHALL BE DIRECTED TO A LANDSCAPE AREA.
17. PEDESTRIAN WALKWAYS ACROSS DRIVE AISLES SHALL BE CONSTRUCTED OF A DECORATIVE PAVING.

site plan keynotes

1. 6" THICK MINIMUM, REINFORCED CONCRETE TRUCK APRON, W/ #3 @ 18" O.C.E.W. 3500 PSI W. CONSTRUCTION AND/OR EXPANSION JOINTS A MAXIMUM OF 18'–0" O.C. EXPANSION JOINTS TO BE A MIN. OF 1–1/2" DEEP AND A MAXIMUM ULTIMATE WIDTH OF 1/4". VERIFY WITH SOILS ENGINEER. PROVIDE HEAVY BROOM FINISH. ALL JOINTS TO BE CLEANED AN FILLED W/ ASPHALTIC CAULKING.
2. ASPHALT CONCRETE (AC) PAVING PER SOILS ENGINEER RECOMMENDATION AS APPROVED BY THE CITY.
3. CONCRETE WALKWAY
4. DRIVEWAY APRONS TO BE CONSTRUCTED PER CITY STANDARD MV51–112C–0. PROVIDE DECORATIVE PAVING (STAMPED CONCRETE W/ LIGHT BROOM FINISH) AT ALL DRIVE LOCATIONS.
5. 5'–6"X5'–6"X4" THICK CONCRETE EXTERIOR LANDING PAD TYP. AT ALL EXTERIOR MAN DOORS TO LANDSCAPED AREAS. FINISH TO BE MEDIUM BROOM FINISH PROVIDE WALK TO PUBLIC WAY OR DRIVE WAY AS REQ. BY CITY INSPECTOR.
6. 14' HIGH CONCRETE TILT–UP SCREEN WALL PER SEPARATE PERMIT
7. 8'H METAL AUTOMATIC SLIDING GATE.
8. CONCRETE RAMP
9. BIKE RACK, "U" SHAPED. EACH RACK HOLDS 2 BIKES. 16 RACKS PROVIDED
10. TRASH ENCLOSURE TO BE TWO BIN AND FULLY COVERED PER CITY STANDARD.
11. CONCRETE STAIRS
12. PUMP ROOM
13. LANDSCAPE. SEE CONCEPTUAL LANDSCAPE PLAN.
14. APPROXIMATE LOCATION OF TRANSFORMER
15. TRAIL FENCING ON BOTH SIDES OF TRAIL PER CITY STANDARDS

KEYNOTES - FLOOR PLAN

1. CONCRETE TILT-UP PANEL.
2. STRUCTURAL STEEL COLUMN.
3. TYPICAL STOREFRONT SYSTEM WITH GLAZING. SEE OFFICE BLOW-UP AND ELEVATIONS FOR SIZE, COLOR AND LOCATIONS.
4. CONCRETE RAMP W/ 42"HIGH CONC TILT-UP GUARD WALL OR BUILDING WALL ON BOTH SIDE OF RAMP.
5. 9'-0" X 10' TRUCK DOOR, SECTIONAL O'H., STANDARD GRADE.
6. EXTERIOR CONCRETE STAIR
7. 5'-6"X5'-6"X4" THICK CONCRETE EXTERIOR LANDING PAD TYPICAL AT ALL EXTERIOR MAN DOORS TO LANDSCAPED AREA. FINISH TO BE MEDIUM BLOOM FINISH. SLOPE TO BE 1/4" : 12" MAX. PROVIDE WALK TO HARD SURFACE PER CITY REQUIREMENTS.
8. LOUVERED OPENING FOR VENTILATION.
9. DOCK DOOR BUMPER.
10. 12' X 14' DRIVE THRU. SECTIONAL OH., STANDARD GRADE. DESIGNED TO RESIST WIND 110 MPH., EXPOSURE "C".
11. 3'X7' HOLLOW METAL EXTERIOR MAN DOOR. DESIGNED TO RESIST WIN 110 MPH., EXPOSURE "C".
12. SOFFIT LINE ABOVE
13. BRACE FRAME.
14. CONC. FILLED GUARD POST. 6" DIA. U.N.O.. 42"H.
15. INTERIOR ROOF DRAIN WITH OVERFLOW SCUPPERS,
16. Z GUARD

GENERAL NOTES - FLOOR PLAN

A. THIS BUILDING IS DESIGNED FOR HIGH PILE STORAGE WITH FIRE ACCESS MAN DOORS AT 100' MAXIMUM O.C. A SEPARATE PERMIT WILL BE REQUIRED FOR ANY RACKING/CONVEYER SYSTEMS.

B. FIRE HOSE LOCATIONS SHALL BE APPROVED PER FIRE DEPARTMENT.

C. THE BUILDING FLOOR SLAB IS SLOPED, SEE "C" DRAWINGS FOR FINISH SURFACE ELEVATIONS.

D. NOT USED

E. WAREHOUSE INTERIOR CONCRETE WALLS ARE PAINTED WHITE. COLUMNS ARE TO RECEIVE PRIMER ONLY. ALL GYP. BD. WALLS IN WAREHOUSE TO RECEIVE 1 COAT OF WHITE TO COVER.

F. SLOPE POUR STRIP 1/2" TO EXTERIOR AT ALL MANDOOR EXITS.

G. ALL DIMENSIONS ARE TO THE FACE OF CONCRETE PANEL WALL, GRIDLINE, OR FACE OF STUD U.N.O.

H. SEE CIVIL DRAWINGS FOR POINT OF CONNECTIONS TO OFF-SITE UTILITIES. CONTRACTOR TO VERIFY ACTUAL UTILITY LOCATIONS. PLUMBING/ELECTRICAL COORDINATION.

I. FOR DOOR TYPES AND SIZES. NOTE: ALL DOORS PER DOOR SCHEDULE ARE FINISH OPENINGS.

J. CONTRACTOR TO PROTECT AND KEEP THE FLOOR SLAB CLEAN. ALL EQUIPMENT TO BE DIAPERED INCLUDING CARS AND TRUCKS.

K. ALL EXIT MAN DOORS IN WAREHOUSE TO HAVE ILLUMINATED EXIT SIGN. HARDWARE.

L. HIGHLY FLAMMABLE AND COMBUSTIBLE MATERIAL SHALL NOT BE USED OR STORED IN THIS BUILDING.

M. EACH EXTERIOR EXIT DOOR SHALL BE IDENTIFIED BY A TACTILE EXIT SIGN WITH THE WORDS "EXIT". THE MOUNTING HEIGHT FOR SUCH SIGNAGE SHALL BE 60" FROM FINISH FLOOR LEVEL TO THE CENTER OF THE SIGN.

N. NON-ACCESSIBLE DOOR. PROVIDE WARNING SIGN LOCATED IN THE INTERIOR SIDE PER CBC 1133B.1.1.1

O. ALL ROOF MOUNTED MATERIALS SHALL BE FULLY SCREENED FROM PUBLIC VIEW,

KEYNOTES - ELEVATIONS

1. CONCRETE TILT-UP PANEL(PAINTED). FINISH GRADE VARIES. SEE "C" DRAWINGS. WATERPROOF ALL WALLS WHERE GRADE IS HIGHER AND EXPOSED TO THE WEATHER ONE SIDE. WATERPROOFING TO BE PROTECTED WITH PROTECTION BOARD AND A MIN. OF 6" OF GRAVEL. PROVIDE TRENCH DRAIN AT BOTTOM AND DAYLIGHT TO CURB OR TAKE TO STORM DRAIN. NOT REQUIRED AT DOCK HIGH CONDITION OR AT RAMP WALLS.
2. PANEL JOINT.
3. PANEL REVEAL. ALL REVEALS TO HAVE A MAX. OF 3/8" CHAMFER. REVEAL COLOR TO MATCH ADJACENT BUILDING FIELD COLOR. U.N.O.
4. OVERHEAD DOOR @ DRIVE THRU. SEE DOOR SCHEDULE. PROVIDE COMPLETE WEATHER-STRIPPING PROTECTION ALL AROUND.
5. OVERHEAD DOOR @ DOCK HIGH. SEE DOOR SCHEDULE. PROVIDE COMPLETE WEATHER-STRIPPING PROTECTION ALL AROUND.
6. CONCRETE STAIR, LANDING AND GUARDRAIL W/ METAL PIPE HANDRAIL. PROVIDE NON SKID NOSING TO MEET ADA REQUIREMENTS. PROVIDE CONTRASTING COLORED 3" WIDE WARNING STRIPE INTEGRAL TO CONCRETE AT TOP LANDING AND BOTTOM TREAD PER ADA REQUIREMENTS.
7. CANOPY
8. HOLLOW METAL DOORS. SEE DOOR SCHEDULE. PROVIDE COMPLETE WEATHER STRIPING ALL AROUND DOOR. PROVIDE FOR RAIN DIVERTER ABOVE DOOR.
9. INTERIOR ROOF DRAIN WITH OVERFLOW SCUPPERS
10. DOCK BUMPER
11. ALUMINUM STOREFRONT FRAMING WITH TEMPERED GLAZING AT ALL DOORS, SIDELITES ADJACENT TO DOORS AND GLAZING WITH BOTTOMS LESS THAN 18" ABOVE FINISH FLOOR ELEVATION.
12. ILLUMINATED BUILDING ADDRESS PER FIRE DEPT. REQUIREMENTS. 24"H. X 2" THICK HIGH DENSITY FOAM "HELVATIC BOLD" W/ 1/16" CAST ALUMINUM FACES EPOXY TO WALL. COLOR TO BE SELECTED BY ARCHITECT.

GENERAL NOTES - ELEVATIONS

A. ALL PAINT COLOR CHANGES TO OCCUR AT INSIDE CORNERS UNLESS NOTED OTHERWISE.
B. ALL PAINT FINISHES ARE TO BE FLAT UNLESS NOTED OTHERWISE.
C. T.O.P. EL.= TOP OF PARAPET ELEVATION.
D. F.F. = FINISH FLOOR ELEVATION.
E. STOREFRONT CONSTRUCTION: GLASS, METAL ATTACHMENTS AND LINTELS SHALL BE DESIGNED TO RESIST 90 MPH, EXPOSURE "C" WINDS. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS PRIOR TO INSTALLATION.
F. CONTRACTOR SHALL FULLY PAINT ONE CONCRETE PANEL W/ SELECTED COLORS. ARCHITECT AND OWNER SHALL APPROVE PRIOR TO PAINTING REMAINDER OF BUILDING.
G. BACK SIDE OF PARAPETS TO HAVE SMOOTH FINISH AND BE PAINTED WITH ELASTOMERIC PAINT.
H. FOR SPANDREL GLAZING, ALLOW SPACE BEHIND SPANDREL TO BREATH.
J. USE ADHESIVE BACK WOOD STRIPS FOR ALL REVEAL FORMS.
K. THE FIRST COAT OF PAINT TO BE ROLLED-ON AND THE SECOND COAT TO BE SPRAYED-ON

STREET PAVEMENT NOTE:

THE FOLLOWING STREET SEGMENTS TO RECEIVE PAVEMENT WORK. WORK SHALL BE AT LEAST A 2 INCH GRIND AND INLAY PER CITY STANDARDS. SLURRY SEAL IS ALLOWED ON APPROVED PARTIAL SEGMENTS BASED UPON A PCI OF 75 OR GREATER (PER CITY ENGINEER). WORK ALSO INCLUDES RESTRIPING AND ADA PEDESTRIAN RAMP IMPROVEMENTS PER CITY STANDARDS.

A. ALESSANDRO – WLC PARKWAY TO VIRGINIA STREET
B. COTTONWOOD – MORENO BEACH TO REDLANDS
C. REDLANDS – BAY TO DRACAEA
D. DRACAEA – WESTFORD TO REDLANDS
E. JOHN F. KENNEDY – CACTUS TO MORENO BEACH

PROPOSED EASEMENTS, DEDICATIONS AND VACATIONS:

(1) INDICATES EASEMENTS FOR STREET AND HIGHWAY PURPOSES TO BE DEDICATED TO THE CITY OF MORENO VALLEY ON PARCEL MAP.

(2) INDICATES PORTIONS OF REDLANDS BOULEVARD, EUCALYPTUS AVENUE AND QUINCY STREET TO BE VACATED ON PARCEL MAP.

(3) INDICATES EASEMENTS FOR TRAIL PURPOSES TO BE DEDICATED TO THE CITY OF MORENO VALLEY ON PARCEL MAP.

(4) INDICATES AN EASEMENT FOR DRAINAGE AND MAINTENANCE PURPOSES (QUINCY CHANNEL) TO BE DEDICATED TO THE CITY OF MORENO VALLEY ON PARCEL MAP.

(5) INDICATED ADDITIONAL RIGHT–OF–WAY FOR PEDESTRIAN ACCESS ACROSS THE PROPOSED DRIVEWAYS TO BE DEDICATED TO THE CITY OF MORENO VALLEY ON PARCEL MAP.

(6) INDICATES EASEMENTS FOR LID WATER QUALITY IMPROVEMENT PURPOSES (BMP) TO BE DEDICATED TO THE CITY OF MORENO VALLEY ON PARCEL MAP.

BASIS OF BEARINGS:

THE BASIS OF BEARINGS FOR THIS SURVEY IS THE CALIFORNIA STATE PLANE COORDINATE SYSTEM (CCS83), ZONE 6, NORTH AMERICAN DATUM 1983 (NAD83) BASED LOCALLY ON CONTINUOUSLY OPERATING REFERENCE STATIONS (CORS) "MLFP" AND "P584" AS BEING NORTH 80°06'44.6994" EAST (BASIS OF BEARINGS) (GRID) AND REPRESENTED HEREON BY THE CENTERLINE OF ENCELIA AVENUE (EUCALYPTUS AVENUE) AS BEING NORTH 89°33'27" WEST. (2010.0 EPOCH)

BOUNDARY ESTABLISHMENT:

THE BOUNDARY SHOWN HEREON IS BASED ON A FIELD SURVEY PERFORMED OCTOBER 30, 2019 TO NOVEMBER 5, 2019.

EXISTING EASEMENTS:

THE FOLLOWING EASEMENTS AND MATTERS AS DISCLOSED IN FIRST AMERICAN TITLE COMPANY PRELIMINARY TITLE REPORT ORDER NUMBER: NCS-970708-SD DATED AS OF JULY 31, 2019.

(NO.) INDICATES ITEM NUMBER PER EXCEPTIONS TO COVERAGE OF ABOVE PRELIMINARY TITLE REPORT.

(1–3) TAXES, ASSESSMENTS AND LIEN OF SUPPLEMENTAL OR ESCAPED ASSESSMENTS, IF ANY.

(4) 4. AN EASEMENT SHOWN OR DEDICATED ON THE MAP OF MAP NO. 1 BEAR VALLEY AND ALESSANDRO DEVELOPMENT CO; RECORDED NOVEMBER 03, 1890 AND ON FILE IN BOOK 11, PAGE 10, OF TRACT MAPS.
FOR: RIGHT OF WAY, PIPES, CONDUITS AND INCIDENTAL PURPOSES.
THE EFFECT OF A RESOLUTION BY THE RIVERSIDE COUNTY BOARD OF SUPERVISORS ACCEPTING SAID OFFER OF DEDICATION FOR THE PURPOSE OF VESTING TITLE IN THE COUNTY OF RIVERSIDE ON BEHALF OF THE PUBLIC, BUT NOT AS PART OF THE COUNTY – MAINTAINED ROAD SYSTEM, RECORDED JANUARY 30, 1990 AS INSTRUMENT NO. 37909 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.
(SAID OFFERS OF DEDICATION BEING 30' HALFWIDTH ALONG QUINCY STREET, 40' HALFWIDTH ALONG FIR AVENUE [NOW EUCALYPTUS AVENUE], 40' HALFWIDTH ALONG EUCALYPTUS AVENUE [NOW ENCELIA AVENUE] AND 60' HALFWIDTH ALONG REDLANDS BOULEVARD PLOTTED HEREON AS (4A))
(SAID ACCEPTANCE OF OFFER ALONG FIR AVENUE [NOW EUCALYPTUS AVENUE] PLOTTED HEREON AS (4A))

(5) 5. AN EASEMENT FOR CONDUITS, AND RIGHTS AND INCIDENTAL PURPOSES, RECORDED MARCH 04, 1955 IN BOOK 1702, PAGE 559 OF OFFICIAL RECORDS.
IN FAVOR OF: EASTERN MUNICIPAL WATER DISTRICT
RECORDED: MARCH 04, 1955 IN BOOK 1702, PAGES 467 AND 552, RESPECTIVELY, OFFICIAL RECORDS, AND BY DEED RECORDED NOVEMBER 12, 1969 AS INSTRUMENT NO. 115832, OFFICIAL RECORDS.
THE LOCATION OF THE EASEMENT CANNOT BE DETERMINED FROM RECORD INFORMATION.
(SAID EASEMENT IS NOT PLOTTABLE FROM RECORD INFORMATION)

(7) 7. THE EFFECT OF A RESOLUTION BY THE RIVERSIDE COUNTY BOARD OF SUPERVISORS ACCEPTING SAID OFFER OF DEDICATION FOR THE PURPOSE OF VESTING TITLE IN THE COUNTY OF RIVERSIDE ON BEHALF OF THE PUBLIC, BUT NOT AS PART OF THE COUNTY – MAINTAINED ROAD SYSTEM, RECORDED SEPTEMBER 30, 1982 AS INSTRUMENT NO. 169330 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.
(SAID ACCEPTANCE OF OFFER ALONG EUCALYPTUS AVENUE [NOW ENCELIA AVENUE] PLOTTED HEREON AS (7))

(14) 14. AN EASEMENT SHOWN OR DEDICATED ON THE MAP OF MAP NO. 1 BEAR VALLEY AND ALESSANDRO DEVELOPMENT CO; RECORDED NOVEMBER 03, 1890 AND ON FILE IN BOOK 11, PAGE 10, OF TRACT MAPS.
FOR: RIGHT OF WAY, PIPES, CONDUITS AND INCIDENTAL PURPOSES.
THE EFFECT OF A RESOLUTION BY THE RIVERSIDE COUNTY BOARD OF SUPERVISORS ACCEPTING SAID OFFER OF DEDICATION FOR THE PURPOSE OF VESTING TITLE IN THE COUNTY OF RIVERSIDE ON BEHALF OF THE PUBLIC, BUT NOT AS PART OF THE COUNTY – MAINTAINED ROAD SYSTEM, RECORDED JANUARY 30, 1990 AS INSTRUMENT NO. 37909 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

Re: The above Property SCH#

We attended a meeting that Councilman David Marquez informed us of on September 19, 2020 letting us know what was intended for the land directly in our backyard.
We are vehemently opposed to the changing of the zoning of the land for this project from Residential or General Land Use of the 71.85 acre site to Light Industrial.
Which is an extremely bogus statement because a building of 1,332,380 square feet is not Light industrial but rather Major Industrial.
We live in the subdivision directly South and across the street from where this Light Industrial Building is to be built. This is literally in our backyard!!! We moved here in 1994 when Kaufman and Broad developed homes in the area. We were always told that another subdivision of homes would be going in some day across the street not an industrial building.

We are opposed to the noise that a building of this kind would create possibly during all hours of the night as does the Paper Factory down on Eucalyptus.
We oppose the massive amount of traffic that it would bring to our quiet neighborhood, jeopardizing the children that play on our streets.
We oppose the taking of our beautiful view of the mountains, which we moved here for.
We are most concerned about what this change would do to the property value of our home here in Rancho Bellago California.

Please find another area for your "Light Industrial Building".

Economic Development Team
14177 Frederick St.
Moreno Valley, CA 92553

Dear Council Members and Economic Development Team:

My name is Nelly Meza, and I am a member of Valley Springs Homeowners Association. I am writing today to ask you reconsider the proposal for the Moreno Valley Trade Center. I ask that you deny any request to rezone the property and keep as residential.

The impact this project will have on my community and family are substantial. So many health risks, such as respiratory health, increase in cancer and cardiovascular health, neurological health, and mental health are upon the several risk factors we will be faced with if this project moves forward. The chemicals in building products are an overlooked harm and are beyond the control of the community it impacts. These materials contain chemical toxicants that are harmful to human health. I am in fear for the wellbeing of my community and family. It is your responsibility to help protect everyone's health.

As we move into the new normal of having classroom within our homes, it has been proven that children with high background noise perform lower. This project is feet away from my front door, the noise will impact the education of the three students I have at home. The noise from the commercial buildings On Eucalyptus and Redlands Blvd are already impactful to our wellbeing. We are forced to keep windows shut in order to have peace, otherwise it feels as we are actively involved in loading/unloading commercial trucks.

Thank you in advance for considering our request. I know that with your help we can prevent the proposal from moving forward.

Sincerely,

Nelly Meza

Subject: No Warehouse up against residential property

Warning: External Email – Watch for Email Red Flags!

I am a homeowner in the Rancho Belago area.

It has come to my attention that land at Redlands/Eucalyptus is up for a zone change for purposes of the proposed Moreno Valley Trade Center. I want the zoning to remain residential. It has also come to my attention Adam's Nursery, who stands to make a lot of money from the sale of his land to the developer, is making political contributions to you for your support of the zone change for the proposed Moreno Valley Trade Center. This is not okay.

I have lived in the Rancho Belago area for many years. I chose this newer upscale area Moreno Valley for its new stores, shopping centers and homes – not for a potential zone changing and warehouses. I am not the only homeowner upset and disappointed in what is going on in our community.

Please reconsider your position on the zone change. Please allow the land to remain residential and protect our community. No warehouses

Dear Community Development Team,

I am a 45 year resident of Moreno Valley currently living near this proposed project. Why would you even consider this project and the negative impact it will have on us as residents on a property currently zoned like ours and right next door? Doesn't Moreno Valley have enough warehouses already? As it is we have to live with the World Logistics Center coming at us. I thought your job was to oversee development in our community for the good of everyone?

Thank you in advance for your response,

Joe Bunker

Mr. Gutierrez,
I have been a resident of Moreno Valley since 1980 and I currently live directly across the street from the site of this proposed project.
I-have lived in this location for approximately 14 years and have seen a lot of changes in this area during that time.
My question to you is, how would you like to have a giant concrete building built across the street from your house.
Not only does it block your entire view, now your family has to listen to trucks driving in and out all day and night, as well as breathing in all of the exhaust from the trucks.
Does that sound like a good environment for your kids to grow up in? Of course it doesn't.
I regret to say that I voted for you in the last election. I would NOT have had I known that you would later sell out me and everyone else that lives in this area.
It should be illegal for you and your city council members to make a decision like this without having to be accountable to the people that it really affects.
Even though it may not be illegal, it certainly is shameful. You and anyone else that wants this project will not be getting my support in the future.
This project will not make this city better. It will bring only low paying jobs, pollution, and unwanted traffic.
Please respond and let me know why you think this is good for the City of Moreno Valley.

Denny.

Subject: Proposed Zone Change for the Moreno Valley Trade Center

Warning: External Email – Watch for Email Red Flags!

I am a homeowner in the Rancho Belago area. I live in the neighborhood across from the proposed zone change for the Moreno Valley Trade Center.

I discovered the land at Redlands/Encelia/Eucalyptus is up for a zone change for purposes of the proposed Moreno Valley Trade Center. I also discovered Adam's Nursery, who stands to make a lot of money from the sale of its land to the developer, is making political contributions to you for your support of the zone change for the proposed Moreno Valley Trade Center. I am appalled by the proposed zone change to accommodate even more warehouses.

I am against the proposed zone change. As a resident of this area, I am very concerned. This is my home. This is my community. I love my neighborhood. This is where I plan to live for many years to come. Don't let money talk. Think of our community. Stop the zone change. I fear this will have a negative impact, destroy our neighborhood's peace and tranquility, and greatly decrease the value of our homes.

I respectfully ask that you reconsider your position on the zone change. Please allow the land to remain residential and protect our community.

Mr. Mancha

I am writing you as our community development director, regarding a proposed zone change for the property at the southwest corner of Eucalyptus Ave and Redlands Blvd.

I understand that there is a proposal to change the residential zoning to industrial to permit the building of a 1,332,380 square foot warehouse.

I am a resident and home owner of district 3 Moreno Valley, I live less then a mile from this proposed project.

I want to make sure that you understand my position on this proposed zoning change. **I AM 100% OPPOSED TO THIS CHANGE AND PROJECT.**

Let me be clear,, at that intersection, across the street they are already building another massive industrial complex. Also a few feet down, they will eventually have the World Logistic Center. **WE DO NOT NEED MORE CONGESTION, POLLUTION AND TRAFFIC!**

I have heard from neighbors that live near Solaris Paper; that apparently the city did not perform due diligence to protect the local residence that live near them. I am told that the noise from

the paper shredding machines disturb their sleep at night. If you have not heard from them, I am certain you will soon.

Finally, I know the city is trying to develop business and jobs for the City of Moreno Valley and that is great; BUT warehouses bring a low density of jobs per square foot of building. We need more businesses that bring MORE jobs.

Do not permit the proposed zone change.

Subject: Re: Zoning Changes

Good Evening Charles,

First, thank you for reaching out to me and of course for your support in the past elections. I appreciate you voicing your concerns and letting me know how you feel about this proposed project.

To clarify, no zone change has been approved nor the project.

The project proposal has not come to planning commission which would be the first step. If the item is denied or approved by the Planning Commission, either party can appeal to the City Council where they would hear the item. I don't anticipate the Planning Commission hearing this item until March or so. I would also encourage residents to email the staff and they provide an initial recommendation to the planning commission:

Mike Lee mikel@moval.org
Marshall Eyerman Marshalle@moval.org and Jackiem@moval.org

I have CC'd Mike Lee to this email so he can be aware of your concerns.

Again, I do appreciate you reaching out to me and voicing your concerns. If it does go to Planning Commission, I would encourage you to keep in contact with me at that time but also voice your concerns to the Planning Commissioners as well.

Kindest regards,

Yxstian

To Whom It May Concern,

The East side of Moreno Valley has already witnessed its share of warehouses and its purported beautification of our streets—the Rancho Belago signs and the signal lights are lovely. Aldi, Sketchers, Solaris Paper, The World Logistics Center. Now you want to add The Moreno Valley Trade Center right across the street from our homes? So we won't need landscape lighting is that it? Or so we can eat at these pop up food vendors that will pitch their tents in the field across the street all hours of the night? Funny how these make shift eateries can peddle their food but established restaurants that actually pay property taxes are forced to abide by the new Covid standards. The new apartment complex is going to flood our streets with traffic on Moreno Beach Drive. Now you want to flood it on Redlands Blvd with not only cars, but diesels as well? When will it end? Why don't you spare us and demolish all our homes and make the whole East side a big warehouse district like Los Angeles. Because we all know how *beautiful* that area is. I have been told many times by different school bus drivers how quiet our neighborhood is. I guess those days are gone. You are leaving the residents of my once quiet and peaceful area no choice but to sell our homes and move. I can't see paying $9500 annually in property tax to live next to a bunch of warehouses. Very disappointed. Rezoning is not what this area needs.

I am writing as a long-time resident of Moreno Valley. My family has lived here since 1972, and we have seen gargantuan growth since then and the decimation of beautiful fields and orange groves with warehouses and strip malls. Please have sympathy for those of us who want to continue living here. Please do not force more warehouses on us and please consider stopping most building projects. Don't we have enough buildings already?
I would also like to ask that no more housing tracts be built. The city is already too crowded and our fields are home to wild animals who also need to live.
Thank you.

Warning: External Email – Watch for Email Red Flags!

This is to be shared at the council meeting if appropriate:

As an affected resident on Wexford Avenue with a family, I am opposed to this horrible project(s). Zoning shenanigans by the City enabled this bad project near our residential neighborhood that was zoned for 1/2 acre homes. Diesel pollution and truck traffic will be horrible. The round about was designed ooorly to accommodate so much truck traffic and was constructed way too small. I see trucks hopping the curb all the time to navigate the round about. It was done on a cheap budget and will be destroyed before you know it. The proposed changes the MVTC plan to eliminate traffic on to Encelia do not address the pollution!

Thank you,

Tom Hyatt

To whom it may concern:
I have been a resident of Moreno Valley since 1977. I served as a pilot at March and Norton Air Force Bases until retirement. My wife worked as a teacher in Moreno Valley for 30 years until she retired. We have seen many changes in the valley over the years, some good and some bad. The approval of the MVTC warehouse would be the most egregious decision this council could ever make. The negative impacts on our city would be overwhelming and the positive results are minimal. As you are all well aware, our air, the condition of our roads, and our traffic conditions would become impossible to manage effectively. Also, since all of those trucks will need diesel fuel, the land where a truck stop would be built will be negatively impacted as well. If you were to approve this proposal at your meeting of 6/21, it would show an obvious lack of respect or caring for our community. This land was zoned for residences and it should remain so.
Lt. Col. Walter Fus, retired

Warning: External Email – Watch for Email Red Flags!

Hi,

Attached for your review is a letter and attachment regarding the upcoming June 21 appeal hearing for the MVTC.

I apologize in advance for its length (5 pages) but I have written it absent much technical jargon. It should be a fairly quick read.

As one of your current appointed Planning Commissioners I voted no against this project and continue to believe that was a good decision. For full transparency I do live in the neighborhood directly adjacent to this project and confirmed with the City Attorney my eligibility to vote. I was very careful in the time leading up to the project going before Planning Commission on October 28, 2021 to avoid any actions that would compromise my ability to vote.

Likely supporters of the project call me hypocritical for voting no on this project as I have voted yes on most similar projects, including the World Logistic Center. The WLC when built will have impacts to the immediate area and affect traffic on a widespread basis. I voted yes though because WLC if built as approved has a plan to minimize impacts on the existing residential neighborhoods. Other warehouse/logistic projects I have voted yes on were either on property already zoned for the use, or not located directly adjacent residential. For example I voted yes on a warehouse on old 215 near the American Legion because 1) the land was zoned for that use, and 2) the existing residential adjacent thereto is consider a legal but non-conforming land use.

MVTC requires you to approve a putting an incompatible land use directly next to existing residential, and amend your recently approved General Plan Update.

Thank you in advance for taking the time to reading and considering this letter in your decision-making. If you'd like to discuss I can be contacted via email at this address or by phone at 951.809.3308.

Jeff Sims

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

June 11, 2022

Honorable Mayor and City Council Members
City of Moreno Valley

Subject: Moreno Valley Trade Center
Appeal PAA21-0001

The Moreno Valley Trade Center ("MVTC") was considered by your appointed Planning Commission on October 28, 2021 and unanimously denied entitlement approvals. On December 7, 2021 the Planning Commission's denial was appealed to this Council. After considerable input by interested stakeholders, Council Members deliberated. Deliberations appeared to be headed in a direction where three Council Members were in favor of upholding the Planning Commission's decision of entitlement denial. Mayor Gutierrez acknowledged this with his deliberative statement "it doesn't appear there is support for the project," and instead of calling for the vote, motioned for a continuance, which was approved. Apparently, the continuance was to give the developer of the proposed MVTC time to address input heard at the Planning Commission and City Council Meeting.

Of note the developer heard the concerns and objections regarding the project at the Planning Commission Hearing where it was unanimously denied but cavalierly a month later at the City Council Appeal Hearing addressed none of the concerns. A person could go down many paths on why. But an obvious non-controversial reason is Hillwood's motivation is profit driven with little to no concern of the impacts on the city, and especially for the existing residential neighborhood directly adjacent to the proposed MVTC. Hillwood wants the project entitled to achieve their goal of maximizing profit.

What were some of the main concerns and objections raised regarding the MVTC?

1. Incompatible Land Use - The proposed MVTC land use is not consistent with the recent City of Moreno Valley General Plan Update. The General Plan Update indicates R-2 zoning for the property where the MVTC is proposed. The General Plan Update process and the entitlement review process for the proposed MVTC was happening concurrently over a two-year time frame. It is hard to believe city planning staff, city leadership, including the Council was not aware of the proposed MVTC during the processing of the General Plan Update. Why have an approved General Plan and not honor it? The General Plan process considered the need to retain compatible land uses adjacent one another and appropriately retained a residential land use adjacent the existing half and third acre residential lots directly adjacent to the proposed MVTC. Your Planning Commission recognized the incompatibility of land uses and denied the MVTC entitlements for consistency with guidance of the City's General Plan as approved by this Council.

2. Traffic – MVTC proposed for maximization of their project functionality as a warehouse/distribution use to dump thousands of daily employee passenger car trips onto Encelia Avenue. Encelia Avenue is a residential street and one of the two main access points into the large existing rural residential area. The Developer indicated at hearings "they tried

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

everything they could to mitigate, but the design as proposed was necessary so truck traffic in and out of their proposed project would not interface with their employee ingress and egress." Their proposed solution to the problem they are creating is to make it a forever problem on the existing neighborhood.

3. Air Pollution – Although I am a registered civil engineer, I am not technically versed in the details of air pollution. But it does not take an engineering degree to know regardless of what study says what, when thousands of daily car and truck trips are introduced into an area where they previously were not, there will be a significant and immediate increase in air pollution in the vicinity. Hillwood in hopes to placate nearest residents offers band aid mitigation.....ask yourself, would I want that air pollution right next to my house so you and your family breathe it in 24/7 – 365 for as long as you live there?

4. Noise Pollution – Like with air pollution, it does not take an engineering degree to know regardless of what study says what, when thousands of daily car and truck trips are introduced into an area where they previously were not, there will be a significant and immediate increase in noise pollution in the vicinity. Hillwood in hopes to placate nearest residents offers some band aid mitigation.....ask yourself, would I want that right next to my house? District 4 Councilmember Cabrera during the appeal hearing stated his first-hand experience about noise impacts from logistic/warehouse use near his home and indicated it was noticeable. There will be increased noise pollution happening all hours of every day.

It is my understanding MVTC representatives have made some modifications to the proposed project in advance of the June 21, 2022 appeal hearing. An area resident who has been in contact with Hillwood and reported Hillwood has shown plans with the building footprint reduced by 65,000 SF and redesigned the parking and access to eliminate traffic, both truck and employee, to and from Encelia Avenue. The updated proposal shows a large berm and drainage detention facility proposed along Encelia Avenue.

Eliminating traffic from the proposed MVTC to Encelia Avenue addresses some of the invasive, obtrusive, and irreparable harm the initial MVTC design would have on the adjacent neighborhood. As previously proposed several thousand passenger car equivalents would be generated by the project of which many would over time find their way through the neighborhood to avoid traffic congestion on Redlands Blvd. But this is just one part of the traffic harm created by the proposed MVTC.

For those of us who drive Redlands Blvd. daily to gain access to the 60 Freeway know the roundabout is challenging now in peak periods caused by the existing traffic. You don't have to be a traffic engineer to know this will be exacerbated with the addition of the proposed MVTC. This problem will remain for decades until the Redlands/60 interchange is upgraded. I say decades because as a resident of the City of Moreno Valley living in the east end since 1994, I've seen how long the Moreno Beach interchange has taken to be improved, and it's still not done. The city is getting the cart in front of the horse approving major truck and traffic producing projects where supporting road infrastructure is obviously deficient. The Redlands Blvd/60 interchange is deficient for more truck traffic and addition of the proposed MVTC will further degrade the quality of life of area resident's dependent on this interchange. The daily drive in and out of Moreno Valley is already horrible. For example, I live off Redlands Blvd. just south of the 60 and work 17 miles away in Jurupa Valley. Everyday going to work I get the 60/215/91 experience. It regularly takes a minimum of 45 minutes leaving the house at 6:15 am to get to work.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Coming home the traffic is worse and the same drive lengthens to 60 plus minutes. Absent an improved Redlands/60 interchange this project will add more time lost to sitting and slogging through added traffic congestion trying to get off 60 at Redlands and navigating through the roundabout. I am sure most, if not all, of the area resident who commute to work agree the proposed MVTC will degrade an already bad situation.

Attached is the Moreno Valley portion of the draft LAFCO Municipal Services Report. As you know LAFCO is an unbiased governmental entity to monitor services provided by various municipalities within Riverside County. There are some interesting findings in this that you as elected leaders of this city should be mindful of:

1. The median household income in Moreno Valley is lower than the rest of the County of Riverside
2. Moreno Valley's population grew slowly during the last decade at just 0.77%
3. Population growth over the next 15-25 years is not expected to keep up with county-wide growth rates
4. The City's land use profile "is disproportionately skewed towards industrial development with almost 75% of the City's commercial square footage designed for industrial users"
5. Largest employers are distribution centers
6. The City will not meet its Regional Housing Needs Assessment 6th cycle (RHNA) in all income categories.
7. FY 2018/19 revenues = $171 M FY 18/19 expenses = $149 M
8. Major sources of income:
    a. Property tax
    b. Sales tax
    c. Property tax in lieu of vehicle licensing fee
    d. Utility tax

Supporters of large box distribution/logistic facilities tout alleged benefits of "job creation", increased ability to work near home, and "living wages". If this is true, why is the median income in Moreno Valley lower than the rest of the County of Riverside? Why is our population growth slow and expected to stay slow? Perhaps it is because in truth, logistic/distribution jobs don't pay living wages sufficient to own and buy a home. Also, perhaps the word on the street now is Moreno Valley is becoming an unattractive place to live and raise a family because of the disproportionately skewed land use of industrial development that creates traffic congestion, difficulty to get in and out of Moreno Valley, low paying jobs, and added air and noise pollution.

You just approved the City's General Plan with this property planned for residential. At a minimum even if you can somehow find a way to justify the benefit of the proposed MVTC over the irreparable harm to the area residents, an approval in land use change from residential to industrial shows continued disregard by the City in meeting its Regional Housing Needs Assessment (RHNA) metrics. Perhaps a more appropriate use for the property is a rezone from R-2 to residential zoning proposing a transition of R-2 along Encelia Avenue to apartments/PUD along Eucalyptus. At least there would be a buffer for the existing residential use with compatible uses. Under this scenario, people moving there would do so acknowledging/accepting the surrounding existing land uses. And with transitional residential with higher densities, the city could indicate progress towards meeting RHNA metrics by providing more opportunity for affordable housing consistent with Moreno Valley incomes.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

I urge the Council to not approve the MVTC. The area residents don't deserve their quality of life degraded by an out-of-town developer looking to make buck. We all know the city likes added tax increment revenues from development. Once this property is built the property tax increment will see a large increase (over current) that will remain fairly static as future property tax increment increases are constrained by Prop 13 legislation. Other land uses could be built on this property and increase city property tax increment revenue in similar manner and if built as residential the added population will live, shop, and spend in Moreno Valley. This would generate increased sales tax revenue and more utility tax revenue.

Saying no is hard especially on projects supported by entities such as LIUNA. LIUNA focuses on doing a good job to keep their dues paying members employed. But how many of those LIUNA represented members live in Moreno Valley? And after a LIUNA project is built, LIUNA representatives will be at the next Planning Commission and Council Meeting in whatever town the next project is proposed. I certainly understand it takes quite an undertaking to get elected and re-elected. My hat off to all of you seeking office with the goal of doing good for those you seek to represent. It takes backing and money to get exposure. Maybe it's a bit naïve on my part, but it would be nice for those seeking elected office to remember the people who live, shop, and spend in Moreno Valley are the ones who are most impacted by the consequences of their decisions. Out-of-town and special interest campaign contributors who help with local city elections won't live with the negative impacts of the projects they seek approval. In the most recent Council District vote the win was not by significant margin which may be indicia people are taking note of the policies and stances of people seeking elected office here in Moreno Valley. As traffic in and out of Moreno Valley gets worse and neighborhoods are impacted by traffic, noise, and air pollution from these warehouse projects it is highly likely there will be less support for leadership who supports approving them.

Many cities are starting to push back on warehouse/logistics project being approved. With what Moreno Valley has already approved in this land use waiting to be built (World Logistics Center) perhaps tapping the brakes a bit would not be a bad decision.

In the event the Council makes findings and justifications indicating the proposed MVTC has more benefit to the city than harm despite its Planning Commission denial and significant area opposition, it is requested Council consider the proposed MVTC be conditioned with the following:

1. An irrevocable deed restriction or some other legally sufficient mechanism on the property forever disallowing any project traffic onto Encelia Avenue. The only exceptions would be - access for emergency by Fire or Police, and if the property in the distant future was redeveloped into residential.
2. Addition of a traffic signal at the intersection of Redlands and Dracaea.
3. Full improvement of the west side of Redlands Blvd. between Encelia and Dracaea. It is anticipated the proposed MVTC is already conditioned to fully improve Redlands Blvd. along its frontage between Eucalyptus and Encelia and provide for adequate transition from full improvement on Redlands for southbound traffic to existing two lane roadway on Redlands between Encelia and Dracaea. This would complete Redlands Blvd. between Eucalyptus and Cottonwood and be an incremental add to the project conditions.

Items 2 & 3 are needed to provide area resident with easier access to Redlands Blvd. and ability to leave the area via Cottonwood to Moreno Beach or Alessandro to avoid congestion at the roundabout and unimproved 60/Redlands interchange. Instead of the Developer proposing to fund road improvements

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

in other areas of the city, this funding could be used to make these improvements to benefit those directly impacted. To provide some equity to the proposed MVTC developer, the developer and the City could enter into a reimbursement agreement where MVTC would be reimbursed some proportionate amount from other developers within an identified Benefit Area who benefit from Redlands Blvd. street improvements. For example, there is undeveloped property along the west side of Redlands Blvd. between Encelia and Dracaea. The future developer of this property would likely be conditioned to build out this improvement if not already built. It would seem reasonable this developer would be required to contribute a proportionate share of the expense paid by MVTC for making the improvement.

As a Planning Commissioner I have participated in the approval of most warehouse/logistic projects in this city. This includes voting yes for the World Logistics Center (WLC) despite living close to it. What WLC has going for it is a plan for buffering the impacts of its project from the existing residential and eliminated truck and employee traffic from Redlands Blvd. with access from Theodore now WLC Parkway. Most other warehouse/logistic approvals in the city have been in areas where the existing underlying land use zoning allows for warehouse/logistic use, or the projects are located where there are existing non-residential land uses, and city approved truck routes.

The proposed MVTC even if modified to eliminate traffic on and off Encelia Avenue will create irreparable harm to the existing residential neighborhood. These residents sought out and bought homes in this area with a reasonable expectation city elected would respect and protect these investments by not approving incompatible land uses. Prior Planning Commissions and City Councils have done that in the past. For example, when Pro-Logis was developing along Eucalyptus east of the auto center, they responsibly agreed with area resident and city leadership to maintain a buffer of their proposed industrial use to the existing residential and eliminated two buildings from their project.

Saying no is hard but needs to be done sometimes. This is one of those times. The harm the proposed MVTC creates far outweighs the tax revenue increase this project will generate. There is still around 2,800 acres of property approved for warehouse/logistics on the east side of the Redlands Blvd. This existing neighborhood does not deserve having this added incompatible use built right on top of it. A yes vote on the proposed MVTC benefits out-of-town developers who will enjoy profits at the expense of city residents.

Please do right by your citizens who have invested in homes, pay taxes, shop, spend, and vote in Moreno Valley. Vote no on approval of the proposed MVTC upholding your Planning Commission's decision and your recent General Plan approval.

I thank you for your time to read this letter as part of your deliberations coming to a decision. If you have any questions or would like to discuss, please feel free to contact me.

CITY OF MORENO VALLEY

The City of Moreno Valley incorporated in 1984 as a general law city in the County's Western Region.[110] The City's northern, eastern, and the majority of the southern boundary is shared with unincorporated Riverside County territory. Most of the City's southern boundary is adjacent to the Lake Perris State Recreation Area. The City of Perris boundary is immediately south of a portion of Moreno Valley. The City's western edge is bound by the March Air Reserve Base, City of Riverside corporate boundary, and unincorporated territory. The City's incorporated boundary covers an area of 51.3 square miles and the City's SOI extends northwest and southeast to encompass an additional 15.5 square miles, for a combined 66.8 square miles.[111]

The City's demographic profile is presented in Figure 84.

Figure 84: Demographic Profile - Moreno Valley

Moreno Valley	City	SOI	County
Population as of 2020	208,838	150	2,442,304
Population as of 2010	193,365	105	2,189,641
Annual Pop. Growth Since 2010	0.77%	3.63%	1.10%
Housing Units	57,523	55	867,637
Persons / Housing Unit	3.63	2.73	2.81

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Moreno Valley's population grew slowly during the last decade, increasing at just a 0.77 percent annual growth rate to a total population of almost 209,000. Moreno Valley is the second-largest city in the County of Riverside. Moreno Valley has large households (3.63 persons per household) and a high population density (4,071 persons per square mile) when compared to the County averages (2.81 persons per household and 339 persons per square mile). The population projections over the next 15 to 25 years indicate that population growth will increase, but growth is not expected to keep pace with County-wide growth rates.

The City's SOI contains a population of just 150, spread across 55 households. The City's median household income is slightly lower than the County-wide average, while the median household income in the SOI is about 38 percent higher than the County-wide average.

The City's land use profile is disproportionately skewed towards industrial development, with almost 75 percent of the City's commercial square footage designed for industrial users. During the last decade, the City added over 9.3 million square feet of industrial space, representing about half of the City's commercial development. While this is a significant increase in square footage, a lot of the City's development can be attributed to retail projects. The City's housing inventory is concentrated in single-family housing, representing more than 80 percent of the City's units.

Aligned with the City's land use profile, several of the City's largest employers are distribution centers, including Amazon (7,500 employees), Ross Dress for Less/DD's (2,400 employees), Sketchers USA (1,200 employees), Harbor Freight Tools (788 employees), and Deckers Outdoor (700 employees). The remaining top ten employers include March Air Reserve Base (9,600

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

employees), Riverside University Health Systems Medical Center (3,400 employees), Moreno Valley Mall (1,500 employees), and Kaiser Permanent Community Hospital (1,457 employees).[112]

Moreno Valley's land use summary is presented in Figure 85.

Figure 85: Land Use Summary - Moreno Valley

Moreno Valley			County
Residential Units	Units	%	%
Single Family	46,378	80.6%	54.8%
Multifamily	9,781	17.0%	43.6%

CURRENT SPHERE OF INFLUENCE, ISLANDS/POCKETS, AND DUCS

The City of Moreno Valley's SOI consists of three (3) noncontiguous areas, illustrated in Exhibit 12. The City's eastern SOI is the largest of the three (3) areas, stretching eastward into the hills along State Route 60 and southward along Gilman Springs to encompass the area known as Mystic Lake, which is a seasonal body of water. The City's northwestern SOI extends west to the City of Riverside's existing SOI in the hills north of State Route 60, in an area that is largely overlapping the Box Springs Mountain Reserve Park. The City's third and smallest SOI area

[112] Source: City of Moreno Valley, 2018-19 Comprehensive Annual Financial Report

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

extends south from the City's southern boundary adjacent to Lake Perris State Recreation Area, east of Davis Road.

The SOI does not contain LAFCO-identified DUCs or unincorporated islands and pockets.

Moreno Valley's boundary was previously reconfirmed in the September 2006 Central Valleys, The Pass Area and Southwestern Riverside County MSR (LAFCO 2005-49-3&5; LAFCO 2005-48-5; LAFCO 2005-47-1&3) (the "2006 MSR").

FORM OF GOVERNMENT AND STAFFING

The City of Moreno Valley is a "Council – Manager" form of government, with a City Council that includes five (5) members, including one Mayor elected at-large, and four (4) Councilmembers elected according to district boundaries. The Mayor serves a two (2) year term while Councilmembers serve four (4) year terms. The City Council appoints a City Manager, who serves as the head of the administrative branch of the City government.[113]

The City Council also serves as the Housing Authority, Successor Agency, Moreno Valley Community Services District, Public Financing Authority, and Public Facilities Financing Corporation. Several boards, commissions, committees, and councils carry out assignments as directed by the City Council, including the Accessibility Appeals Board, Environmental and Historical Preservation Board, Senior Citizens Advisory Board, Arts Commission, Library Commission, Planning Commission, Traffic Safety Commission, Utilities Commission, Moreno Valley Citizens Public Safety Committee, Parks Community Services and Trails Committee, and the Emerging Leaders Council.[114]

The City Manager reports directly to the City Council and oversees a staff of 375 full-time equivalent personnel.[115] The City's annual operating expenditures ranged from $118 to $150.3 million between 2016-17 2018-19.[116]

SERVICES PROVIDED

City staff provide the community with building and planning, housing, code enforcement, animal control, parks and recreation, landscape maintenance, streets and road maintenance, lighting, utilities, stormwater drainage, and innovation and technology services. The following section describes municipal services provided within Moreno Valley and identifies the service provider.

Government Services

General government services in the City of Moreno Valley are provided by the elected City Council, and appointed staff like the City Manager and City Clerk. The City Manager serves as the Chief Executive of the City and is responsible to the City Council for the efficient management of all City business including implementation of Council policies and programs, providing direction to departments that administer City programs and services, coordinating intergovernmental relations and legislative advocacy efforts, and administering the outsourcing agreements through which Public Safety services are provided. The City Clerk is responsible for the administration of all municipal elections, access to and management of City records, preparation of agendas, recording and maintenance of all Council actions, maintenance of the Municipal Code, and serves as the official custodian of the City seal.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Law Enforcement

Moreno Valley receives law enforcement services from the Riverside County Sheriff Department. The Sheriff provides general policing services including, investigations, special enforcement, school resources, traffic enforcement and patrols, community services, crime prevention, and the administration of the volunteer program and the Explorer youth program.

The 2006 MSR presented the following determination:

- Law enforcement services were being provided at a level below the City's standard of 1 sworn officer per 1,000 people.

According to City staff, the recently adopted General Plan identifies City policies for providing responsive, efficient, and effective law enforcement services that promote a high level of public safety. Furthermore, City staff noted that the City no longer has a policy specifying a number of sworn officers per 1,000 residents.

Fire Protection

Fire Protection services are provided by Riverside County Fire Department/CalFire in Moreno Valley. Since 1921, the Riverside County Fire Department has been in a contractual relationship with CalFire to provide wildland fire protection services. In 1946, the contract between CalFire and Riverside County Fire Department was expanded to include fire protection services. Services provided by Riverside County Fire Department/CalFire include fire protection and prevention, medical response, review of planning cases, review and inspections of construction and developments, fire and life safety inspections of state-regulated occupancies, information on ordinances and standards for construction, and information bulletins and standards for fire protection. Fire Stations 2, 6, 48, 58, 65, 91, and 99 are in the City.

The Riverside County Fire Department/CalFire provides fire protection services to 20 cities in Riverside County and the Rubidoux community services district. The Riverside County Fire Department/CalFire also responds to calls for service in seven (7) additional Riverside County cities and the Idyllwild Fire Protection District through mutual and automatic aid agreements.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Emergency Medical

Emergency medical services are provided by the Riverside County Fire Department/CalFire. Please refer to the previous section for more information on the Department.

Building/Planning and Housing (Community Development)

Building, planning, and housing services are provided by the City's Community Development Department through the Planning and Building and Safety Divisions. The Planning Division informs the planning commission, ensures new developments fulfill the City's strategic priorities, and ensures new development is in line with CEQA. The Building and Safety Division conducts plan reviews, issues permits, conducts field inspections, and coordinates permit approvals with City departments and outside agencies.

Code Enforcement

Code enforcement services are provided by the Community Development Department's Code and Neighborhood Services Division. The Division responds to citizen complaints, proactively enforces the municipal code, provides parking control services, and runs the abandoned vehicle abatement program.

Animal Control

Animal control is provided by the Animal Services Division of the Community Development Department. The Division provides humane animal services, sheltering, rabies control, stray animal control, licensing, and public education. A shelter operated by the Division is located in the City at 14041 Elsworth Street.

Parks and Recreation

Parks and recreation services are provided by three (3) entities: The City's Parks and Community Services Department, the Community Services District- Zone A, Community Facilities District No. 1, and the Riverside County Regional Parks and Open Space District. The Department provides

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

maintenance and development of parks, trails and recreational facilities, maintains open space, administers an array of recreational programs, and enforces park rules and regulations. The Community Services District, known also as Zone A, services parks in the City with the Parks and Community Services Department. The District primarily provides funding to the Department for parks and recreation services. The Community Facilities District No. 1 also provides funding to the Department, but funding is reserved for maintenance of facilities. The Riverside County Regional Parks and Open Space District operates the Box Spring Mountain Reserve in the City. The Reserve is located on 3,400 acres of land that overlooks the cities of Riverside and Moreno Valley. The entrance is located at 9699 Box Springs Mountain Road in Moreno Valley.

The 2006 MSR identified the following determinations:

- The City was providing parkland at a ratio that was below the City's standard and noted financing constraints that led to an increase in fee related recreational activities and a degradation of service provision.

According to City staff, the recently adopted General Plan identifies 671 acres of existing and planned parkland which could meet the parkland ratio within a 20-year period. City staff noted that the City also plans to evaluate parkland dedication fees and in-lieu parkland dedication fees to ensure that the City is adequately addressing the community need while maintaining regional competitiveness.

Library

The Moreno Valley Public Library provides library services to the City. The Library is owned and operated by the City. It has two (2) satellite locations in the Moreno Valley Mall and Iris Plaza. The Library provides users of all ages with reading materials in electronic and traditional formats, educational support for students, and literacy programs. The City's Community Services District provides funding for the operations of the Library.

The 2006 MSR presented the following determinations:

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

- The City's Library was too small to hold the City's entire inventory and the City had plans at the time to develop a larger facility.

The City has expanded library facilities to address this finding, adding two satellite libraries that provide library services throughout Moreno Valley. Museum

There is no museum in the City of Moreno Valley.

Landscape Maintenance

Landscape maintenance is provided by the City's Public Works Department through funding from the Community Services District, Landscape Maintenance District 2014-2, and several other special funding districts in the City. The Department provides general landscape maintenance services to public property and oversees any landscape maintenance contracts.

Streets/Road Maintenance

Streets and roads maintenance is provided by the Public Works Department. The Department's responsibilities include the coordination, maintenance, and operation of traffic facilities and roadways, sidewalk and street maintenance, and the management of City capital improvements.

The 2006 MSR identified the following determinations:

- The City's roads and intersections operating below the City's level of service standard.

City staff indicated that streets and roads were in fair to good shape.

Streetlights

The Moreno Valley Community Services District, Zone C Arterial Streetlights, the Lighting Maintenance District 2014-01, the Community Facilities District 2014-01, and the Edgemont Community Services District all provide funding for streetlight maintenance in various parts of the City. The Edgemont Community Services District provides streetlight maintenance services to several neighborhoods in the western part of the City. The District was formed in 1957 to cover

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

the Edgemont area of Riverside County which straddles both the cities of Riverside and Moreno Valley. The other districts provide funding that is used by the Moreno Valley Public Works Department to service the rest of the City.

Utilities (Gas, Electric)

Utilities are provided by the Moreno Valley Electric Utility ("MVU"), Southern California Edison ("SCE"), and the Southern California Gas Company ("SoCal Gas"). The MVU is the primary public electric utility in the City and is run by the Public Works Department. Created in 2001, the utility now serves around 6,600 residents. The traditional regional utilities SCE and Socal Gas both still serve some residents in the City. In Fiscal Year 2018-19 the MVU entered into a financing agreement through Bank of America to acquire the City's streetlights from SCE. According to City staff, the streetlights then underwent an LED retrofit.

Solid Waste

The City has a franchise agreement in place with Waste Management for solid waste collection services. Waste Management is a private solid waste disposal company provides solid waste disposal and recycling services to Moreno Valley residences. Waste Management is one of the largest solid waste companies in North America with more than 45,000 employees serving over 20 million residential, industrial, municipal, and commercial customers.

The 2006 MSR presented the following determinations:

- The City was not disposing of the required amount of solid waste.

City staff indicated that the City has implemented a number of innovative source reductions, recycling, composting, and reuse programs to help meet State diversion goals. The City's current diversion rate is 65 percent, which exceeds the current standard diversion rate of 50 percent. Furthermore, City staff noted that an amendment to the City's municipal code will require a diversion rate of 75 percent by 2025 as required by State law.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Storm Drainage

Storm drainage services are provided by the Public Works Department. The Department is responsible for engineering, designing, and overseeing the construction of capital improvements for flood and storm-water management, and the operation and maintenance of City storm drains.

County Service Area 152 provides funding for the management of the City's NPDES permit program, which is aimed at reducing pollution to underground water tables.

The 2006 MSR presented the following determinations:

- The City's storm water drainage is inadequate.

City staff did not indicate that storm water drainage was inadequate in the City.

Innovation and Technology

Innovation and technology services are provided by the Financial and Management Services Department. The Department manages the City's technology assets, improves hardware, software, and telecommunications, and provides IT support.

Airport

There is no public or private airport in the City of Moreno Valley.

Extraterritorial Services Provided

The City of Moreno Valley does not provide services outside of the City's boundaries. Government Code Section 56133 requires LAFCO approval for extension of services outside a sphere of influence in response to an existing or impending threat to public health or safety.

RECENT AND PLANNED MAJOR CAPITAL IMPROVEMENTS

The City prepares a Capital Improvement Plan that serves as a comprehensive planning document inclusive of revenues and expenditures for capital improvements within the City. The

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

City's CIP is adopted every other year and coordinates with the City's two-year budget cycle. The City plans to make improvements in regard to pavement rehabilitation, street and road improvements, interchange construction, bridge maintenance and construction, drainage improvements, lighting improvements, and community center renovation.

According to City staff, all projects identified above, except for the March Community Center Renovation, are moving forward and funded.

HOUSING NEEDS AND HOUSING ELEMENT REPORTING

The City of Moreno Valley submitted its 6th Cycle Draft Housing element to HCD on February 19, 2021. As of the date on this MSR, HCD had not completed the review of the City's Housing Element.[117] According to City staff, the City provided HCD with a second submittal and is in active discussion with HCD to have the 6th Cycle Housing Element certified. During the 5th Cycle, the City submitted Annual Progress Reports between 2014 and 2019, but failed to submit an Annual Progress Report in 2013.[118]

The City's 5th Cycle housing needs are presented in Figure 87.

Figure 87: 5th Cycle Housing Element Summary - Moreno Valley

Moreno Valley 5th Cycle Housing Needs	Very Low Income	Low Income	Moderate Income	Above Moderate Income
RHNA Allocation	1,500	993	1,112	2,564
Permitted Units	0	0	457	1,354
Allocation Surplus/(Shortage)	(1,500)	(993)	(655)	(1,210)

Source: HCD Annual Progress Report Permit Summary, October 6, 2020

The City permitted 457 moderate income housing units and 1,354 above-moderate income units during the 5th Cycle. The City did not permit any very low- or low-income housing units during the

[117] Source: California Department of Housing and Community Development, "Housing Element Implementation Status Tracker" updated June 28, 2019

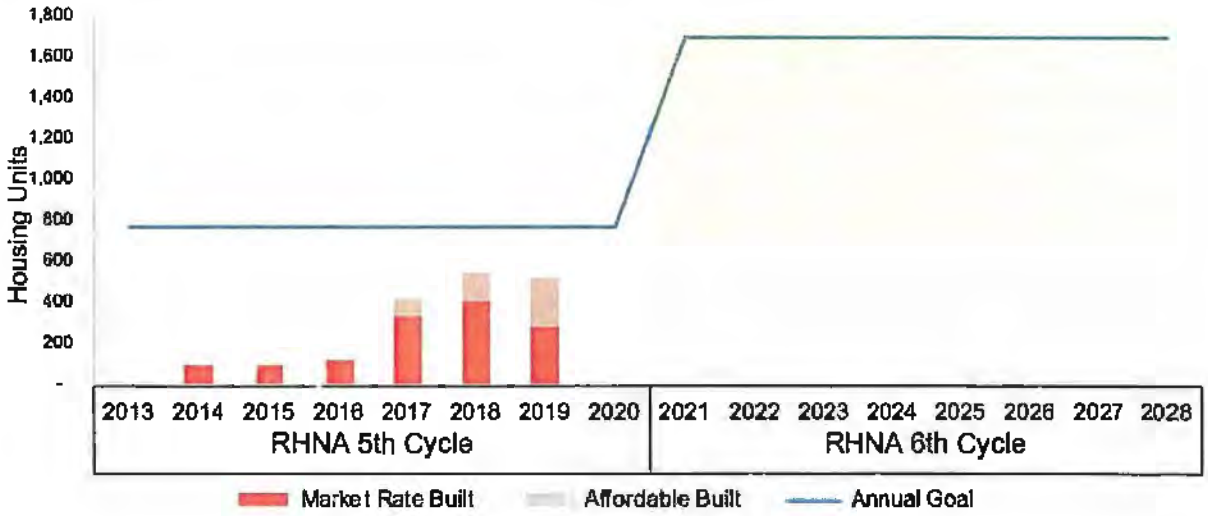
Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

5th Cycle, and the City fell short of meeting its RHNA allocation in all income categories. With a shortage of 4,358 housing units, the City is not expected to meet its RHNA allocation in any income category.

The City's RHNA allocation increases by about 120 percent, or 7,427 units, to a total of 13,596 housing units for the 6th Cycle. In order to accomplish this, the City will need to permit 1,700 units every year during the eight (8) year cycle. City staff noted that the Courtyards at Cottonwood affordable housing project in Moreno Valley is currently under construction and will assist the City in meeting its RHNA goals for low and very low income housing.

The City's 5th and 6th Cycle production goals and unit production is presented in Figure 88.

Figure 88: 5th and 6th Cycle RHNA Allocation and Production - Moreno Valley



Moreno Valley is one of 289 California jurisdictions that have not made sufficient progress toward either moderate-income RHNA unit production or failed to submit the latest (2019) Annual Progress Report. As a result, the City is subject to streamlined ministerial approval process for proposed housing developments with at least 10 percent affordable units. The streamlined

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

ministerial approval process was introduced as part of Senate Bill 35 (Chapter 366, Statutes of 2017) in 2017.[119]

City staff noted that the City adopted a new General Plan in June 2021 and has implemented all of the Zoning amendments required to implement its 6th Cycle Housing Element.

FISCAL HEALTH

The City of Moreno Valley's fiscal health evaluation, including audit findings, revenue sources, expenditure categories, long-term obligations, reserves, and California State Auditor assessment is presented in the sections that follow. The City's net position is presented as annual revenues less expenditures for fiscal years 2016-17 through 2018-19 in Figure 89. The City recorded surpluses in each year between 2016-17 and 2018-19.

Figure 89: Net Position - Moreno Valley

Moreno Valley	2016-17	2017-18	2018-19

Source: California State Controller's Office

The City's general tax revenues, which were $101.6 million in 2018-19, account for 59.4 percent of the City's total revenues. The City has a diverse revenue base, with sales tax ($25.9 million), property tax ($20.8 million), property tax in-lieu of VLF (19.6 million), and utility user tax ($15.5 million) representing the largest revenue sources and collectively representing 80.5 percent of total general tax revenues.

When compared to all other Riverside County and California cities, the City's tax revenues are proportionate, except for utility user tax, which not all communities have adopted. Although sales tax is the City's largest general tax revenue source, accounting for 25.5 percent of the City's general tax revenues, it is proportionally lower than the average sales tax revenue for all

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Riverside County cities (39.9 percent), and more aligned with the average sales tax revenue for all California cities (24.7 percent). Because sales tax can be susceptible to economic shifts, such as the results of the COVID-19 pandemic, it may be advantageous for the City to rely less on sales tax revenues.

The City's general tax revenues are compared to all Riverside County and California cities in Figure 91.

Figure 91: General Tax Revenue Comparison - Moreno Valley

Aside from tax revenues, City's largest non-tax revenue sources are miscellaneous revenues ($22.9 million) and intergovernmental revenues ($21.5 million). The City's major revenue sources are described in greater detail in the sections that follow.

Sales Tax

Sales tax revenues are the City's single-largest tax revenue, accounting for 25.5 percent of general tax revenues or $25.9 million in 2018-19. Sales tax revenues are derived from one percent of gross receipts from the sale of tangible personal property sold in Moreno Valley. Sales tax revenues increased by 7.1 percent annually between 2016-17 and 2018-19.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Property Tax and Property Tax in-lieu of Motor Vehicle License Fees

Property tax and property tax in-lieu of VLF were the City's second and third largest tax revenues in 2018-19, accounting for 20.5 and 19.3 percent of general tax revenues respectively.

In 2018-19, the City collected almost $20.8 million in property tax. Property tax is assessed on land, improvements, and personal property, which amounted to about $15.6 billion in 2018-19. Approximately $4.1 billion in assessed value was derived from land value and $11.8 billion from improvements.[120] The City's property tax collections were approximately 15.6 percent of all property tax collected in Moreno Valley, which is one of the highest tax rates for a city in Riverside County.

The City's property tax revenues increased from about $13.5 million in 2016-17 to $20.8 million in 2018-19, 23.8 percent annual growth rate. While property assessed valuations can only increase by a maximum of 2 percent annually, property tax revenues can grow at a much faster pace as a result of new development adding new taxable value to the tax roll.

The City of Moreno Valley and County of Riverside have a mutually adopted Master Property Tax Exchange Agreement in place, which was adopted in 1985.[121]

Property tax in-lieu of VLF accounted for 19.3 percent of the City's general tax revenue in 2018-19, equivalent to $19.6 million. Property tax in-lieu of VLF replaced vehicle license fees as a revenue source for cities in 2004, and increases based on assessed valuation growth in the jurisdiction.

Utility User Tax

A fourth significant revenue source for the City is utility user tax revenues. The City assesses utility user taxes on telephone use at a rate of 5.75 percent, inclusive of intrastate residential and

[120] Source: California City Finance, "Assessed Valuation of Property by City"
[121] Source: Riverside LAFCO

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

commercial calls, interstate residential and commercial calls, international residential and commercial calls, and all wireless residential and commercial calls. Additionally, the City taxes business and residential electricity, business and residential natural gas, business and residential cable television, business and residential water, and business and residential sewer fees at a rate of 6 percent.[122] In 2018-19, utility user tax revenues amounted to $15.5 million, or about 15.2 percent of general tax revenues. Over the three (3) year period from 2016-17 to 2018-19, the City's utility user tax revenues were relatively flat, decreasing by a little more than $100,000 over that period.

Miscellaneous Revenues

The City's largest non-tax revenue source is classified as miscellaneous revenues. Miscellaneous revenues amounted to $22.9 million in 2018-19, or about 13.4 percent of all revenues. For the City, the primary sources of miscellaneous revenues includes development impact fees ($9.6 million in 2018-19), contributions from nongovernmental sources ($1.9 million), and other unclassified miscellaneous revenues ($11.3 million). According to City staff, the City is expected to begin preparation of a development impact fee study in 2021.

Intergovernmental Revenues

Intergovernmental revenues are collected from County, State, and Federal sources and amounted to $21.5 million in 2018-19 for the City. The City's intergovernmental revenues are comprised of gas tax revenues ($8.0 million), community development block grants ($1.8 million) and several other State ($8.0 million) and Federal ($3.3 million) government sources. Intergovernmental revenues increased from about $14.6 million in 2016-17 to $21.5 million in 2018-19, a 21.2 percent annual growth rate.

[122] Source: California City Finance, "Utility User Tax by City" updated in February 2021

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Operating Expenditures

The City's operating expenditures ranged from $117.9 to $150.3 million between 2016-17 and 2018-19. The City's annual operating expenditures, categorized by use, are presented in Figure 92.

Figure 92: Operating Expenditures - Moreno Valley

Moreno Valley	2016-17	2017-18	2018-19

Source: California State Controller's Office

Because the City contracts with the County of Riverside for law enforcement and fire protection services, it is not surprising that the City's largest expenditure category is contract services, amounting to $83.3 million in 2018-19. Between 2016-17 and 2018-19, the City's contract services expenditures increased by 21.6 percent annually – over the same time frame all other operating expenditures increased by just 2.9 percent. In 2018-19, the City's contract service expenditures amounted to 56 percent of total expenditures.

The City's largest current expenditure category is associated with public safety, amounting to $63.3 million in 2018-19. Public safety expenditures grew at just 3.5 percent annually between 2016-17 and 2018-19 while total current expenditures increased by 12.3 percent annually. Most of the growth occurred in transportation, community development, and culture and leisure expenditure categories. The City's current expenditures by function between 2016-17 and 2018-19 are presented in Figure 93.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Figure 93: Current Expenditures - Moreno Valley

Moreno Valley	2016-17	2017-18	2018-19

Source: California State Controller's Office

In most contract cities around Riverside County, the public safety costs are rapidly increasing at unsustainable paces – that is not the case in Moreno Valley. The fastest growing expenditure categories for the City were culture and leisure (51 percent annual increase between 2016-17), transportation (32.6 percent annual growth), and community development ($27.5 percent annual growth). These three (3) categories represented $23.2 million in expenditure increases between 2016-17 and 2018-19.

Culture and leisure expenditures are entirely associated with parks and recreation costs (almost $19.0 million in 2018-19) while transportation expenditures include costs for streets, highways and storm drains ($18.1 million), and trees and landscaping ($1.1 million). Community development expenditures are associated with planning ($3.2 million), construction and engineering regulation ($373,000), and other unclassified community development expenditures ($7.5 million). Some of these costs are recovered via charges for services, and according to City staff, the City's fees are balanced and consistent with all fee studies. City staff also indicated that the City planned to prepare a new development impact fee study in 2021 because the previous fee study was prepared nine (9) years ago.

Reserve Fund Balance

The City has several reserve fund policies. The City's cash flow reserve aims to preserve 17 to 35 percent of General Fund expenditures. The Emergency fund policy requires 12 percent of

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

General Fund expenditures and the Rainy Day Reserve policy requires an additional 10 percent of General Fund expenditures to be retained. The City's 2020-21 budget indicates that the City will retain $39.9 million in reserves and is in compliance with the City's reserve policies.[123]

Pension and OPEB Obligations

The City of Moreno Valley's pension and OPEB obligations are outlined in Figure 94.

Figure 94: Pension and OPEB Obligations - Moreno Valley

Moreno Valley	2017-18	2018-19	2019-20

Total OPEB Liability/(Surplus)	7,099,335	6,453,487	8,175,011
Total Benefit Liability/(Surplus)	$79,509,363	$74,545,754	$81,071,284

Source: 2017-18, 2018-19 and 2019-20 ACFR

Qualifying employees are eligible to participate in the City's Miscellaneous Pension Plan. The City does not have public safety employees and therefore does not offer a Safety Plan. The City also provides OPEB policies, which are defined benefit postemployment healthcare plans for retired persons, and benefits are extended to surviving spouses. As illustrated in Figure 94, the City has about $81.1 million in combined pension and OPEB liabilities.

The City established an irrevocable trust fund in June 2009 to begin prefunding the City's unfunded OPEB liability.

The City's pension indicators, which include the City's employer contribution compared to the actuarially determined contribution, the City's total covered payroll, and the contribution rate as a percent of covered payroll, are presented in Figure 95.

[123] Source: City of Moreno Valley, 2019-20 Budget

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Figure 95: Pension Indicators - Moreno Valley

Moreno Valley	2017-18	2018-19	2019-20
Actuarially Determined Contribution	$6,385,610	$7,094,031	$7,972,616
Employer Contribution	6,385,610	7,094,031	7,972,616
Covered Payroll	$20,860,026	$21,783,847	$24,175,227
Employer Contribution Rate	30.6%	32.6%	33.0%

Source: 2017-18, 2018-19 and 2019-20 ACFR

The City made employer contributions equivalent to the actuarially determined contribution between 2016-17 and 2019-20. During this time frame, the City's covered payroll increased at an annual rate of about 7.7 percent. The City's employer contribution rate, which ranged from 30.6 to 33.0 percent between 2016-17 and 2019-20, is about average for the County of Riverside, which ranged from 26 to 32 percent over the same period.

Annual Audit Findings

RSG reviewed the City's Annual Audits from 2017-18 through 2019-20. The Annual Audits did not present any findings and the auditor stated that the financial statements present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City. Additionally, the City's Annual Audits between 2017-18 and 2019-20 were awarded Certificates of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association.

California State Auditor Fiscal Health Evaluation

The City of Moreno Valley ranked 281 out of 471 jurisdictions and received an overall risk rating of low. The City is considered higher risk than 190 peer cities in California, or about 40 percent of cities. The City received low risk ratings on six (6) indicators, including liquidity, general fund reserves, pension obligations, pension costs, future pension costs, and OPEB obligations. Two

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

(2) indicators were given moderate risk ratings, including debt burden and revenue trends. Two (2) indicators scored high risk ratings, including pension funding and OPEB funding.[124]

MSR DETERMINATIONS

Requisite CKH determinations for the City of Moreno Valley are presented by topic below:

1. **Population, Growth, and Housing**

   Moreno Valley grew at a slower rate over the last decade, when compared to the County and most other incorporated jurisdictions in the Western Riverside Region. The Moreno Valley population is expected to grow at a rate that is slightly lower than the County-wide growth rate over the next 15 to 25 years. The City did not build sufficient housing units to meet its 5th Cycle RHNA allocation of 6,169 units, falling short by 4,358 units, and the City's 6th Cycle RHNA allocation increased by 120 percent to a total of 13,596 housing units.

2. **Disadvantaged Unincorporated Communities in SOI**

   The City's SOI does not contain any DUCs.

3. **Present and Planned Capacity of Facilities**

   Many of the City's deficiencies identified in the 2006 MSR did not resurface during RSG's research, data collection, and city interview stages.

4. **Financial Ability to Provide Services**

   The City's general tax revenue sources have increased to more than $101.6 million in 2018-19. The City has identified issues with its pension and OPEB liabilities and began to take

[124] Source: California State Auditor, Financial Data for Fiscal Year 2019-20

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

corrective action as early as 2008 with the introduction of an irrevocable trust fund. The City has maintained healthy reserve funds.

5. **Opportunities for Shared Facilities**

   No opportunities for shared facilities were identified.

6. **Accountability for Community Service Needs**

   The City Council is elected according to district boundaries. The City's plethora of boards, committees, and commissions indicates that the City residents are engaged with City government. The City is active across at least five (5) social media platforms and maintains an email list. The City also operates a television channel and has a dedicated media team.

7. **Any Other Matter Related to Effective or Efficient Service Delivery as Required by Commission Policy.**

   The City did not identify any other matters related to effective or efficient service delivery as required by Commission Policy.

SOI RECOMMENDATIONS

RSG's recommendations related to the Moreno Valley SOI are presented by topic below. RSG is not recommending any changes to Moreno Valley's SOI.

1. **Present and Planned Land Uses**

   Large portions of Moreno Valley's SOI overlaps difficult-to-develop and protected land and are unlikely to be developed in the foreseeable future. The southern and southeastern portions of the unincorporated Moreno Valley SOI present the best opportunities for future growth and development.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

2. **Present and Probable Need for Public Facility and Services**

   City staff indicated that the Moreno Valley SOI has adequate public facilities and services.

3. **Present Capacity of Public Facilities**

   City staff indicated that public facilities in the Moreno Valley SOI are sufficient to meet the community's needs.

4. **Social or Economic Communities of Interest**

   The City did not identify any social or economic communities of interest in the Moreno Valley SOI.

5. **Disadvantaged Unincorporated Community Present and Planned Need for Facilities and Services**

   The Moreno Valley SOI does not contain any DUCs.

Good afternoon members of the Moreno Valley City Council,

June 13, 2022

Re: Your June 21st public hearing on the Moreno Valley Trade Center (MVTC) and its health impacts on the neighborhood — especially the children.

While the 1.3 million sq ft Moreno Valley Trade Center (MVTC) warehouse has made some changes in their project since December none of them significantly reduce the health impacts to children trying to play in their own backyard — **assuming parents will even allow their children outside knowing the pollution copied below from the MVTC's own documents impact children more than adults.**

EVEN THOUGH THE MVTC MAY HAVE TRIED TO SAFELY FIT A VERY LARGE WAREHOUSE ON LAND ZONED FOR HOMES, ACROSS THE STREET FROM HOMES, AND ADJACENT TO LAND ZONED FOR HOMES **THE FOLLOWING ARE IMPORTANT AREAS THEY HAVE NEVER BEEN ABLE TO COME CLOSE TO MITIGATE** ACCORDING TO THEIR OWN FINAL EIR:

"5.1 Significant Environmental Effects that Cannot be Avoided if the Project is Implemented

The CEQA Guidelines require that an EIR disclose the significant environmental effects of a project which cannot be avoided if the proposed project is implemented (CEQA Guidelines Section 15126(b)). As described in detail in Section 4.0, *Environmental Analysis*, of this EIR, **the proposed Project is anticipated to result in impacts to the environment that cannot be reduced to below a level of significance** after the consideration of Project design features, compliance with applicable federal, State and local regulations, and the application of the feasible mitigation measures identified in this EIR. The significant impacts that cannot be mitigated to a level below thresholds of significance consist of the following:

o **Aesthetics: Implementation of the Project would mostly or completely block views** of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Also, implementation of the Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site. **This would be a significant and unavoidable direct impact.**

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

o **Air Quality (Air Quality Management Plan Conflict):** The Project would emit air pollutants (NOx) that would contribute to a delay in the attainment of federal and State ozone standards in the SCAB. Because the Project requires a General Plan Amendment, it also would exceed the growth projections contained in SCAQMD's *2016 AQMP*. As such, the Project would conflict with and could obstruct implementation of the *AQMP*. Project impacts due to a conflict with the SCAQMD *2016 AQMP* **would be significant and unavoidable** on both a direct and cumulatively-considerable basis.

o **Air Quality (Criteria Pollutant Emissions):** After the application of Project design features, mandatory regulatory requirements, and feasible mitigation measures, Project-related NOx emissions during long-term operation of the Project would remain above the applicable SCAQMD regional thresholds. Accordingly, Project-related emissions would not meet SCAQMD air quality standards and contribute to the non-attainment of ozone standards in the SCAB. Therefore, Project operational-related impacts due to NOx **emissions would be significant and unavoidable** on a direct and cumulatively-considerable basis.

o **Greenhouse Gas Emissions (GHG Emissions Generation):** Project-related GHG emissions would exceed the applicable SCAQMD significance threshold for GHG **emissions and would result in a cumulatively-considerable impact to the environment**." (page 5-1 in MVTC Final EIR)

Sincerely,

George Hague

Subject: MVTC Warehouse

I am writing this email to voice my objection to the proposed MVTC Warehouse... This property was originally zoned for homes... This development will be located directly adjacent to a housing tract! WTH are you people thinking? Would YOU want this built right next to your home?

Furthermore, the freeway and off ramp areas near that area are already a cluster $&@$ of traffic!!!

STOP before you make our community a place where no one wants to be because of traffic, air quality and warehouses everywhere... no thanks for all the homelessness we are already dealing with!

Don't forget the people who you represent and who voted for you! Quit being manipulated by developers and money...

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

June 13, 2022

Rural Association of Mead Valley (RAMV)
PO Box 2244
Perris, CA 92572

Moreno Valley City Council
Attn: Gabriel Diaz, Associate Planner
Community Development Department
14177 Frederick Street
Moreno Valley, CA 92553

RE: Moreno Valley Trade Center Project including Final Environmental Impact Report (SCH No 20210039038), GPA PEN19-0191, Change of Zone PEN19-0192, Plot Plan PEN19-0193, and Tentative parcel Map 37836.

Honorable Council Members:

The Redlands Amazon Warehouse along the I-215 Freeway is a Prime example of why this warehouse SHOULD NOT BE APPROVED.

A massive fire broke out Friday morning, June 5 at a distribution center on West Lugonia Avenue in Redlands which shuttered part of the 10 Freeway. (Photo courtesy of the Redlands Fire Department)

This recently built state of the art Redlands warehouse burned to the ground just two years ago. It was 600,000 square feet along the I-10 freeway. Operated by Amazon, this recently built

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

warehouse caught on fire and burned to the ground quickly. Those driving along the freeway could feel the heat from the fire.

The Redlands warehouse was 600,000 sq. ft. and 45 feet in height. The Proposed warehouse is 1,328,853 sq. ft. in size and at least 100 feet in height.

Even though this recently constructed warehouse had the state of the art sprinkler system, it went up in flames quickly and was completely destroyed according to the Redlands Daily news.

> There were about 100 people working inside when the fire was reported about 5:30 a.m., and they all got out safely, city spokesman Carl Baker said.
>
> "It went up really fast, and the whole building was involved," Baker said. He described the damage as a total loss. The damage was estimated at "hundreds of millions of dollars," Baker said.
>
> One focus of the investigation will be why what Baker called "a state-of-the-art" sprinkler system failed to limit the fire's spread. "Obviously, the suppression system didn't work as intended," he said.
> **Redlands Daily News Article**

Redlands City does not have the equipment necessary to fight this type of warehouse. A large number of agencies from other cities and counties were brought in with ladder trucks to fight this Redlands City fire.

Will the fire trucks be tall enough to put water on top of a building 100 feet or more? That is much taller than the 45-foot warehouse that burned down in Redlands. Will there be enough ladder trucks to fight this type of fire with a building 100 feet tall or more? Will there be

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

enough of a setback from the residential neighborhoods if the walls over 100 feet tall collapse during a fire?

How does the City of Moreno Valley plan to fight a fire if one were to break out if this massive warehouse were to be built?

The Rural Association of Mead Valley is opposed to the Moreno Valley Trade Center Project for this and the following reasons. This Project is for a proposed 1,328,853 square foot Industrial warehouse building up to 100 feet in height on a 72.5-acre site and adjacent to existing single-family homes within a rural animal keeping overlay. The change in the Project Site's Land Use Designation would result in a total increase of approximately 80.04-acres of the Business Park (BP) General Plan Land Use Designation and a corresponding reduction of approximately 80.04-acres of the Residential 2 (R2) General Plan Land Use Designation.

1) a General Plan Amendment (PEN19-0191) to amend the General Plan Land Use Designation of the Project Site from Residential 2 (R2) to Business Park (BP); 2) a Change of Zone (PEN19-0192) to amend the City's Zoning Atlas to rezone the Project Site from Residential Agriculture 2 (RA2) to Light Industrial (LI) and remove the Primary Animal Keeping Overlay (PAKO) district; 3) Tentative Parcel Map (PEN19-0234) to merge 11 parcels into 1 parcel; and 4) a Plot Plan (PEN19-0193) for an approximately 1,328,853 square foot Warehouse/Distribution Building. The Project Site is located south of Eucalyptus Avenue, north of Encelia Avenue, west of Quincy Street and west or Redlands Boulevard comprising Assessor Parcel Nos. 488-340-002 through 012.

The Project requires a General Plan Amendment and Change of Zone from Single Family Residential land with animal keeping, a rural land use, to Industrial Zoning. This massive Industrial Project is not compatible with the surrounding residential neighborhood. The General Plan that was just updated includes the Project site as Residential housing. No indications were made during the General Plan update that this area would be changed in the near future from residential to industrial land uses. The MVTC is inconsistent with the recently approved 2040 General Plan which points out that industrial is incompatible with residential zoned areas. Policy LCC.3-2 directs the City to use "development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another". The 2040 General Plan approved in June also requires the city to screen and buffer nonresidential projects to protect adjacent residential property when necessary to mitigate noise, glare and other adverse effects on adjacent lands.

The World Logistics Center and numerous other massive logistics warehouses are set to open nearby this Project location. This Project will add to the tens of thousands of additional truck trips approved on the already gridlocked I-60 Freeway. The unrealistic analysis of job creation assumes that there is a need for additional warehouse workers. The facts are that the current logistics and e-commerce warehouses cannot fill their positions. Where will these tens of thousands of additional workers come from? The best use of this land will be for single-family homes.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

If the Project is constructed and used as an e-commerce fulfillment center the amount of vehicle trips is projected to be more than 5,000 vehicles per day. The MVTC's plan as a warehouse is to allow the southern entrance of the project to allow 1,000's of vehicles to access Encelia Street.

The project is located 118 feet away the nearest family homes Building height 100 feet or more.
This Project is for a proposed 1,328,853 square foot Industrial warehouse **building up to 100 feet** in height on a 72.5-acre site and adjacent to existing single-family homes within a rural animal keeping overlay.

Moreno Valley Municipal Code
9.05.040 Industrial site development standards.

A. General Requirements.

B. Special Site Development Standards.
1. When any industrial district abuts a property in any residential district, a minimum building setback equal to the building height, but not less than twenty (20) feet shall be required from such residential district. Further, the then (10) feet of such setback nearest the district boundary line shall be landscaped.

9. In the LI district, industrial and warehouse, structures greater than fifty thousand (50,000) square feet in building area shall be separated from any residential district as determined by an air quality and noise impact analysis. The minimum separation distance for such uses shall be two hundred fifty (250) feet between the residential district and the truck court or loading area.

The developer does not have a tenant for the building.
The Project is proposed to be built under speculation.
The developer has the option of developing this Project as a fulfillment/e-commerce center or logistics warehouse.

The following significant and unavoidable environmental impacts have been identified in the Final EIR and will require mitigation but cannot be mitigated to a level of insignificance: 1) Aesthetics: Substantial Adverse Effect on a Scenic Vista; 2) Air 2 Quality: Air Quality Management Plan Conflict; 3) Air Quality: Criteria Pollutant Emissions; and 4) Greenhouse Gas Emissions: GHG Emissions Generation. Details of these significant unavoidable adverse impacts are discussed in the Final EIR and are summarized, or were otherwise provided in Section 5.3, *Environmental Effects Which Remain Significant and Unavoidable After Mitigation and Findings*, in the Statement of Facts and Findings. (Page 11).

Moreno Valley is one of the areas designates as a Disadvantage Community under 5B S35. Adding thousands of additional logistics trucks to this community will greatly impact the health of over 100,000 residents living in your community.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

The Environmental Justice Element is now required by the State to be a part of all General Plans. The City must "minimize any potential health risks" of new development on adjacent sensitive receptors and "designated truck routes that avoid sensitive land uses" (Policies EJ.1-3 and EJ. 1-9). The City must create a substantial buffer between homes and the warehouse. Screening must be installed along the southern and western boundaries of the Project. All truck parking and docks must be located on the north side and east side of the Project away from residential neighborhoods.

Although the Project has a number of entrances most warehouses use just one driveway for trucks to enter and exit, thereby reducing staffing to one gate. The Project does not have sufficient room at any of the entrances to prevent trucks from backing up onto Eucalyptus Ave.

The Project must include a substantial amount of solar power, especially if used as an e-commerce business. The current power grid is not sufficient to produce enough electricity for the current customers. The drain on the power grid during summer months produces frequent brown outs throughout Southern California.
A large warehouse in the City of Perris recently had a large explosion from a large propane tank. This warehouse is next to residential homes. The blast from the explosion could be seen and heard from miles away. No propane tanks should be installed and used on warehouse sites. All forklifts, Goats, and equipment should be electric powered.

The Project is located in an area with the worst smog in the nation.

This Project will increase greenhouse gas levels that are already impacting Communities in Western Riverside County. Mead Valley is also a disadvantaged community. The impacts warehouses in Moreno Valley and Perris are having negatively impacts to the entire region. The I-215 Freeway is congested for most of the day. The I-60 Freeway is congested with thousands of trucks. This backs up traffic throughout the region. Trucks are now using residential streets to avoid the congested freeways. Cajalco Road is backed up bumper to bumper during the day. Trucks are using Van Buren, Alessandro and Cajalco to get to the I-91 to get to the Ports. Our freeways cannot add tens of thousands of additional trucks and cars from any new warehouses without severe gridlock to our freeways.

5.1 SIGNIFICANT ENVIRONMENTAL EFFECTS THAT CANNOT BE AVOIDED IF THE PROJECT IS IMPLEMENTED

The CEQA Guidelines require that an EIR disclose the significant environmental effects of a project which cannot be avoided if the proposed project is implemented (CEQA Guidelines Section 15126(b)). As described in detail in Section 4.0, *Environmental Analysis*, of this EIR, the proposed Project is anticipated to result in impacts to the environment that cannot be reduced to below a level of significance after the consideration of Project design features, compliance with applicable federal, State and local regulations, and the application of the feasible mitigation measures identified in this EIR. The significant impacts that cannot be mitigated to a level below thresholds of significance consist of the following:

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

• **Aesthetics: Implementation of the Project would mostly or completely block views** of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Also, implementation of the Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site. This would be a significant and unavoidable direct impact.

• **Air Quality (Air Quality Management Plan Conflict):** The Project would emit air pollutants (NOX) that would contribute to a delay in the attainment of federal and State ozone standards in the SCAB. Because the Project requires a General Plan Amendment, it also would exceed the growth projections contained in SCAQMD's *2016 AQMP*. As such, the Project would conflict with and could obstruct implementation of the *AQMP*. Project impacts due to a conflict with the SCAQMD *2016 AQMP* would be significant and unavoidable on both a direct and cumulatively-considerable basis.

•**Air Quality (Criteria Pollutant Emissions):** After the application of Project design features, mandatory regulatory requirements, and feasible mitigation measures, Project-related NOX emissions during long-term operation of the Project would remain above the applicable SCAQMD regional thresholds. Accordingly, Project-related emissions would not meet SCAQMD air quality standards and contribute to the non-attainment of ozone standards in the SCAB. Therefore, Project operational-related impacts due to NOX emissions would be significant and unavoidable on a direct and cumulatively-considerable basis.

• **Greenhouse Gas Emissions (GHG Emissions Generation):** Project-related GHG emissions would exceed the applicable SCAQMD significance threshold for GHG emissions and would result in a cumulatively-considerable impact to the environment." (page 5-1 in MVTC Final EIR)

RAMV is opposed to the **Moreno Valley Trade Center Project** that will impact the entire region. We cannot afford to turn anymore of our residential zoned areas into Industrial zoned areas. Our freeways are already at capacity, our air quality is already the worse in the nation, and our local roads are already being destroyed by truck traffic. Please consider all of the impacts that this Project will bring to not only Moreno Valley, but the entire region.

I urge the City Council to follow the Planning Commission's recommendation and deny this Project.

Sincerely,

Debbie Walsh

Follow Up Flag: Follow up
Flag Status: Flagged

Warning: External Email – Watch for Email Red Flags!

Honorable Mayor and Councilmembers;

Please include these comments as part of the record for the above mentioned public hearing. I represent the Valley Springs HOA which borders Encelia Ave., the southern border of this proposed project. **We again ask you to uphold the Planning Commission's denial of entitlements for this project** for the same reasons that were voiced on December 7, 2021 during the applicants appeal of their decision. While it is true that the developer has reached out to me with some proposed changes that will eliminate the traffic exiting onto Encelia Ave., **the environmental impact has not changed**. There will still be the **same amount of pollution to our neighborhood** as described in the FEIR, the **same truck and employee traffic congestion at the round-about of Redlands and Eucalyptus**, and the **same property devaluation** to our homes if this project is approved.

Mr. Marquez, Cabrera, and Delgado, you were ready to vote no on December 7th after listening to us. We ask that you again vote no on June 21st. Again, please revisit the location of the project and **visualize the magnitude of a 1.3 million sq. ft. building** and what it will do to our neighborhood.

Thank you,

Joe Bunker
Valley Springs HOA
Warehouse Chairperson

To whom it may concern,

Please accept my attached document regarding my opposition to the MV Trade center that is being brought forward again.

This project does not belong next to our homes and needs to be denied.

Thank you.

Lindsay Robinson

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

June 14, 2022
Moreno Valley Trade Center Round 2

To whom it may concern,

Please enter this into the Moreno Valley Trade Center Packet along with the additional documents as the previous concerns still apply.

I still believe that the mayor was allowed to act inappropriately when he tabled the discussion prior to voting when he saw he was not going to get his way.

The developer lied when he said that our school superintendent Kedzoira provided a letter of support for the project. Many of us were in disbelief and Mr. Kedzoira confirmed that he did NOT support this project or other warehouses. He thanked them for their donation (bribe) to the school wellness center. This should remind you all of the felony conviction Alex Ramirez received for the fraudulent letters of support for the Ironwood Village project. Superintendent Kedzoira is very well respected and this lie tarnished his reputation for many people and a public apology is warranted. The magnitude of this lie should be reason enough to vote no and black list Hillwood from the city.

Mr. Gutierrez sent out many glossy mailers as well as inundated residents with campaign calls. **One such call stated that he does not approve of warehouses near homes/residential areas**. That's great news for the residents as it means he will not approve this project.

Campaign mailers from most of you all say you're going to bring better businesses and high paying jobs yet what we see are warehouses, gas stations and fast food. Once elected the promises fade away. Let's start honoring your promises and bring those high paying jobs and better businesses. Moreno Valley could be so much more than what it's been doomed to.

Our General Plan Update has recently been completed and rezoning projects should not be coming forward to soon especially one as hypocritical as this that takes residential land away. The city's excuse for destroying the community character of the NE by letting Chung rezone R2 to R10 was that we needed more homes to meet state mandates therefore residential land should not be rezoned to warehouses.

Why hasn't Hillwood said where the residential R2 PAKO homes will be relocated as required by law?

Hillwood's presentation admitted they have no tenant thus all of the estimates could be way off regarding traffic, noise, pollution. It's a spec building and thus needs to be denied.

Have any of you sat and watched trucks navigating Benzeevi's absurd roundabout? It was clearly not designed for large trucks so now more trucks are heading west thru the auto mall to Moreno Beach which could be a violation of the Prologis agreement that all

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

trucks go east to Redlands. This roundabout will not be able to handle trucks from this project as well as wlc so where will these trucks illegally drive? We aren't getting sufficient truck enforcement nor traffic patrols in the east end as it is.

Has our municipal code for noise been amended yet to require warehouses shut down from 10 pm to 7 am if they're next to homes? If not, this project needs to be denied.

This project's EIR has too many significant negative impacts that severely harm the residents' health and quality of life. For too long the city flippantly over rides these severe impacts. There are laws that are supposed to protect us from these travesties. For too long now the city staff have wantonly used the "override" to approve too many projects with significant negative impacts in a manner that I believe is illegal. For too long, staff have incorrectly asserted that the City may simply adopt a statement of override when a project results in impacts.

Not so — procedurally, the lead agency can only approve a project with significant environmental impacts if: (1) the adverse environmental effects of a project have been substantially mitigated, or (2) mitigation measures or alternatives are infeasible *and* overriding considerations exist which allow approval of the project. (PRC § 21081; Guideline §§ 15091, 15093.)

Overriding considerations do not come into play unless there are *no* feasible project alternatives. (*City of Marina v. Board of Trustees of the California State University*, 2006, 39 Cal.4th 341,368.) The lead agency, therefore, cannot merely adopt a statement of overriding considerations and approve a project with significant impacts; it must first adopt feasible alternatives and mitigation measures. "CEQA does not authorize an agency to proceed with a project that will have significant, unmitigated effects on the environment, based simply on a weighing of those effects against the project's benefits, unless the measures necessary to mitigate those effects are truly infeasible. (*Id.* at 376.)

5.1 Significant Environmental Effects that Cannot be Avoided if the Project is

Implemented

The CEQA Guidelines require that an EIR disclose the significant environmental effects of a project which cannot be avoided if the proposed project is implemented (CEQA Guidelines Section 15126(b)). As described in detail in Section 4.0, *Environmental Analysis*, of this EIR, the proposed Project is anticipated to result in impacts to the environment that cannot be reduced to below a level of significance after the consideration of Project design features, compliance with applicable federal, State and local regulations, and the application of the feasible mitigation measures identified in this EIR. The significant impacts that cannot be mitigated to a level below thresholds of significance consist of the following:

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

o **Aesthetics: Implementation of the Project would mostly or completely block views** of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Also, implementation of the Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site. This would be a significant and unavoidable direct impact.

o **Air Quality (Air Quality Management Plan Conflict):** The Project would emit air pollutants (NOx) that would contribute to a delay in the attainment of federal and State ozone standards in the SCAB. Because the Project requires a General Plan Amendment, it also would exceed the growth projections contained in SCAQMD's *2016 AQMP*. As such, the Project would conflict with and could obstruct implementation of the *AQMP*. Project impacts due to a conflict with the SCAQMD *2016 AQMP* would be significant and unavoidable on both a direct and cumulatively-considerable basis.

o **Air Quality (Criteria Pollutant Emissions):** After the application of Project design features, mandatory regulatory requirements, and feasible mitigation measures, Project-related NOx emissions during long-term operation of the Project would remain above the applicable SCAQMD regional thresholds. Accordingly, Project-related emissions would not meet SCAQMD air quality standards and contribute to the non-attainment of ozone standards in the SCAB. Therefore, Project operational-related impacts due to NOx emissions would be significant and unavoidable on a direct and cumulatively-considerable basis.

o **Greenhouse Gas Emissions (GHG Emissions Generation):** Project-related GHG emissions would exceed the applicable SCAQMD significance threshold for GHG emissions and would result in a cumulatively-considerable impact to the environment." (page 5-1 in MVTC Final EIR)

The wlc is 10% of our city's land due to Benzeevi's ability to buy off our former council/pc members. Any future warehouses need to be placed on wlc land and not next to homes. Let Hillwood negotiate with Benzeevi to place his warehouse there perhaps next to Alessandro that they wish to pave. Other warehouses near homes have already been approved. Please ask how much total land is now warehouses in our city and say enough is enough. None of you would enjoy living next to a warehouse so don't inflict this on the established residents. Other cities have imposed moratoriums on warehouses and it's time Moreno Valley does the same. Put the residents health and quality of life first!

Dear Council members,

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Please respect the residents and the planning commission decision and vote NO on the Moreno Valley Trade Center. The 2006 general plan as well as the current mayor appointed planning commission realized that warehouses do not belong next to our residential homes.

This area of Moreno Valley was renamed to Rancho Belago and it was touted as the "Beverly Hills" of Moreno Valley complete with matching signs. Unfortunately thru less than ethical processes the warehouses to the east of these homes were approved. These residents do not deserve to now be surrounded on two sides with warehouses and 24/7 noise, traffic, light and air pollution.

The Hillwood presentation tries to depict a rosy picture but the reality is that the warehouse does not belong there. They have no tenant so all the data on traffic and noise they are providing is irrelevant.

Redlands south of Eucalyptus is not a truck route yet they have a truck entrance near the south end of the building near Encelia. There is no proposal to change the truck route, so they will be breaking the law.

An incredible amount of traffic will be using Encelia to exit the project during shift changes yet no street light was proposed. If it becomes an Amazon distribution center their vehicles will be invading the residential streets to reach Redlands.

Some of the houses will receive air filtration systems therefore they acknowledge the severe negative impact of their pollution. If air filtration is needed in the homes how will they protect the kids/adults who are playing and working outside? A yes vote means you really don't care about the health of the residents.

This project has a long list of money they're "donating" to different causes. Sure looks like Pay to Play if not bribery.

Unless there is a point of sale, the revenue the city may get is not worth the damage they will do.

Jobs- there will be many more jobs associated with building the 148 homes and more long term jobs. 148 homes will need upgrades, repairs, landscape maintenance etc for many years to come and will employ a large variety of tradesmen.

This warehouse hopes to remove approximately 148 half acre principal animal keeping homes at a time when the city claims we need more homes. The pandemic has shown us that people and especially children need space and yards to play thus the R2 PAKO zoning must remain especially as your new GPU allowed Nelson Chung to rezone our R2 PAKO land north of the freeway to his preferred R10 (Pay to Play goes full circle).

The Hillwood presentation talked about moving the 148 PAKO homes to another area but did not say where. It's my understanding they are supposed to show the new location for the displaced residential land. Where else in the city will they put those homes?

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Noise- the city needs to amend their municipal noise ordinances to include warehouse noise. Warehouses in or near residential homes need to cease operation from 10 pm to 7 am. Just as loud parties, construction, yard equipment noise is restricted so must the warehouse noise. A perfect example is the horribly designed paper company building that the city approved that disrupts sleep and forces residents to keep their doors and windows shut all day to avoid the obnoxious droning. Would any of you want to have a generator running in your front yard all night? I don't think so and the excuse that it's "within acceptable limits" is absurd. None of you would find it acceptable so don't force it on us. Beeping trucks all night long is also disruptive and needs to cease.

One of the items they bragged about was paving Alessandro thru the wlc property- something Mr. Benzeevi is responsible for and won't help the city since Mr. Benzeevi intends to close Alessandro east of Merwin thru his property and the city signed off on it. Cactus will become the through street.

This warehouse appeared as a done deal on the maps shown during the public GPU meeting. An astute resident noticed it as the project had not come forward yet. The GPU consultant stated that city staff informed him it was already approved. So once again the city promoted a project that had not come before them yet just as was done years ago for wlc.

There is not sufficient data regarding the compounding effect that residents will suffer if both the wlc and the trade center are developed. The wlc will be bad enough, don't compound it. Vote NO on the mv trade center.

The 2006 general plan and the current planning commissioners did the right thing. They protected the residents from a warehouse next to their homes. They chose to value the residents' health and quality of life over a quick profit for a developer.

People choose to live in areas that suit their interests and income levels. No one I've met chooses to live next to a warehouse and no city should rezone residential property near existing homes to warehouses. The city has made many horrible decisions with regard to warehouses don't let this be one of them.

I doubt any of you (council, staff, and developers) live next to a warehouse nor would you choose to do so. The negative impacts are too detrimental and can't be mitigated so please vote NO on the MV Trade Center- wrong location and it's your responsibility to make the residents' health and quality of life a priority!

Thank you,
Lindsay Robinson

Moreno Valley Trade Center dEIR concerns

To whom it may (or may not) concern,

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Please include this in the public record to voice my concerns on the inadequacy of the draft EIR related to the Moreno Valley Trade Center proposed at a location on Redlands Blvd. south of Eucalyptus.

As with the other warehouse projects, the city staff and developers make light of the significant negative impacts that can't be mitigated and they unethically continue to override them without adequately addressing the cumulative effect of all the previous projects who also had their significant negative impacts unmitigated (pollution, noise, traffic etc.). Some of these projects that directly affect the residents south of Encelia include the wlc, Aldi, Prologis warehouses and the sleep disrupting Solaris paper company and now commercial zoning just north of them. The developers and staff that promote these obscene projects do not live here and leave us to suffer the consequences of their bad decisions and yes outright false data in order to get their projects approved.

Many at city hall have forgotten who they work for- it's the residents not the developers and our health and quality of life should be their priority, not the financial enrichment of developers. Would the city staff and developers want this to happen where they live- have their views blocked, breathe bad air, have non-stop truck traffic 24/7 disrupting their sleep with beeping and brakes noise etc.? People moved out here for the larger lots, animal keeping, quiet, night skies, low crime to name a few. We poured our life savings into purchasing our homes in an area we researched and thought was the right place for our families. Warehouses were never intended out here and especially the encroachment into residential areas as the MV Trade Center intends to do. The 2006 comprehensive general plan protected the residents, the new plan does not.

This project was already included on the general plan update as a done deal. It was on the map and consultant thought it was already approved. How did that happen when it hadn't even come forward yet? Again underhanded action at city hall just like when the city promoted the wlc prematurely. This warehouse does not belong here and needs to be eliminated.

The land that this abomination intends to rezone is resident R2 with animal keeping rights. The city keeps whining about losing control if they don't meet certain housing numbers yet they want to remove residential land in favor of another warehouse. They just allowed Chung/Benzeevi committee to remove more animal keeping residential land so we need to preserve what is left. The city needs to stop contradicting themselves and using RHNA when it suits them. DO NOT ALLOW THIS LOSS OF RESIDENTIAL LAND FOR ANOTHER WAREHOUSE ENCROACHING INTO AN EXISTING NEIGHBORHOOD!

Their traffic studies and analysis contain many areas that need to be addressed more completely and false data/info removed. Encelia is not a high traffic street and is not a truck route and should never become one. **Why have the traffic numbers been**

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

inflated for Encelia **to make it seem like all the project driveways won't impact the residents??**

This project intends to direct a huge amount of traffic onto a quiet street and onto Redlands. Redlands Blvd south of Eucalyptus is NOT a truck route although large numbers of trucks break the law daily.

This study seems to assume that Encelia and Redlands will be ok for their trucks when they are not truck routes. **Why hasn't this study adequately addressed the illegal trucks using Redlands Blvd south of Eucalyptus? Will this project pay for additional police patrols to stop the illegal truck traffic?** The trucks going south **on Redlands to Cactus will** have **severe negative impacts on the other** housing **tracks along Redlands and Cactus so why isn't this addressed satisfactorily? These large trucks also destroy our roads much quicker than passenger vehicles- will this project (and wlc) be held accountable in paying for the damage to our roads? It has been mentioned that this will be another Amazon distribution center, if so is their adequate parking and law enforcement for all their small delivery trucks?** We have Amazon in our city already and do not need another. Their drivers are dangerous and invade neighborhoods parking their vehicles off the premises. Again, all these neighborhoods will suffer compounded health and quality life issues associated with adding another warehouse to their already affected community. **Will this project finance the additional police we will need to protect our residents from all these negative impacts associated with our residential road use?**

Employee traffic- we all know that people look for quicker routes to and from their destinations. **How will you protect the existing residents from excessive employee/truck traffic through their quiet neighborhoods?** Non-residential traffic is much more dangerous than residential. **How will you stop employees from parking in our residential neighborhoods? Where are the safe guards and the non-residential traffic noise, dangerous driving, pollution needs to be addressed not over ridden.**

Why have the safe equestrian trails been eliminated from this study? Our master planned trail system includes a safe equestrian overpass at Theodore and it should be down Redlands (and Theodore) to connect with Lake Perris. Only pedestrian and bikes get mentioned.

Aesthetics-The 2006 general plan included many more protections to our residents that this project will destroy. The wlc high cube warehouses will obstruct the resident's wonderful views to the east and now this project will obstruct their views to the north. Just another severe negative impact that is compounded by other projects that have already been approved. Loss of the substantial views to east is bad enough so do not allow this project to obstruct their remaining views. **Why isn't the city protecting the residents better rather than over riding this compounded severe negative impact?**

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Pollution- the city and out of town developers continue to play Russian roulette with our health by approving unlimited warehouses to encroach into our residential areas. There are so many studies already done that show the damage done to our lungs from diesel and other fuels- especially the young and seniors. **Why didn't this EIR address the NOx pollution that will be associated with the project operation? Along with air pollution there will be substantial noise and light pollution 24/7 that are not adequately addressed- will the truck noise and lights be stopped at 10 pm as other activities need to? Will the city finally address this issue and amend our noise ordinance to include warehouses in residential areas?** The beeping trucks at skechers all night have disrupted sleep of those who live north of it and since it opened they haven't been able to sleep with their windows open. Since the paper company opened the noise has disrupted both daytime and night time sleep and that should not be allowed to occur with any more warehouses. **Why hasn't the compounded effect been addressed adequately to include the injustice that this neighborhood will suffer from with the already approved wlc? Do NOT claim it doesn't need to be addressed!**

Water- I don't believe that the EMWD is being truthful on being able to supply water to all these projects coming forward- wlc and the commercial north of the freeway will suck up so much water. I was appalled to read that they will dig a well for their project and suck out the aquifers which aren't getting adequately replenished during so many years of drought. The Festival also dug a well recently and will also be taking aquifer water. We have residents whose property relies on well water that these projects may deplete. **Where are the safeguards for these residents? Why was there no research and data collected on what happens when excessive underground water is removed? How much water will they be pumping from their well? When the underground water is pumped out, the ground will settle and homes could start sinking and sink holes could develop on our roads. Will this project be responsible later down the road for all the damage they've done? This well pumping by warehouses should NOT be allowed and certainly without safe guards and restrictions.**

Jobs- once again the promise of jobs is bandied about to entice people to like this project. The 2006 and 2021 general plans as well as city propaganda every year promise to bring high paying jobs to Moreno Valley so people don't have to commute. Warehouses do not bring those high paying jobs promised. This project like the wlc will swallow up in huge amount of valuable land for a small number of jobs that are not high paying. **What guarantee is there that there will be 2000 permanent high paying jobs? Why hasn't the city learned from past lies from developers in order to get their project approved (skechers/benzeevi promised thousands and did not deliver)?** Warehouses and even trucks are becoming more automated, therefore less jobs and most are temporary. **Why do you keep bringing up the commuting issue when it's been shown that our resident commute times are on average or less than surrounding communities?** In fact the majority of city staff commute into Moreno Valley to work so it is a non-issue intended to instill fear. **Why does the city staff**

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

continue to condemn our residents to low paying warehouse jobs? We deserve better.

For too long now the city staff have wantonly used the "override" to approve too many projects with significant negative impacts in a manner that I believe is illegal. For too long, staff have incorrectly asserted that the City may simply adopt a statement of override when a project results in impacts.

Not so — procedurally, the lead agency can only approve a project with significant environmental impacts if: (1) the adverse environmental effects of a project have been substantially mitigated, or (2) mitigation measures or alternatives are infeasible *and* overriding considerations exist which allow approval of the project. (PRC § 21081; Guideline §§ 15091, 15093.)

Overriding considerations do not come into play unless there are *no* feasible project alternatives. (*City of Marina v. Board of Trustees of the California State University*, 2006, 39 Cal.4th 341,368.) The lead agency, therefore, cannot merely adopt a statement of overriding considerations and approve a project with significant impacts; it must first adopt feasible alternatives and mitigation measures. "CEQA does not authorize an agency to proceed with a project that will have significant, unmitigated effects on the environment, based simply on a weighing of those effects against the project's benefits, unless the measures necessary to mitigate those effects are truly infeasible. (*Id.* at 376.)

Now with CEQA in play, the city/developer try to claim that rejecting the project and leaving the zoning as is will result in the same if not more severe negative impacts that just leave me speechless. With RHNA in play we need these residential homes- especially as the pandemic has shown kids and adults need larger yards to play in to remain safely distanced. Our large lot neighborhood home sell quickly and are in demand so we need to keep our R2 designation. The **NO PROJECT ALTERNATIVE** is the correct selection and the MV TRADE CENTER needs to be denied.

Our city has been overwhelmed by warehouses and at this point there needs to be a moratorium. No more warehouses and we need more open space per the law. The compounded effects are real and dangerous and should no longer be ignored.

As residents we don't have investor money to afford legal services and PR staff the way developers do. Our hard earned money went into purchasing our homes in a place chosen that suited our life styles. We moved further out of town to larger lots, space, low crime, night skies, views etc. and trusted that our city government would actually work to protect us as city governments were set up to do. Staff and elected officials take ethics training and oaths of office to do so. Unfortunately developer money has completely corrupted our system of government and the residents have not been protected. Rejection of the Moreno Valley Trade Center will be the start to reverse prior environmental injustices inflicted on the tax paying residents of Moreno Valley.

Warning: External Email – Watch for Email Red Flags!

To whom it may concern:

My name is Eric Esquer. I am concerned about the rising inflation and its effects on government cost for the public improvements and wages. The Consumer Price Index shows an inflation rate of almost 6% per year, and the costs of public improvements is up almost 9% according to the Engineering News Record. And based on my personal household expenses I expect the inflation rates are even higher.

While I think President Biden is trying to slow the inflation rates, it's likely won't be slowing down anytime soon. Even the Federal; Reserve Board recently admitted they were wrong when they said inflation was "transinary" and would go away in 2022. Admittedly, it has been here for some time.

This inflation will result in higher payroll cost and the cost of pavement, storm drains, irrigation lines, and general repairs for the city.

One way to pay for the added costs is to support development like the project before you. One that will provide hundreds of high paying union jobs during construction, and over a thousand jobs after its in operation. One that will also pay extreme property taxes, and even sales tax revenue if it is developed for a retail operation.

I hope that the council will consider these factors in their deliberations.

Thank you for your time,

Eric Esquer

Dear Council Members,

I strongly support the above Project and ask you to vote YES on June 21st , 2022. We need the additional Jobs and City Revenues so you don't have to raise our TAXES !! The Developer has more than addressed the adjacent neighborhood to the South's concerns and is spending more money on Community Benefits to the entire City than the WLC did (World Logistics Center) and it is 40 times larger than this project.

Thank you,

Amanda

Warning: External Email – Watch for Email Red Flags!

Good evening Mayor Gutierrez, Council Members Ulises Cabrera, David Marquez, Ed Delgado and Elena Baca, I send this email to implore you to vote NO on the proposed Moreno Valley Trade Center. The land is zoned for homes, not warehouses. We have enough warehouses in Moreno Valley along with already heavy diesel truck traffic on the freeway and not to mention up and down Ironwood Blvd! Building this massive warehouse will only bring more truck and more pollution! We already have an air pollution problem with the existing diesel truck emissions. Building the MVTC would bring thousands more diesel trucks and even more pollution that is not good for us that live here and the children that go to schools here.

Vote your conscience and vote NO on the MVTC!

Northeast Moreno Valley Resident,

Cipriano and Linda Castellano

Hi Gabriel,
Thanks for responding ! Yes , the revenues and extra sales tax generated from this project and its employees shopping in MV will help maintain the City Staffing levels at City Hall and Public Safety . It would be a disaster to have to cut City Staff/Public Safety levels if we cant keep up with the inflationary spiral we are witnessing now. We don't want to become another San Bernadino . I am very proud of the 20,000 new jobs and industrial tax base that has come to MV in recent years from the hard work of the City Staff and developers . I am very proud to have been a part of that effort ! Lets approve this great project and keep moving forward . We cant let those with no vision or common business sense bankrupt our great City . Vote YES for the MVTC !

Thank you,
Jerry Stephens

Subject: Vote Yes for the (MVTC) Moreno Valley Trade Center Project June 21st 2022

Warning: External Email – Watch for Email Red Flags!

Dear Council Members,

I strongly support the above Project and ask you to vote YES on June 21st , 2022. We need the additional Jobs and City Revenues so you don't have to raise our TAXES !! The Developer has more than addressed the adjacent neighborhood to the South's concerns and is spending more money on Community Benefits to the entire City than the WLC did (World Logistics Center) and it is 40 times larger than this project.

Thank you,
Jerry Stephens

With great respect, I want to remind you that you were elected to serve your district and the people of those respected communities. I find it disappointing that you don't respect the voices and the values of the folks you are supposed to serve. I'm talking about warehouses, changing the general plan to put warehouses in and near schools and neighborhoods. With an infrastructure that can barely support the terrible traffic that exists currently. Yes we live in the northeast, yes, yes we opposed the Benzeevi plan(WLC) to put 700 football fields in warehouses. encroaching on neighborhoods, so it's scaled down HA! The city did not do its research and gave everyone false information and had to spend lots of taxpayer money on lawsuits. But you still want more warehouses ! I have done my research . The Inland Empire is already saturated with warehouses many not even filled We have warehouses right across the freeway, the Solaris paper company and signage that lights up at night shining down on our neighborhood (yes we also have the Moreno Valley Auto Center signage too) Solaris the paper company has this drone noise that disturbs sleep. Folks bought here in our particular area for the big lots and larger homes and the quiet lifestyle. We, my husband and I as well as other residents(I have been told don't want changes) are Not opposed to changes. We have a nice shopping area, Stoneridge and Moreno Beach shopping area, the University Health Systems on Nason just to name a few. Are you all so unimaginative that you can only think about developers' money and warehouses on the beautiful empty land that surrounds us, or is it politics as normal like Councilmen Co,.our city was on the national news for all the wrong reasons. Why not developers that could build parks in the neighborhoods for the children and libraries, tech schools for young people that want to learn different life skills. The promise of jobs from the warehouses is very misleading and the city doesn't make a dime unless the point of sale is in our city and empty warehouses a blight on our city

DO NOT USE OR CHANGE THE RESIDENTIAL LAND THAT SURROUNDS OUR NEIGHBORHOOD AND OTHER EXISTING NEIGHBORHOODS WITH ANOTHER WAREHOUSE / MORENO VALLEY TRADE CENTER.

Thank you for taking the time to read my letter

Respectfully,

Catherine & Richard Losee
12433 Prairie Wind Trail.

Warning: External Email – Watch for Email Red Flags!

Dear Mr. Kelleher,
Please include my concerns on the June 21st City Council Agenda.

I am contacting you in regards to the MVTC proposal. I have already expressed my concern to this project in front of the city planning committee, which voted it down. I am now expressing my concerns to you.

With a Ph.D. in Environmental Toxicolgy I know that increasing the amount of diesel trucks on our roads will increase the amount of air pollution in the area. Diesel trucks spew out particulate matter which causes asthma, cancer, and brain damage. By voting for this proposal you are sentencing Moreno Valley residents, and children in particular, to an unhealthy life.

Please vote NO on the MVTC proposal to allow our dreams to soar.

With Gratitude,

Just STOP this insanity and stop approving more warehouses!!!!! I don't have the time or desire to keep telling all of you that we hate the warehouses that we already have for many good reasons. We have more warehouses than any sane community needs. And surely we don't need more! We had the "planned" warehouse district designated in the southern part of the city. Then the council approved the WLC on the East side of the city because of the whims of ONE developer. Warehouses are now popping elsewhere too (e.g the center of town--Heacock & Hwy 60). Enough already!!!! What is wrong with you all thinking this is a good thing for our city! They are ugly, poor investments, unhealthy for our residents in many ways and have already negatively impacted our lives, our quality of life , our vistas, etc. When are you going to start to represent the best interests of your voters and citizens? DON'T keep torturing us like this!!! VOTE NO to the MV Trade Center!!!!

Sincerely and disgustedly,
Marcia Narog

Subject: Moreno Valley homes/families/streets & SR-60 & I-215 are already impacted by warehouse diesel trucks & their harmful pollution -- Why add the MVTC?

Warning: External Email – Watch for Email Red Flags!

Good afternoon City Council members, June 14, 2022

Re: **Moreno Valley homes/families/streets & SR-60 & I -215 are already impacted by warehouse diesel trucks & their pollution.**

Moreno Valley residents are having their Homes and Families Streets impacted by diesel Trucks and their Harmful Pollution

Local Streets and SR-60 and I-215 are re becoming more and more impacted/clogged by Diesel Trucks and Their Harmful Pollution.

The following are some of the city's approved warehouses which have not been built.

The World Logistic Center 40 million sq ft warehouse = across the street from homes is approved with more than **11,000 Daily Diesel Truck Trips and more than 50,000 other Daily Vehicle Trip**

The Moreno Valley Business Center warehouse/diesel truck traffic is approved = across the street from homes will be impacted by Harmful Diesel Pollution & Traffic.

The Compass Danbe Centerpointe warehouse is approved = across the street from a school, homes and apartments where Diesel Truck Trips/Traffic and their Harmful Pollution will impact Families.

Our City IS NOW PROCESSING THE FOLLOWING THREE WAREHOUSES NEAR HOMES WHERE DIESEL TRUCK TRAFFIC WILL CLOG OUT STREETS AND IMPACT THE HELATH OF OUR FAMILIES— all require changes in our new General Plan to allow warehouses.

The 1.3 million sq ft Moreno Valley Trade Center (MVTC) is across the street from an existing neighborhood and adjacent to land zoned for more homes. All of the changes in the project's changes since December have not significantly reduced its toxic pollution which will impact the health of many families and the impacts to Redlands Blvd roundabout/traffic. Vote No on this poorly placed Warehouse.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

The Heacock Commerce Center warehouse is only 20 feet from homes and across the street from others. Their Diesel Truck traffic and its Harmful Pollution will impact these families and our City's roads.

The Edmont commerce Center Warehouse is only 10 feet from homes and across the street from others. Their Diesel Truck traffic and it Harmful Pollution will impact these families and our City's roads.

PLEASE DENY THE MORENO VALLEY TRADE CENTER (MVTC). OUR FAMILIES AND LOCAL STREETS AND SR-60/I-215 CANNOT HANDLE THE IMPACTS FROM THIS POORLY PLACED WAREHOUSE.

Sincerely,

George Hague

Subject: Impacts to children & their families & those using Redlands Blvd by the MVTC

Follow Up Flag: Follow up
Flag Status: Flagged

Warning: External Email – Watch for Email Red Flags!

Good morning city council members, June 15, 2022

Re:Impacts to children & their families & those using Redlands Blvd caused by the Moreno Valley Trade Center (MVTC) — **even with revisions**.

THE AIR POLLUTION CAUSED BY THE DIESEL TRUCKS FROM THE 1.3 MILLION SQ FT MORENO VALLEY TRADE CENTER (MVTC) WILL STILL IMPACT THE NEARBY FAMILIES. REMEMBER IT IS NOT HOW FAR THE BUILDING IS AWAY, BUT THE PATH THAT DIESEL TRUCKS USE AND IDLE. **THE RECENT REVISIONS TO THE WAREHOUSE PLANS STILL ALLOW THE POLLUTION TO EASILY REACH THE CHILDREN — ESPECIALLY IF THEY TRY TO PLAY OUTSIDE IN THEIR YARDS. THE EXISTING ZONING FOR HOMES WOULD NOT CAUSE THESE PROBLEMS.**

THE MVTC'S DIESEL TRUCKS WILL ADD TO THE INCREASING CONGESTION AT THE INADEQUATE ROUNDABOUT ON REDLANDS BLVD AS WELL THE POORLY DESIGNED AND OUTDATED SR-60 INTERCHANGE. THERE COULD BE A DIESEL TRUCK TRYING TO USE BOTH AT LEAST EVERY MINUTE DURING DAYLIGHT HOURS. **THE RECENT REVISIONS WILL DO VERY LITTLE TO REDUCE TRAFFIC. THE EXISTING ZONING OF HOMES WOULD NOT CAUSE THESE PROBLEMS.**

THE DEVELOPER STILL WANTS THIS PROJECT TO BE A FULFILLMENT CENTER WHICH WOULD RESULT IN A BUILDING OF MORE THAN 100 FEET. IT IS NOT THE NUMBER OF SQUARE FEET IN SUCH BUILDINGS, BUT THE NUMBER OF CUBIC FEET. **THEREFORE THE PROPOSED VERY SMALL REDUCTION IN SQ FOOTAGE MEANS VERY LITTLE, BUT INCREASING HEIGHT ADDS MANY MORE CUBIC FEET.**

TO PROTECT FAMILIES AND THEIR CHILDREN'S HEALTH FROM THE PROJECT'S DEISEL POLLUTION, TO REDUCE SIGNIFICANT TRAFFIC CONGESTION IN MORENO VALLEY STREETS/SR-60 EXASPERATED BY THIS MASSIVE PROJECT YOU MUST SUPPORT THE PLANNING COMMISSIONS UNANIMOUS VOTE TO DENY THIS POORLY PLACED PROJECT.

THE DEVELOPER'S PROPOSED REVISIONS DO NOT SIGNIFICANTLY REDUCE OR ELIMINATE SOME OF ITS MOST SERIOUS PROBLEMS/IMPACTS TO MORENO VALLEY RESIDENTS, BUT ALLOWING THE EXISTING ZONING FOR HOMES TO REMAIN WOULD.

Subject: Diesel Truck Traffic in Moreno Valley vs the City of Perris

Follow Up Flag: Follow up
Flag Status: Flagged

Warning: External Email – Watch for Email Red Flags!

Good evening/morning city council members,

Why does our city continue to bring diesel trucks into our city near homes and on truck routes past schools? The Moreno Valley Trade Center (MVTC) brings toxic diesel pollution very near an existing neighborhood with children. **The elderly and children are the most impacted by diesel pollution.**

The City of Perris leadership is finally realizing the danger they bring to their residents by allowing diesel trucks into and through their city on the approved Mid County Parkway. if you scroll down to the sections just above the picture, you we see they wrote they will "support the parkway — **only if trucks weren't allowed on it**"

The City of Moreno Valley needs to deny the MVTC because it brings diesel trucks very near an existing neighborhood and all the changes made in the project since December will still allow its health impacting pollution to easily reach families — especially those trying to use their yards.

Sincerely,

George Hague

After 20 years and $150 million, will Mid-County Parkway ever be built in Riverside County?

By JEFF HORSEMAN | jhorseman@scng.com | The Press-Enterprise

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

PUBLISHED: April 25, 2022 at 6:04 p.m. | UPDATED: April 25, 2022 at 6:15 p.m.

It's taken almost 20 years and more than $150 million to build a parkway between Perris and San Jacinto.

Despite that, most of the Mid-County Parkway remains on the drawing board — unhelpful to drivers whose limited east-west options include an expressway notorious for fatal crashes.
It's unclear when the 16-mile parkway will ever be finished. Officials with the city of Perris and the Riverside County Transportation Commission are trying to resolve the city's concerns about the project's impact on the city, a situation that frustrates commissioners who thought the parkway was a done deal.

"This is pretty much the big punch in the eyeball when you come back at this stage, $150 million into it and decide now is the time to raise a bunch of issues," Jurupa Valley City Council Member Brian Berkson, a commission member, said at a March 28 meeting.

Perris officials contend the current version of the parkway isn't what the city agreed to, and the city wasn't told of the changes until work started on the first phase, an interchange being built at the 215 Freeway and Placentia Avenue in Perris.

"The concerns related to traffic, air quality, and noise impacts on nearby residential areas, city streets, a fire station, and a local park, remain of great concern for us," Perris City Manager Clara Miramontes wrote in an April 18 letter to the commission, the county's main transportation-planning body. Earlier, Perris raised concerns about the parkway cutting off access to a nearby high school.
On Monday, April 25, a subcommittee of the 34-member transportation commission, which has elected leaders from every city in Riverside County, agreed to delay work on the parkway's Perris segment "until such time that the project is financially and technically feasible," a commission report states. It's not clear when that might be.

Money and staff time for the parkway would be shifted toward another segment of the project as well as work to improve safety on the Ramona Expressway, one of the east-west linkages between the San Jacinto Valley and the county's western half and the subject of heightened traffic enforcement after a series of deadly crashes, including at least four in the past three months.
The subcommittee's vote must be approved by the full commission. That might happen in May.

Home to 2.4 million people, Riverside County is the 10th most populated county in the United States and one of California's fastest growing counties.
Infrastructure has struggled to keep pace with that rapid growth, leading to gridlock as residents lured by the county's cheaper housing commute to jobs beyond the county line.

A longtime challenge has been adding another link between the San Jacinto Valley and the county's western half. Right now, drivers' main options between Hemet/San Jacinto and the 215 are Highway 74 and the Ramona Expressway.

The parkway concept sprang from a regional planning effort in the late 1990s that developed a long-term blueprint for growth in the county's unincorporated areas, including a network of reserves to protect endangered species and a

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

vision for new and expanded transportation arteries. At first, the parkway would have one or two lanes in each direction but eventually would have three lanes each way, a commission fact sheet states.

Originally, the parkway would have stretched from the 15 Freeway in Corona to Highway 79 in San Jacinto. But facing rising costs and concerns about building in Lake Mathews and Gavilan Hills, the transportation commission in 2009 cut the parkway from 32 to 16 miles. That meant it would run between the 215 and the 79 and the portion between the 15 and 215 would be scrapped.

The parkway project also required an extensive environment impact report and settled two lawsuits challenging the project on environmental grounds. In all, more than $150 million has been spent so far on the parkway, which includes the cost of getting permits and buying land to offset environmental impacts.

In all, it could cost $1.1 billion to finish the project. The Placentia interchange, which is 70% complete, will cost $42 million.
The commission was set to move forward with the parkway when it received a Feb. 28 letter from Perris.
In it, Perris officials expressed concern the parkway would send traffic through residential streets to connect with the 215. Officials also worried the parkway would sever access to Orange Vista High School, which opened in 2016 after the parkway's environment study wrapped up.
Commission staff agreed to build a bridge undercrossing so students could get to Orange Vista, preserve a local trail and guide trucks to Perris' preferred truck routes, commission Executive Director Anne Mayer said at the March 28 meeting of the commission's subcommittee dealing with road projects in western Riverside County.
But in a March 23 letter to the commission, Perris officials said they would support the parkway — only if trucks weren't allowed on it.

Next

1 of 3

Riverside County Transportation Commission Executive Director Anne Mayer, seen in 2016, told commissioners that "it would be very difficult" to build the Mid-County Parkway without the city of Perris' support. (File photo by Kurt Miller, The Press-Enterprise/SCNG)

"That is certainly not something that is within the purview of (the commission)," Mayer said.

At the March subcommittee meeting, officials recommended stopping all work on the parkway, except for the Placentia interchange, and shifting parkway funding to other projects.

"At this point, I don't see a path forward given the city of Perris' requirements and issues related to truck traffic," Mayer said. "So it is a difficult recommendation and not one that we make lightly. But we do not believe that we should continue to expend funds on the project if there's not going to be support within the community for it."

Commissioners urged the staff to continue talking with Perris to find a solution.

"To not build what we've spent this amount of money on is crazy," commissioner and Eastvale Mayor Clint Lorimore said. "It is unconscionable to walk away from the investment of $150 million in taxpayer money."

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

In letters sent to the commission since March, Perris — as a condition of supporting the parkway — wants either a series of improvements to Placentia Avenue or upgrades around Redlands, Morgan and Indian avenues.

Commission staff said it could cost $25 million to $40 million to make the improvements Perris wants. Twelve homes would have to be bought from willing sellers — they likely couldn't be acquired through eminent domain — and Perris' option for diverting truck traffic could require more environmental studies, officials wrote in a report to commissioners.

As a result, the commission should focus on other "(parkway) construction packages along the 16-mile corridor to determine if a less complex, less controversial, and less expensive option is feasible," the commission report read, noting the Ramona Expressway's safety problems.

In order for the project to keep its environmental approvals, work must start on a new portion of the parkway every five years, Mayer said Monday.

Berkson, the Jurupa Valley council member, asked last month if the parkway could be built without Perris' permission. Mayer said that the commission could move forward with the parkway because of the project's environmental report, but the commission eventually would need Perris permits to connect to city streets.

"With this level of opposition, it would be very difficult to proceed without the city of Perris' support," she said.

Miramontes and Perris Mayor Michael Vargas, who sits on the commission, said Perris supports the parkway and that measures the city is seeking, such as walls, traffic barriers and landscape signals, are typical for such projects.

"The bottom line is that this project has changed. It's not the original," Vargas said in a telephone interview Friday, adding the city continues to work with the commission.

Last month, Vargas told fellow commissioners: "Times have changed. The high school's now in place. We were able to mitigate that issue. We're basically just stumped with the trucks."

When the parkway was first designed, no one anticipated the Inland Empire would have the truck traffic it has today, Vargas said Monday. He also has noted the project started when most of the current Perris City Council was not in office.

Commissioner and Riverside County Supervisor Karen Spiegel on Monday said she was "very disappointed and frustrated that after 20 years ... this project was moving forward and there was never a comment made until recently."

"You can't because of city council changes and new people .... take a regional project and change the whole direction of it," Spiegel said, adding that without the parkway, the Placentia interchange, which was meant to benefit the region, instead will mainly benefit Perris.

If the parkway is scrapped, Berkson and Spiegel last month raised the prospect of whether Perris could be forced to reimburse the commission for money spent on the project. Mayer replied the commission "doesn't have any mechanisms" to force reimbursement.

The possibility of the parkway not being built "comes as a real shock," Hemet City Council Member Linda Krupa said in March.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

"Moving forward, we do need increased access and safer access (for) traffic into the San Jacinto Valley," she said. " ... And we're growing. And we are growing. And we are growing. And everything that's happening in Winchester, in Hemet, in Menifee, in San Jacinto, all brings more traffic onto two-lane roads."

Staff Writer David Downey contributed to this report.

Good morning Council member,

IF YOU BOUGHT A HOME A FEW YEARS AGO FOR YOUR GROWING FAMILY KNOWING THE GENERAL PLAN SHOWS THE LAND VERY NEARBY IS ZONED FOR HOMES, WOULD YOU SUPPORT A 1.3 MILLION SQ FT WAREHOUSE LIKE THE MORENO VALLEY TRADE CENTER WITH ALL ITS DIESEL TRUCKS IN PLACE OF THOSE HOMES YOU EXPECTED TO BE BUILT?

HOW WOULD YOU FEEL ABOUT THOSE WHO WOULD WANT YOUR GROWING FAMILY TO ACCEPT THE MASSIVE WAREHOUSE AND ENCOURAGE DECISION MAKERS TO VOTE FOR IT AND ALL ITS HEALTH-IMPACTING DIESEL POLLUTION?

PLEASE VOTE TO DENY THE MORENO VALLEY TRADE CENTER JUST AS IF YOUR FAMILY WOULD LIVE ACROSS FROM IT BECAUSE THE CHILDREN OF REAL FAMILIES WILL IF IT IS APPROVED!!!

Sincerely,

George Hague

Council member;
I urge you to support the Moreno Valley Trade Center when it comes before you for a vote. This project will bring a new desperately needed sports park to the City of Moreno Valley.
We need more parks with soccer and baseball fields to accommodate our youth and teach them the critical skills of teamwork and respect.

Please vote yes on the Moreno Valley Trade Center so Ironwood Sports Park can become a reality.
Thank vou very much.

Moreno Valley City Council
Attn: Mayor Yxstian Gutierrez

Subject: Please support the Moreno Valley Trade Center

Mayor Yxstian Gutierrez,

I urge you to support the Moreno Valley Trade Center when it comes before you for a vote. This project will create over 1,500 local jobs, as well as $4 million in road improvements and over $6 million annually in revenue to support critical City services.

Moreover, the developer has gone above and beyond in community outreach to neighbors and has modified the project to address community concerns.

The addition of a landscaped berm will not only block neighbors from any noise or views of the project, but it will also block existing views of other industrial facilities. The project will also create a sports park, including a baseball field and 2 full-size soccer fields.

As your constituent, I respectfully request you support the Moreno Valley Trade Center to bring jobs and a desperately needed new park to our community.

Thank you very much.

Michael S. Dea
Business Manager
Secretary-Treasurer

Good afternoon,

I'm writing today to voice my full support for the Moreno Valley trades center project. It is come to my attention that this project will fund repairs to our much damaged roadways and also build a soccer and baseball park. I live close to the project so my children will definitely be playing at that park, and I'm a trades person so there's a good chance I could work in the city I pay taxes in. I urge you to support this project it will benefit me and through me it will benefit Moreno Valley!

Thank you

J

i am in full support of this project because we don't really have parks in our city. it would be great for the community. having soccer fields, baseball fields, basket ball courts and just a place to get away from the city would be awesome. we also need road repair the streets are really bad they have pot holes and cracks and even weeds coming out of them. this project would also bring hundreds of jobs to our community who work here.

Dear Council Members,

I strongly support the above Project and ask you to vote YES on June 21st , 2022. We need the additional Jobs and City Revenues so you don't have to raise our TAXES !! The Developer has more than addressed the adjacent neighborhood to the South's concerns and is spending more money on Community Benefits to the entire City than the WLC did (World Logistics Center) and it is 40 times larger than this project.

Moreno Valley City Council
Attn: Councilmember Elena Baca Santa Cruz:

Subject: Please support the Moreno Valley Trade Center

Councilmember Elena Baca Santa Cruz,

I urge you to support the Moreno Valley Trade Center when it comes before you for a vote. This project will create over 1,500 local jobs, as well as $4 million in road improvements and over $6 million annually in revenue to support critical City services.

Moreover, the developer has gone above and beyond in community outreach to neighbors and has modified the project to address community concerns.

The addition of a landscaped berm will not only block neighbors from any noise or views of the project, but it will also block existing views of other industrial facilities. The project will also create a sports park, including a baseball field and 2 full-size soccer fields.

As your constituent, I respectfully request you support the Moreno Valley Trade Center to bring jobs and a desperately needed new park to our community.

Thank you very much,

Michael S. Dea
Business Manager
Secretary-Treasurer

Moreno Valley City Council
Attn: Councilmember Ulises Cabrera

Subject: Please support the Moreno Valley Trade Center

Councilmember Ulises Cabrera,

I urge you to support the Moreno Valley Trade Center when it comes before you for a vote. This project will create over 1,500 local jobs, as well as $4 million in road improvements and over $6 million annually in revenue to support critical City services.

Moreover, the developer has gone above and beyond in community outreach to neighbors and has modified the project to address community concerns.

The addition of a landscaped berm will not only block neighbors from any noise or views of the project, but it will also block existing views of other industrial facilities. The project will also create a sports park, including a baseball field and 2 full-size soccer fields.

As your constituent, I respectfully request you support the Moreno Valley Trade Center to bring jobs and a desperately needed new park to our community.

Thank you very much!

Michael S. Dea
Business Manager

Date:	Friday, June 17, 2022 9:22:12 PM

Warning: External Email – Watch for Email Red Flags!

Dear Members,

As a home owner and owner of additional property in Moreno Valley, I strongly support the above Project and ask you to vote YES on June 21st, 2022. It will bring much needed jobs and revenues to our city.

The Developer has more than addressed the adjacent neighborhood to the South's concerns and is spending more money on Community Benefits to the entire City than the WLC did (World Logistics Center) and it is 40 times larger than this project.

Thank you.

-Jason Lo

Hello City Council,
My name is Jason Lowe and I have been a Math Teacher and Head Wrestling Coach at Canyon Springs School for the last 19 years. I am emailing you to let you know I am in support of the 1,300,000 sq ft Moreno Valley Trade Center. I support this massive project because it will bring so many new jobs, allow our current Moreno Valley residents to work close to home, bring in tax revenue for much needed road improvements, police and fire departments, schools and parks, and future community projects.
Thank you so much for your time and consideration.

Jason Lowe

Subject: Moreno Valley Trade Center Appeal

Dear Councilman Cabrera,

Once again you will be taking up the MVTC warehouse appeal of the Planning Commission's denial. You expressed major concerns with the project that could not be rectified and I hope that position has not changed. You will likely hear a lot of reasons why the appeal should not be approved and thus make the decision to deny as the community expects. There are so many potential warehouses to build just east of this project site and elsewhere in the city, that employment for construction workers and warehouse workers should be set for a very long time.

I am unable to attend the meeting Tuesday evening and have attached a letter expressing only a few the many concerns that arise from this project. Please give what write serious consideration and vote **NO on the appeal of the Moreno Valley Trade Center.**

Sincerely,

Tom Thornsley

To: District 4 Councilman -Ulises Cabrera (Via email: ulisesc@moval.org)

Subject: Reject Moreno Valley Trade Center Appeal

Dear Councilman Cabrera,

You are once again about to consider the Moreno Valley Trade Center's project denial appeal, that was destine for denial by you and two other council members that would have upheld the Planning Commission's denial and the communities interest. It was conferred by three council members as a good proposal in the wrong location. Despite the changes made this warehouse is still in the wrong location and if approved will start a domino effect for other undesirable development in the area. If you approve the appeal you will then be considering the Truck Stop denial which combined will drastically impact the Redlands/Eucalyptus/SR-60 intersections beyond any acceptable level in the community. I will leave the complete listing the litany of concerns to all the others speaking/writing against this project – most of which you heard at the first hearing.

Late last year, at the conclusion of the public hearing for the Campus Danbe warehouse, on Alessandro, you implied that you would be approving the project with the belief the Sierra Club would sue the developer and thus make it a better project. This philosophy is wrong on so many levels and really quite embarrassing to be heard from a council member. It indicates that you believe the project could be better but you are not willing to put forth those improvements yourself. Nor is it a good reflection on the city staff that seemed to fail at bringing forth a worthy project with all impacts addressed to the fullest. Additionally, the comment and staff's shortcomings do not make us look business friendly. Think about it; shove a project through with flaws, approve it, and let outside forces sue for a better project at greater expense to the developer. Ouch!

Let us not forget the Moreno Valley Business Park approval in 2020 that proposed a warehouse on the southeast corner of Ironwood and Nasson. It had a flawed Initial Study that failed to address the actual project. It is so bad that staff should have been reprimanded, and so bad that the developer knows they cannot correct the errors without the need to prepare an EIR. Thus they have requested to have their project rescinded and to date staff has not brought forth this request to the council.

So let us consider the Moreno Valley Trade Center. Several months ago three of the four council members deemed this project inappropriate for multiple reasons. The best concluding comment was "it's a good project but in the wrong location." Now that it has returned with modifications, that staff should have required, it is still a warehouse taking away residential land in a city that fails to meet its

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

housing needs and has more than enough warehousing opportunities immediately to the east and on the southwestern edge of town. Do we need more warehouses? **NO!**

The land upon which it is proposed is intended for residential use as is the land immediately west of it and to the southwest. Good planning policy has always advocated keeping industrial uses away from residential. However, city leaders and planning staff have failed to maintain this policy for the protection of the existing and potential residential areas. Nor have they embraced their General Plan's objectives. Environment impacts from industrial uses, such as warehousing, impose significant harm to residential areas. In many instances you will be lead to believe that air, noise, traffic, and lighting impacts are minimal. Playing up impacts as minimal detracts from the ultimate reality of putting a warehouse adjacent to existing homes. The complexities of these impacts will way heavy on adjacent residents and degrade their standard of living. This also devalues their homes and will hinder development of adjacent and nearby vacant residential land, further limiting the City's required housing count.

I expect/hope you are aware of the draft Municipal Services Review finding from LAFCO about Moreno Valley's make up. They point out that we are now over saturated with warehousing, we are failing to meet our housing needs, and we are classified as a disadvantage community. In their perspective, and that of many others, we need to go in a new direction. Developers prey on disadvantaged communities because they are hungry for any kind of development and they don't care about the members of the community they are impacting. This is why it should be easy to say **NO** to the Moreno Valley Trade Center and look to more promising development and growth for Moreno Valley.

So what should be done? Compliance with the City's General Plan should be maintained, not only here but throughout the Moreno Valley. At this time the city has reached its saturation point for mega-warehouses and should be looking to establish higher goals for residential development and employment diversity and opportunities. Just east of this project site is an approved specific plan that will develop the equivalent of 40 one-million square foot mega-warehouses. This alone should be enough for us to just say **NO** to any other mega-warehouses, including **NO to the Moreno Valley Trade Center**.

Sincerely,

Tom Thornsley

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Moreno Valley Warehouse Approvals 2009-2021

Since 2009, Moreno Valley has approved, or is reviewing, at least the following industrial warehouse projects that serve as “distribution” or “logistics” centers for consumer goods, and as such, they are part of the “goods movement” network totaling 53,070,835 square feet:

- March Business Center (2009) – General Plan Amendment to allow 1,484,407 square
- feet of industrial warehouse space on 66.9-acres.
- Master Plot Plan PA07-0035 (2010) - 409,598 square foot industrial warehouse
- West Ridge Commerce Center (2011) - 937,260 square foot warehouse distribution
- building
- VIP Moreno Valley Project (2012) - 1,616,133 square foot warehouse space
- First Inland Logistics Center II Project (2013) - 400,130 square feet warehouse space
- First Nandina Logistics Center Project (2014) - 1,450,000 square feet warehouse space
- Prologis Eucalyptus Industrial Park Project (2015) - 2,244,419 square feet of warehouse uses including a General Plan Amendment from residential to Light Industrial
- World Logistics Center (2015) - 40.6 million square feet of warehouse logistics development on 3,918 acres in eastern Moreno Valley
- Indian Street Commerce Center Project (2016) - 446,350 square feet of warehouse space
- Moreno Valley Logistics Center (2016) - 1,736,180 total square feet of warehouse space
- Brodiaea Commerce Center (2017) - 262,398 square foot warehouse including a rezone from Business Park-Mixed Use to “Light Industrial”
- Moreno Valley Business Park (2021) - 220,390 square feet of warehouse logistics development including a General Plan Amendment to from commercial to light industrial
- Heacock Commerce Center (2021) – application for a General Plan Amendment and Change of Zone for two high cube industrial buildings totaling 873,967 square feet
- Compass Danbe Center Point (2021) – application for a General Plan Amendment to allow for the development of two light industrial buildings of 389,603 square feet

Subject: Reject Moreno Valley Trade Center Appeal

Dear Councilman Delgado,

You are once again about to consider the Moreno Valley Trade Center, a project you stated was a good proposal in the wrong location. Despite the changes made this warehouse is still in the wrong location and if approved will start a domino effect for other undesirable development in the area. I will leave listing the litany of concerns to all the others speaking against this project – most of which you heard at the first hearing.

One must question the purpose of a land owner who contributes campaign funds to council members outside of their council district. What do they want? One must question the purpose of a developer offering to pay for city improvements beyond the scope of these necessarily required for their projects approval. Why would they? Both of these appear as requests to curry favor for the land owner and the developer. Any offer to improve city roadways or build ballfields by an outside developer looking for project approval is nothing more than an incentive (some consider a bribe) to get approval of their project. Making this same offer well after development has occurred and their business is established would be a philanthropic investment in their community. Think about the precedence this sets for others seeking project approval.

You have cited your mother's livelihood as a warehouse employment on a few occasions to justify considering and approving land use changes to permit development of more warehouses. One has to wonder if even you mom would approve of only providing one narrow range of employment opportunities over an entire city. In the past decade, the city has processed land use changes to permit in excess of 53,000,000 square feet of large warehousing opportunities. During this time the city has done away with available land for housing, commercial, and business park opportunities. Now it seems little value is being placed on the city's newly adopted general plan which intended to establish a stable, balance of growth for the foreseeable future.

Several months ago you seemed sound in your point of view that this warehouse was a good project but in the wrong location. Even though the developer has made some changes to the project, it is still a massive warehouse next to residential, and still in the wrong place. The land upon which it is proposed is intended for residential use as is the land immediately west of it and to the southwest. Good planning policy has always advocated keeping industrial uses away from residential. However, city leaders and

Dear Council Members,

I want to voice my support for the MVTC Moreno Valley Trade Center Project on June 21st 2022. I am asking you to vote YES to help us improve our city. This project is such a benefit to Moreno Valley and it's citizens. It will allow for the creation of increased jobs and reduced taxes. Enacting this project will also help keep from our taxes being increased. I believe that the developers have addressed all of the necessary concerns for the community. As a resident of Moreno Valley and a voter in this city I feel it is imperative we support this project.

Thank you,
Brooke

Dear council member

As a 25 year voting resident of Moreno Valley I strongly support the above project to vote yes. The project will help our community in many ways without hindering us financially. The revenue will improve Moreno Valley such as a much need park and road ways located near the project.
This project will help with revenue for the support of our police, fire, schools, and other city employees.
I strongly support this and see only positive outcome from this project
Sincerely
Michelle Hall

Dear council members

As being a voting resident of Moreno Valley my whole life, whom supports and loves this community, I feel strongly about the Moreno Valley trade center project getting approved and the benefits it will add to our amazing community. This project will not only provide many jobs for the hard working people of Moreno Valley, but it will also bring new residents and business to our community that will only help us further flourish. I have adored and loved this city since I was born and as a voting resident I strongly feel the need for this project to occur for the benefit and growth of our community. We are in need of the revenue this project will provide in order to insure that our taxes don't increase. This project will provide necessary proceeds in order to better our police, fire department, parks, after school programs, and recreational centers for our entire community as a whole. These are the ideals that make Moreno Valley the incredible community that it is. Let's allow that to flourish and grow.

Sincerely,

Dakota Madison

For someone who professes to love Moreno Valley, I don't know how you still have a job! WHAT are you trying to do?

You need to come out here and checkout this round about when there's traffic… especially with the landscape that grows taller everyday! In my car I can barely see over the tops of it… and half the vehicles just barrel through without yielding It ought to be a nightmare when we have a ton of diesel trucks utilizing it….

I really believe all of you are either clueless OR you really just don't care WHAT you approve as long as you get perks and recognition to feed your egos….

You are increasing pollution exponentially… you're building this crap right next to a housing tract… do you guys have ANY common sense?! ♀

I hope there is enough opposition that you can possibly reconsider this project.

Sincerely
Sharon Stokes
34-year east end resident

Honorable Mayor and Councilmembers;

Please include these comments as part of the record for the above-mentioned public hearing. I am a resident of the Heritage Ranch community, the southern border of this proposed project. **We again ask you to uphold the Planning Commission's denial of entitlements for this project** for the same reasons that were voiced on December 7, 2021 during the applicant's appeal of their decision. While it is true that the developer has reached out to me with some proposed changes that will eliminate the traffic exiting onto Encelia Ave., **the environmental impact has not changed**. There will still be the **same amount of pollution to our neighborhood** as described in the FEIR, the **same truck and employee traffic congestion at the round-about of Redlands and Eucalyptus**, and the **same property devaluation** to our homes if this project is approved.

I believe that the people in the affected community should have the most credibility because we also represent the children to be affected by the decisions of people and interests that do not hold or care about the well-being of our community. There are always paid workers that claim to live amongst us or live in Moreno Valley at large to lobby for destructive and irreversible policy prescriptions for our neighborhood in the name of revenue and personal gain or greed. It is frustrating to listen to and deal with knowing those very people who are for projects in our community do not live here. If the same questionable projects were dropped in their community they would not approve. It is shocking to us that some of the things that people believe are "Good for Moreno Valley". Really? Good for who? These outside interests wanting and praising this project as a net positive for the Moreno Valley do not live in this community. This is not a good project... If you approved this project then you will want to approve the Pilot Truck stop next... I would like to not assume that you care more about city revenue than the health and well-being of the people in your community.

Mr. Marquez, Cabrera, and Delgado, you were ready to vote no on December 7th after listening to us. We ask that you again vote no on June 21st. Again, please revisit the location of the project and **visualize the magnitude of a 1.3 million sq. ft. building** and what it will do to our neighborhood.

Subject: PE Article on the Moreno Valley Trade Center .... "Moreno Valley warehouse — larger than city's mall "
Date: Monday, June 20, 2022 1:34:26 PM

Warning: External Email – Watch for Email Red Flags!

https://www.pe.com/2022/06/19/moreno-valley-warehouse-larger-than-citys-mall-is-back-for-consideration/

Same as the Press-Enterprise (PE) article found below with all pictures.

Good afternoon city council members,

The developer of the 1.26 million sq ft Moreno Valley Trade Center (MVTC) has done very little since December to reduce its pollution impacting the health of nearby residents — especially on children and the elderly. **Even their 18 acre sports park is adjacent to Redlands Blvd which north of SR-60 is a city designated diesel truck route for the MVTC and other warehouses which will again impact the health of children trying to use the park.**

BOTH THE MVTC AND SPORTS PARK ARE IN THE WRONG LOCATION BECAUSE OF DIESEL POLLUTION AND HOW THEY WILL BOTH RESULT IN HEALTH IMPACTS TO CHILDREN AND OTHERS.

PLEASE DENY THEIR APPEAL FROM THE PLANNING COMMISSION'S UNANIMOUS NO VOTE OF THIS WAREHOUSE

Sincerely,

George Hague

P.S. Please read the Press-Enterprise (PE) article found below .

Moreno Valley warehouse — larger than city's mall — is back for consideration

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Silvia Flores, seen Friday, June 17, 2022, with children, Jillian Flores,13, at right, and Slater Flores, 11, opposes a 1.26-million-square-foot warehouse in her neighborhood. They are standing in the middle of Mozart Way, with Encelia Avenue behind them, where the proposed warehouse could rise. (Photo by Terry Pierson, The Press-Enterprise/SCNG)

By **DAVID DOWNEY** | ddowney@scng.com | The Press-Enterprise
PUBLISHED: June 19, 2022 at 7:00 a.m. | UPDATED: June 19, 2022 at 7:01 a.m.

A plan to build a warehouse larger than the Moreno Valley Mall across the street from houses on half-acre lots is returning to the Moreno Valley City Council.

The council is set to decide Tuesday, June 21, whether to greenlight a 1.26-million-square-foot logistics project called the Moreno Valley Trade Center, on 80 acres south of the 60 Freeway.

The developer, Dallas-based Hillwood Investment Properties, has said the warehouse would stand 48 feet tall. The project's final environmental impact reportstates that the building could reach 100 feet if occupied by a fulfillment center filling the orders of online shoppers.

Silvia Flores, seen Friday, June 17, 2022, w

In advance of Tuesday's meeting, letters from people on both sides of the issue have poured in to the city.

Walter Fus, saying he has been a Moreno Valley resident since 1977 and is a retired Air Force pilot, wrote Saturday, June 11, that approving the project "would be the most egregious decision this council could ever make."

Cristina Rivera, in a Wednesday, June 15, email, urged approval in praising an amenity the developer promised, if allowed to build. The project "will bring a new desperately needed sports park to the City of Moreno Valley," Rivera wrote.

Union carpenters submitted letters of support, saying the project would create construction jobs.

A decision was postponed

In October, the Moreno Valley Planning Commission rejected the project on a 4-0 vote, with one commissioner not participating due to a potential conflict of interest, concluding the center was incompatible with a neighborhood to the south. Hillwood Investment Properties appealed the decision to the council, which discussed the project in December but postponed a decision.

Now the project is back.

City planners are recommending the council approve it, by certifying the environmental impact report, approving a general plan amendment, changing the zone and making a determination that the project won't "result in a net loss in residential capacity."

In changing the property designation, the city would eliminate the potential for 145 single-family houses to be built, according to an environmental report.

Project proponents are seeking approval at a time when some Inland Empire communities are pushing back against warehouses.

For example, the Redlands City Council recently enacted a moratorium on industrial projects on the city's west side. Earlier, Jurupa Valley limited warehouses to its Mira Loma and Agua Mansa areas, and adopted rules for other types of businesses that generate heavy truck traffic. And Pomona is considering a 45-day moratorium on new warehouses.

At the same time, online shopping is soaring and continues to drive a regional explosion in the logistics industry.

The Moreno Valley Trade Center arrived on the dais of the Planning Commission in fall, a few months after the city completed an overhaul of its general plan, a guide for future growth.

That document designated the 80-acre project site, west of Redlands Boulevard between Eucalyptus and Encelia avenues and mostly empty except for an 8.5-acre plant nursery, as a place for houses on half-acre lots.

Attachment: City Council - Public Comments Packet 1 of 3 [Revision 3] (6209 : Moreno Valley Trade Center/Park)

Hillwood is seeking permission to deviate from that new growth guide. In part because of that, Planning Commission member Jeff Sims called on the council to kill the project in a Saturday, June 11, letter.

“Why have an approved General Plan and not honor it?” Sims wrote.

Two other projects in pipeline

There are two other warehouse projects in the early stages.

One is called Edgemont Commerce Center, a proposed 142,345-square-foot warehouse distribution building on approximately 7 acres southwest of Bay Avenue and Day Street.

The other is Heacock Commerce Center, a pair of industrial buildings totaling 874,000 square feet on 46 acres southeast of Gentian Avenue and Heacock Street.

City spokesperson Matthew Bramlett said in email Thursday that environmental reports are being prepared for both projects and it’s not known when they will be completed.

Like Moreno Valley Trade Center, the Heacock project can’t be built unless the city lets the developer deviate from the general plan. Warehouses are allowed at the Edgemont site, though a zone change is required to build one bigger than 50,000 square feet.

George Hague, conservation chair for the Moreno Valley Group of the Sierra Club, said those projects are also in the wrong place because they are near homes and schools.

The California Air Resources Board submitted letters to the city warning that each project has the potential to “expose nearby communities to elevated levels of air pollution.”

In separate letters, Robert Krieger, chief of the California Air Resources Board’s Risk Reduction Branch, wrote that both projects are “in census tracts that score within the top 1 percent of State’s most impacted from air pollution from an environmental hazard and socioeconomic standpoint.”

Truck traffic, air pollution concerns

As for the Moreno Valley Trade Center, since the December hearing Hillwood has made changes.

The warehouse footprint has been reduced by 65,582 square feet to approximately 1,263,271 square feet, a city report states. A 35-foot-tall earthen berm, landscaped with trees and shrubs is to be built along Encelia Avenue. Truck access is to be limited to Eucalyptus Avenue. The number of loading docks is to be reduced by four, to 117, on the south side of the building, and by seven, to 97, on the north side.

Also, Hillwood has offered to build an 18-acre park at Redlands Boulevard and Ironwood Avenue that features two lighted soccer fields, a lighted baseball field, a playground, concession stand and exercise equipment.

Manuel and Arminda Del Alto, who live near Encelia Avenue, said improvements such as the berm don’t alleviate concerns. They moved to Moreno Valley 14 years ago from Ontario because they wanted to escape the warehouses going up there.

“My main concern is what the trucks and cars will put in the air,” said Manuel Del Alto, who has had a lung transplant.

Arminda Del Alto said they enjoy hearing birds and coyotes in the distance, and worry they will disappear.

Silvia Flores, who lives nearby with her husband, Joe, and two children ages 13 and 11, said she worries about pollution and traffic.

“It’s going to be terrible to have all these trucks,” Flores said.

The environmental report states that the logistics center would generate about 2,320 vehicle trips per day, including 1,436 by passenger vehicles and 885 by trucks. Under the fulfillment center scenario, the total would be 6,607 daily vehicle trips, including 5,750 passenger vehicles and 857 trucks.

Hillwood made several proposals earlier to soften the project’s impact on the neighborhood, including setting aside:

- $125,000 to establish an account to purchase of at least five electric-powered heavy trucks that drive the 60 Freeway corridor through Moreno Valley
- $64,000 to create an account for defraying up to 90% of neighbors’ costs of purchasing and installing noise-insulation equipment, with a per-home limit of $8,000. Eleven homes on Galino Court, Essen Lane, Gershwin Way, Mozart Way, Strauss Lane and Shubert Street would be eligible for the payments.
- $40,000 to establish an account to pay up to 90% of a homeowner’s cost of purchasing and installing air filtration systems, with a per-home limit of $5,000. The same 11 households would be eligible for such payments.

Despite the offers, Sims, the planning commissioner, said, “you can’t negate the smog, the traffic and the noise.”

The warehouse building also would eclipse neighbors’ views, he said.

On most days, they can see foothills.

“On a clear day you can see the mountains looking up toward the Big Bear area,” Sims said. If the project goes in, he said, “all we will be able to see is a big wall looking to the north.”

IF YOU GO

What: The Moreno Valley City Council will meet and consider a 1.26-million-square-foot logistics project called the Moreno Valley Trade Center.

When: 6 p.m. Tuesday, June 21

Where: City Hall Council Chamber, 14177 Frederick St., Moreno Valley

Staff writer Monserrat Solis contributed to this report.

Hello,

Now that the agenda packet has been posted, looking at the modified site plan is possible. Sorry for additional comments at this late time.

Hillwood now proposes a large landscaped berm 35' high relative to Encelia Avenue about 167' wide for about 2,000 feet along the length of Encelia (almost a half mile). On the project side of the berm there is a 40' wide private driveway that is 15 to 25 feet below the top of the berm. Apparently this allows the truck traffic to circulate from east to west and vice versa to move between the north and south loading docks and access points to Eucalyptus.

The 14 foot screen wall is between the private driveway and south facing loading dock area.

This raises some concerns if the project is approved:

1. No perimeter security fencing is proposed along Encelia Avenue. I confirmed this via call with Sean Kelleher, Manny Mancha, and Michael Lloyd this morning. This means the entire area between Encelia to the 14' wall is open.....basically there will be an open space and a private road parallel the length of Encelia. Given this is going to be an unfenced, shaded, landscaped area of around 7.5 acres, this area may become a prime location for people to hang out and set up camp. Further with Encelia being a wide and relatively low traffic street, it may also become a spot for motorhomes and cars to park for an extended period while using the unfenced landscaped area. If the Pilot Travel Center is also approved on appeal, the potential for this increases. The unsheltered like being able to locate where there is some privacy and opportunity for easy property theft, panhandling, and getting places.

2. With the private drive running parallel to Encelia for close to a half mile there will be ongoing truck traffic at all times of the day and night grinding through their gears driving around on the project property. This road is only 250 feet from the existing homes on the south side of Encelia. The 14' wall does nothing for this traffic and noise. The private drive ranges from 15 to 25 feet below the top of the berm. Truck exhausts are at around 12 feet. Instead of all the noise, air pollution from trucks being on Encelia, they will be masked a bit from site due to the berm, but the berm will do nothing to prevent the ongoing noise and diesel soot coming into the neighborhood.

I have attached the overall site plan and the cross sections from the agenda package.

This project is not compatible with the existing neighborhood and should be built in the WLC. I highly doubt you would vote to put this on top of your house regardless of the "benefits" Hillwood offers.

I would also like to add that the community at large finds the appeasement or "Bribe" of a park or youth facility at this point more evidence that they know this project is out of place. It gives this whole project another black eye... Instead of truly coming up with solutions... Let's give them a park on the other side of the freeway that the current community cannot easily access as a way to bypass the people... SMH it is disappointing...

Warning: External Email – Watch for Email Red Flags!

Honorable Mayor and Councilmembers;

Please include these comments as part of the record for the above-mentioned public hearing. I am a resident of the Heritage Ranch community, the southern border of this proposed project. **We again ask you to uphold the Planning Commission's denial of entitlements for this project** for the same reasons that were voiced on December 7, 2021 during the applicant's appeal of their decision. While it is true that the developer has reached out to me with some proposed changes that will eliminate the traffic exiting onto Encelia Ave., **the environmental impact has not changed**. There will still be the **same amount of pollution to our neighborhood** as described in the FEIR, the **same truck and employee traffic congestion at the round-about of Redlands and Eucalyptus**, and the **same property devaluation** to our homes if this project is approved.

I believe that the people in the affected community should have the most credibility because we also represent the children to be affected by the decisions of people and interests that do not hold or care about the well-being of our community. There are always paid workers that claim to live amongst us or live in Moreno Valley at large to lobby for destructive and irreversible policy prescriptions for our neighborhood in the name of revenue and personal gain or greed. It is frustrating to listen to and deal with knowing those very people who are for projects in our community do not live here. If the same questionable projects were dropped in their community they would not approve. It is shocking to us that some of the things that people believe are "Good for Moreno Valley". Really? Good for who? These outside interests wanting and praising this project as a net positive for the Moreno Valley do not live in this community. This is not a good project... If you approved this project then you will want to approve the Pilot Truck stop next... I would like to not assume that you care more about city revenue than the health and well-being of the people in your community.

Mr. Marquez, Cabrera, and Delgado, you were ready to vote no on December 7th after listening to us. We ask that you again vote no on June 21st. Again, please revisit the location of the project and **visualize the magnitude of a 1.3 million sq. ft. building** and what it will do to our neighborhood.

Thank you,

Darric V. Williams

Subject: Moreno Valley Trade Center comments for the public hearing at the June 21 City Council Meeting
Date: Monday, June 20, 2022 8:07:36 PM

Warning: External Email – Watch for Email Red Flags!

Moreno Valley Trade Center Project concerns:

Since I am unable to attend tomorrow night's meeting I am writing to you with my concerns for this project on the public hearing agenda tonight.

The project at first may sound as if it has been scaled back to reduce impacts from the project but most of the changes are minor and still result in significant impacts as before.

The reduction in the size of the building is minor as the square footage is only reduced by less than 5 % from the previous proposed size.

The number of truck loading docks will only reduced by 4 out of a total of 117 on the south side of the building closest to the homes - that is still 113 loading docks on the south side nearest homes! And another 90 loading docks (instead of 97) on the north side. 203 loading docks total! That is a lot of loading docks and would not be a significant change to the amount of noise and air pollution coming from this activity. And another 228 tractor trailer parking spaces besides the loading docks. That is a lot of trucks in a relatively small area right next to existing homes.

The visual impact is changed but not reduced. Instead of the current scenic vistas, the existing homes houses will have a view of a 35 foot berm right along Encelia Avenue just feet from the homes and way taller than the one story homes there. This berm will block a view of the building more but still remove any vistas they now have. And none of the changes will reduce pollution impacts or impacts to roads.

While this project appears to remove traffic impacts to Encelia Avenue itself, there will still be more trucks in the area that will pollute the air, damage roads, continue to run over curbs at the too small roundabout and impact the too small overpass and ramps at Redlands Blvd with no proposal to improve anytime soon. There will be a high volume of employee cars also added to Redlands Blvd. and at certain times of day is very busy already.

As far as providing construction jobs, the homes that were zoned for the area would also provide construction jobs and there is a very high demand for more housing. The city is also proposing more homes just to the southwest of this trade center and those potential residents have no say in this proposal since it has not been developed yet and would impact them as well especially from noise and air pollution.

This project is also right next to the Prologis Development on Eucalyptus that was made to revise their proposal to keep large buildings away from the homes that are now going to be impacted by this proposal. How is it right to have that developer revise their project to keep it further from the homes and now put a bigger building even closer to those same homes?

This is also another change to the very new general plan that was supposed to be a vision for the city for many years to come. What is the point of all of the work that went into the general plan to turn around and immediately change it? As the planning commission pointed out this is not the right place for this project and there is already a nearby very large area approved in the current general plan for this type of project (WLC).

Melody Lardner
34 year resident of Moreno Valley

I sure hope you aren't in favor of this project? Your priority should be the health and safety of your constituents (families with children and disabled adults), not the $$ interests of the warehouse developers. Move this east of Redlands NOT NEXT TO AN EXISTING Residential neighborhood! The developer offered to pressure wash the pollution off of our houses at the last council meeting! Are you kidding?? That tells you all you need to know about the hazards of this project and the other proposed projects near our neighborhood. If they offered to do this to your house because of the pollution, you would laugh at their face. NO to this project. There is talk of class action lawsuits. Hoping common sense and decency will prevail.

Good evening Ladies and Gentlemen,

I sincerely hope that my neighbors and I can all count on your support to deny this request to change the general planning on zoning of the parcels north of Encella and west of Redlands blvd where the Halls Nursary is located. Allowing this to be changed from residential to BP and industrial is unconscionable. There should be a buffer zone between BP, Industrial and residential zones.

Our residences are within 1/4 mile of this area and it is unhealthy for our families. It will also decrease the value of our homes. There is already too much truck traffic in the area. Sometimes I come home to see transport trucks parked on our residential streets and sometimes even idling. These still happens even with the signs posted at the new Redlands blvd roundabout which we were told was to prevent trucks to move south of eucalyptus.

I sincerely hope you work in our best interest at the next hearing on Nov 15 and not be swayed by developers.

Subject: Moreno Valley Trade Center (MVTC) offsite offers and impacts to current families

Follow Up Flag: Follow up
Flag Status: Flagged

Warning: External Email – Watch for Email Red Flags!

Good morning City Council,

The Moreno Valley Trade Center (MVTC) with all their off sites offers to you are trying to put lipstick on a pig with the hope you will be willing to sacrifice the families who will be forced to live (24/7/365) very near the project which could be built to a height of at least 100 feet (almost 10 stories) — on land currently zoned for homes.

Below my name are some of the harmful polluting impacts that caused the Planning Commission to vote unanimously against the project and which the developer's own documents show they cannot avoid if the project is built.

Sincerely,

George Hague

"5.1 **SIGNIFICANT ENVIRONMENTAL EFFECTS THAT CANNOT BE AVOIDED IF THE PROJECT IS IMPLEMENTED**

The CEQA Guidelines require that an EIR disclose the significant environmental effects of a project which cannot be avoided if the proposed project is implemented (CEQA Guidelines Section 15126(b)). As described in detail in Section 4.0, *Environmental Analysis*, of this EIR, the proposed Project is anticipated to result in impacts to the environment that cannot be reduced to below a level of significance after the consideration of Project design features, compliance with applicable federal, State and local regulations, and the application of the feasible mitigation measures identified in this EIR. **The significant impacts that cannot be mitigated to a level below thresholds of significance consist of the following:**

o **Aesthetics: Implementation of the Project would mostly or completely block views** of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Also, implementation of the Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site. **This would be a significant and unavoidable direct impact.**

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

o **Air Quality (Air Quality Management Plan Conflict):** The Project would emit air pollutants (NOx) that would contribute to a delay in the attainment of federal and State ozone standards in the SCAB. Because the Project requires a General Plan Amendment, it also would exceed the growth projections contained in SCAQMD's *2016 AQMP*. As such, the Project would conflict with and could obstruct implementation of the *AQMP*. Project impacts due to a conflict with the SCAQMD *2016 AQMP* **would be significant and unavoidable** on both a direct and cumulatively-considerable basis.

o **Air Quality (Criteria Pollutant Emissions):** After the application of Project design features, mandatory regulatory requirements, and feasible mitigation measures, Project-related NOx emissions during long-term operation of the Project would remain above the applicable SCAQMD regional thresholds. Accordingly, Project-related emissions would not meet SCAQMD air quality standards and contribute to the non-attainment of ozone standards in the SCAB. Therefore, Project operational-related impacts due to NOx **emissions would be significant and unavoidable** on a direct and cumulatively-considerable basis.

o **Greenhouse Gas Emissions (GHG Emissions Generation):** Project-related GHG emissions would exceed the applicable SCAQMD significance threshold for GHG **emissions and would result in a cumulatively-considerable impact to the environment.**" (page 5-1 in MVTC Final EIR)

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

November 7, 2022

To: Honorable Mayor and City Council Members
City of Moreno Valley

From: Jeff Sims
Area Resident
City of Moreno Valley Planning Commissioner

RE: Moreno Valley Trade Center
Appeal PAA21-0001

On October 28, 2021, the Moreno Valley Trade Center ("MVTC or Project") was considered by your appointed Planning Commission, which I currently am a member, and unanimously denied entitlement approvals. On December 7, 2021, the Developer appealed this decision of the Planning Commission to the City Council. After considerable input by interested stakeholders, Council Members deliberated. Deliberation comments by Council Members Delgado, Cabrera, and Marquez suggested a potential majority may vote to uphold the Planning Commission's decision. Mayor Gutierrez acknowledged this with his statement "it doesn't appear there is support for the project." Instead of calling for the vote, Gutierrez motioned for a continuance, which was seconded and approved. Apparently, the continuance was to give the Developer time to address concerns and objections stated at the Planning Commission, and City Council appeal.

Of note the Developer heard the concerns and objections regarding the project at the October 28, 2021 Planning Commission Hearing where it was unanimously denied but cavalierly five weeks later at the City Council Appeal Hearing addressed none of the concerns. A person could go down many paths on why none of the concerns were addressed. But an obvious reason is Hillwood's motivation is profit driven with little to no concern of the impacts on the City, and especially for the existing residential neighborhood directly adjacent to the proposed MVTC. Hillwood wants the Project entitled to achieve their goal of maximizing profit.

The continued appeal was scheduled for June 21, 2022. The Developer at the last minute pulled the item from the agenda. It is understood the Developer between December 7, 2021, and June 21, 2022, offered some "City Benefits" including a proposed Developer funded park near Ironwood and Redlands Blvd., and a $500,000 cash contribution to the Moreno Valley Community Fund (of which I understand the Council Members control the allocation and disposition of the funds).

Although at the time of writing this letter the Project Conditions and Agenda Packet for the November 15, 2022, meeting was not available it is my understanding after speaking with City Planning staff these "City Benefits" are still on the table, and the plans and conditions for the Project are essentially the same as those proposed in June. The question I ask each of you is – is the offering by the Developer to influence approval of their Project adequate consideration for the actual harm and damage it will

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

impose on your citizens who live in the existing residential neighborhood directly next to this proposed project?

As one of your appointed Planning Commissioners I find the project is a nice logistics/warehouse project, but in the wrong location. Its location simply is not compatible with the existing land uses adjacent to it. Below are some of the concerns I had and still do about the MVTC:

1. Incompatible Land Use - The proposed MVTC land use is not consistent with the City of Moreno Valley General Plan Update. The General Plan Update indicates R-2 zoning for the property where the MVTC is proposed. The General Plan Update process and the entitlement review process for the proposed MVTC was happening concurrently over a two-year time frame. It is hard to believe city planning staff, city leadership, including the Council was not aware of the proposed MVTC during the processing of the General Plan Update. The General Plan process considered the need to retain compatible land uses adjacent one another and appropriately retained a residential land use adjacent the existing half and third acre residential lots directly adjacent to the property where the MVTC is proposed. Your Planning Commission recognized the incompatibility of land uses and denied the MVTC entitlements due to its lack of consistency with guidance of the City's General Plan as approved by this Council. Why go through all the effort to develop and approve a General Plan and then not honor it?

2. Traffic – The original MVTC design proposed for maximum utility of a warehouse use resulting in a design where thousands of daily employee passenger car trips would be dumped onto Encelia Avenue. Encelia Avenue is a one lane in each direction residential street and one of the two main access points into the adjacent existing rural residential neighborhood. The Developer indicated at the Planning Commission Hearing "they tried everything they could to mitigate impacts on the adjacent neighborhood, but the design as proposed was necessary so truck traffic in and out of their proposed project would not interface with their employee ingress and egress." Their proposed solution to the problem they are creating is to make a forever problem for the existing neighborhood. Now the Project has been modified to not allow project traffic onto Encelia Avenue by building a 40 ft. wide private street that runs parallel to Encelia Avenue. This close to half mile long private street will be "masked" from sight behind a 35 ft. tall berm, but the adjacent neighborhood will undoubtedly be subjected to significant increases in noise and forced to breath the air pollution as this road is only 250 feet away from existing homes along Encelia Avenue. Since this is a proposed logistics/warehouse operation with no time limits on operation, the noise and pollution will be imposed on the existing neighborhood 24/7 – 365.

3. Air Pollution – Although I am a registered civil engineer, I am not technically versed in the details of air pollution. But it does not take an engineering degree to know regardless of what study says what, when thousands of daily car and truck trips are introduced into an area where they previously were not, there will be a significant and immediate increase in air pollution in the vicinity. Hillwood in hopes to placate nearest residents offers band aid mitigation.....ask yourself, would I want my family to breathe in diesel soot 24/7 – 365 for as long we continued to live there? Who wants to live where you need air filtration for your home and to have the exterior of the house power washed due to ongoing pollution? Is it fair to the citizens who invested in this neighborhood to be polluted on?

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

4. Noise Pollution – Like with air pollution, it does not take an engineering degree to know regardless of what study says what, when thousands of daily car and truck trips are introduced into an area where they previously were not, there will be a significant and immediate increase in noise pollution in the vicinity. Hillwood in hopes to placate nearest residents again offers some band aid mitigation.....ask yourself, would I want that right next to my house? Councilmember Cabrera during the appeal hearing stated his first-hand experience about noise impacts from the logistic/warehouse use near his home and indicated it was noticeable. There will be increased noise pollution happening all hours of every day. The revised and current Project plan shows a truck circulation plan where trucks will be driving parallel along Encelia only 250 ft. away from homes 24/7 – 365. The 40 ft. wide private road is on the neighborhood side of the proposed 14 ft. screen wall. The screen wall does nothing to mitigate sounds from the trucks using the private drive. Essentially the Developer eliminated the traffic problem onto Encelia Avenue but did so at the expense of increased noise and air pollution – both of which are clearly incompatible with the existing residential neighborhood.

5. No boundary/perimeter fencing along Encelia Avenue – As mentioned above under #2 "Traffic", the project proposes installing a massive 35 ft. high landscaped berm along Encelia Avenue with a goal to mask the project from the existing residential neighborhood. The berm will obliterate existing northerly viewsheds currently enjoyed by the existing neighborhood. The Developers own plans show cross sections of this berm to scale (attached). When looking at the cross section, notice the relationship of the person to the height of the berm and trees. The area of open space on the south side of the MVTC property, including the landscaped berm totals around 7.5 acres with no perimeter fencing along Encelia Avenue. If the Project is approved and built as proposed, going north toward the Project from the northerly right of way of Encelia Avenue there will be a 35 ft. high landscaped berm (relative to existing centerline of Encelia Avenue), then a landscaped open space between the berm and a 40 ft. wide private street for ongoing truck circulation, and then a 14 ft. high screen wall. Attached are cross-sections showing all of this from the Developers plans. Concern about this include:

    a. The 14 ft. screen wall does nothing to constrain any of the noise from the truck traffic using the 40 ft. private street as the private street is on the neighborhood side of the screen wall. The private street is being proposed to enable trucks to access docking on both the north and south side of the proposed building 24/7 – 365 days per year from Eucalyptus only.

    b. As proposed, there is no perimeter fencing for the Project along Encelia Avenue to stop unwanted loitering, camping, or trespassing on the privately owned 7.5 acres of landscaped open space. With Encelia Avenue kept as a quiet, low traffic residential street directly adjacent a large unfenced open space, one can reasonably anticipate this unfenced, unsecured open space area will become attractive to homeless along with the problems associated therewith. This would be further exacerbated if the Pilot Travel Center is approved on appeal to Council. The residents living in this neighborhood while at work to pay for their homes they invested in will have to worry about increased

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

property theft, and other crimes potentially carried out by those occupying the unfenced, unsecured open space.

When deliberating on this project, I ask you to think about these five above compatibility issues. But beyond straight compatibility issues there are other concerns.

For those who drive Redlands Blvd. on a routine basis to access the 60 Freeway know the roundabout at Eucalyptus is challenging now during peak periods caused by existing traffic. You don't have to be a traffic engineer to know this will be exacerbated with the addition of the proposed MVTC. This problem will remain for decades until the Redlands/60 interchange is upgraded. I say decades because as a resident of the City of Moreno Valley living in the east end since 1994, I've seen how long the Moreno Beach interchange has taken to be improved, and it's still not done. The City is getting the cart in front of the horse approving major truck and traffic producing projects where supporting road infrastructure is obviously deficient. The Redlands Blvd/60 interchange is deficient for more truck traffic and addition of the proposed MVTC will further degrade the quality of life of area resident's dependent on this interchange. The daily drive in and out of Moreno Valley is already miserable during morning and evening commute times due to existing freeway congestion on the 60 between the 60/215 interchange and 60/91 interchange. Absent an improved Redlands/60 interchange the MVTC will add more time lost to sitting and slogging through added traffic congestion trying to get off 60 at Redlands and navigating through the roundabout. I am sure most, if not all, of the area resident who use the 60 to get to work agree the proposed MVTC will exacerbate an already miserable daily commute.

The Moreno Valley portion of the draft LAFCO Municipal Services Report is attached. As you know LAFCO is an unbiased governmental entity to monitor services provided by various municipalities within Riverside County. There are some interesting findings in this unbiased report you as elected leaders of this City should be mindful of:

1. The median household income in Moreno Valley is lower than the rest of the County of Riverside
2. Moreno Valley's population grew slowly during the last decade at just 0.77%
3. Population growth over the next 15-25 years is not expected to keep up with county-wide growth rates
4. The City's land use profile "is disproportionately skewed towards industrial development with almost 75% of the City's commercial square footage designed for industrial users"
5. Largest employers are distribution centers
6. The City will not meet its Regional Housing Needs Assessment 6th cycle (RHNA) in all income categories.
7. FY 2018/19 revenues = $171 M FY 18/19 expenses = $149 M
8. Major sources of income:
    a. Property tax
    b. Sales tax
    c. Property tax in lieu of vehicle licensing fee
    d. Utility tax

Supporters of large box distribution/logistic facilities tout benefits of "job creation", increased ability to work near home, and "living wages". If this is true, why is the median income in Moreno Valley lower than the rest of the County of Riverside? Why is our population growth slow and expected to stay slow? Perhaps it is because most logistic/distribution jobs don't pay living wages sufficient to own and buy a

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

home. Also, perhaps the word on the street now is Moreno Valley is becoming a less attractive place to live and raise a family because of the disproportionately skewed land use of industrial development that creates traffic congestion, difficulty to get in and out of Moreno Valley, low paying jobs, and added air and noise pollution.

This Council recently approved the City's General Plan with this property planned for residential development consistent with the existing residential directly adjacent. At a minimum even if you can somehow find a way to justify the "benefit" of the proposed MVTC over the irreparable harm to the existing area residents, an approval in land use change from residential to industrial shows continued disregard by the City in meeting its Regional Housing Needs Assessment (RHNA) metrics. Perhaps a more appropriate use for the property is a rezone from R-2 to residential zoning proposing a transition of R-2 along Encelia Avenue to higher density residential along Eucalyptus. At least there would be a buffer for the existing residential use with similar and compatible uses. Under this scenario, people moving there would do so acknowledging/accepting the surrounding existing land uses. And with transitional higher density residential, the City could indicate progress towards meeting RHNA metrics by providing more opportunity for affordable housing consistent with Moreno Valley incomes.

We all know the City likes added tax increment revenues from development. If the MVTC is built on this property, the property tax increment received by the City see an initial large increase (over current) then see only small incremental increases due to Prop 13 legislation. In contrast if developed as residential land use consistent with the General Plan, the City would also receive an initial large increase in property taxes, plus receive added sales tax, and added utility taxes as the added population will live, shop, and spend in Moreno Valley. Also, as part of a residential development the residential developer would be required to pay impact fees such as park fees.

Saying no is hard especially on union supported projects. Labor unions focus on keeping their dues paying members employed. But how many of those dues paying union members live in Moreno Valley or anywhere near where this project is proposed? The reality is not many do. After a union supported project is approved those same union representatives will be at the next Planning Commission and Council Meeting in whatever town the next project is proposed. I certainly understand it is quite an undertaking to get elected and re-elected. It takes backing and money to get exposure. Hats off to all of you seeking elected office. Maybe it's a bit naïve on my part, but it would be nice to believe those seeking elected office remember the people who live, shop, and spend in Moreno Valley are the ones who are most impacted by the consequences of the decisions. Out-of-towners and special interest campaign contributors who participate to influence local city elections won't live with the negative, harmful impacts of the projects they support. In the recent special election in April, the council seat win was not by significant margin which may be indicia people are beginning to take note of the policies and stances of people seeking elected office here in Moreno Valley. As traffic in and out of Moreno Valley gets worse and neighborhoods are impacted by traffic, noise, and air pollution from these warehouse projects it is likely there will be less support for leadership who supports approving them.

Many cities are pushing back on warehouse/logistics project approvals. There is an awareness of the incompatibility of these land uses adjacent to or near existing residential land uses. With what Moreno Valley has already approved in this land use waiting to be built (World Logistics Center) perhaps tapping the brakes a bit would not be a bad decision.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

In the event the Council makes findings and justifications indicating the proposed MVTC has more benefit to the City than harm despite Planning Commission denial and significant area opposition, it is requested the Council condition the MVTC with the following added improvements:

1. **Addition of perimeter fencing along the entire length of Encelia Avenue such 6 – 8 ft. high metal fencing with masonry pilasters. Common sense should make this an obvious requirement.**

2. **Record an irrevocable deed restriction or some other legally sufficient mechanism on the property forever disallowing any project traffic onto Encelia Avenue. The only exceptions would be -access for emergency by Fire or Police, and if the property in the distant future was redeveloped into residential.**

3. **Addition of a traffic signal at the intersection of Redlands and Dracaea.**

4. **Full improvement of the west side of Redlands Blvd. between Encelia and Dracaea. It is anticipated the proposed MVTC is already conditioned to fully improve Redlands Blvd. along its frontage between Eucalyptus and Encelia and provide for adequate transition from full improvement on Redlands for southbound traffic to the existing two-lane roadway on Redlands between Encelia and Dracaea. This would complete Redlands Blvd. between Eucalyptus and Cottonwood and be an incremental add to the project conditions.**

Items 3 & 4 are needed to provide area residents with safe access to Redlands Blvd. and ability to leave the area via Cottonwood to Moreno Beach or Alessandro to avoid congestion at the roundabout and unimproved 60/Redlands interchange. To provide some equity to the MVTC Developer, the Developer and the City could enter into a reimbursement agreement where MVTC would be reimbursed some proportionate amount from other developers within an identified Benefit Area who benefit from Redlands Blvd. street improvements. For example, there is undeveloped property along the west side of Redlands Blvd. between Encelia and Dracaea. The developer of this property would likely be conditioned to build out this improvement if not already built. It would seem reasonable this developer would be required to contribute a proportionate share of the expense paid by MVTC for making the improvement.

As a Planning Commissioner for close to 10 years I have participated in the approval of most warehouse/logistic projects in this City. This includes voting yes for the World Logistics Center (WLC) despite living close to it. What WLC has going for it is a plan for buffering the impacts of its project from the existing residential and eliminated truck and employee traffic from Redlands Blvd. with access from Theodore now WLC Parkway. Most other warehouse/logistic approvals in the City have been in areas where the existing underlying land use zoning allows for warehouse/logistic use, or the projects are located where there are existing non-residential land uses, and city approved truck routes.

The proposed MVTC even as modified to eliminate traffic on and off Encelia Avenue, will create irreparable harm to the existing residential neighborhood. These residents bought homes in this area with a reasonable expectation City elected would respect and protect their investments by not approving incompatible land uses on adjacent property. Prior Planning Commissions and City Councils have done that in the past. For example, when Pro-Logis was developing along Eucalyptus east of the auto center, they responsibly agreed with area resident and city leadership to maintain a buffer of their proposed industrial use to the existing residential and eliminated two buildings from their project.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Saying no is hard but needs to be done sometimes. This is one of those times. The harm the proposed MVTC creates far outweighs the tax revenue increase this project will generate, a proposed park, and $500,000 cash contribution. There is still around 2,800 acres of property approved for warehouse/logistics on the east side of the Redlands Blvd. This existing neighborhood does not deserve having this incompatible use built right on top of it. A yes vote on the proposed MVTC benefits out-of-town developers who will enjoy profits at the expense of city residents.

Please do right by the approximate 1,000 citizens who have invested and live in the approximate 250 homes between Encelia and Cottonwood who pay taxes, shop, spend, and vote in Moreno Valley. **VOTE NO ON APPROVAL OF THE PROPOSED MVTC UPHOLDING YOUR PLANNING COMMISSION'S DECISION AND YOUR RECENT GENERAL PLAN APPROVAL.**

I apologize for the long letter but thank you for your time to read it as part of your considerations in coming to a decision. If you have any questions or would like to discuss, please feel free to contact me.

CITY OF MORENO VALLEY

The City of Moreno Valley incorporated in 1984 as a general law city in the County's Western Region.[110] The City's northern, eastern, and the majority of the southern boundary is shared with unincorporated Riverside County territory. Most of the City's southern boundary is adjacent to the Lake Perris State Recreation Area. The City of Perris boundary is immediately south of a portion of Moreno Valley. The City's western edge is bound by the March Air Reserve Base, City of Riverside corporate boundary, and unincorporated territory. The City's incorporated boundary covers an area of 51.3 square miles and the City's SOI extends northwest and southeast to encompass an additional 15.5 square miles, for a combined 66.8 square miles.[111]

The City's demographic profile is presented in Figure 84.

Figure 84: Demographic Profile - Moreno Valley

Moreno Valley	City	SOI	County
Population as of 2020	208,838	150	2,442,304
Population as of 2010	193,365	105	2,189,641
Annual Pop. Growth Since 2010	0.77%	3.63%	1.10%
Housing Units	57,523	55	867,637
Persons / Housing Unit	3.63	2.73	2.81

[110] Source: City of Moreno Valley
[111] Source: Riverside LAFCO

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Moreno Valley's population grew slowly during the last decade, increasing at just a 0.77 percent annual growth rate to a total population of almost 209,000. Moreno Valley is the second-largest city in the County of Riverside. Moreno Valley has large households (3.63 persons per household) and a high population density (4,071 persons per square mile) when compared to the County averages (2.81 persons per household and 339 persons per square mile). The population projections over the next 15 to 25 years indicate that population growth will increase, but growth is not expected to keep pace with County-wide growth rates.

The City's SOI contains a population of just 150, spread across 55 households. The City's median household income is slightly lower than the County-wide average, while the median household income in the SOI is about 38 percent higher than the County-wide average.

The City's land use profile is disproportionately skewed towards industrial development, with almost 75 percent of the City's commercial square footage designed for industrial users. During the last decade, the City added over 9.3 million square feet of industrial space, representing about half of the City's commercial development. While this is a significant increase in square footage, a lot of the City's development can be attributed to retail projects. The City's housing inventory is concentrated in single-family housing, representing more than 80 percent of the City's units.

Aligned with the City's land use profile, several of the City's largest employers are distribution centers, including Amazon (7,500 employees), Ross Dress for Less/DD's (2,400 employees), Sketchers USA (1,200 employees), Harbor Freight Tools (788 employees), and Deckers Outdoor (700 employees). The remaining top ten employers include March Air Reserve Base (9,600

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

employees), Riverside University Health Systems Medical Center (3,400 employees), Moreno Valley Mall (1,500 employees), and Kaiser Permanent Community Hospital (1,457 employees).[112]

Moreno Valley's land use summary is presented in Figure 85.

Figure 85: Land Use Summary - Moreno Valley

Moreno Valley			County
Residential Units	Units	%	%
Single Family	46,378	80.6%	54.8%

CURRENT SPHERE OF INFLUENCE, ISLANDS/POCKETS, AND DUCS

The City of Moreno Valley's SOI consists of three (3) noncontiguous areas, illustrated in Exhibit 12. The City's eastern SOI is the largest of the three (3) areas, stretching eastward into the hills along State Route 60 and southward along Gilman Springs to encompass the area known as Mystic Lake, which is a seasonal body of water. The City's northwestern SOI extends west to the City of Riverside's existing SOI in the hills north of State Route 60, in an area that is largely overlapping the Box Springs Mountain Reserve Park. The City's third and smallest SOI area

[112] Source: City of Moreno Valley, 2018-19 Comprehensive Annual Financial Report

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

extends south from the City's southern boundary adjacent to Lake Perris State Recreation Area, east of Davis Road.

The SOI does not contain LAFCO-identified DUCs or unincorporated islands and pockets.

Moreno Valley's boundary was previously reconfirmed in the September 2006 Central Valleys, The Pass Area and Southwestern Riverside County MSR (LAFCO 2005-49-3&5; LAFCO 2005-48-5; LAFCO 2005-47-1&3) (the "2006 MSR").

FORM OF GOVERNMENT AND STAFFING

The City of Moreno Valley is a "Council – Manager" form of government, with a City Council that includes five (5) members, including one Mayor elected at-large, and four (4) Councilmembers elected according to district boundaries. The Mayor serves a two (2) year term while Councilmembers serve four (4) year terms. The City Council appoints a City Manager, who serves as the head of the administrative branch of the City government.[113]

The City Council also serves as the Housing Authority, Successor Agency, Moreno Valley Community Services District, Public Financing Authority, and Public Facilities Financing Corporation. Several boards, commissions, committees, and councils carry out assignments as directed by the City Council, including the Accessibility Appeals Board, Environmental and Historical Preservation Board, Senior Citizens Advisory Board, Arts Commission, Library Commission, Planning Commission, Traffic Safety Commission, Utilities Commission, Moreno Valley Citizens Public Safety Committee, Parks Community Services and Trails Committee, and the Emerging Leaders Council.[114]

The City Manager reports directly to the City Council and oversees a staff of 375 full-time equivalent personnel.[115] The City's annual operating expenditures ranged from $118 to $150.3 million between 2016-17 2018-19.[116]

SERVICES PROVIDED

City staff provide the community with building and planning, housing, code enforcement, animal control, parks and recreation, landscape maintenance, streets and road maintenance, lighting, utilities, stormwater drainage, and innovation and technology services. The following section describes municipal services provided within Moreno Valley and identifies the service provider.

Government Services

General government services in the City of Moreno Valley are provided by the elected City Council, and appointed staff like the City Manager and City Clerk. The City Manager serves as the Chief Executive of the City and is responsible to the City Council for the efficient management of all City business including implementation of Council policies and programs, providing direction to departments that administer City programs and services, coordinating intergovernmental relations and legislative advocacy efforts, and administering the outsourcing agreements through which Public Safety services are provided. The City Clerk is responsible for the administration of all municipal elections, access to and management of City records, preparation of agendas, recording and maintenance of all Council actions, maintenance of the Municipal Code, and serves as the official custodian of the City seal.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Law Enforcement

Moreno Valley receives law enforcement services from the Riverside County Sheriff Department. The Sheriff provides general policing services including, investigations, special enforcement, school resources, traffic enforcement and patrols, community services, crime prevention, and the administration of the volunteer program and the Explorer youth program.

The 2006 MSR presented the following determination:

- Law enforcement services were being provided at a level below the City's standard of 1 sworn officer per 1,000 people.

According to City staff, the recently adopted General Plan identifies City policies for providing responsive, efficient, and effective law enforcement services that promote a high level of public safety. Furthermore, City staff noted that the City no longer has a policy specifying a number of sworn officers per 1,000 residents.

Fire Protection

Fire Protection services are provided by Riverside County Fire Department/CalFire in Moreno Valley. Since 1921, the Riverside County Fire Department has been in a contractual relationship with CalFire to provide wildland fire protection services. In 1946, the contract between CalFire and Riverside County Fire Department was expanded to include fire protection services. Services provided by Riverside County Fire Department/CalFire include fire protection and prevention, medical response, review of planning cases, review and inspections of construction and developments, fire and life safety inspections of state-regulated occupancies, information on ordinances and standards for construction, and information bulletins and standards for fire protection. Fire Stations 2, 6, 48, 58, 65, 91, and 99 are in the City.

The Riverside County Fire Department/CalFire provides fire protection services to 20 cities in Riverside County and the Rubidoux community services district. The Riverside County Fire Department/CalFire also responds to calls for service in seven (7) additional Riverside County cities and the Idyllwild Fire Protection District through mutual and automatic aid agreements.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Emergency Medical

Emergency medical services are provided by the Riverside County Fire Department/CalFire. Please refer to the previous section for more information on the Department.

Building/Planning and Housing (Community Development)

Building, planning, and housing services are provided by the City's Community Development Department through the Planning and Building and Safety Divisions. The Planning Division informs the planning commission, ensures new developments fulfill the City's strategic priorities, and ensures new development is in line with CEQA. The Building and Safety Division conducts plan reviews, issues permits, conducts field inspections, and coordinates permit approvals with City departments and outside agencies.

Code Enforcement

Code enforcement services are provided by the Community Development Department's Code and Neighborhood Services Division. The Division responds to citizen complaints, proactively enforces the municipal code, provides parking control services, and runs the abandoned vehicle abatement program.

Animal Control

Animal control is provided by the Animal Services Division of the Community Development Department. The Division provides humane animal services, sheltering, rabies control, stray animal control, licensing, and public education. A shelter operated by the Division is located in the City at 14041 Elsworth Street.

Parks and Recreation

Parks and recreation services are provided by three (3) entities: The City's Parks and Community Services Department, the Community Services District- Zone A, Community Facilities District No. 1, and the Riverside County Regional Parks and Open Space District. The Department provides

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

maintenance and development of parks, trails and recreational facilities, maintains open space, administers an array of recreational programs, and enforces park rules and regulations. The Community Services District, known also as Zone A, services parks in the City with the Parks and Community Services Department. The District primarily provides funding to the Department for parks and recreation services. The Community Facilities District No. 1 also provides funding to the Department, but funding is reserved for maintenance of facilities. The Riverside County Regional Parks and Open Space District operates the Box Spring Mountain Reserve in the City. The Reserve is located on 3,400 acres of land that overlooks the cities of Riverside and Moreno Valley. The entrance is located at 9699 Box Springs Mountain Road in Moreno Valley.

The 2006 MSR identified the following determinations:

- The City was providing parkland at a ratio that was below the City's standard and noted financing constraints that led to an increase in fee related recreational activities and a degradation of service provision.

According to City staff, the recently adopted General Plan identifies 671 acres of existing and planned parkland which could meet the parkland ratio within a 20-year period. City staff noted that the City also plans to evaluate parkland dedication fees and in-lieu parkland dedication fees to ensure that the City is adequately addressing the community need while maintaining regional competitiveness.

Library

The Moreno Valley Public Library provides library services to the City. The Library is owned and operated by the City. It has two (2) satellite locations in the Moreno Valley Mall and Iris Plaza. The Library provides users of all ages with reading materials in electronic and traditional formats, educational support for students, and literacy programs. The City's Community Services District provides funding for the operations of the Library.

The 2006 MSR presented the following determinations:

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

- The City's Library was too small to hold the City's entire inventory and the City had plans at the time to develop a larger facility.

The City has expanded library facilities to address this finding, adding two satellite libraries that provide library services throughout Moreno Valley. Museum

There is no museum in the City of Moreno Valley.

Landscape Maintenance

Landscape maintenance is provided by the City's Public Works Department through funding from the Community Services District, Landscape Maintenance District 2014-2, and several other special funding districts in the City. The Department provides general landscape maintenance services to public property and oversees any landscape maintenance contracts.

Streets/Road Maintenance

Streets and roads maintenance is provided by the Public Works Department. The Department's responsibilities include the coordination, maintenance, and operation of traffic facilities and roadways, sidewalk and street maintenance, and the management of City capital improvements.

The 2006 MSR identified the following determinations:

- The City's roads and intersections operating below the City's level of service standard.

City staff indicated that streets and roads were in fair to good shape.

Streetlights

The Moreno Valley Community Services District, Zone C Arterial Streetlights, the Lighting Maintenance District 2014-01, the Community Facilities District 2014-01, and the Edgemont Community Services District all provide funding for streetlight maintenance in various parts of the City. The Edgemont Community Services District provides streetlight maintenance services to several neighborhoods in the western part of the City. The District was formed in 1957 to cover

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

the Edgemont area of Riverside County which straddles both the cities of Riverside and Moreno Valley. The other districts provide funding that is used by the Moreno Valley Public Works Department to service the rest of the City.

Utilities (Gas, Electric)

Utilities are provided by the Moreno Valley Electric Utility ("MVU"), Southern California Edison ("SCE"), and the Southern California Gas Company ("SoCal Gas"). The MVU is the primary public electric utility in the City and is run by the Public Works Department. Created in 2001, the utility now serves around 6,600 residents. The traditional regional utilities SCE and Socal Gas both still serve some residents in the City. In Fiscal Year 2018-19 the MVU entered into a financing agreement through Bank of America to acquire the City's streetlights from SCE. According to City staff, the streetlights then underwent an LED retrofit.

Solid Waste

The City has a franchise agreement in place with Waste Management for solid waste collection services. Waste Management is a private solid waste disposal company provides solid waste disposal and recycling services to Moreno Valley residences. Waste Management is one of the largest solid waste companies in North America with more than 45,000 employees serving over 20 million residential, industrial, municipal, and commercial customers.

The 2006 MSR presented the following determinations:

- The City was not disposing of the required amount of solid waste.

City staff indicated that the City has implemented a number of innovative source reductions, recycling, composting, and reuse programs to help meet State diversion goals. The City's current diversion rate is 65 percent, which exceeds the current standard diversion rate of 50 percent. Furthermore, City staff noted that an amendment to the City's municipal code will require a diversion rate of 75 percent by 2025 as required by State law.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Storm Drainage

Storm drainage services are provided by the Public Works Department. The Department is responsible for engineering, designing, and overseeing the construction of capital improvements for flood and storm-water management, and the operation and maintenance of City storm drains.

County Service Area 152 provides funding for the management of the City's NPDES permit program, which is aimed at reducing pollution to underground water tables.

The 2006 MSR presented the following determinations:

- The City's storm water drainage is inadequate.

City staff did not indicate that storm water drainage was inadequate in the City.

Innovation and Technology

Innovation and technology services are provided by the Financial and Management Services Department. The Department manages the City's technology assets, improves hardware, software, and telecommunications, and provides IT support.

Airport

There is no public or private airport in the City of Moreno Valley.

Extraterritorial Services Provided

The City of Moreno Valley does not provide services outside of the City's boundaries. Government Code Section 56133 requires LAFCO approval for extension of services outside a sphere of influence in response to an existing or impending threat to public health or safety.

RECENT AND PLANNED MAJOR CAPITAL IMPROVEMENTS

The City prepares a Capital Improvement Plan that serves as a comprehensive planning document inclusive of revenues and expenditures for capital improvements within the City. The

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

City's CIP is adopted every other year and coordinates with the City's two-year budget cycle. The City plans to make improvements in regard to pavement rehabilitation, street and road improvements, interchange construction, bridge maintenance and construction, drainage improvements, lighting improvements, and community center renovation.

According to City staff, all projects identified above, except for the March Community Center Renovation, are moving forward and funded.

HOUSING NEEDS AND HOUSING ELEMENT REPORTING

The City of Moreno Valley submitted its 6th Cycle Draft Housing element to HCD on February 19, 2021. As of the date on this MSR, HCD had not completed the review of the City's Housing Element.[117] During the 5th Cycle, the City submitted Annual Progress Reports between 2014 and 2019, but failed to submit an Annual Progress Report in 2013.[118]

The City's 5th Cycle housing needs are presented in Figure 87.

Figure 87: 5th Cycle Housing Element Summary - Moreno Valley

Moreno Valley 5th Cycle Housing Needs	Very Low Income	Low Income	Moderate Income	Above Moderate Income
RHNA Allocation	1,500	993	1,112	2,564
Permitted Units	0	0	457	1,354
Allocation Surplus/(Shortage)	(1,500)	(993)	(655)	(1,210)

Source: HCD Annual Progress Report Permit Summary, October 6, 2020

The City permitted 457 moderate income housing units and 1,354 above-moderate income units during the 5th Cycle. The City did not permit any very low- or low-income housing units during the 5th Cycle, and the City fell short of meeting its RHNA allocation in all income categories. With a

[117] Source: California Department of Housing and Community Development, "Housing Element Implementation Status Tracker" updated June 28, 2019
[118] Source: California Department of Housing and Community Development, "Annual Progress Report Permit Summary," dated October 6, 2020.

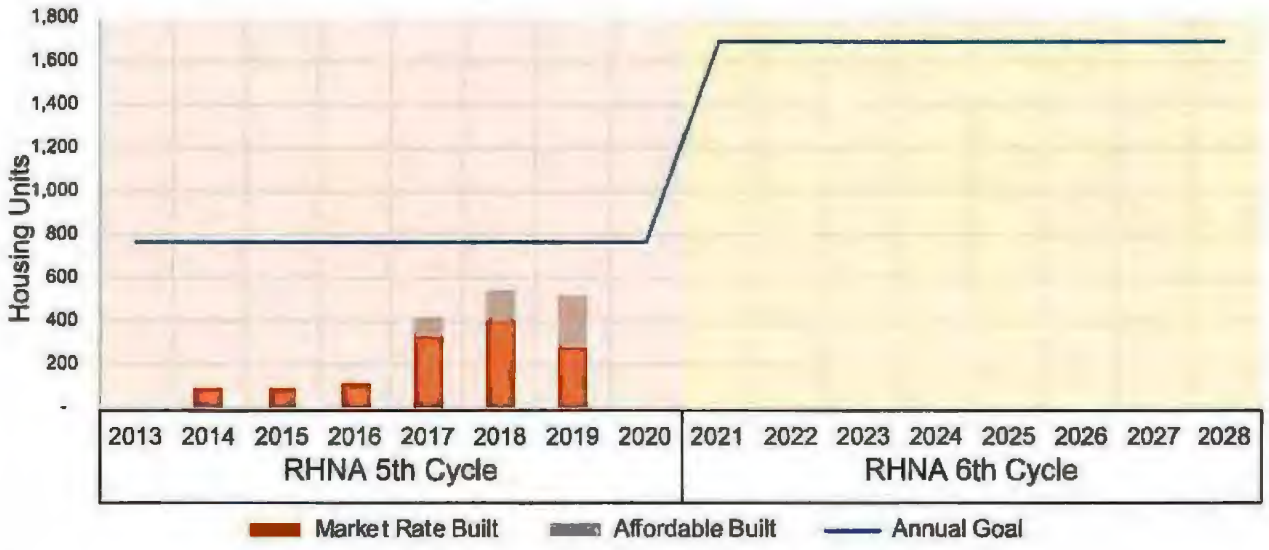
Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

shortage of 4,358 housing units, the City is not expected to meet its RHNA allocation in any income category.

The City's RHNA allocation increases by about 120 percent, or 7,427 units, to a total of 13,596 housing units for the 6th Cycle. In order to accomplish this, the City will need to permit 1,700 units every year during the eight (8) year cycle.

The City's 5th and 6th Cycle production goals and unit production is presented in Figure 88.

Figure 88: 5th and 6th Cycle RHNA Allocation and Production - Moreno Valley



Moreno Valley is one of 289 California jurisdictions that have not made sufficient progress toward either moderate-income RHNA unit production or failed to submit the latest (2019) Annual Progress Report. As a result, the City is subject to streamlined ministerial approval process for proposed housing developments with at least 10 percent affordable units. The streamlined ministerial approval process was introduced as part of Senate Bill 35 (Chapter 366, Statutes of 2017) in 2017.[119]

FISCAL HEALTH

The City of Moreno Valley's fiscal health evaluation, including audit findings, revenue sources, expenditure categories, long-term obligations, reserves, and California State Auditor assessment is presented in the sections that follow. The City's net position is presented as annual revenues less expenditures for fiscal years 2016-17 through 2018-19 in Figure 89. The City recorded surpluses in each year between 2016-17 and 2018-19.

Figure 89: Net Position - Moreno Valley

Moreno Valley	2016-17	2017-18	2018-19
Total General Tax Revenues	$80,283,944	$95,664,565	$101,563,227
Other Tax Revenues	252,636	757,763	3,562

Total Expenditures	**117,944,142**	**150,346,468**	**148,856,763**
Net Position	**$6,215,588**	**$4,899,433**	**$22,088,711**

Operating Revenues

As illustrated in Figure 90, the City had total revenues that ranged from $124.2 million in 2016-17 to $170.9 million in 2018-19. Figure 90 outlines the City's revenue sources between 2016-17 and 2018-19.

Source: California State Controller's Office

The City's general tax revenues, which were $101.6 million in 2018-19, account for 59.4 percent of the City's total revenues. The City has a diverse revenue base, with sales tax ($25.9 million), property tax ($20.8 million), property tax in-lieu of VLF (19.6 million), and utility user tax ($15.5 million) representing the largest revenue sources and collectively representing 80.5 percent of total general tax revenues.

When compared to all other Riverside County and California cities, the City's tax revenues are proportionate, except for utility user tax, which not all communities have adopted. Although sales tax is the City's largest general tax revenue source, accounting for 25.5 percent of the City's general tax revenues, it is proportionally lower than the average sales tax revenue for all

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Riverside County cities (39.9 percent), and more aligned with the average sales tax revenue for all California cities (24.7 percent). Because sales tax can be susceptible to economic shifts, such as the results of the COVID-19 pandemic, it may be advantageous for the City to rely less on sales tax revenues.

The City's general tax revenues are compared to all Riverside County and California cities in Figure 91.

Figure 91: General Tax Revenue Comparison - Moreno Valley

Aside from tax revenues, City's largest non-tax revenue sources are miscellaneous revenues ($22.9 million) and intergovernmental revenues ($21.5 million). The City's major revenue sources are described in greater detail in the sections that follow.

Sales Tax

Sales tax revenues are the City's single-largest tax revenue, accounting for 25.5 percent of general tax revenues or $25.9 million in 2018-19. Sales tax revenues are derived from one percent of gross receipts from the sale of tangible personal property sold in Moreno Valley. Sales tax revenues increased by 7.1 percent annually between 2016-17 and 2018-19.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Property Tax and Property Tax in-lieu of Motor Vehicle License Fees

Property tax and property tax in-lieu of VLF were the City's second and third largest tax revenues in 2018-19, accounting for 20.5 and 19.3 percent of general tax revenues respectively.

In 2018-19, the City collected almost $20.8 million in property tax. Property tax is assessed on land, improvements, and personal property, which amounted to about $15.6 billion in 2018-19. Approximately $4.1 billion in assessed value was derived from land value and $11.8 billion from improvements.[120] The City's property tax collections were approximately 15.6 percent of all property tax collected in Moreno Valley, which is one of the highest tax rates for a city in Riverside County.

The City's property tax revenues increased from about $13.5 million in 2016-17 to $20.8 million in 2018-19, 23.8 percent annual growth rate. While property assessed valuations can only increase by a maximum of 2 percent annually, property tax revenues can grow at a much faster pace as a result of new development adding new taxable value to the tax roll.

The City of Moreno Valley and County of Riverside have a mutually adopted Master Property Tax Exchange Agreement in place, which was adopted in 1985.[121]

Property tax in-lieu of VLF accounted for 19.3 percent of the City's general tax revenue in 2018-19, equivalent to $19.6 million. Property tax in-lieu of VLF replaced vehicle license fees as a revenue source for cities in 2004, and increases based on assessed valuation growth in the jurisdiction.

Utility User Tax

A fourth significant revenue source for the City is utility user tax revenues. The City assesses utility user taxes on telephone use at a rate of 5.75 percent, inclusive of intrastate residential and

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

commercial calls, interstate residential and commercial calls, international residential and commercial calls, and all wireless residential and commercial calls. Additionally, the City taxes business and residential electricity, business and residential natural gas, business and residential cable television, business and residential water, and business and residential sewer fees at a rate of 6 percent.[122] In 2018-19, utility user tax revenues amounted to $15.5 million, or about 15.2 percent of general tax revenues. Over the three (3) year period from 2016-17 to 2018-19, the City's utility user tax revenues were relatively flat, decreasing by a little more than $100,000 over that period.

Miscellaneous Revenues

The City's largest non-tax revenue source is classified as miscellaneous revenues. Miscellaneous revenues amounted to $22.9 million in 2018-19, or about 13.4 percent of all revenues. For the City, the primary sources of miscellaneous revenues includes development impact fees ($9.6 million in 2018-19), contributions from nongovernmental sources ($1.9 million), and other unclassified miscellaneous revenues ($11.3 million). According to City staff, the City is expected to begin preparation of a development impact fee study in 2021.

Intergovernmental Revenues

Intergovernmental revenues are collected from County, State, and Federal sources and amounted to $21.5 million in 2018-19 for the City. The City's intergovernmental revenues are comprised of gas tax revenues ($8.0 million), community development block grants ($1.8 million) and several other State ($8.0 million) and Federal ($3.3 million) government sources. Intergovernmental revenues increased from about $14.6 million in 2016-17 to $21.5 million in 2018-19, a 21.2 percent annual growth rate.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Operating Expenditures

The City's operating expenditures ranged from $117.9 to $150.3 million between 2016-17 and 2018-19. The City's annual operating expenditures, categorized by use, are presented in Figure 92.

Figure 92: Operating Expenditures - Moreno Valley

Moreno Valley	2016-17	2017-18	2018-19

Source: California State Controller's Office

Because the City contracts with the County of Riverside for law enforcement and fire protection services, it is not surprising that the City's largest expenditure category is contract services, amounting to $83.3 million in 2018-19. Between 2016-17 and 2018-19, the City's contract services expenditures increased by 21.6 percent annually – over the same time frame all other operating expenditures increased by just 2.9 percent. In 2018-19, the City's contract service expenditures amounted to 56 percent of total expenditures.

The City's largest current expenditure category is associated with public safety, amounting to $63.3 million in 2018-19. Public safety expenditures grew at just 3.5 percent annually between 2016-17 and 2018-19 while total current expenditures increased by 12.3 percent annually. Most of the growth occurred in transportation, community development, and culture and leisure expenditure categories. The City's current expenditures by function between 2016-17 and 2018-19 are presented in Figure 93.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Figure 93: Current Expenditures - Moreno Valley

Moreno Valley	2016-17	2017-18	2018-19
General Government	$17,323,318	$18,982,549	$19,669,398
Public Safety	59,152,472	63,992,529	63,305,321

Total Current Expenditures	**$117,944,142**	**$150,346,468**	**$148,856,763**

Source: California State Controller's Office

In most contract cities around Riverside County, the public safety costs are rapidly increasing at unsustainable paces – that is not the case in Moreno Valley. The fastest growing expenditure categories for the City were culture and leisure (51 percent annual increase between 2016-17), transportation (32.6 percent annual growth), and community development (\$27.5 percent annual growth). These three (3) categories represented \$23.2 million in expenditure increases between 2016-17 and 2018-19.

Culture and leisure expenditures are entirely associated with parks and recreation costs (almost \$19.0 million in 2018-19) while transportation expenditures include costs for streets, highways and storm drains (\$18.1 million), and trees and landscaping (\$1.1 million). Community development expenditures are associated with planning (\$3.2 million), construction and engineering regulation (\$373,000), and other unclassified community development expenditures (\$7.5 million). Some of these costs are recovered via charges for services, and according to City staff, the City's fees are balanced and consistent with all fee studies. City staff also indicated that the City planned to prepare a new development impact fee study in 2021 because the previous fee study was prepared nine (9) years ago.

Reserve Fund Balance

The City has several reserve fund policies. The City's cash flow reserve aims to preserve 17 to 35 percent of General Fund expenditures. The Emergency fund policy requires 12 percent of

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

General Fund expenditures and the Rainy Day Reserve policy requires an additional 10 percent of General Fund expenditures to be retained. The City's 2020-21 budget indicates that the City will retain $39.9 million in reserves and is in compliance with the City's reserve policies.[123]

Pension and OPEB Obligations

The City of Moreno Valley's pension and OPEB obligations are outlined in Figure 94.

Figure 94: Pension and OPEB Obligations - Moreno Valley

Moreno Valley	2017-18	2018-19	2019-20
Net Pension Liability/(Surplus)	$72,410,028	$68,092,267	$72,896,273
Total OPEB Liability/(Surplus)	7,099,335	6,453,487	8,175,011
Total Benefit Liability/(Surplus)	$79,509,363	$74,545,754	$81,071,284

Source: 2017-18, 2018-19 and 2019-20 ACFR

Qualifying employees are eligible to participate in the City's Miscellaneous Pension Plan. The City does not have public safety employees and therefore does not offer a Safety Plan. The City also provides OPEB policies, which are defined benefit postemployment healthcare plans for retired persons, and benefits are extended to surviving spouses. As illustrated in Figure 94, the City has about $81.1 million in combined pension and OPEB liabilities.

The City established an irrevocable trust fund in June 2009 to begin prefunding the City's unfunded OPEB liability.

The City's pension indicators, which include the City's employer contribution compared to the actuarially determined contribution, the City's total covered payroll, and the contribution rate as a percent of covered payroll, are presented in Figure 95.

[123] Source: City of Moreno Valley, 2019-20 Budget

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Figure 95: Pension Indicators - Moreno Valley

Moreno Valley	2017-18	2018-19	2019-20
Actuarially Determined Contribution	$6,385,610	$7,094,031	$7,972,616
Employer Contribution	6,385,610	7,094,031	7,972,616
Covered Payroll	$20,860,026	$21,783,847	$24,175,227
Employer Contribution Rate	30.6%	32.6%	33.0%

Source: 2017-18, 2018-19 and 2019-20 ACFR

The City made employer contributions equivalent to the actuarially determined contribution between 2016-17 and 2019-20. During this time frame, the City's covered payroll increased at an annual rate of about 7.7 percent. The City's employer contribution rate, which ranged from 30.6 to 33.0 percent between 2016-17 and 2019-20, is about average for the County of Riverside, which ranged from 26 to 32 percent over the same period.

Annual Audit Findings

RSG reviewed the City's Annual Audits from 2017-18 through 2019-20. The Annual Audits did not present any findings and the auditor stated that the financial statements present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City. Additionally, the City's Annual Audits between 2017-18 and 2019-20 were awarded Certificates of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association.

California State Auditor Fiscal Health Evaluation

The City of Moreno Valley ranked 281 out of 471 jurisdictions and received an overall risk rating of low. The City is considered higher risk than 190 peer cities in California, or about 40 percent of cities. The City received low risk ratings on six (6) indicators, including liquidity, general fund reserves, pension obligations, pension costs, future pension costs, and OPEB obligations. Two

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

(2) indicators were given moderate risk ratings, including debt burden and revenue trends. Two (2) indicators scored high risk ratings, including pension funding and OPEB funding.[124]

MSR DETERMINATIONS

Requisite CKH determinations for the City of Moreno Valley are presented by topic below:

1. **Population, Growth, and Housing**

   Moreno Valley grew at a slower rate over the last decade, when compared to the County and most other incorporated jurisdictions in the Western Riverside Region. The Moreno Valley population is expected to grow at a rate that is slightly lower than the County-wide growth rate over the next 15 to 25 years. The City did not build sufficient housing units to meet its 5th Cycle RHNA allocation of 6,169 units, falling short by 4,358 units, and the City's 6th Cycle RHNA allocation increased by 120 percent to a total of 13,596 housing units.

2. **Disadvantaged Unincorporated Communities in SOI**

   The City's SOI does not contain any DUCs.

3. **Present and Planned Capacity of Facilities**

   Many of the City's deficiencies identified in the 2006 MSR did not resurface during RSG's research, data collection, and city interview stages.

4. **Financial Ability to Provide Services**

   The City's general tax revenue sources have increased to more than $101.6 million in 2018-19. The City has identified issues with its pension and OPEB liabilities and began to take

[124] Source: California State Auditor, Financial Data for Fiscal Year 2019-20

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

corrective action as early as 2008 with the introduction of an irrevocable trust fund. The City has maintained healthy reserve funds.

5. **Opportunities for Shared Facilities**

   No opportunities for shared facilities were identified.

6. **Accountability for Community Service Needs**

   The City Council is elected according to district boundaries. The City's plethora of boards, committees, and commissions indicates that the City residents are engaged with City government. The City is active across at least five (5) social media platforms and maintains an email list. The City also operates a television channel and has a dedicated media team.

7. **Any Other Matter Related to Effective or Efficient Service Delivery as Required by Commission Policy.**

   The City did not identify any other matters related to effective or efficient service delivery as required by Commission Policy.

SOI RECOMMENDATIONS

RSG's recommendations related to the Moreno Valley SOI are presented by topic below. RSG is not recommending any changes to Moreno Valley's SOI.

1. **Present and Planned Land Uses**

   Large portions of Moreno Valley's SOI overlaps difficult-to-develop and protected land and are unlikely to be developed in the foreseeable future. The southern and southeastern portions of the unincorporated Moreno Valley SOI present the best opportunities for future growth and development.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

2. **Present and Probable Need for Public Facility and Services**

   City staff indicated that the Moreno Valley SOI has adequate public facilities and services.

3. **Present Capacity of Public Facilities**

   City staff indicated that public facilities in the Moreno Valley SOI are sufficient to meet the community's needs.

4. **Social or Economic Communities of Interest**

   The City did not identify any social or economic communities of interest in the Moreno Valley SOI.

5. **Disadvantaged Unincorporated Community Present and Planned Need for Facilities and Services**

   The Moreno Valley SOI does not contain any DUCs.

Subject: Moreno Valley Trade Center (MVTC)— Larger than City's Mall in June article--& proposed unhealthy sports park

Follow Up Flag: Follow up
Flag Status: Flagged

Warning: External Email – Watch for Email Red Flags!

Good afternoon City Council members, **November 8, 2022**

When the Moreno Valley Trade Center (MVTC) couldn't protect the families in the neighborhood and the environment, they decided a park could be offered to influence you to get at least three votes, but they fail to explain the park will be next to a city designated diesel truck route with all its harmful pollution impacting the health of children using the sports park — active use of the sports park will result in children breathing in deeply the health impacting diesel pollution. The 40 million sq ft World Logistics Center warehouse project has just begun moving forward with its project and will be using Redlands Blvd for some of its 13,000 daily diesel truck trips as will the MVTC, Sketchers and others.
Sincerely,
George Hague

Moreno Valley warehouse — larger than city's mall — is back for consideration

By **DAVID DOWNEY** | ddowney@scng.com | The Press-Enterprise
PUBLISHED: June 19, 2022 at 7:00 a.m. | UPDATED: June 19, 2022 at 7:01 a.m.

A plan to build a warehouse larger than the Moreno Valley Mall across the street from houses on half-acre lots is returning to the Moreno Valley City Council.
The council is set to decide Tuesday, June 21, whether to greenlight a 1.26-million-square-foot logistics project called the Moreno Valley Trade Center, on 80 acres south of the 60 Freeway.

The developer, Dallas-based Hillwood Investment Properties, has said the warehouse would stand 48 feet tall.
The project's final environmental impact reportstates that the building could reach 100 feet if occupied by a fulfillment center filling the orders of online shoppers.

In advance of Tuesday's meeting, letters from people on both sides of the issue have poured in to the city.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Walter Fus, saying he has been a Moreno Valley resident since 1977 and is a retired Air Force pilot, wrote Saturday, June 11, that approving the project "would be the most egregious decision this council could ever make."

Cristina Rivera, in a Wednesday, June 15, email, urged approval in praising an amenity the developer promised, if allowed to build. The project "will bring a new desperately needed sports park to the City of Moreno Valley," Rivera wrote.

Union carpenters submitted letters of support, saying the project would create construction jobs.

A decision was postponed

In October, the Moreno Valley Planning Commission rejected the project on a 4-0 vote, with one commissioner not participating due to a potential conflict of interest, concluding the center was incompatible with a neighborhood to the south. Hillwood Investment Properties appealed the decision to the council, which discussed the project in December but postponed a decision.
Now the project is back.

City planners are recommending the council approve it, by certifying the environmental impact report, approving a general plan amendment, changing the zone and making a determination that the project won't "result in a net loss in residential capacity."
In changing the property designation, the city would eliminate the potential for 145 single-family houses to be built, according to an environmental report.

Project proponents are seeking approval at a time when some Inland Empire communities are pushing back against warehouses.
For example, the Redlands City Council recently enacted a moratorium on industrial projects on the city's west side. Earlier, Jurupa Valley limited warehouses to its Mira Loma and Agua Mansa areas, and adopted rules for other types of businesses that generate heavy truck traffic. And Pomona is considering a 45-day moratorium on new warehouses.
At the same time, online shopping is soaring and continues to drive a regional explosion in the logistics industry.
The Moreno Valley Trade Center arrived on the dais of the Planning Commission in fall, a few months after the city completed an overhaul of its general plan, a guide for future growth.

That document designated the 80-acre project site, west of Redlands Boulevard between Eucalyptus and Encelia avenues and mostly empty except for an 8.5-acre plant nursery, as a place for houses on half-acre lots.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Hillwood is seeking permission to deviate from that new growth guide. In part because of that, Planning Commission member Jeff Sims called on the council to kill the project in a Saturday, June 11, letter.

“Why have an approved General Plan and not honor it?” Sims wrote.

Two other projects in pipeline

There are two other warehouse projects in the early stages.

One is called Edgemont Commerce Center, a proposed 142,345-square-foot warehouse distribution building on approximately 7 acres southwest of Bay Avenue and Day Street.
The other is Heacock Commerce Center, a pair of industrial buildings totaling 874,000 square feet on 46 acres southeast of Gentian Avenue and Heacock Street.
City spokesperson Matthew Bramlett said in email Thursday that environmental reports are being prepared for both projects and it’s not known when they will be completed.

Like Moreno Valley Trade Center, the Heacock project can’t be built unless the city lets the developer deviate from the general plan. Warehouses are allowed at the Edgemont site, though a zone change is required to build one bigger than 50,000 square feet.

George Hague, conservation chair for the Moreno Valley Group of the Sierra Club, said those projects are also in the wrong place because they are near homes and schools.

The California Air Resources Board submitted letters to the city warning that each project has the potential to “expose nearby communities to elevated levels of air pollution.”

In separate letters, Robert Krieger, chief of the California Air Resources Board’s Risk Reduction Branch, wrote that both projects are “in census tracts that score within the top 1 percent of State’s most impacted from air pollution from an environmental hazard and socioeconomic standpoint.”

Truck traffic, air pollution concerns

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

As for the Moreno Valley Trade Center, since the December hearing Hillwood has made changes.

The warehouse footprint has been reduced by 65,582 square feet to approximately 1,263,271 square feet, a city report states. A 35-foot-tall earthen berm, landscaped with trees and shrubs is to be built along Encelia Avenue. Truck access is to be limited to Eucalyptus Avenue. The number of loading docks is to be reduced by four, to 117, on the south side of the building, and by seven, to 97, on the north side.

Also, Hillwood has offered to build an 18-acre park at Redlands Boulevard and Ironwood Avenue that features two lighted soccer fields, a lighted baseball field, a playground, concession stand and exercise equipment.

Manuel and Arminda Del Alto, who live near Encelia Avenue, said improvements such as the berm don't alleviate concerns. They moved to Moreno Valley 14 years ago from Ontario because they wanted to escape the warehouses going up there.

"My main concern is what the trucks and cars will put in the air," said Manuel Del Alto, who has had a lung transplant.

Arminda Del Alto said they enjoy hearing birds and coyotes in the distance, and worry they will disappear.

Silvia Flores, who lives nearby with her husband, Joe, and two children ages 13 and 11, said she worries about pollution and traffic.

"It's going to be terrible to have all these trucks," Flores said.

The environmental report states that the logistics center would generate about 2,320 vehicle trips per day, including 1,436 by passenger vehicles and 885 by trucks. Under the fulfillment center scenario, the total would be 6,607 daily vehicle trips, including 5,750 passenger vehicles and 857 trucks.

Hillwood made several proposals earlier to soften the project's impact on the neighborhood, including setting aside:

- $125,000 to establish an account to purchase of at least five electric-powered heavy trucks that drive the 60 Freeway corridor through Moreno Valley
- $64,000 to create an account for defraying up to 90% of neighbors' costs of purchasing and installing noise-insulation equipment, with a per-home limit of $8,000. Eleven homes on Galino Court, Essen Lane, Gershwin Way, Mozart Way, Strauss Lane and Shubert Street would be eligible for the payments.
- $40,000 to establish an account to pay up to 90% of a homeowner's cost of purchasing and installing air filtration systems, with a per-home limit of $5,000. The same 11 households would be eligible for such payments.

- Moreno Valley council says yes — again — to World Logistics Center

Despite the offers, Sims, the planning commissioner, said, "you can't negate the smog, the traffic and the noise."

The warehouse building also would eclipse neighbors' views, he said.

On most days, they can see foothills.

"On a clear day you can see the mountains looking up toward the Big Bear area," Sims said. If the project goes in, he said, "all we will be able to see is a big wall looking to the north."

IF YOU GO

Attached is a copy of a letter sent to the Mayor, 4 Councilpersons, and the City Clerk

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Dear Mr Kelleher:

A copy of a letter sent to the Mayor, 4 Councilpersons, and the City Clerk

As I have been crossing the 215 on Cactus, Alessandro, and Eucalyptus over passes on weekdays I have noticed that the traffic along the northbound 215 is slowed to a crawl as numerous cargo trucks are on the road. They are being passed by many truck cabs that have just dropped off their trailers or are on their way to pick up trailers. We simply cannot have thousands more trucks clogging up the 60 and 215 freeways. Gridlock will inevitably result. The idling of thousands of trucks will pour fumes into the air that will result in sickness and deaths. This is not what we should want for us or our children.

Here is an article reported in the May 26th Los Angeles Times:

A decades-old plan to widen one of America's busiest cargo corridors was scrapped Thursday, as transportation officials acknowledged they must find a new way to lessen traffic without adding lanes.

The Los Angeles County Metropolitan Transportation Authority unanimously voted to end the $6-billion expansion plans for most of the 710 Freeway, **where port-bound trucks idle in traffic-choked lanes and nearby communities struggle with high rates of asthma and poor health.**

And the Times reported on May 6, 2022

Black and Latino residents make up an estimated 83% of the 1.2 million people who live along the 710 corridor. **They endure some of the worst air quality in the country. The area accounts for about**

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

20% of all particulate emissions in Southern California, according to Metro…

Moreno Valley MUST stop the proliferation of warehouses in our city! We must also stop the proposed Pilot Travel Center/Truck Stop. The interchange at Redlands Blvd cannot handle that traffic! And, proposed housing tracts in that area will negatively impacted. As the elected by the people it is up to you, the City Council, to stop this **NOW!**

Charles Smith

This is a poorly planned usage of this area. The detriment to the Community and the City as a whole will not improve the quality of life for this area. Instead it will cause massive pollution and associated medical problems for the area. It will cause increased traffic in an area that is not equipped to handle the extra truck and other vehicles. Please encourage the City Council to vote against this project. Please attach this to the Public Record.

Dear Mayor,
I am writing to you about the Moreno Valley Trade Center project. I thought the planning commission voted against this project, but now I see it is on the City Council agenda? This project is not in alignment with the general plan (the area is zoned for homes) and it will create more traffic and air pollution. If you care about the residents of Moreno Valley, and not your pocketbook, please vote against this project.

With Gratitude,
Bianca Blua, Ph.D.

RE: Moreno Valley Trade Center Project including Final Environmental Impact Report (SCH No 20210039038), GPA PEN19-0191, Change of Zone PEN19-0192, Plot Plan PEN19-0193, and Tentative parcel Map 37836.

Honorable Council Members:

The Redlands Amazon Warehouse along the I-215 Freeway is a Prime example of why this warehouse SHOULD NOT BE APPROVED.

A massive fire broke out Friday morning, June 5 at a distribution center on West Lugonia Avenue in Redlands which shuttered part of the 10 Freeway. (Photo courtesy of the Redlands Fire Department)

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

This recently built state of the art Redlands warehouse burned to the ground just two years ago. It was 600,000 square feet along the I-10 freeway. Operated by Amazon, this recently built warehouse caught on fire and burned to the ground quickly. Those driving along the freeway could feel the heat from the fire.

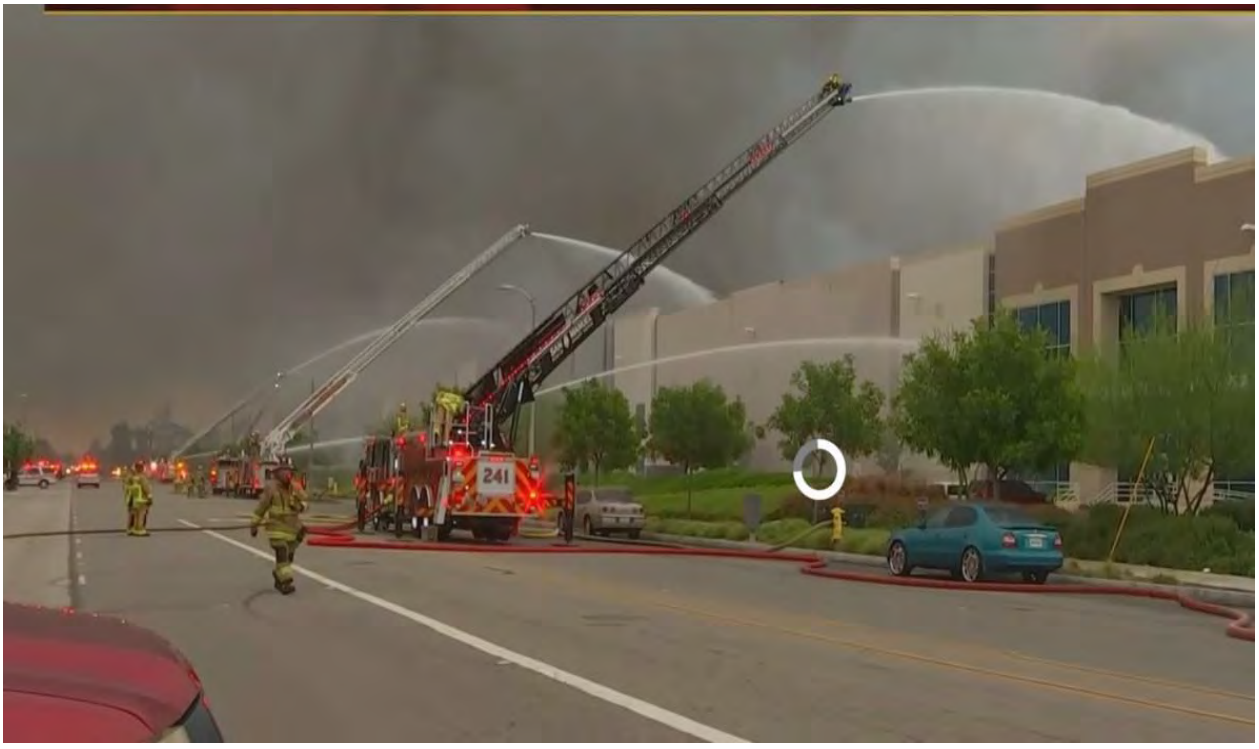
The Redlands warehouse was 600,000 sq. ft. and 45 feet in height. The Proposed warehouse is 1,328,853 sq. ft. in size and at least 100 feet in height.

Even though this recently constructed warehouse had the state of the art sprinkler system, it went up in flames quickly and was completely destroyed according to the Redlands Daily news.

There were about 100 people working inside when the fire was reported about 5:30 a.m., and they all got out safely, city spokesperson Carl Baker said.

"It went up really fast, and the whole building was involved," Baker said. He described the damage as a total loss. The damage was estimated at "hundreds of millions of dollars," Baker said.

One focus of the investigation will be why what Baker called "a state-of-the-art" sprinkler system failed to limit the fire's spread. "Obviously, the suppression system didn't work as intended," he said.
Redlands Daily News Article.



Redlands City does not have the equipment necessary to fight this type of warehouse. A large number of agencies from other cities and counties were brought in with ladder trucks to fight this Redlands City fire.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Will the fire trucks be tall enough to put water on top of a building 100 feet or more? That is much taller than the 45-foot warehouse that burned down in Redlands. Will there be enough ladder trucks to fight this type of fire with a building 100 feet tall or more? Will there be enough of a setback from the residential neighborhoods if the walls over 100 feet tall collapse during a fire? How does the City of Moreno Valley plan to fight a fire if one were to break out if this massive warehouse were to be built?

This warehouse is planned next to a residential neighborhood and homes. Yes, these warehouses catch on fire. The trucks will use residential streets even though agreements state they will not use residential streets.

A large warehouse in the City of Perris recently had a large explosion from a large 1,000 gallon propane tank. This warehouse is directly next to residential homes similar to the proposed Project. The blast from the explosion could be seen and heard from miles away. No propane tanks should be installed and used on warehouse sites. All forklifts, Goats, and equipment should be electric powered.

The Rural Association of Mead Valley is opposed to the Moreno Valley Trade Center Project for this and the following reasons. This Project is for a proposed 1,328,853 square foot Industrial warehouse building up to 100 feet in height on a 72.5-acre site and adjacent to existing single-family homes within a rural animal keeping overlay. The change in the Project Site's Land Use Designation would result in a total increase of approximately 80.04-acres of the Business Park (BP) General Plan Land Use Designation and a corresponding reduction of approximately 80.04-acres of the Residential 2 (R2) General Plan Land Use Designation.

1) a General Plan Amendment (PEN19-0191) to amend the General Plan Land Use Designation of the Project Site from Residential 2 (R2) to Business Park (BP); 2) a Change of Zone (PEN19-0192) to amend the City's Zoning Atlas to rezone the Project Site from Residential Agriculture 2 (RA2) to Light Industrial (LI) and remove the Primary Animal Keeping Overlay (PAKO) district; 3) Tentative Parcel Map (PEN19-0234) to merge 11 parcels into 1 parcel; and 4) a Plot Plan (PEN19-0193) for an approximately 1,328,853 square foot Warehouse/Distribution Building. The Project Site is located south of Eucalyptus Avenue, north of Encelia Avenue, west of Quincy Street and west or Redlands Boulevard comprising Assessor Parcel Nos. 488-340-002 through 012.

2) The Project requires a General Plan Amendment and Change of Zone from Single Family Residential land with animal keeping, a rural land use, to Industrial Zoning. This massive Industrial Project is not compatible with the surrounding residential neighborhood. The General Plan that was just updated includes the Project site as Residential housing. No indications were made during the General Plan update that this area would be changed in the near future from residential to industrial land uses. The MVTC is inconsistent with the recently approved 2040 General Plan which points out that industrial is incompatible with residential zoned areas. Policy LCC.3-2 directs the City to use "development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another". The 2040 General Plan approved in June also requires the city to screen and buffer

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

nonresidential projects to protect adjacent residential property when necessary to mitigate noise, glare and other adverse effects on adjacent lands.

The World Logistics Center and numerous other massive logistics warehouses are set to open nearby this Project location. This Project will add to the tens of thousands of additional truck trips approved on the already gridlocked I-60 Freeway. The unrealistic analysis of job creation assumes that there is a need for additional warehouse workers. The facts are that the current logistics and e-commerce warehouses cannot fill their positions. Where will these tens of thousands of additional workers come from? The best use of this land will be for single-family homes.

If the Project is constructed and used as an e-commerce fulfillment center the amount of vehicle trips is projected to be more than 5,000 vehicles per day. The MVTC's plan as a warehouse is to allow the southern entrance of the project to allow 1,000's of vehicles to access Encelia Street.

The project is located just 118 feet away the nearest family home. A 1,000-foot buffer is recommended by the California Air Resources Board (CARB) and Western Riverside Council of Governments (WRCOG) to protect the health of residents living across the street.

The Project is proposed to be built under speculation. The developer has the option of developing this Project as a fulfillment/e-commerce center or logistics warehouse.

The following significant and unavoidable environmental impacts have been identified in the Final EIR and will require mitigation but cannot be mitigated to a level of insignificance: 1) Aesthetics: Substantial Adverse Effect on a Scenic Vista; 2) Air 2 Quality: Air Quality Management Plan Conflict; 3) Air Quality: Criteria Pollutant Emissions; and 4) Greenhouse Gas Emissions: GHG Emissions Generation. Details of these significant unavoidable adverse impacts are discussed in the Final EIR and are summarized, or were otherwise provided in Section 5.3, *Environmental Effects Which Remain Significant and Unavoidable After Mitigation and Findings*, in the Statement of Facts and Findings. (Page 11).

The Environmental Justice Element is now required by the State to be a part of all General Plans. The City must "minimize any potential health risks" of new development on adjacent sensitive receptors and "designated truck routes that avoid sensitive land uses" (Policies EJ.1-3 and EJ. 1-9). The City must create a substantial buffer between homes and the warehouse. Screening must be installed along the southern and western boundaries of the Project. All truck parking and docks must be located on the north side and east side of the Project away from residential neighborhoods.

The Project is located in an area the State has designates as a Disadvantage Community under SB 535.

Although the Project has a number of entrances most warehouses use just one driveway for trucks to enter and exit, thereby reducing staffing to one gate. The Project does not have sufficient room at any of the entrances to prevent trucks from backing up onto Eucalyptus Ave.

The Project must include a substantial amount of solar power, especially if used as an e-commerce business. The current power grid is not sufficient to produce enough electricity for the current

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

customers. The drain on the power grid during summer months produces frequent brown outs throughout Southern California.

The Project is located in an area with the worst smog in the nation.

This Project will increase greenhouse gas levels that are already impacting Communities in Western Riverside County. Mead Valley is also a disadvantaged community. The impacts warehouses in Moreno Valley and Perris are having negatively impacts to the entire region. The I-215 Freeway is congested for most of the day. The I-60 Freeway is congested with thousands of trucks. This backs up traffic throughout the region. Trucks are now using residential streets to avoid the congested freeways. Cajalco Road is backed up bumper to bumper during the day. Trucks are using Van Buren, Alessandro and Cajalco to get to the I-91 to get to the Ports. Our freeways cannot add tens of thousands of additional trucks and cars from any new warehouses without severe gridlock to our freeways.

RAMV is opposed to this Project that will impact the entire region. We cannot afford to turn anymore of our residential zoned areas into Industrial zoned areas. Our freeways are already at capacity, our air quality is already the worse in the nation, and our local roads are already being impacted. Please consider all of the impacts that this Project will bring to not only Moreno Valley, but also the entire region.

Sincerely,

Debbie Walsh

Please forward to council members.

I am writing in support of the Moreno Valley Trade Center.

This project will bring the residents of Moreno Valley hundreds of good union jobs and reduce traffic by keeping people working locally. Less cars means less pollution.

Businesses being tax dollars and that helps to pay for public safety which is the residents' number one concern overall.

I ask that you vote in support of the Moreno Valley Trade Center.

To: City Clerk; Sean P. Kelleher
Subject: Moreno Valley Trade Center Comments
Date: Saturday, November 12, 2022 8:26:29 PM

Warning: External Email – Watch for Email Red Flags!

City Clerk and Planning Manager Sean P. Kelleher, for your consideration and distribution,

I am a resident of Moreno Valley (City) since 1990. I have three grown children and four small grandchildren, and they all live in the area. I am writing these comments on the subject matter because I am very concerned with the future of my children and grandchildren, and in particular, in their future ability to breathe healthy air and lead a healthful life in the City. I am writing as an individual (not as a member of a City Advisory Board member), and on behalf my family and myself.

California Attorney General (AG) Bonta Intervention on the Moreno Valley General Plan. During a press release dated July 1, 2022, the AG Bonta made it clear that according to CalEnviroScreen, Moreno Valley ranks among the highest in the state for ozone pollution (it also worth noting that the counties of San Bernardino and Riverside get an "F" on the American Lung Association's 2022 State of the Air report card for both high ozone days and particle pollution). Ozone exposure (smog) is associated with decreases in lung function, worsening of asthma, increases in hospital admissions, and a higher death rate. Mr. Bonta further argued in its petition (dated June 21, 2022) that the City did not fully account for and mitigate the environmental and public health consequences of its General Plan. Specifically, Moreno Valley fails to:

- Compare the General Plan's air quality impacts against a proper environmental baseline, which is typically defined as "the physical environmental conditions as they exist at the time" of project approval;
- Evaluate whether the General Plan would lead to a significant, cumulative increase in pollutants like ozone and particulate matter, which impacts whether the region can meet state and federal air quality standards; and
- Consider whether the General Plan would increase pollution near schools, hospitals, and other sensitive sites or otherwise negatively impact the surrounding communities.
- Implement enforceable measures required to mitigate the General Plan's anticipated greenhouse gas impacts.

All of these requirements have not been addressed by the City, and are still lacking in the Moreno Valley General Plan. It is important to address these matters before approving additional warehouses, as any approvals will be on "thin ice".

Continuous Approval of Warehouse Projects and their Impact
The City of Moreno Valley for the past several years continues to approve (or settle) additional warehouses in the City. For example, 1) it has approved the 40.6 million square feet World Logistic Center (settled in April 29, 2021 with $47 million in green technologies, conservation and minor air pollution mitigation measures), which is starting construction this year, and is projected to create more than **13,000 daily toxic diesel truck trips**, 2) there are several additional warehouse projects undergoing the City development review process, which may potentially add more than 20 million square-foot warehouse space and additional thousands of daily toxic diesel truck trips, 3) there may be others in the development process that have not necessarily been disclosed to the public.

Any reasonable and average individual does not need to run an environmental and/or cumulative impact studies to see that the currently approved World Logistic Center warehouse project, along with other warehouse projects being approved and planned, will potentially be adding more than **70-million of warehouses square footage space** that within a few years will convert the City into a "jungle" of trucks,

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

and subject it to unprecedented pollution and noise levels.

These **thousands and thousands of daily toxic diesel truck trips** will have the end result, within less than a decade, of transforming our current barely livable air quality into an environment with unbreathable air, undrivable city streets and adjacent freeways, and with all-day noise and bright lights at night, exposing its residents to continuous 7day/24hr air, noise and light pollution. Needless to say, these projects are close enough to our schools and homes, and its cumulative and local effect will directly impact our families and all those around us - **a living hell.**

The MV Trade Center Project Being Proposed Fails to Meet Proper Analysis and Fails to Protect from Pollution Impacts Current Residents and Future Generations
As indicated in comments filed on the MV General Plan during the last four years, and as also indicated recently by the California Attorney General filing, the air pollution analysis in the General Plan is faulty, and thus, any project relying on it is defective, since it relies on incorrect data.

Mr. Bonta has stated: "Communities in Moreno Valley experience some of the highest levels of air pollution in the state. We're intervening today so that those communities do not continue to bear the brunt of poor land decisions that site warehouses outside their doors. At the California Department of Justice, we're fighting day in and day out for communities who live at the intersection of poverty and pollution" (June 21, 2022).

The Moreno Valley Trade Center project in and by itself, **does not have a proper environmental baseline reflecting actual physical conditions** in the proposed project area, it **does not have a true impact evaluation of the cumulative increase of pollutants** (e.g. air, noise, water runoff, greenhouse gases, light and glare pollution) on the surrounding communities and whether they meet state and federal standards, and the project **fails to calculate the true effects of pollution** in homes, schools, hospitals and other sensitive communities in the project surrounding areas. The MVTC also needs to describe how the project is going to **mitigate the cumulative impact of pollutants** on those living within the surrounding areas of the project census tract.

We should not be adding and approving indiscriminately warehouses without fully addressing proper baselines, true evaluation of cumulative impacts and effects on the City environment and people. Doing otherwise is failing our City residents and future generations.

Warehouse Moratorium Consideration - A Necessary Step to Take Stock of Where We Are in Terms of Pollution Impacts, and to Assure a Healthy MV Community in the Present and for the Future
Many cities have considered and explored a warehouse moratorium while studying the accumulated pollution impact of warehousing on their communities. Others have outright rejected warehouse projects due to concerns of traffic, pollution, and lowering property values. A brief overview of these activities (not intended to provide a whole history) is given below:

- In June 2019, the Pomona City Council supported drafting a set of strategies to address the cumulative impacts of warehouses in their city. The strategies recommended would include an update on City zoning laws to better regulate industrial zones and long-term impacts of these projects. This will allow city officials to better address the negative impacts that these warehouse projects may have on their community, while also giving due consideration to environmental justice. The moratorium would prohibit citywide speculative industrial development and new warehouse development, except for certain expansions. The city felt it this was necessary because oftentimes projects are built near communities of color, and this forces many neighbors to breathe diesel exhaust from warehouse activities, particularly in "disadvantaged-communities".
- The cities of Chino, Colton, Riverside and Jurupa Valley have also enacted similar moratoriums.
- The City of Redlands enacted a temporary ban on non-housing development in a portion of their City on June 7, and was considering a ban for their entire City.
- In August 2022, the City of Norco approved a a 45-day moratorium on warehousing to give city officials

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

time to find the potential and cumulative impact of warehousing on public safety, health and welfare. This would allow time to develop proper zoning, regulations and standards for future logistics sites.
- In October 2022, the Beamont City Council rejected several warehouse projects due to concerns with polluting truck traffic, pollution and ruining property values.

It is time for the Moreno Valley Mayor and Council to **consider a warehouse moratorium** to take stock of where we are in terms of polluting levels, properly model and project where we will be in terms of pollution impacts if all approved warehouse projects were to be built, and take the necessary steps now to mitigate these polluting impacts.

The State-of-Affairs of the Climate Crisis According to World Leaders and Its Implications to the City of Moreno Valley
On November 7, 2022, the Chief of the United Nations put it very clearly and bluntly during the International Climate Conference: We as the world are on "**a highway to climate hell with our foot on the accelerator**", and warned world leaders to "**cooperate or perish**". Former U.S. Vice President Al Gore stated: "**Choose life over death ... It is not time for moral cowardice".**

What this means to our Moreno Valley Mayor and Councilmembers, is to remove their foot from the accelerator of implementing polluting warehouses in our city, and to choose to bring into the city products and services that **will save our lives**, such as electric vehicles manufacturing, medicine related products, planting extensively trees along the major streets in our city, and other climate crisis mitigation related activities. Our city leaders need to have the courage and perform the hard work to lead the City into a leadership position in the Inland Empire where mitigation of the climate crisis is a priority, and a way of life.

Doing otherwise is failing our current city residents and future generations, and **effectively choosing death over life**.

Conclusions

- Concerns from the California Attorney General need to be addressed address before approving additional warehouses, as any approvals will be on "thin ice".
- Warehouse projects already approved or in the pipeline will add **thousands and thousands of daily toxic diesel truck trips** within less than a decade, transforming our current barely livable air quality into an environment with unbreathable air, undrivable city streets and adjacent freeways, and with all-day noise and bright lights at night, exposing its residents to continuous 7day/24hr air, noise and light pollution. **A true living hell**.
- The MV Trade Center **should not be approved as it does not have a proper environmental baseline reflecting actual physical conditions** in the proposed project area, it **does not have a true impact evaluation of the cumulative increase of pollutants** (e.g. air, noise, water runoff, greenhouse gases, light and glare pollution) on the surrounding communities, and the project **fails to calculate the true effects of pollution** in homes, schools, hospitals and other sensitive communities. The MVTC also needs to describe how the project is going to **mitigate the cumulative impact of pollutants** on those living within the surrounding areas of the project census tract. We should not be adding and approving indiscriminately warehouses without fully addressing proper baselines, true evaluation of cumulative impact and effects on the City environment and people. Doing otherwise is failing our City residents and future generations.
- It is time for the Moreno Valley Mayor and Council to **consider a warehouse moratorium** to take stock of where we are in terms of polluting levels, properly model and project where we will be in terms of pollution impacts if all approved warehouse projects were to be built, and take the necessary steps now to mitigate these polluting impact.
- It is time for the Moreno Valley Mayor and Council to **remove their foot from the accelerator of implementing polluting warehouses** in our city, and to choose to bring into the City products and services that **will save our lives**, such as electric vehicles manufacturing, medicine related products, planting extensively trees along the major streets in our city, and other related climate

I am writing in support of the Moreno Valley Trade Center.

This project will bring the residents of Moreno Valley hundreds of good union jobs and reduce traffic by keeping people working locally. Less cars means less pollution.

Businesses being tax dollars and that helps to pay for public safety which is the residents' number one concern overall.

I ask that you vote in support of the Moreno Valley Trade Center.

Warning: External Email – Watch for Email Red Flags!

Honorable Mayor and Councilmembers;

Please include these comments as part of the record for the above-mentioned public hearing. I am a resident of the Heritage Ranch community, the southern border of this proposed project. **We again ask you to uphold the Planning Commission's denial of entitlements for this project** for the same reasons that were voiced on December 7, 2021, during the applicant's appeal of their decision. While it is true that the developer has reached out to me with some proposed changes that will eliminate the traffic exiting onto Encelia Ave., **the environmental impact has not changed**. There will still be the **same amount of pollution in our neighborhood** as described in the FEIR, the **same truck and employee traffic congestion at the roundabout of Redlands and Eucalyptus**, and the **same property devaluation** to our homes if this project is approved.

I believe that the people in the affected community should have the most credibility because we also represent the children to be affected by the decisions of people and interests that do not hold or care about the well-being of our community. There are always paid workers that claim to live amongst us or live in Moreno Valley at large to lobby for destructive and irreversible policy prescriptions for our neighborhood in the name of revenue and personal gain or greed. It is frustrating to listen to and deal with knowing those people who are for projects in our community do not live here. If the same questionable projects were dropped in their community they would disapprove. It is shocking to us that some of the things that people believe are "Good for Moreno Valley". Really? Good for who? These outside interests wanting and praising this project as a net positive for Moreno Valley do not live in this community. This is not a good project... If you approved this project then you will want to approve the Pilot Truck stop next... I would like to not assume that you care more about city revenue than the health and well-being of the people in your community.

Mr. Marquez, Cabrera, and Delgado, you were ready to vote no on December 7th after listening to us. The June 21, 2022 vote was conveniently postponed till Nov 15th right after the current elections. Again, please revisit the project's location and **visualize the magnitude**

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

of a 1.3 million sq. ft. building and what it will do to our neighborhood.

The same sentiments are shared for the MVBC.

If these developers are offering $500,000 to the city to develop in areas that will cause irreparable harm to the community then there must be something that is innately wrong with the project. It does not fit in with this community and my children will pay the price for greed and power. This behavior that is being tolerated does not fit in with our progressive agenda and typifies the corporate monster that is allowed to propagate itself in retrospect to what you ran on as politicians and supposed protectors of the community.

The sad part is that we will rehash the sideshow of union workers claiming to be a part of our community that somehow we never see at our local meetings tell us how good this project is for Moreno Valley, to say nothing of how it will affect the immediate local residents. These actors are not in fact a part of our local community. They have no interest in our concerns about why this project's location and proximity to our community is a net negative.

At the end of the day, I like business and growth... Just not at the expense of my home, children, and community. This project can exist... They just need to move it into the area that was already zoned for this... Move it off Theodore...

Warning: External Email – Watch for Email Red Flags!

I am sending you this email to implore you all to vote no on the 1.26 million sq ft Moreno Valley Trade Center! You all say you want what is best for the residents of Moreno Valley, well how could this warehouse possibly be good for us? Imagine what this huge warehouse would do to our quality of life, it could possibly shorten our lives! In the meantime, while your yes vote would be killing us, we would also have to suffer the additional truck traffic! It already takes me 30 minutes to get out of Moreno Valley!

The planning Commission voted against the MVTC so the developer is now trying to sweeten the deal by offering a sports park! And now I just learned that they are also promising the Moreno Valley Community Foundation $500,000 to sweeten the deal even more. I am not sure how many of you are on the board of MVCF but please do not let this bribe or whatever you prefer to call it influence your NO vote!

If you truly are for the people of Moreno Valley, then vote NO on the MVTC.

Sincerely,

Linda Castellano
34-year resident of Moreno Valley

Warning: External Email – Watch for Email Red Flags!

Good Afternoon Councilman Cabrera,

Congratulations on the outcome of the election. How I hope you can bring some change to what seems to be the city's philosophy that all things warehouse are good. We need a leader that puts community residents first while focusing on appropriate and diverse development for a broader spectrum of opportunities in Moreno Valley. Besides, next door to this project site is the WLC with land available for 30 similar size warehouses.

Since the last hearing, the developer has sweetened the deal with an offer to build a park, contribute $500,000 to a city foundation and made campaign contribution. If an established local business wanted to make a contribution to the city, it would appear to be a neighborly thing to do. But as an enticement to get a project approved is just not right. Remember that Ex-Councilman Co went to jail for taking a bribe to get a land use and zoning change. Only difference here is the offer is made to the city publicly with one string attached, the project must be approved. These offers offend me and it should do so to you too. Remember, they do nothing to offset the project impacts.

The staff report implies that the developer now considers building an e-commerce distribution center and needs a 100-foot-tall building. Previously, we were told that would not be the option. This will be the largest building by cubic feet anywhere in the region and with it will be even more traffic not previously discussed publicly.

Please put forth a Condition of Approval limiting the height of this warehouse to 50 feet even if you don't what the project approved. At least this would limit the facility should others vote to approve.

There are a litany of environmental impacts this project will bring that simply cannot be mitigated or even mitigated to the fullest financially feasible. Instead, the developer is burdening the city while enticing the project's approval with financial incentives.

Attached is a letter outlining the full range issues this project fails to meet according to the MoVal 2040 General Plan. Please take a look at what the General Plan asks for and consider whether we really need another warehouse when we need housing and job diversity.

Please uphold the Planning Commissions denial of the Moreno Valley Trade Center.

Sincerely,
Tom Thornsley

November 14, 2022

To: Council Members Cabrera,
City of Moreno Valley

Subject: Request to not overturn Planning Commission Denial of the Moreno Valley Trade Center

Dear Council Member Cabrera,

Having resided just south of the proposed Moreno Valley Trade Center (MVTC) and next to the World Logistics Center (WLC), for many years, it is my hope that you can understand my and all most all those on this end of town objecting to yet another warehouse near us. We ask that you agree with the Planning Commissions denial of this project. Just east of this project, the WLC has the potential to build 30 similar sized warehouses. So, why the need for one more at the cost of losing valuable residential, increasing air pollution, intensifying truck traffic, and further impacting and devaluating residential property.

You should take note that there are a broad range of reasons why this project should have be approved. Yes some are personal but may have to do with quality of life, environmental impacts, and inconsistencies with the MoVal 2040 General Plan.

Planning staff for the city should never have overlooked the following issues and standards. What follows are passages taken directly from the General Plan that defend the need to deny this project for its inconsistencies with the General Plan. ***(My comments in the following passages are those in bold italics.)***

MoVal 2040 General Plan Goals, Policies, Actions

POLICIES
LCC.1-1: Foster a balanced mix of employment, housing, educational, entertainment, and recreational uses throughout the city to support a complete community.
LCC.1-2: Expand employment opportunities locally and provide sufficient lands for commercial, industrial, residential and public/quasi-public uses while ensuring that a high quality of life is maintained in Moreno Valley.

Growth Management
POLICIES
LCC.1-12: Balance levels of employment and housing within the community to provide more opportunities for Moreno Valley residents to work locally, cut commute times, and improve air quality.

(There is already a surplus of logistic jobs in the city and the WLC expects to add 20,000 more. Its time to diversify our employment base so fewer of us have to commute to non-logistics jobs.)

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

(The following is the argument against any warehouse going next to residential. MVTC does not meet these criteria from the MoVal 2040 General Plan)

BUILDING AND SITE DESIGN

Building Massing and Design Building massing refers to the visual dominance of buildings, while building design refers to a building's architectural features. Building massing and design controls are crucial for ensuring appropriate, sensitive development, particularly when it is adjacent to existing residential neighborhoods. Building massing and design measures to be considered include providing for sensitive transitions between new and existing development so as to reduce impacts to existing neighborhoods, incorporating human and pedestrian-scaled design for new commercial and mixed-use development, and building design that incorporates visual quality and interest to contribute to place making.

(The MVTC proposal has the option to build a 100 foot tall warehouse which not appears very likely and this further violates it original intent and further impacts the visual character of the community.)

Goal LCC-3: Build a distinctive sense of place and pride in Moreno Valley.

General

POLICIES LCC.3-1: Insist on high-quality development that is sensitive to surrounding context throughout the city and particularly in centers and corridors. ***(Warehouses don't belong adjacent to residential.)***

LCC.3-2: Use development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another. ***(This is what the City fails to do all the time. In fact, little exists in the development standards to assure this can be done.)***

Planning for a Pleasant, Healthy Noise Environment

Integrating noise reduction into the planning and design of projects can help address the potential for increased noise as development occurs and ensure a healthy and pleasant noise environment for residents and visitors alike. Proactively reducing noise at its source, separating and buffering noisy land uses, and designing for a quiet indoor environment will contribute to a healthy, livable neighborhood and a vibrant local economy.

In a vibrant city, some noise is inevitable, and making sure that noise-sensitive land uses such as schools and housing are separated from noisy uses is important to ensuring a pleasant, healthy noise environment for all. Land uses have different levels of compatibility relative to noise, and the State of California mandates that general plans include noise level compatibility standards for the development of land as a function of a range of noise exposure values

The City has adopted Good Neighbor Guidelines for warehouse and distribution facilities into the zoning code that specify requirements to minimize the potential for impacts from these facilities on surrounding areas, including limiting noise generating activities near residential areas.

(The MVTC is a massive warehouse that will be operating 24/7. Although expected noise levels will not physically harm the nearby residents, the constant background noise will disturb the peace and tranquility they would have expected to enjoy when the project site developed with homes as designated in MoVal 2040.)

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Goal N-1: Design for a pleasant, healthy sound environment conducive to living and working.
POLICIES
N.1-2: Guide the location and design of transportation facilities, industrial uses, and other potential noise generators to minimize the effects of noise on adjacent land uses.
N.1-5: Noise impacts should be controlled at the noise source where feasible, as opposed to at receptor end with measures to buffer, dampen, or actively cancel noise sources. Site design, building orientation, building design, hours of operation, and other techniques, for new developments deemed to be noise generators shall be used to control noise sources.
N.1-6: Require noise buffering, dampening, or active cancellation, on rooftop or other outdoor mechanical equipment located near residences, parks, and other noise sensitive land uses.

Goal N-2: Ensure that noise does not have a substantial, adverse effect on the quality of life in the community.
ACTIONS N.2-A: Continue to maintain performance standards in the Municipal Code to ensure that noise generated by proposed projects is compatible with surrounding land uses.
N.2-B: Update the Municipal Code to establish controls on outdoor noise in public places, such as outdoor dining terraces in commercial mixed use areas, public plazas, or parks. Controls may include limits on noise levels or hours of operation.

AIR QUALITY
Pollution Control Statewide, 35 local air pollution control districts regulate emissions from businesses and stationary facilities, ranging from oil refineries to auto body shops and dry cleaners. Moreno Valley is located within the South Coast Air Basin, which is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The Basin is designated as in "nonattainment" for select State air quality standards, which means that air pollutant emissions exceed acceptable levels for the region, indicating poor air quality.

EJ.1-C: Consider establishing a fee to be paid by new development to assist in the funding of local projects that contribute to the enhancement of air quality, particularly in DACs.
EJ.1-D: Work with the distribution and warehousing business community to improve outdoor air quality through improved operations and practices, such as planning for zero emissions trucks and vans.

Circulation
POLICIES
C.3-1: Strive to maintain Level of Service (LOS) "C" on roadway links, wherever possible, and LOS "D" in the vicinity of SR 60 and high employment centers. Strive to maintain LOS "D" at intersections during peak hours.
C.3-3: Where new developments would increase traffic flows beyond the LOS C (or LOS D, where applicable), require appropriate and feasible improvement measures as a condition of approval. Such measures may include extra right-of-way and improvements to accommodate additional left-turn and right-turn lanes at intersections, or other improvements.
C.3-4: Require development projects to complete traffic impact studies that conduct vehicle miles traveled analysis and level of service assessment as appropriate per traffic impact study guidelines.
(With the surplus of logistics job in Moreno Valley employees will be traveling here from greater distances which is not addressed in the traffic impact study.)

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

C.3-8: Ensure that new development pays a fair share of costs to provide local and regional transportation improvements and to mitigate cumulative traffic deficiencies and impacts.
(Moreno Valley has adopted the lowest Development Impact Fees for traffic mitigation in the entire region as noted in the last DIF Update report. This would seem unreasonable considering the city's push to be a logistics hub and point of dispersement for e-commerce.)

(Please note that even the city's Municipal Code states that there should be transitional uses separating Warehousing from Residential. It does not matter the title of District designation for a particular piece of property as much as what uses are proposed creating conflicts adjacent uses.)

Moreno Valley
Municipal Code Development Standards

9.05.020 Industrial districts.

A. Business Park District (BP). The primary purpose of the business park (BP) district is to provide for light industrial, research and development, office-based firms and limited supportive commercial in an attractive and pleasant working environment and a prestigious location. This district is intended to provide a transition between residential and other sensitive uses and more intense industrial and warehousing uses.

B. Light Industrial District (LI). The primary purpose of the light industrial (LI) district is to provide for light manufacturing, light industrial, research and development, warehousing and distribution and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial uses on a limited basis. This district is intended as an area for light industrial uses that can meet high performance standards. This district requires buffering between residential districts and industrial and warehouse structures greater than fifty thousand (50,000) square feet in building area within the LI district. Please refer to the special site development standards in Section 9.05.040(B)(9).

Everyone living in Moreno Valley depends on the City Council to look out for them. The denied Moreno Valley Trade Center warehouse proposal would seems warranted for a number of reasons express by the Planning Commission, local residents, and the facts outlined in this letter. It is unsettling to think that those people living the neighborhood south of this warehouse will be looking at a 100 foot tall building wall running the entire length of the neighborhood when a project of this type should never have been proposed here to being with.

Hope you give my thoughts sincere consideration and look out for the quality of life the Moreno Valley community and those residents that will be directly impacted by this warehouse and those traveling on Redlands Boulevard. **This project needs to be denied** and left to be developed as a residential area.

Sincerely
Tom Thornsley

Mayor Gutierrez,

Times are changing in Moreno Valley and hopefully you understand the sentiments of those near the site of the Moreno Valley Trade Center. They spoke up and the Planning Commission made the right decision to deny this project. As Councilman DelGado stated; "this is a good project but in the wrong location." Most realize that just across the street the WLC project has land capable of hosting 30 similar warehouses. Therefore, this area should be maintained for housing.

Attached is my full letter outlining the shortcoming of this project that have merit and should be considered. Please take a look at it and vote to uphold the Planning Commissions denial.

Sincerely,
Tom Thornsley

Building massing and design controls are crucial for ensuring appropriate, sensitive development, particularly when it is adjacent to existing residential neighborhoods. Building massing and design measures to be considered include providing for sensitive transitions between new and existing development so as to reduce impacts to existing neighborhoods, incorporating human and pedestrian-scaled design for new commercial and mixed-use development, and building design that incorporates visual quality and interest to contribute to place making.

(The MVTC proposal has the option to build a 100 foot tall warehouse which not appears very likely and this further violates it original intent and further impacts the visual character of the community.)

Goal LCC-3: Build a distinctive sense of place and pride in Moreno Valley.

General

POLICIES LCC.3-1: Insist on high-quality development that is sensitive to surrounding context throughout the city and particularly in centers and corridors. ***(Warehouses don't belong adjacent to residential.)***

LCC.3-2: Use development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another. ***(This is what the City fails to do all the time. In fact, little exists in the development standards to assure this can be done.)***

Planning for a Pleasant, Healthy Noise Environment

Integrating noise reduction into the planning and design of projects can help address the potential for increased noise as development occurs and ensure a healthy and pleasant noise environment for residents and visitors alike. Proactively reducing noise at its source, separating and buffering noisy land uses, and designing for a quiet indoor environment will contribute to a healthy, livable neighborhood and a vibrant local economy.

In a vibrant city, some noise is inevitable, and making sure that noise-sensitive land uses such as schools and housing are separated from noisy uses is important to ensuring a pleasant, healthy noise environment for all. Land uses have different levels of compatibility relative to noise, and the State of California mandates that general plans include noise level compatibility standards for the development of land as a function of a range of noise exposure values

The City has adopted Good Neighbor Guidelines for warehouse and distribution facilities into the zoning code that specify requirements to minimize the potential for impacts from these facilities on surrounding areas, including limiting noise generating activities near residential areas.

(The MVTC is a massive warehouse that will be operating 24/7. Although expected noise levels will not physically harm the nearby residents, the constant background noise will disturb the peace and tranquility they would have expected to enjoy when the project site developed with homes as designated in MoVal 2040.)

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Goal N-1: Design for a pleasant, healthy sound environment conducive to living and working.
POLICIES
N.1-2: Guide the location and design of transportation facilities, industrial uses, and other potential noise generators to minimize the effects of noise on adjacent land uses.
N.1-5: Noise impacts should be controlled at the noise source where feasible, as opposed to at receptor end with measures to buffer, dampen, or actively cancel noise sources. Site design, building orientation, building design, hours of operation, and other techniques, for new developments deemed to be noise generators shall be used to control noise sources.
N.1-6: Require noise buffering, dampening, or active cancellation, on rooftop or other outdoor mechanical equipment located near residences, parks, and other noise sensitive land uses.

Goal N-2: Ensure that noise does not have a substantial, adverse effect on the quality of life in the community.
ACTIONS N.2-A: Continue to maintain performance standards in the Municipal Code to ensure that noise generated by proposed projects is compatible with surrounding land uses.
N.2-B: Update the Municipal Code to establish controls on outdoor noise in public places, such as outdoor dining terraces in commercial mixed use areas, public plazas, or parks. Controls may include limits on noise levels or hours of operation.

AIR QUALITY
Pollution Control Statewide, 35 local air pollution control districts regulate emissions from businesses and stationary facilities, ranging from oil refineries to auto body shops and dry cleaners. Moreno Valley is located within the South Coast Air Basin, which is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The Basin is designated as in "nonattainment" for select State air quality standards, which means that air pollutant emissions exceed acceptable levels for the region, indicating poor air quality.

EJ.1-C: Consider establishing a fee to be paid by new development to assist in the funding of local projects that contribute to the enhancement of air quality, particularly in DACs.
EJ.1-D: Work with the distribution and warehousing business community to improve outdoor air quality through improved operations and practices, such as planning for zero emissions trucks and vans.

Circulation
POLICIES
C.3-1: Strive to maintain Level of Service (LOS) "C" on roadway links, wherever possible, and LOS "D" in the vicinity of SR 60 and high employment centers. Strive to maintain LOS "D" at intersections during peak hours.
C.3-3: Where new developments would increase traffic flows beyond the LOS C (or LOS D, where applicable), require appropriate and feasible improvement measures as a condition of approval. Such measures may include extra right-of-way and improvements to accommodate additional left-turn and right-turn lanes at intersections, or other improvements.
C.3-4: Require development projects to complete traffic impact studies that conduct vehicle miles traveled analysis and level of service assessment as appropriate per traffic impact study guidelines.
(With the surplus of logistics job in Moreno Valley employees will be traveling here from greater distances which is not addressed in the traffic impact study.)

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

C.3-8: Ensure that new development pays a fair share of costs to provide local and regional transportation improvements and to mitigate cumulative traffic deficiencies and impacts.
(Moreno Valley has adopted the lowest Development Impact Fees for traffic mitigation in the entire region as noted in the last DIF Update report. This would seem unreasonable considering the city's push to be a logistics hub and point of dispersement for e-commerce.)

(Please note that even the city's Municipal Code states that there should be transitional uses separating Warehousing from Residential. It does not matter the title of District designation for a particular piece of property as much as what uses are proposed creating conflicts adjacent uses.)

Moreno Valley
Municipal Code Development Standards

9.05.020 Industrial districts.

A. Business Park District (BP). The primary purpose of the business park (BP) district is to provide for light industrial, research and development, office-based firms and limited supportive commercial in an attractive and pleasant working environment and a prestigious location. This district is intended to provide a transition between residential and other sensitive uses and more intense industrial and warehousing uses.

B. Light Industrial District (LI). The primary purpose of the light industrial (LI) district is to provide for light manufacturing, light industrial, research and development, warehousing and distribution and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial uses on a limited basis. This district is intended as an area for light industrial uses that can meet high performance standards. This district requires buffering between residential districts and industrial and warehouse structures greater than fifty thousand (50,000) square feet in building area within the LI district. Please refer to the special site development standards in Section 9.05.040(B)(9).

Everyone living in Moreno Valley depends on the City Council to look out for them. The denied Moreno Valley Trade Center warehouse proposal would seems warranted for a number of reasons express by the Planning Commission, local residents, and the facts outlined in this letter. It is unsettling to think that those people living the neighborhood south of this warehouse will be looking at a 100 foot tall building wall running the entire length of the neighborhood when a project of this type should never have been proposed here to being with.

Hope you give my thoughts sincere consideration and look out for the quality of life the Moreno Valley community and those residents that will be directly impacted by this warehouse and those traveling on Redlands Boulevard. **This project needs to be denied** and left to be developed as a residential area.

Sincerely
Tom Thornsley

Warning: External Email – Watch for Email Red Flags!

Good Afternoon Councilman DelGado,

Seems it is time to consider the Trade Center project again. Months ago, you appeared ready to agree with the Planning Commission's vote to deny the project. Recall you saying this was a good project is the wrong location. You are right. Next door, to the east, is the WLC with land available for 30 similar size warehouses. Since then, the developer has sweetened the deal with an offer to build a park. contribute $500,000 to enhance the city and campaign donations. If an established local business wanted to make a contribution to the city, it would appear to be a neighborly thing to do. But as an enticement to get a project approved is just not right. These offers offend me and it should do so to you too.

The staff report implies that the developer now considers to build an e-commerce distribution center from a 100-foot-tall building. Previously, we were told that would not be the option. This will be the largest building by cubic feet anywhere in the region and with it will be even more traffic not previously discussed publicly.

There are a litany of environmental impacts this project will bring that simply cannot be mitigated or even mitigated to the fullest financially feasible. Instead, the developer is burdening the city while enticing the project's approval with financial donations.

Attached is a letter outlining the full range issues this project fails to meet according to the MoVal 2040 General Plan. Please take a look at what the General Plan asks for and consider whether we really need another warehouse next to an area already established to produce as many as 30 similar warehouse. We need housing and job diversity.

Please uphold the Planning Commissions denial of the Moreno Valley Trade Center.

Sincerely,
Tom Thornsley

November 14, 2022

To: Council Members DelGado,
City of Moreno Valley

Subject: Request to not overturn Planning Commission Denial of the Moreno Valley Trade Center

Dear Council Member DelGado,

Having resided just south of the proposed Moreno Valley Trade Center (MVTC) and next to the World Logistics Center (WLC), for many years, it is my hope that you can understand my and all most all those on this end of town objecting to yet another warehouse near us. We ask that you agree with the Planning Commissions denial of this project. Just east of this project, the WLC has the potential to build 30 similar sized warehouses. So, why the need for one more at the cost of losing valuable residential, increasing air pollution, intensifying truck traffic, and further impacting and devaluating residential property.

You should take note that there are a broad range of reasons why this project should have be approved. Yes some are personal but may have to do with quality of life, environmental impacts, and inconsistencies with the MoVal 2040 General Plan.

Planning staff for the city should never have overlooked the following issues and standards. What follows are passages taken directly from the General Plan that defend the need to deny this project for its inconsistencies with the General Plan. ***(My comments in the following passages are those in bold italics.)***

MoVal 2040 General Plan Goals, Policies, Actions

POLICIES
LCC.1-1: Foster a balanced mix of employment, housing, educational, entertainment, and recreational uses throughout the city to support a complete community.
LCC.1-2: Expand employment opportunities locally and provide sufficient lands for commercial, industrial, residential and public/quasi-public uses while ensuring that a high quality of life is maintained in Moreno Valley.

Growth Management
POLICIES
LCC.1-12: Balance levels of employment and housing within the community to provide more opportunities for Moreno Valley residents to work locally, cut commute times, and improve air quality.

(There is already a surplus of logistic jobs in the city and the WLC expects to add 20,000 more. Its time to diversify our employment base so fewer of us have to commute to non-logistics jobs.)

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

(The following is the argument against any warehouse going next to residential. MVTC does not meet these criteria from the MoVal 2040 General Plan)

BUILDING AND SITE DESIGN

Building Massing and Design Building massing refers to the visual dominance of buildings, while building design refers to a building's architectural features. Building massing and design controls are crucial for ensuring appropriate, sensitive development, particularly when it is adjacent to existing residential neighborhoods. Building massing and design measures to be considered include providing for sensitive transitions between new and existing development so as to reduce impacts to existing neighborhoods, incorporating human and pedestrian-scaled design for new commercial and mixed-use development, and building design that incorporates visual quality and interest to contribute to place making.

Warning: External Email – Watch for Email Red Flags!

Good Afternoon Councilman Marquez,

Seems it is time to consider the Trade Center project again. You have honored your constituents on the east end and we know you will agree with the Planning Commission's vote to deny the project. However, since you last considered this appeal, the developer has put out golden carrots offering to build a sports park, contribute $500,000 to a community foundation and made campaign contributions. I view these offers and a means of bribing the elected official to approve the project. If an established local business wanted to make a contribution to the city, it would appear to be a neighborly thing to do. Remind everyone that Ex-Councilman Co went to jail for taking a bribe to get a land use and zoning change. Only difference here is the offer is made to the city publicly with strings attached. No project, no enhancements or funding. These offers offend me and it should do so to you too.

The staff report implies that the developer now considers building an e-commerce distribution center from a 100-foot-tall building. Previously, we were told that would not be the option. This will be the largest building by cubic feet anywhere in the region and with it will be even more traffic not previously discussed publicly.

Please put forth a Condition of Approval limiting the height of this warehouse to 50 feet even if you don't what the project approved. At least this would limit the facility should other vote to approve.

Attached is a letter outlining the full range issues this project fails to meet according to the MoVal 2040 General Plan. Please take a look at what the General Plan asks for and consider whether we really need another warehouse next to an area already established to produce as many as 30 similar warehouse. We need housing and job diversity.

Please uphold the Planning Commissions denial of the Moreno Valley Trade Center.

Sincerely,
Tom Thornsley

Re: Public Comments—November 15, 2022 City Council Meeting, Public Hearing Agenda Item F1: Moreno Valley Trade Center/Park Project including Final Environmental Impact Report (SCH No. 2020039038), General Plan Amendment PEN19-0191, Change of Zone PEN19-0192, Plot Plan PEN19-0193, and Tentative Parcel Map 37836

Dear City of Moreno Valley City Council:

Please accept these comments on behalf of the Sierra Club-San Gorgonio Chapter regarding the proposed Moreno Valley Trade Center/Park Project ("the Project"). This Project is currently scheduled for a public hearing before the City Council **on November 15, 2022, Item F1.** This Project has been appealed by the developer following the Planning Commission's decision to deny the Project in October 2021.

The City Council should uphold the Planning Commission's denial of this Project. By a vote of 4-0, the Planning Commission voted to deny this Project because,

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

> the Proposed Project's warehouse and logistics center option was 1) inconsistent with the City's General Plan; and 2) the Proposed Project's warehouse and logistics center option would result in significant and unavoidable impacts to the surrounding community. (June 2022 Staff Report p. 1452)

Indeed, this Project represents poor planning as it locates a massive warehouse complex within 118 feet of existing homes. It brings more localized impacts to your citizens who are already overburdened by the effects of industrial development. The Project is blatantly inconsistent with the City's General Plan which sets forth policies and goals to prevent this very type of incompatible development.

Moreover, the City Council should not be persuaded by the proposed "changes" to the Project's site design. These changes do little to mitigate the Project's impacts. For instance, the applicant has proposed to reduce the number of loading docks on the south side of the building by 4 docks and to reduce the building pad by 3 feet. These changes do not address the major land use and environmental impacts presented by the Project.

I. The City Should Not Approve a 1.2+ million square foot, 100-Foot Industrial Building Adjacent to Existing Single-Family Homes

Regardless of the Project's purported size reduction by approximately 65,000 square feet, the Project will construct and operate *either* a warehouse distribution/logistics use *or* a "e-commerce/fulfillment" use adjacent to existing single-family residences. The building could be up to 100 feet in height. The Staff Reports focus on the "smaller" "48 or 60 foot" building, with the Project intended as a distribution facility, but the Environmental Impact Report ("EIR") purports to evaluate, and therefore provide environmental clearance for, *either* development scenario *including the "100 foot" building option.*

The application should be denied because the Project—whether built to 100 feet or 48/60 feet—is fundamentally incompatible with surrounding uses, even with the purported site plan changes described in the Staff Report that were not evaluated through the EIR review process. The Project site is currently zoned residential; *existing single-family homes are located immediately south of the Project site* in a residential zone on the south side of Encelia Avenue. In contrast to surrounding uses, the Project proposes a massive, 1.2+ million square foot building to operate as a truck-intensive logistics or "e-commerce" center. If allowed, this building would substantially alter and degrade the quality of the existing environment. **Closest residences are located a mere 118 feet from the site**. Residents to the south of the site will be exposed to views of the 100-foot monolithic, walled building, especially as the record indicates the building will be constructed on an elevated pad. Reducing the elevation of the pad by a *few feet* (approximately 3 feet) will not eliminate the visual impacts of the proposed Project; nor is there any evidence in the record to support the recent claims that the visual impacts of the Project are eliminated as a result of the proposed changes to the Project's design. There are no aesthetic renderings or visual representations to support these claims.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

In addition to the physical changes to the environment presented by the Project, the Project's intense industrial operations conflict with surrounding uses. Under the "warehouse distribution building option", the building may have 117 loading docks on its south elevation as well as 97 docks on the north elevation. There is no justification for placement of loading docks on the south side of the building other than the applicant's desire to maximize the full site. Big-rig trucks will pass through and maneuver at the site along the south side of the building (indeed, site plans indicate a *vehicle lane* along the south side of the facility), subjecting residents to the Project's noise and air pollution.

The Project could be designed to: (1) locate dock doors on the northern elevation only, reducing the direct impacts to residents and presumably reducing the number of truck trips to/from the site; and (2) construct a building of no more than 48 or 60 feet comparable to existing warehouses in the City. Instead, **the site has been maximized with development** (horizontally in both development scenarios, and vertically in the "e-commerce building" scenario).

II. The City Does Not Need More Warehouse/Logistics Center Industrial Space

The City has approved a multitude of warehouse projects in the last fifteen years including the 40+ million square foot World Logistics Center project which is located in the immediate proximity of the Project before you. These projects include:

- March Business Center (2009) – General Plan Amendment to allow **1,484,407** square feet of industrial warehouse space on 66.9-acres.
- Master Plot Plan PA07-0035 (2010) - **409,598** square foot industrial warehouse
- West Ridge Commerce Center (2011) - **937,260** square foot warehouse distribution building
- VIP Moreno Valley Project (2012) - **1,616,133** square foot warehouse space
- First Inland Logistics Center II Project (2013) - **400,130** square feet warehouse space
- First Nandina Logistics Center Project (2014) - **1,450,000** square feet warehouse space
- Prologis Eucalyptus Industrial Park Project (2015) - **2,244,419** square feet of warehouse uses including a General Plan Amendment from residential to Light Industrial
- World Logistics Center (2015) - **40.6 million** square feet of warehouse logistics development on 3,918 acres in eastern Moreno Valley. ***The World Logistics Center Project – immediately east of Redlands Avenue - will be located almost adjacent to the proposed Project.***
- Indian Street Commerce Center Project (2016) - **446,350** square feet of warehouse space
- Moreno Valley Logistics Center (2016) - **1,736,180** total square feet of warehouse space
- Brodiaea Commerce Center (2017) - **262,398** square foot warehouse including a rezone from Business Park-Mixed Use to "Light Industrial"

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

- Moreno Valley Business Park (2021) - **220,390** square feet of warehouse logistics development including a General Plan Amendment to from commercial to light industrial
- Heacock Commerce Center (2021) – application for a **General Plan Amendment** and Change of Zone for two high cube industrial buildings totaling **873,967** square feet
- Compass Danbe Center Point (2021) – application for a **General Plan Amendment** to allow for the development of two light industrial buildings of **389,603** square feet
- Edgemont Commerce Center (2022) – application for the development of a 142,325-square foot commerce center project

There is no justification for yet more warehouse space particularly given that virtually all these projects, like the current Project, result in significant air quality impacts. The burden of these projects falls on your residents. The City should promote development that does not compromise the health and welfare of its citizens, especially vulnerable persons such as children and the elderly as well as environmental justice populations.

III. The EIR Must Be Recirculated Pursuant to CEQA and the City's Decision Not To Recirculate is Not Supported by Substantial Evidence

The Staff Report states that the applicant has apparently proposed changes to the Project's design and site plan. The changes require recirculation of the EIR pursuant to CEQA Guidelines, 15088.5.

The revised "project description" requires re-circulation of the EIR, as CEQA requires that a project's description be fixed and complete. The EIR does not accurately describe the proposed project considering the changes to the Project's design and operation. Among other changes that necessitate recirculation are the claims in the Staff Report, unsupported by technical analysis, that the new "berm" will "completely block" views of the Proposed Project from the adjacent neighborhood (June 2022 Staff Report p. 12), and that the berm will "drastically reduce" the Project's sound levels. These claims must be evaluated through the CEQA review process.

Redirecting Project trucks and vehicles to other roadways also requires recirculation of the EIR to evaluate these traffic and circulation changes. The Project is not being reduced in size in such a way that would substantially reduce its vehicle and truck traffic impacts; in fact, the reduction in building size does not prevent the Project from adding vertical space, as the EIR provides clearance for a 100-foot building (i.*e*., any size reduction could be illusory). The fact that Project vehicles and trucks are being *re-routed* to other streets and intersections does not eliminate the Project's traffic impacts; it merely shifts them to other roadways.

Major revisions to the Project's design and site plan must be evaluated through a recirculated CEQA document affording the public and others the opportunity to fully review and comment on the changes and their impacts.

Furthermore, the "changes" to the project (including the new "berm" are not adopted through the Project's CEQA mitigation program, meaning that their enforceability is not assured. CEQA requires that mitigation measures must be fully enforceable. Also, to the extent

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

the applicant has proposed purported "Community Benefits," including various payments to the City, these are not tied to any discernable plan to address the direct or indirect impacts of the Project and therefore do not represent CEQA mitigation in any form. It is unclear how funds collected by the "Moreno Valley Community Foundation" are distributed or implemented towards mitigation of impacts of industrial warehouse projects if at all.[1]

IV. The Project Is Still Inconsistent with the New 2040 General Plan Update and the City Has Failed to Make Adequate Findings of Consistency

The Project is inconsistent with the City of Moreno Valley General Plan and the City cannot make the findings that the Project is consistent with the General Plan. The generic "findings" listed in the proposed Resolution adopting the GPA are not supported by substantial evidence. The City cannot and does not support the statement that the GPA is "consistent with existing goals, objectives, policies and programs of the 2040 General Plan…" (Resolution p. 4) The Project is, in fact, inconsistent with the General Plan, with respect to the size and scale of the building as well as the proposed industrial use; and the conflicts between the Project and the General Plan result in significant and unmitigated CEQA land use impacts.

The "Vision and Guiding Principles" of the City's General Plan Update[2] include to support and create "Livable Neighborhoods" that "prioritize … community health." (General Plan p. 1-10.) This Project does not "prioritize community health" with respect to the existing neighborhood immediately south of the Project site. According to the General Plan's Land Use & Community Character Element, the purpose of the General Plan's land use designations are to "enhance[] livability and quality of life for current and future residents.." (General Plan p. 2-8.) Yet the Project seeks a GPA to change the site's land use designation from residential to industrial to allow an industrial operation that brings substantial truck traffic and noise to an existing residential area. The General Plan states that "residential neighborhoods form the basic fabric of the community. These are areas of the city characterized primarily by housing, parks, and community facilities." *Id*. The Project—an industrial facility consisting of round-the-clock operations and hundreds of truck trips per day —represents the opposite of *community-oriented* development.

With respect to the building's design, the General Plan states that **"[b]uilding massing and design controls are crucial for ensuring appropriate, sensitive development, particularly when it is adjacent to residential neighborhoods." (**General Plan p. 2-30 (emphasis added).) Among other things, the General Plan states, "[b]uilding **massing** and design measures to be considered include providing for **sensitive transitions between new and existing development so as to reduce impacts to existing neighborhoods."** *Id.* (emphasis added) The Project will cover the site with a **giant, box-style, 1.2+ million square foot**, **100-foot** (or 48/60 foot) building "adjacent to residential neighborhoods." Under any

[1] *See*, http://www.moval.org/communityfoundation/
This hyperlink and its contents, and each of the hyperlinks and their contents cited in this letter, are hereby incorporated by reference as if reproduced herein.

[2] The 2040 General Plan Update is currently under legal challenge. The Project also conflicts with the policies and goals of the 2006 General Plan.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

reasonable interpretation of the General Plan's design principles, the industrial Project is not a "sensitive development"; nor does it provide a "sensitive transition" between the site and the adjacent residential community. The Project is patently inconsistent with the principles, policies, and goals of the new General Plan with respect to land use compatibility.

General Plan Policy LCC 3.2 directs the City to "use development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another." General Plan p. 2-31. Policy LCC.3-17 requires the City to "[s]creen and buffer nonresidential projects to protect adjacent residential property and other sensitive land uses when necessary to mitigate noise, glare, and other adverse effects on adjacent uses." General Plan p. 2-32. Policy N.1-2 directs the City to "[g]uide the location and design of transportation facilities, industrial uses, and other potential noise generators to minimize the effects of noise on adjacent land uses." General Plan p. 7-8. The Project conflicts with, and is inconsistent with, these and other General Plan policies including those of the Environmental Justice element of the General Plan.

V. The Final EIR Does not Comply with CEQA and Additional Mitigation is Required

The Project should not be approved at this time because the Final EIR does not comply with the requirements of the California Environmental Quality Act ("CEQA") and additional mitigation must be imposed before the EIR can be legally certified.

A. Aesthetic Impacts

The EIR concludes that the Project's aesthetic impacts are significant in that the Project building will "mostly or completely" block views from vantage points such as from south of the Project site. Undoubtedly, a 1.2+ million square foot building with potentially **100-foot**, solid, tilt-up concrete walls, with very little articulation or variation, will obstruct views and adversely impact visual resources. The EIR states there is no mitigation available to reduce these impacts. However, the Project could be developed with a **smaller footprint** to allow for views to be maintained, even if partially. The building could be shrunk on the west side to allow more southerly homes to retain views; or the site could be designed with smaller industrial buildings that are clustered or placed in such a way to retain some views across the site. It is not shown based on any evidence that a building of more than one-million-square feet and 100 feet in height is required for any reason, especially as no tenant is presently identified or known.

Alternatively, the Project's significant aesthetic impacts could be mitigated by developing the Project at an alternate site; this option is not explored through the EIR. The EIR's alternatives analysis states that alternative sites were not considered because an alternative site would not reduce the Project's significant air quality impacts. DEIR p. 6-3. However, given the Project's proposal to build a 100-foot building adjacent to a residential neighborhood, the EIR should study alternative sites that could more reasonably accommodate such a use. The City as the lead agency has an obligation under CEQA to conduct a good faith,

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

independent analysis of the Project's environmental impacts including an examination of reasonable alternatives to the proposed Project.

The rapid growth of industrial warehouse development in the Inland Empire in the last ten years[3] [4] [5] [6] suggests there are alternative sites available within Moreno Valley and other jurisdictions. Alternative sites should be considered and evaluated as mitigation for significant aesthetic impacts. According to the 2040 General Plan, "a full 32% of the land within the City limit is vacant, including large undeveloped tracts of land at the interior of the city…" General Plan p. 2-2. The General Plan created new industrial and "office" land use designations for properties that presumably could be utilized for a project of this type such as vacant land designated "office" north of, and immediately adjacent to, State Route 60.[7]

The EIR reasons there is no mitigation available to reduce the significant impact based on the design specifications of "typical" warehouse distribution/logistics buildings. First, the site is currently zoned for residential uses. It is not a foregone conclusion that the site will be developed with an industrial use of *any* kind; in addition, there is currently no tenant for the building, so there are no design specifications that are specifically required by the user. Second, the applicant was presumably aware of the site's zoning when purchasing the property and/or undertaking development. Should an industrial building of a certain size or type be required, the applicant should explore an alternate site that can more reasonably accommodate the desired building within existing zoning designations.

In short, aesthetic impacts are not unmitigable, as it is feasible to (1) redesign the Project to preserve views and lessen the size and intensity (*i.e.*, "massing") of the building, or (2) develop the Project on a more appropriate site within the City. Furthermore, there is no evidence in the record to suggest that the new "berm" will obscure the massive building (constructed on an elevated pad) from adjacent residences.

B. Greenhouse Gas Emission Impacts

Contrary to the conclusions of the EIR, the Project results in a significant GHG and land use impacs as a result of inconsistency with policies and programs of the City's General Plan. By way of example, the Project does not demonstrate consistency with Objective 6.7 to "reduce mobile and stationary source air pollutant emissions." The Project increases these emissions, and a Statement of Overriding Considerations is proposed for significant air quality impacts. There is no evidence that the Project "reduce[s] vehicle trip lengths". (Table 3-8 GHG

Report). The Project locates a major industrial distribution center more than fifty miles from the Ports of Long Beach and Los Angeles, thus requiring trucks to travel hundreds of miles for delivery of goods to and from the Project site. There is no evidence of consistency with policies to reduce vehicle miles traveled ("VMT"). The Project does not require local hiring, for instance. Nor is there evidence that the Project supports employment that is consistent with housing costs in the City of Moreno Valley. The Project does not support R2-T1: the Project is not a "Transit Priority Project"[8] as asserted in Table 3-9 of the Project's GHG Report. Among other things, the Project is not consistent with existing land use designations. *See, id.* There is no evidence to support the claim that a new industrial distribution center creating hundreds of truck and vehicle trips per day will reduce vehicle trip lengths. The Project thus does not support R2-T3 of Table 3-9. The conclusion of the EIR that the Project is consistent with these policies is specious and without support in the record.

C. The So-Called "Community Benefits" Described In Various Project Documents Must Be Adopted As Enforceable CEQA Mitigation Measures

The Project applicant has identified numerous "community benefit" measures via disparate letters and proposed agreements in connection with the proposed Project. These "benefits" are described in Exhibits A, B, and C to proposed Resolution 2022-___ [approving community benefits, etc.], a document included with the materials available for the Moreno Valley Trade Center Agenda Item. As many of these alleged "benefits" of the Project are, in fact, *feasible air quality, noise, or greenhouse gas emission mitigation measures* they must be adopted through the CEQA mitigation program.

CEQA requires that a lead agency adopt *all* feasible mitigation measures for significant impacts. Where measures are identified by the applicant as feasible for implementation as "community benefits" there is no justifiable reason for excluding these measures from the CEQA mitigation program to ensure their enforceability and continuity. These include, for instance, installation of a 14-foot wall; designing the building to LEED Silver certification standards; and installing a minimum of 12 onsite electric vehicle chargers. The alleged "benefits" described in the disparate Project documents - outside of the EIR and the CEQA review process - must be included in the Project's CEQA Mitigation Program. Otherwise, they are not enforceable pursuant to CEQA standards.

D. The City Must Adopt All Feasible Mitigation Measures

The City has been presented with feasible mitigation measures such as requiring the use of solar power for the Project. These measures have not been shown to be infeasible within the meaning of CEQA.

[8] https://www.sacog.org/post/transit-priority-and-sustainable-communities-projects-consistent-scs

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

E. The EIR's Alternatives Analysis is Faulty, and the City Must Adopt the Environmentally Superior Alternative

The Reduced Building Area alternative is shown to be environmentally superior to the proposed Project with respect to the Project's significant aesthetic impacts. The alternative would develop a portion of the site with a parking area and would reduce the building area by approximately 400,000 square feet. The EIR claims that a 10-14 feet tall screening wall to shield the outdoor storage area from the street would be "comparable" to the visual impacts associated with the proposed project. On the contrary, it is reasonable to assume that a 10-14 foot screening wall has a lesser visual impact than a 100-foot building that completely blocks views across the site. To ensure that alternatives are properly assessed and considered, CEQA "contains a `substantive mandate' requiring public agencies to refrain from approving projects with significant environmental effects if 'there are feasible alternatives or mitigation measures' that can substantially lessen or avoid those effects'." *County of San Diego v. Grossmont-Cuyamaca Community College Dist.* (2006) 141 Cal.App.4th 86, 98; Pub. Res. Code § 21002. A lead agency may not reject an alternative unless the agency makes findings supported by substantial evidence showing that the alternative is infeasible. Public Resources Code §§ 21081 (a), 21081.5; Guidelines, §§ 15091 (a)(3), 15092. Rejected alternatives must be "truly infeasible." *City of Marina v. Bd of Trustees of Calif. State Univ.* (2006) 39 Cal.4th 341, 369 ("*City of Marina*"); *see*, Guidelines § 15364 (defining "feasible"). Absent findings of infeasibility supported by substantial evidence, the City must adopt the Reduced Building Area alternative as it is environmentally superior in at least the area of visual impacts, and because the EIR claims that it also "reduces" air quality and GHG emission impacts, albeit without any supporting data to support those conclusions. Because this feasible alternative would reduce impacts according to the EIR, it must be adopted pursuant to CEQA.

VI. The Statement of Overriding Considerations Is Not Supported by Substantial Evidence

The Statement of Overriding Considerations asserts the Project will generate employment opportunities for local residents but this claim is not supported by evidence where the Project is speculative (*i.e.*, tenants and uses are unknown), and there is no commitment to local hiring. Claims that the Project is needed to support employment and tax-generating uses in the City are not supported by factual evidence such as economic data to show that the Project will generate revenue for the City or a certain number of jobs. The Statement of Overriding Considerations reads like a generic list of alleged benefits; and it is unsupported by any factual information. As the Project is speculative, the alleged benefits of the Project are simply unknown. Furthermore, as the City already has a multitude of warehouse projects either in development or proposed for development (including the 40+ million square foot World Logistics Center), it is simply unreasonable to assert, without evidence, that yet more industrial warehouse developments is needed for compelling economic reasons.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

VII. The City Has Improperly Segmented the "Park" Project from the Proposed Industrial Project

In connection with the proposed Project, the applicant has apparently proposed to fund an 18-acre public park as an alleged "community benefit". This "park project" is loosely described in ancillary project documents. Ostensibly the aim of the "park project" is to offer some "trade-off" "benefit" of the deleterious Project. This sports park at SE Redlands Blvd/Ironwood Ave is just north of SR-60 and on a City- designated diesel truck route which will be used by some of the World Logistic Centers 13,000 daily diesel truck trips as well as the proposed Project and about five other warehouses just south of SR-60. The children playing sports at the park will be breathing deeply and making the truck route even more harmful. The "park project" has not been evaluated pursuant to the Project EIR, in violation of CEQA.

Per CEQA, the two proposals – the industrial development project and the "park" that is included in the bundle of approvals that are being proposed in connection with the industrial development project - must be considered one "project" for purposes of CEQA review. The "park project" must be described and evaluated in the Project EIR. Without such disclosures and analysis, the EIR fails to provide sufficient information for the public and decision-makers.

The term "project" under CEQA refers to the whole of an action and to the underlying physical activity being approved, not to each government approval (CEQA Guidelines, section 15378 (c).) The City may not "segment" the two proposals so that environmental review occurs separately. The City claims without legal or logical basis that the "Community Park is entirely separate from Developer's Project and is being proposed as a separate community benefit. The Community Park shall be subject to separate review and approval by the City." (Exhibit C to proposed Resolution 2022-__ [accepting community benefits, etc.]) CEQA does not permit segmentation of projects that are clearly related, as here. This is particularly the case when the "park" will be proposed in an area subject to major pollution from the World Logistics Center, SR-60, and other industrial development. The park is not "speculative" in that it is described in a discreet location, will be of a certain size, etc. The park is part of the proposed "project", as that term is defined broadly under CEQA, and, as such, it must be evaluated contemporaneously with the industrial development, so the environmental effects of the applicant's entire proposal can be properly evaluated and mitigated.

VIII. Conclusion

For these reasons, Sierra Club urges the City to deny the developer's appeal of this Project which will bring environmental harms and incompatible growth to an overburdened community.

Subject: FW: Vote NO, F-1 Moreno Valley Trade Center, Nov 15, 2022 City Council Meeting
Date: Monday, November 14, 2022 5:02:01 PM

Warning: External Email – Watch for Email Red Flags!

Dear Mr. Kelleher:

I have sent the following letter to the city councilmembers and the mayor.

I am forwarding it to you so it can be included in the public record.

Ann McKibben

Re: VOTE NO—City Council Meeting, November 15, 2022, F-1 Moreno Valley Trade Center

Please vote NO on the Moreno Valley Trade Center project.

The proposed project would be adjacent to already established homes and neighborhoods. The project site is zoned for housing. It is not a compatible land use for adjacent homes. It does not follow the city's newly approved general plan

The levels of Air Pollution will worsen with the increase numbers of trucks moving through adjacent streets.

The increase in Traffic will negatively affect the quality of life for those who live adjacent to the proposed project and the city in general.

The city cannot 'mitigate' the project to protect our health and make it acceptable to adjacent residents.

I get weekly emails the city sends out regarding our community. All of them are very positive, upbeat about the quality of life, etc. in our city and all the good works the city staff and elected officials are doing for our community.

I don't see how putting new warehouses next to homes improves our community or makes it a livable community.

Please vote NO on this project.

Sincerely,
Ann McKibben
92557
Moreno Valley Resident since 1985

Subject: Trade Center Proposal
Date: Monday, November 14, 2022 6:22:01 PM

Warning: External Email – Watch for Email Red Flags!

Please do not approve the Trade Center being proposed for the corner of Eucalyptus, Encelia and Redlands Blvd. The community next to that property is one of a few nice neighborhoods in Moreno Valley. Having a warehouse in the next plot of land will immediately lower our property value. We already have big trucks driving past the signs south on Redlands and backed up traffic coming from Sketchers getting on the freeway every day. We can already hear the warehouse operations from Solaris and they a mile away! East of us, beginning on Theodore there are thousands of vacant acres of land perfect for a warehouse and your proposed Pilot Station. Put them on that land, don't devastate this beautiful, quiet family community of tax payers with a warehouse in our backyard.
I was at the meeting in December 2021, and I know there were 3 "No" votes coming that night…your tax paying citizens DO NOT want this warehouse on this property!!! I know you will have lots of (Liuna)union members there tomorrow night to talk about "all" of the wonderful union jobs…they are not your tax paying citizens, they are paid by the developer to speak. Yep when the building is being built there will be temporary union jobs. They can have those same jobs, one mile away on Theodore. The Developer told us all in December there was not a tenant slated for that building…so when it is finished an unknown company may or may not (there are still thousands of square feet of vacant, new warehouse property, on Van Buren in Riverside) lease the building and they may already have employees they are relocating =NO NEW JOBS to Moreno Valley residents. I know all of you already know all of this…But your tax paying, voting citizens DO NOT WANT THIS BUILT on Redlands Blvd!

Sincerely,
Linda Scheschy
13315 Wexford Ave.
Moreno Valley

Date: Monday, November 14, 2022 9:59:33 PM

Warning: External Email – Watch for Email Red Flags!

Please Vote Yes for the Moreno Valley Trader Center project!

I am a Moreno Valley resident who supports the Moreno Valley Trade Center!

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Warning: External Email – Watch for Email Red Flags!

Please Vote Yes for the Moreno Valley Trader Center project!

I am a Moreno Valley resident who supports the Moreno Valley Trade Center!

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Subject: Christine Ryan Says YES for Moreno Valley Trade Center!
Date: Monday, November 14, 2022 10:06:30 PM

Warning: External Email – Watch for Email Red Flags!

Please Vote Yes for the Moreno Valley Trader Center project!

I am a Moreno Valley resident who supports the Moreno Valley Trade Center!

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Subject: Prince Hall Says YES for Moreno Valley Trade Center!
Date: Monday, November 14, 2022 10:06:35 PM

Warning: External Email – Watch for Email Red Flags!

Please Vote Yes for the Moreno Valley Trader Center project!

I am a Moreno Valley resident who supports the Moreno Valley Trade Center!

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Please Vote Yes for the Moreno Valley Trader Center project!

I am a Moreno Valley resident who supports the Moreno Valley Trade Center!

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Hi:

I am writing to support this project that I understand will be discussed on June 21, 2022. I have residential and commercial property in Moreno Valley, and believe that the MVTC warehouse project will benefit the city and its residents. It also will provide much needed tax revenue for road improvements, police, fire, schools, parks, and other community projects. I urge the city council to approve the project. Thank you.

Warning: External Email – Watch for Email Red Flags!

Mayor and Council Members,

There are so many conflicts with the two warehouse projects being considered at tonight's meeting of the City Council. Nether project should be approved for development as outlined in my previous letters. You will likely hear from a variety of residents this evening and hopefully you will be able to come to a consensus and deny each project. Additionally, both projects fail to make the findings necessary for a general plan amendment or a plot plan approvel. Attached you will find a full collection of Finding for Denial of Moreno Valley Business Center and Moreno Valley Trade Center.

Hope they are helpful.

Tom Thornsley

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Moreno Valley Business Center

Finding for Denial of Plot Plan (PEN21-0079) presented in Appeals (PAA22-0002 AND PAA22-0003)

There are certain basic rules that either prohibit the City from approving a project or require it to approve a project. The most common ones are summarized below: City cannot legally approve any project if:

- Environmental documents, studies and mitigation measures are not legally adequate
- Project is not consistent with General Plan
- Land is not properly zoned for the proposed use

9.02.040 General plan amendments.
F. Required Findings. Amendment to the text or maps of the general plan may be made if:

1. The proposed amendment is consistent with existing goals, objectives, policies and programs of the general plan;

This project is not consistent with the prescribed land use.
List of GP Goal, Policies not met:

LCC.1-1: Foster a balanced mix of employment, housing, educational, entertainment, and recreational uses throughout the city to support a complete community.

The proposed warehouse distribution center further expands the same employment base and fails to provide the city with a balanced mixes of employment opportunities.

LCC.1-2: Expand employment opportunities locally and provide sufficient lands for commercial, industrial, residential and public/quasi-public uses while ensuring that a high quality of life is maintained in Moreno Valley.

The proposed warehouse distribution center fails to expand employment opportunities beyond the multiple similar jobs options, thus not ensuring that a high quality of life can be maintained in Moreno Valley.

POLICIES
LCC.1-12: Balance levels of employment and housing within the community to provide more opportunities for Moreno Valley residents to work locally, cut commute times, and improve air quality.

This project will continue to unbalance the levels of employment opportunities. There is already a surplus of logistic jobs in the city and the WLC expects to add 20,000 more. Without balanced levels of employment opportunities may

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Moreno Valley residents will be denied career field job locally, more employees will be driving to Moreno Valley for logistic jobs, both of which will not cut commute times or improve air quality.

General

POLICIES LCC.3-1: Insist on high-quality development that is sensitive to surrounding context throughout the city and particularly in centers and corridors.

Warehouses adjacent to residential are not sensitive to the surround context.

LCC.3-2: Use development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another.

This project fails to comply with the MoVal General Plan Building Massing and Design criteria by failing to address the visual dominance of a building proposed to be 48 or 100 feet tall as required when it is adjacent to existing residential neighborhoods.

Goal N-1: Design for a pleasant, healthy sound environment conducive to living and working.

POLICIES

N.1-2: Guide the location and design of transportation facilities, industrial uses, and other potential noise generators to minimize the effects of noise on adjacent land uses.

In the MoVal 2040 General Plan under Planning for a Pleasant, Healthy Noise Environment it says "separating and buffering noisy land uses, and designing for a quiet indoor environment will contribute to a healthy, livable neighborhood and a vibrant local economy." Those residing in homes next to or near this warehouse project will be subjected to continuous background noise from outdoor on-site activities thus impacting the health and livable neighborhood that exists and diminishing the vibrant local economy – their residential property's devaluation.

N.1-5: Noise impacts should be controlled at the noise source where feasible, as opposed to at receptor end with measures to buffer, dampen, or actively cancel noise sources. Site design, building orientation, building design, hours of operation, and other techniques, for new developments deemed to be noise generators shall be used to control noise sources.

N.1-6: Require noise buffering, dampening, or active cancellation, on rooftop or other outdoor mechanical equipment located near residences, parks, and other noise sensitive land uses.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Goal N-2: Ensure that noise does not have a substantial, adverse effect on the quality of life in the community.

Noise generation from the warehouse may fall below codified thresholds but sensitive receptors adjacent or near the noise sources will be subject to ongoing background noises 24/7 which can be considered disturbing and a nuisance during times of outdoor activity and at night. This project does not propose limited hours of operation thus this impact cannot be eliminated.

AIR QUALITY

EJ.1-D: Work with the distribution and warehousing business community to improve outdoor air quality through improved operations and practices, such as planning for zero emissions trucks and vans.

This project does not have guarantees that vehicles used with their operation will be zero emissions trucks and/or vans. Rebate programs are voluntary and this project needs mandatory compliance to meet this goal.

2. The proposed amendment will not adversely affect the public health, safety or general welfare.

9.02.030 Development review process.

5. Findings. Following the noticed public hearing pursuant to Section 9.02.200 of this chapter and unless otherwise specified in this chapter, the planning commission shall make the following findings before approving a major development review application:

a. That the proposed project is consistent with the general plan;

This project fails to meet multiple goals, objectives, policies and programs of the general plan as detailed under project findings for the general plan as previously outlined above.

b. That the proposed use is in compliance with each of the applicable provisions of this title;

The placement of this warehouse fails to meet the basic criteria for establishing buffering uses between residential and light industrial as stated under the Light Industrial District ". This district requires buffering between residential districts and industrial and warehouse structures greater than fifty thousand (50,000) square feet in building area." The complete text can be found below.

Municipal Code Development Standards

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

9.05.020 Industrial districts.

A. Business Park District (BP). The primary purpose of the business park (BP) district is to provide for light industrial, research and development, office-based firms and limited supportive commercial in an attractive and pleasant working environment and a prestigious location. This district is intended to provide a transition between residential and other sensitive uses and more intense industrial and warehousing uses.

B. Light Industrial District (LI). The primary purpose of the light industrial (LI) district is to provide for light manufacturing, light industrial, research and development, warehousing and distribution and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial uses on a limited basis. This district is intended as an area for light industrial uses that can meet high performance standards. This district requires buffering between residential districts and industrial and warehouse structures greater than fifty thousand (50,000) square feet in building area within the LI district. Please refer to the special site development standards in Section 9.05.040(B)(9).

c. That the proposed use, together with the conditions applicable thereto, will not be detrimental to the public health, safety or welfare, or materially injurious to properties or improvements in the vicinity of the proposal.

This project is not in compliance with the following:
9.02.030 Development review process.
B. Major Development Review Process.
1. Purpose and Intent. The major development review process is intended to implement general plan policies and other adopted policy and design standards, regulations and guidelines. To achieve quality development that is functionally as well as aesthetically enhancing to the community, and to minimize adverse effects on surrounding properties and the environment, the purposes of major development review are to ensure the following:

a. That the location and configuration of structures developed within the city are visually harmonious with their sites and with natural landforms and surrounding sites, structures, and streetscapes;

The development of a 48 or 100 foot tall warehouse is not harmonious with the surrounding environment of neighboring residential development.

d. That adverse environmental effects are minimized;

The environmental impacts are so significant that they cannot be mitigate for thus requesting that those impact be overridden due to benefits the project will

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

bring. This project offers not better benefits than multiple projects before it or the multitude of warehouse designated to be built on the World Logistics property. The best remedy to minimize the environmental effects is to deny the project.

f. That the materials, textures, colors and details of proposed construction are an appropriate expression of the design concept and function, and are, to the extent feasible, compatible with the adjacent and neighboring structures and functions;

g. That development proposals do not unnecessarily block scenic views from other buildings or from public ways, or visually dominate their surroundings with respect to mass and scale, to an extent inappropriate to their use;

Should be denied because the scale of the warehouse does most definitely block scenic views in all manors and will visually dominate their surrounding changing the character of the existing community.

k. That excellence in architectural design is maintained in order to enhance the visual environmental of the city and to protect the economic value of existing structures;

This project should be denied because even the modest architectural elements cannot shield the sheer size and mass of the warehouse which is not enough to enhance the visual environment. Conflicting uses such as a warehouse next to residential hurts the economic value of neighboring structures which in this case are residents' homes.

m. That the public health, safety and general welfare are protected;

This project fails to meet these criteria with the unmitigatable impacts to air, greenhouse gases, visual blight, increased truck traffic levels all diminishing the general welfare of the neighborhood and the community.

n. That development plans comply with applicable policies, standards, ordinances and design guidelines.

This project proposal does not comply with a number of the applicable policies and standards outlined in MoVal 2040 General plan as discussed here-in.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Moreno Valley Trade Center/Park

Finding for Denial of General Plan Amendment (PEN19-0191), Tentative Parcel Map (PEN19-0234), and Plot Plan (PEN19-0193)

There are certain basic rules that either prohibit the City from approving a project or require it to approve a project. The most common ones are summarized below: City cannot legally approve any project if:

- Environmental documents, studies and mitigation measures are not legally adequate
- Project is not consistent with General Plan
- Land is not properly zoned for the proposed use

9.02.040 General plan amendments.
F. Required Findings. Amendment to the text or maps of the general plan may be made if:

1. The proposed amendment is consistent with existing goals, objectives, policies and programs of the general plan;

This project is not consistent with the prescribed land use.
List of GP Goal, Policies not met:

LCC.1-1: Foster a balanced mix of employment, housing, educational, entertainment, and recreational uses throughout the city to support a complete community.

The proposed warehouse distribution center further expands the same employment base and fails to provide the city with a balanced mixes of employment opportunities.

LCC.1-2: Expand employment opportunities locally and provide sufficient lands for commercial, industrial, residential and public/quasi-public uses while ensuring that a high quality of life is maintained in Moreno Valley.

The proposed warehouse distribution center fails to expand employment opportunities beyond the multiple similar jobs options, thus not ensuring that a high quality of life can be maintained in Moreno Valley.

POLICIES
LCC.1-12: Balance levels of employment and housing within the community to provide more opportunities for Moreno Valley residents to work locally, cut commute times, and improve air quality.

This project will continue to unbalance the levels of employment opportunities. There is already a surplus of logistic jobs in the city and the WLC expects to add 20,000 more. Without balanced levels of employment opportunities may

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Moreno Valley residents will be denied career field job locally, more employees will be driving to Moreno Valley for logistic jobs, both of which will not cut commute times or improve air quality.

General

POLICIES LCC.3-1: Insist on high-quality development that is sensitive to surrounding context throughout the city and particularly in centers and corridors.

Warehouses adjacent to residential are not sensitive to the surround context.

LCC.3-2: Use development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another.

This project fails to comply with the MoVal General Plan Building Massing and Design criteria by failing to address the visual dominance of a building proposed to be 48 or 100 feet tall as required when it is adjacent to existing residential neighborhoods.

Goal N-1: Design for a pleasant, healthy sound environment conducive to living and working.

POLICIES

N.1-2: Guide the location and design of transportation facilities, industrial uses, and other potential noise generators to minimize the effects of noise on adjacent land uses.

In the MoVal 2040 General Plan under Planning for a Pleasant, Healthy Noise Environment it says "separating and buffering noisy land uses, and designing for a quiet indoor environment will contribute to a healthy, livable neighborhood and a vibrant local economy." Those residing in homes next to or near this warehouse project will be subjected to continuous background noise from outdoor on-site activities thus impacting the health and livable neighborhood that exists and diminishing the vibrant local economy – their residential property's devaluation.

N.1-5: Noise impacts should be controlled at the noise source where feasible, as opposed to at receptor end with measures to buffer, dampen, or actively cancel noise sources. Site design, building orientation, building design, hours of operation, and other techniques, for new developments deemed to be noise generators shall be used to control noise sources.

N.1-6: Require noise buffering, dampening, or active cancellation, on rooftop or other outdoor mechanical equipment located near residences, parks, and other noise sensitive land uses.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Goal N-2: Ensure that noise does not have a substantial, adverse effect on the quality of life in the community.

Noise generation from the warehouse may fall below codified thresholds but sensitive receptors adjacent or near the noise sources will be subject to ongoing background noises 24/7 which can be considered disturbing and a nuisance during times of outdoor activity and at night. This project does not propose limited hours of operation thus this impact cannot be eliminated.

AIR QUALITY

EJ.1-D: Work with the distribution and warehousing business community to improve outdoor air quality through improved operations and practices, such as planning for zero emissions trucks and vans.

This project does not have guarantees that vehicles used with their operation will be zero emissions trucks and/or vans. Rebate programs are voluntary and this project needs mandatory compliance to meet this goal.

2. The proposed amendment will not adversely affect the public health, safety or general welfare.

9.02.030 Development review process.

5. Findings. Following the noticed public hearing pursuant to Section 9.02.200 of this chapter and unless otherwise specified in this chapter, the planning commission shall make the following findings before approving a major development review application:

a. That the proposed project is consistent with the general plan;

This project fails to meet multiple goals, objectives, policies and programs of the general plan as detailed under project findings for the general plan as previously outlined above.

b. That the proposed use is in compliance with each of the applicable provisions of this title;

The placement of this warehouse fails to meet the basic criteria for establishing buffering uses between residential and light industrial as stated under the Light Industrial District ". This district requires buffering between residential districts and industrial and warehouse structures greater than fifty thousand (50,000) square feet in building area." The complete text can be found below.

Municipal Code Development Standards

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

9.05.020 Industrial districts.

A. Business Park District (BP). The primary purpose of the business park (BP) district is to provide for light industrial, research and development, office-based firms and limited supportive commercial in an attractive and pleasant working environment and a prestigious location. This district is intended to provide a transition between residential and other sensitive uses and more intense industrial and warehousing uses.

B. Light Industrial District (LI). The primary purpose of the light industrial (LI) district is to provide for light manufacturing, light industrial, research and development, warehousing and distribution and multitenant industrial uses, as well as certain supporting administrative and professional offices and commercial uses on a limited basis. This district is intended as an area for light industrial uses that can meet high performance standards. This district requires buffering between residential districts and industrial and warehouse structures greater than fifty thousand (50,000) square feet in building area within the LI district. Please refer to the special site development standards in Section 9.05.040(B)(9).

c. That the proposed use, together with the conditions applicable thereto, will not be detrimental to the public health, safety or welfare, or materially injurious to properties or improvements in the vicinity of the proposal.

This project is not in compliance with the following:
9.02.030 Development review process.
B. Major Development Review Process.
1. Purpose and Intent. The major development review process is intended to implement general plan policies and other adopted policy and design standards, regulations and guidelines. To achieve quality development that is functionally as well as aesthetically enhancing to the community, and to minimize adverse effects on surrounding properties and the environment, the purposes of major development review are to ensure the following:

a. That the location and configuration of structures developed within the city are visually harmonious with their sites and with natural landforms and surrounding sites, structures, and streetscapes;

The development of a 48 or 100 foot tall warehouse is not harmonious with the surrounding environment of neighboring residential development.

d. That adverse environmental effects are minimized;

The environmental impacts are so significant that they cannot be mitigate for thus requesting that those impact be overridden due to benefits the project will

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

bring. This project offers not better benefits than multiple projects before it or the multitude of warehouse designated to be built on the World Logistics property. The best remedy to minimize the environmental effects is to deny the project.

f. That the materials, textures, colors and details of proposed construction are an appropriate expression of the design concept and function, and are, to the extent feasible, compatible with the adjacent and neighboring structures and functions;

g. That development proposals do not unnecessarily block scenic views from other buildings or from public ways, or visually dominate their surroundings with respect to mass and scale, to an extent inappropriate to their use;

Should be denied because the scale of the warehouse does most definitely block scenic views in all manors and will visually dominate their surrounding changing the character of the existing community.

k. That excellence in architectural design is maintained in order to enhance the visual environmental of the city and to protect the economic value of existing structures;

This project should be denied because even the modest architectural elements cannot shield the sheer size and mass of the warehouse which is not enough to enhance the visual environment. Conflicting uses such as a warehouse next to residential hurts the economic value of neighboring structures which in this case are residents' homes.

m. That the public health, safety and general welfare are protected;

This project fails to meet these criteria with the unmitigatable impacts to air, greenhouse gases, visual blight, increased truck traffic levels all diminishing the general welfare of the neighborhood and the community.

n. That development plans comply with applicable policies, standards, ordinances and design guidelines.

This project proposal does not comply with a number of the applicable policies and standards outlined in MoVal 2040 General plan as discussed here-in.

Please Vote Yes for the Moreno Valley Trader Center project!

I am a Moreno Valley resident who supports the Moreno Valley Trade Center!

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Warning: External Email – Watch for Email Red Flags!

Dear council and staff,

My original concerns regarding the trade center still apply and are attached for your enjoyment. Please enter the attached in the record opposing the trade center.

I am also including some quotes from Mr. Gutierrez that appeared in the Press Enterprise so let's see if he really listens and cares about what the residents want. The additional "bribe" of a sports complex in another district does not outweigh the damage that will be done to the health and quality of life of the residents should you approve this abomination.

By Jeff Horseman | jhorseman@scng.com | The Press-Enterprise
PUBLISHED: April 29, 2022 at 2:28 p.m. | UPDATED: June 20, 2022 at 2:07 p.m.

Gutierrez:

..."I would always look at issues (as supervisor) independently and objectively and I would make sure the people are listened to," he added.

"Any time we look at an individual (development) project (we should) look at it from a social justice lens in terms of how can we benefit that community that's being impacted," Gutierrez said.

By Jeff Horseman | jhorseman@scng.com | The Press-Enterprise
PUBLISHED: October 8, 2022 at 7:00 a.m. | UPDATED: October 8, 2022 at 7:00 a.m.

What are your thoughts on the county's logistics industry? Should the county continue to add warehouses? If not, what ideas do you have for adding jobs in a county that lags behind its neighbors in education and income?

Gutierrez: I understand the concerns many Riverside County residents have about warehouses and their impacts on traffic and the environment. In general, if the community around a potential warehouse site doesn't want a warehouse built, then we need to listen to that community.

Thank you,

Lindsay Robinson

June 14, 2022
Moreno Valley Trade Center Round 2

To whom it may concern,

Please enter this into the Moreno Valley Trade Center Packet along with the additional documents as the previous concerns still apply.

I still believe that the mayor was allowed to act inappropriately when he tabled the discussion prior to voting when he saw he was not going to get his way.

The developer lied when he said that our school superintendent Kedzoira provided a letter of support for the project. Many of us were in disbelief and Mr. Kedzoira confirmed that he did NOT support this project or other warehouses. He thanked them for their donation (bribe) to the school wellness center. This should remind you all of the felony conviction Alex Ramirez received for the fraudulent letters of support for the Ironwood Village project. Superintendent Kedzoira is very well respected and this lie tarnished his reputation for many people and a public apology is warranted. The magnitude of this lie should be reason enough to vote no and black list Hillwood from the city.

Mr. Gutierrez sent out many glossy mailers as well as inundated residents with campaign calls. **One such call stated that he does not approve of warehouses near homes/residential areas.** That's great news for the residents as it means he will not approve this project.

Campaign mailers from most of you all say you're going to bring better businesses and high paying jobs yet what we see are warehouses, gas stations and fast food. Once elected the promises fade away. Let's start honoring your promises and bring those high paying jobs and better businesses. Moreno Valley could be so much more than what it's been doomed to.

Our General Plan Update has recently been completed and rezoning projects should not be coming forward to soon especially one as hypocritical as this that takes residential land away. The city's excuse for destroying the community character of the NE by letting Chung rezone R2 to R10 was that we needed more homes to meet state mandates therefore residential land should not be rezoned to warehouses.

Why hasn't Hillwood said where the residential R2 PAKO homes will be relocated as required by law?

Hillwood's presentation admitted they have no tenant thus all of the estimates could be way off regarding traffic, noise, pollution. It's a spec building and thus needs to be denied.

Have any of you sat and watched trucks navigating Benzeevi's absurd roundabout? It was clearly not designed for large trucks so now more trucks are heading west thru the auto mall to Moreno Beach which could be a violation of the Prologis agreement that all

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

trucks go east to Redlands. This roundabout will not be able to handle trucks from this project as well as wlc so where will these trucks illegally drive? We aren't getting sufficient truck enforcement nor traffic patrols in the east end as it is.

Has our municipal code for noise been amended yet to require warehouses shut down from 10 pm to 7 am if they're next to homes? If not, this project needs to be denied.

This project's EIR has too many significant negative impacts that severely harm the residents' health and quality of life. For too long the city flippantly over rides these severe impacts. There are laws that are supposed to protect us from these travesties. For too long now the city staff have wantonly used the "override" to approve too many projects with significant negative impacts in a manner that I believe is illegal. For too long, staff have incorrectly asserted that the City may simply adopt a statement of override when a project results in impacts.

Not so — procedurally, the lead agency can only approve a project with significant environmental impacts if: (1) the adverse environmental effects of a project have been substantially mitigated, or (2) mitigation measures or alternatives are infeasible *and* overriding considerations exist which allow approval of the project. (PRC § 21081; Guideline §§ 15091, 15093.)

Overriding considerations do not come into play unless there are *no* feasible project alternatives. (*City of Marina v. Board of Trustees of the California State University,* 2006, 39 Cal.4th 341,368.) The lead agency, therefore, cannot merely adopt a statement of overriding considerations and approve a project with significant impacts; it must first adopt feasible alternatives and mitigation measures. "CEQA does not authorize an agency to proceed with a project that will have significant, unmitigated effects on the environment, based simply on a weighing of those effects against the project's benefits, unless the measures necessary to mitigate those effects are truly infeasible. (*Id.* at 376.)

5.1 Significant Environmental Effects that Cannot be Avoided if the Project is

Implemented

The CEQA Guidelines require that an EIR disclose the significant environmental effects of a project which cannot be avoided if the proposed project is implemented (CEQA Guidelines Section 15126(b)). As described in detail in Section 4.0, *Environmental Analysis*, of this EIR, the proposed Project is anticipated to result in impacts to the environment that cannot be reduced to below a level of significance after the consideration of Project design features, compliance with applicable federal, State and local regulations, and the application of the feasible mitigation measures identified in this EIR. The significant impacts that cannot be mitigated to a level below thresholds of significance consist of the following:

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

o **Aesthetics: Implementation of the Project would mostly or completely block views** of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Also, implementation of the Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site. This would be a significant and unavoidable direct impact.

o **Air Quality (Air Quality Management Plan Conflict):** The Project would emit air pollutants (NOx) that would contribute to a delay in the attainment of federal and State ozone standards in the SCAB. Because the Project requires a General Plan Amendment, it also would exceed the growth projections contained in SCAQMD's *2016 AQMP*. As such, the Project would conflict with and could obstruct implementation of the *AQMP*. Project impacts due to a conflict with the SCAQMD *2016 AQMP* would be significant and unavoidable on both a direct and cumulatively-considerable basis.

o **Air Quality (Criteria Pollutant Emissions):** After the application of Project design features, mandatory regulatory requirements, and feasible mitigation measures, Project-related NOx emissions during long-term operation of the Project would remain above the applicable SCAQMD regional thresholds. Accordingly, Project-related emissions would not meet SCAQMD air quality standards and contribute to the non-attainment of ozone standards in the SCAB. Therefore, Project operational-related impacts due to NOx emissions would be significant and unavoidable on a direct and cumulatively-considerable basis.

o **Greenhouse Gas Emissions (GHG Emissions Generation):** Project-related GHG emissions would exceed the applicable SCAQMD significance threshold for GHG emissions and would result in a cumulatively-considerable impact to the environment." (page 5-1 in MVTC Final EIR)

The wlc is 10% of our city's land due to Benzeevi's ability to buy off our former council/pc members. Any future warehouses need to be placed on wlc land and not next to homes. Let Hillwood negotiate with Benzeevi to place his warehouse there perhaps next to Alessandro that they wish to pave. Other warehouses near homes have already been approved. Please ask how much total land is now warehouses in our city and say enough is enough. None of you would enjoy living next to a warehouse so don't inflict this on the established residents. Other cities have imposed moratoriums on warehouses and it's time Moreno Valley does the same. Put the residents health and quality of life first!

Dear Council members,

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Please respect the residents and the planning commission decision and vote NO on the Moreno Valley Trade Center. The 2006 general plan as well as the current mayor appointed planning commission realized that warehouses do not belong next to our residential homes.

This area of Moreno Valley was renamed to Rancho Belago and it was touted as the "Beverly Hills" of Moreno Valley complete with matching signs. Unfortunately thru less than ethical processes the warehouses to the east of these homes were approved. These residents do not deserve to now be surrounded on two sides with warehouses and 24/7 noise, traffic, light and air pollution.

The Hillwood presentation tries to depict a rosy picture but the reality is that the warehouse does not belong there. They have no tenant so all the data on traffic and noise they are providing is irrelevant.

Redlands south of Eucalyptus is not a truck route yet they have a truck entrance near the south end of the building near Encelia. There is no proposal to change the truck route, so they will be breaking the law.

An incredible amount of traffic will be using Encelia to exit the project during shift changes yet no street light was proposed. If it becomes an Amazon distribution center their vehicles will be invading the residential streets to reach Redlands.

Some of the houses will receive air filtration systems therefore they acknowledge the severe negative impact of their pollution. If air filtration is needed in the homes how will they protect the kids/adults who are playing and working outside? A yes vote means you really don't care about the health of the residents.

This project has a long list of money they're "donating" to different causes. Sure looks like Pay to Play if not bribery.

Unless there is a point of sale, the revenue the city may get is not worth the damage they will do.

Jobs- there will be many more jobs associated with building the 148 homes and more long term jobs. 148 homes will need upgrades, repairs, landscape maintenance etc for many years to come and will employ a large variety of tradesmen.

This warehouse hopes to remove approximately 148 half acre principal animal keeping homes at a time when the city claims we need more homes. The pandemic has shown us that people and especially children need space and yards to play thus the R2 PAKO zoning must remain especially as your new GPU allowed Nelson Chung to rezone our R2 PAKO land north of the freeway to his preferred R10 (Pay to Play goes full circle).

The Hillwood presentation talked about moving the 148 PAKO homes to another area but did not say where. It's my understanding they are supposed to show the new location for the displaced residential land. Where else in the city will they put those homes?

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Noise- the city needs to amend their municipal noise ordinances to include warehouse noise. Warehouses in or near residential homes need to cease operation from 10 pm to 7 am. Just as loud parties, construction, yard equipment noise is restricted so must the warehouse noise. A perfect example is the horribly designed paper company building that the city approved that disrupts sleep and forces residents to keep their doors and windows shut all day to avoid the obnoxious droning. Would any of you want to have a generator running in your front yard all night? I don't think so and the excuse that it's "within acceptable limits" is absurd. None of you would find it acceptable so don't force it on us. Beeping trucks all night long is also disruptive and needs to cease.

One of the items they bragged about was paving Alessandro thru the wlc property- something Mr. Benzeevi is responsible for and won't help the city since Mr. Benzeevi intends to close Alessandro east of Merwin thru his property and the city signed off on it. Cactus will become the through street.

This warehouse appeared as a done deal on the maps shown during the public GPU meeting. An astute resident noticed it as the project had not come forward yet. The GPU consultant stated that city staff informed him it was already approved. So once again the city promoted a project that had not come before them yet just as was done years ago for wlc.

There is not sufficient data regarding the compounding effect that residents will suffer if both the wlc and the trade center are developed. The wlc will be bad enough, don't compound it. Vote NO on the mv trade center.

The 2006 general plan and the current planning commissioners did the right thing. They protected the residents from a warehouse next to their homes. They chose to value the residents' health and quality of life over a quick profit for a developer.

People choose to live in areas that suit their interests and income levels. No one I've met chooses to live next to a warehouse and no city should rezone residential property near existing homes to warehouses. The city has made many horrible decisions with regard to warehouses don't let this be one of them.

I doubt any of you (council, staff, and developers) live next to a warehouse nor would you choose to do so. The negative impacts are too detrimental and can't be mitigated so please vote NO on the MV Trade Center- wrong location and it's your responsibility to make the residents' health and quality of life a priority!

Thank you,
Lindsay Robinson

Moreno Valley Trade Center dEIR concerns

To whom it may (or may not) concern,

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Please include this in the public record to voice my concerns on the inadequacy of the draft EIR related to the Moreno Valley Trade Center proposed at a location on Redlands Blvd. south of Eucalyptus.

As with the other warehouse projects, the city staff and developers make light of the significant negative impacts that can't be mitigated and they unethically continue to override them without adequately addressing the cumulative effect of all the previous projects who also had their significant negative impacts unmitigated (pollution, noise, traffic etc.). Some of these projects that directly affect the residents south of Encelia include the wlc, Aldi, Prologis warehouses and the sleep disrupting Solaris paper company and now commercial zoning just north of them. The developers and staff that promote these obscene projects do not live here and leave us to suffer the consequences of their bad decisions and yes outright false data in order to get their projects approved.

Many at city hall have forgotten who they work for- it's the residents not the developers and our health and quality of life should be their priority, not the financial enrichment of developers. Would the city staff and developers want this to happen where they live- have their views blocked, breathe bad air, have non-stop truck traffic 24/7 disrupting their sleep with beeping and brakes noise etc.? People moved out here for the larger lots, animal keeping, quiet, night skies, low crime to name a few. We poured our life savings into purchasing our homes in an area we researched and thought was the right place for our families. Warehouses were never intended out here and especially the encroachment into residential areas as the MV Trade Center intends to do. The 2006 comprehensive general plan protected the residents, the new plan does not.

This project was already included on the general plan update as a done deal. It was on the map and consultant thought it was already approved. How did that happen when it hadn't even come forward yet? Again underhanded action at city hall just like when the city promoted the wlc prematurely. This warehouse does not belong here and needs to be eliminated.

The land that this abomination intends to rezone is resident R2 with animal keeping rights. The city keeps whining about losing control if they don't meet certain housing numbers yet they want to remove residential land in favor of another warehouse. They just allowed Chung/Benzeevi committee to remove more animal keeping residential land so we need to preserve what is left. The city needs to stop contradicting themselves and using RHNA when it suits them. DO NOT ALLOW THIS LOSS OF RESIDENTIAL LAND FOR ANOTHER WAREHOUSE ENCROACHING INTO AN EXISTING NEIGHBORHOOD!

Their traffic studies and analysis contain many areas that need to be addressed more completely and false data/info removed. Encelia is not a high traffic street and is not a truck route and should never become one. **Why have the traffic numbers been**

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

inflated for Encelia **to make it seem like all the project driveways won't impact the residents??**

This project intends to direct a huge amount of traffic onto a quiet street and onto Redlands. Redlands Blvd south of Eucalyptus is NOT a truck route although large numbers of trucks break the law daily.

This study seems to assume that Encelia and Redlands will be ok for their trucks when they are not truck routes. **Why hasn't this study adequately addressed the illegal trucks using Redlands Blvd south of Eucalyptus? Will this project pay for additional police patrols to stop the illegal truck traffic? The trucks going south on Redlands to Cactus will have severe negative impacts on the other housing tracks along Redlands and Cactus so why isn't this addressed satisfactorily? These large trucks also destroy our roads much quicker than passenger vehicles- will this project (and wlc) be held accountable in paying for the damage to our roads? It has been mentioned that this will be another Amazon distribution center, if so is their adequate parking and law enforcement for all their small delivery trucks?** We have Amazon in our city already and do not need another. Their drivers are dangerous and invade neighborhoods parking their vehicles off the premises. Again, all these neighborhoods will suffer compounded health and quality life issues associated with adding another warehouse to their already affected community. **Will this project finance the additional police we will need to protect our residents from all these negative impacts associated with our residential road use?**

Employee traffic- we all know that people look for quicker routes to and from their destinations. **How will you protect the existing residents from excessive employee/truck traffic through their quiet neighborhoods?** Non-residential traffic is much more dangerous than residential. **How will you stop employees from parking in our residential neighborhoods? Where are the safe guards and the non-residential traffic noise, dangerous driving, pollution needs to be addressed not over ridden.**

Why have the safe equestrian trails been eliminated from this study? Our master planned trail system includes a safe equestrian overpass at Theodore and it should be down Redlands (and Theodore) to connect with Lake Perris. Only pedestrian and bikes get mentioned.

Aesthetics-The 2006 general plan included many more protections to our residents that this project will destroy. The wlc high cube warehouses will obstruct the resident's wonderful views to the east and now this project will obstruct their views to the north. Just another severe negative impact that is compounded by other projects that have already been approved. Loss of the substantial views to east is bad enough so do not allow this project to obstruct their remaining views. **Why isn't the city protecting the residents better rather than over riding this compounded severe negative impact?**

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Pollution- the city and out of town developers continue to play Russian roulette with our health by approving unlimited warehouses to encroach into our residential areas. There are so many studies already done that show the damage done to our lungs from diesel and other fuels- especially the young and seniors**. Why didn't this EIR address the NOx pollution that will be associated with the project operation? Along with air pollution there will be substantial noise and light pollution 24/7 that are not adequately addressed- will the truck noise and lights be stopped at 10 pm as other activities need to? Will the city finally address this issue and amend our noise ordinance to include warehouses in residential areas?** The beeping trucks at skechers all night have disrupted sleep of those who live north of it and since it opened they haven't been able to sleep with their windows open. Since the paper company opened the noise has disrupted both daytime and night time sleep and that should not be allowed to occur with any more warehouses. **Why hasn't the compounded effect been addressed adequately to include the injustice that this neighborhood will suffer from with the already approved wlc? Do NOT claim it doesn't need to be addressed!**

Water- I don't believe that the EMWD is being truthful on being able to supply water to all these projects coming forward- wlc and the commercial north of the freeway will suck up so much water. I was appalled to read that they will dig a well for their project and suck out the aquifers which aren't getting adequately replenished during so many years of drought. The Festival also dug a well recently and will also be taking aquifer water. We have residents whose property relies on well water that these projects may deplete. **Where are the safeguards for these residents? Why was there no research and data collected on what happens when excessive underground water is removed? How much water will they be pumping from their well? When the underground water is pumped out, the ground will settle and homes could start sinking and sink holes could develop on our roads. Will this project be responsible later down the road for all the damage they've done? This well pumping by warehouses should NOT be allowed and certainly without safe guards and restrictions.**

Jobs- once again the promise of jobs is bandied about to entice people to like this project. The 2006 and 2021 general plans as well as city propaganda every year promise to bring high paying jobs to Moreno Valley so people don't have to commute. Warehouses do not bring those high paying jobs promised. This project like the wlc will swallow up in huge amount of valuable land for a small number of jobs that are not high paying. **What guarantee is there that there will be 2000 permanent high paying jobs? Why hasn't the city learned from past lies from developers in order to get their project approved (skechers/benzeevi promised thousands and did not deliver)?** Warehouses and even trucks are becoming more automated, therefore less jobs and most are temporary. **Why do you keep bringing up the commuting issue when it's been shown that our resident commute times are on average or less than surrounding communities?** In fact the majority of city staff commute into Moreno Valley to work so it is a non-issue intended to instill fear. **Why does the city staff**

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

continue to condemn our residents to low paying warehouse jobs? We deserve better.

For too long now the city staff have wantonly used the “override” to approve too many projects with significant negative impacts in a manner that I believe is illegal. For too long, staff have incorrectly asserted that the City may simply adopt a statement of override when a project results in impacts.

Not so — procedurally, the lead agency can only approve a project with significant environmental impacts if: (1) the adverse environmental effects of a project have been substantially mitigated, or (2) mitigation measures or alternatives are infeasible *and* overriding considerations exist which allow approval of the project. (PRC § 21081; Guideline §§ 15091, 15093.)

Overriding considerations do not come into play unless there are *no* feasible project alternatives. (*City of Marina v. Board of Trustees of the California State University,* 2006, 39 Cal.4th 341,368.) The lead agency, therefore, cannot merely adopt a statement of overriding considerations and approve a project with significant impacts; it must first adopt feasible alternatives and mitigation measures. “CEQA does not authorize an agency to proceed with a project that will have significant, unmitigated effects on the environment, based simply on a weighing of those effects against the project’s benefits, unless the measures necessary to mitigate those effects are truly infeasible. (*Id.* at 376.)

Now with CEQA in play, the city/developer try to claim that rejecting the project and leaving the zoning as is will result in the same if not more severe negative impacts that just leave me speechless. With RHNA in play we need these residential homes- especially as the pandemic has shown kids and adults need larger yards to play in to remain safely distanced. Our large lot neighborhood home sell quickly and are in demand so we need to keep our R2 designation. The **NO PROJECT ALTERNATIVE** is the correct selection and the MV TRADE CENTER needs to be denied.

Our city has been overwhelmed by warehouses and at this point there needs to be a moratorium. No more warehouses and we need more open space per the law. The compounded effects are real and dangerous and should no longer be ignored.

As residents we don’t have investor money to afford legal services and PR staff the way developers do. Our hard earned money went into purchasing our homes in a place chosen that suited our life styles. We moved further out of town to larger lots, space, low crime, night skies, views etc. and trusted that our city government would actually work to protect us as city governments were set up to do. Staff and elected officials take ethics training and oaths of office to do so. Unfortunately developer money has completely corrupted our system of government and the residents have not been protected. Rejection of the Moreno Valley Trade Center will be the start to reverse prior environmental injustices inflicted on the tax paying residents of Moreno Valley.

Subject: Moreno Valley Trade Center appeal @ city Council Meeting tonight
Date: Tuesday, November 15, 2022 2:25:21 PM

Warning: External Email – Watch for Email Red Flags!

I am unable to attend the meeting to tonight so I wanted to be sure my comments are seen and considered for this hearing.

I urge you to uphold the Planning Commission's recommendation to not approve this project. It is not the right location for this project and is not consistent with our recently completed general plan that had extensive input. As the planning commission also said there is already a huge area in the general plan zoned for this type of project that has had almost nothing built yet (the World Logistics Center). The WLC area is a huge area already zoned for this type of building nearby and is not as close to homes and does not require a rezoning.

To summarize my more detailed comments below, the Moreno Valley Trade Center project is right across a small street from existing homes, severely impacts the viewshed of these homes (they would have a view of a towering 35 foot berm), will still have noise impacts (loading docks and lots of trucks just on the other side of the berm), and air pollution effects that are not mitigated to non-significance, and will add more truck traffic and employee vehicle traffic to a very small traffic circle and overpass on Redlands Blvd. The number of trucks is extremely high for this facility. And while this project would provide construction jobs that are temporary, the homes zoned for this area would also provide future construction jobs for much needed housing in the city, or could provide construction jobs if built in an area zoned for this type of facility.

The project at first may sound as if it has been scaled back to reduce impacts from the project since the Planning Commission recommended against it, most of the changes are minor and still result in several significant impacts as before.

The reduction in the size of the building is minor as the square footage is only reduced by less than 5 % from the previous proposed size.

The number of truck loading docks will only reduced by 4 out of a total of 117 on the south side of the building closest to the homes - that is still 113 loading docks on the south side nearest homes! And another 90 loading docks (instead of 97) on the north side. 203 loading docks total still at this building! That is a lot of loading docks and would not be a significant change to the amount of noise and air pollution coming from this activity. And another 228 tractor trailer parking spaces besides the loading docks. That is a lot of trucks in a relatively small area right next to existing homes!

The visual impact is changed but not reduced. Instead of the current scenic vistas, the existing homes houses will have a view of a 35 foot berm right along Encelia Avenue just feet from the homes and way taller than the one story homes there. This berm will block a view of the building more but still remove any vistas they now have. And none of the changes will reduce pollution impacts as the truck numbers are high, loading docks are still nearby on the south side of the building and trucks will idle, travel and park just on the other side of the berm from the homes.

While this project appears to remove previous traffic impacts to Encelia Avenue itself, there will still be more trucks in the area that will pollute the air, damage roads, continue to run over curbs at the too small roundabout and impact the too small overpass and ramps at Redlands Blvd with no proposal to improve the overpass anytime soon. There will be a high volume of employee cars also added to Redlands Blvd. as well as a traffic signal added on Redlands Blvd. between Encelia and Eucalyptus. Redlands Blvd. at certain times of day is very busy already. I thought the traffic circle was to help improve traffic flow but the signal then added seems to counteract that attempt. And traffic over the overpass already backs up at

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

certain times of day.

As far as providing construction jobs, the homes that were zoned for the area would also provide construction jobs and there is a very high demand for more housing.

The city is also proposing more homes just to the southwest of this trade center according to the general plan and those potential residents have no say in this proposal since it has not been developed yet and would impact them as well especially from noise and air pollution.

This project is also right next to the Prologis Development on Eucalyptus that was made to revise their proposal to keep large buildings away from the homes that are now going to be impacted by this proposal. How is it right to have that developer revise their project to keep it further from the homes and now put a bigger building even closer to those same homes?

This is also another change to the very new general plan that was supposed to be a vision for the city for many years to come. What is the point of all of the work that went into the general plan to turn around and immediately change it? As the planning commission pointed out this is not the right place for this project and there is already a nearby very large area approved in the current general plan for this type of project.

Please do not approve this project at this location.

Melody Lardner
34 year resident of Moreno Valley

Subject: Public Hearing re: PEN19-0191 INITIAL STUDY FOR THE MORENO VALLEY TRADE CENTER PROJECT
Date: Tuesday, November 15, 2022 2:36:05 PM
Attachments: INITIAL STUDY FOR THE MORENO VALLEY TRADE CENTER PROJECT.pdf

Warning: External Email – Watch for Email Red Flags!

Mr. Kelleher,

This email is to **reject** the project proposed for the project location:
South of Eucalyptus Avenue, North of Encelia Avenue, East of Quincy Street and West of Redlands Boulevard.

Based on the Initial Study for this project, there is nothing that should be acceptable about this project due to the numerous items that will significantly impact our community.

Without significant drainage upgrades to the entire east end of the community, this project will directly impact the runnoff into our residential community causing increased flooding to our residential neighborhood.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

ISSUES & SUPPORTING INFORMATION SOURCES:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
protective or avoidance measures. The Project's potential to violate any water quality standards or waste discharge requirements during short-term construction and/or long-term operational activities, and the protective and avoidance measures proposed by the Project to address water quality will be fully analyzed in the EIR.				
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	☐	☐	☒	☐
Response: Within the City of Moreno Valley, there are few domestic uses for groundwater due to salinity/water quality issues; therefore, the City primarily relies on imported water from the Eastern Municipal Water District (EMWD) for its domestic water supply. The Project does not propose the installation of any water wells that would directly extract groundwater; however, the proposed increase in impervious surface cover (e.g., building area, pavement) that would be installed on the Project site would reduce the amount of water percolating down into the underground aquifer that underlies the site – although it should be noted that the Project would provide design features such as pervious landscaped areas and a water quality/detention basin that would maximize percolation on-site. As noted in the City's General Plan FEIR (Moreno Valley, 2006, p. 5.7-12), "the impact of an incremental reduction in groundwater would not be significant as domestic water supplies are not reliant on groundwater as a primary source." Accordingly, with buildout of the Project, the local groundwater levels would not be substantially affected. As such, impacts to groundwater supplies and recharge would be less than significant.				
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
i) Result in substantial erosion or siltation on- or off-site?	☒	☐	☐	☐
Response: During construction of the Project, soils would be exposed and subject to erosion at the Project site. The Project Applicant would be required to adhere to standard regulatory requirements to minimize water pollutants including sedimentation in stormwater runoff, including, but not limited to, requirements imposed by the City of Moreno Valley's National Pollutant Discharge Elimination System (NPDES) Municipal Stormwater Permit and a Project-specific Stormwater Pollution Prevention Plan (SWPPP) and Water Quality Management Plan (WQMP). Mandatory compliance with these standard regulatory requirements are expected to preclude substantial adverse environmental effects related to erosion or siltation. Notwithstanding, the EIR will evaluate the Project's potential to result in substantial soil erosion.				
ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite?	☒	☐	☐	☐
Response: A site-specific hydrology study will be prepared to evaluate whether the Project would result in a substantial change in the rate or amount of runoff from the site. Any increase in the rate or amount of runoff from the site could result in increased potential for flooding on downstream properties. The results of the site-specific hydrology study will be documented in the EIR.				
iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	☒	☐	☐	☐
Response: As indicated under Response X(a), the Project's potential to result in sources of polluted runoff will be disclosed and evaluated in the required EIR. A hydrology study will be prepared for the Project to evaluate the Project's proposed stormwater drainage system; the hydrology study will identify if the existing stormwater drainage system can adequately accept stormwater runoff from the Project site or if improvements are needed. The findings of the hydrology study will be disclosed in the EIR.				

Moreno Valley Trade Center Page 29 City of Moreno Valley

The site map also included shows there will be truck docks on the south side of the building that will inherently allow trucks to use and access the building by using the residential street Encelia Ave. This road connecting at Redlands Blvd. was never designed for truck traffic let alone high volume vehicle traffic.

Also, what will keep all the business traffic from using the residential neighborhood as their main streets to enter and exit their facility?

It is strongly requested that should this building be allowed I will petition for no business access for any vehicles along Encelia. We will also petition that our entire community have all new drainage, landscape improvements with

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

NO portion of the DIF to be paid by the stakeholders of Moreno Valley.

Truck Traffic on the 60 Freeway will drastically impact our community.

Tracy Hodge

From: brooke hall
To: Sean P. Kelleher
Subject: SUPPORT THE Moreno Valley Trade Center (warehouse)
Date: Tuesday, November 15, 2022 3:07:21 PM

Warning: External Email – Watch for Email Red Flags!

Hello Sean Kelleher,

I am appealing to the Moreno Valley council to support the new Moreno Valley Trade Center. I believe it will be extremely beneficial to our community. Some of the many benefits include increased revenue for the city, an influx in job supply, more jobs created for the police and fire department.

This facility will also increase property value, provide increased tax revenue for better roads, and bring more commerce to our local businesses. We as a community can use these new jobs and revenue especially in the current economic climate.

I am a strong advocate for this project and believe in its positive impact.

Thank you,

Brooke Victoria

Please Vote Yes for the Moreno Valley Trader Center project!

I am a Moreno Valley resident who supports the Moreno Valley Trade Center!

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Absolutely. The best way to get ahold of me is via cell phone (951)522-8917.

Here is the information received from the Department of Cannabis Control:

"Lastly, I understand Teresa let you know that we are still waiting for a response from the local jurisdiction. Did the city happen to get to back to you at all? Our local jurisdiction group sent the city another request to respond on September 28 but still no response from them."

Feel free to send the edits through the portal or email them directly to me.

Thank you again for these quick clarifications.

Good Morning Ezri,

I am away from the office today but would be available for a call tomorrow. We are preparing the final conditions of approval based on the Planning Commissions' action. Your next step will be to submit to the building and safety division for your proposed tenant improvements.

Thank you,

Sean

Dear council member

As a 25 year voting resident of Moreno Valley I strongly support the above project to vote yes. The project will help our community in many ways without hindering us financially. The revenue will improve Moreno Valley such as a much need park and road ways located near the project.
This project will help with revenue for the support of our police, fire, schools, and other city employees.
I strongly support this and see only positive outcome from this project
Sincerely
Michelle Hall

Subject:	Agenda F.1 MVBC (Moreno Valley Business Center)
Date:	Tuesday, November 15, 2022 7:19:24 PM

Warning: External Email – Watch for Email Red Flags!

Moreno Valley Mayor, City Councilmembers and Planning Commission

Enough with the Warehouses! The proposed project MVBC F.1 set on the agenda at the 11/15/22 City Council Meeting tonight is too much. When and where will you STOP? There are locations that are appropriate and then there are locations that are NOT...this is NOT.

Seriously, do your job, think about the residents who live in this area and the residents who shop in this area and the many CARS that use Day St to get to the other side of town. Now think about the added traffic, especially semi-trucks, residents walking or riding their bikes, nearby schools and parks, pollution. We were assured that all the warehouses in the east end and now on Heacock and Ironwood would not cause a problem, they would not be using our streets, such as Ironwood! We now know that was a lie.

Just yesterday while taking my kids to Box Springs Elementary School located on Athens Dr./Ironwood Ave; while waiting at the light, I counted eight Logistic semi-trucks pass by me like an endless caravan, heading toward Day St. and Box Springs. This was due to the stopped traffic on the west bound 60 fwy. More and more out of area trucks and vehicles are discovering that Ironwood will keep them moving all the way to the end. The traffic in this city is relentless. Before the only semi-trucks you would see on Pigeon Pass/Ironwood was Staters Bros. or Home Depot...now we have all the idiots who don't want to sit on the congested 60. It's dangerous for the parents and kids trying to get to school.

Now you want to completely make Day St an area where residents will avoid and therefore also find somewhere else to spend their money. What about the nice new Hotels in that area have been slowly attracting visitors who need to stay nearby? Do you really think they want a view of warehouses, semi-trucks, traffic, pollution? I think not.
The residents who live in that area, the ones who've waited years and years for road improvements, basic water service, waited for the area they live in to be cleaned up, crime and other undesirable things to improve...are going to get screwed again by sweet deals, by others who don't live there, who will dictate the outcome of their home equity. It's wrong on every level.

Please vote against this project. It's not enough to just change the general plan to fit deep pockets...to say it's okay, there's other warehouses in the area.

Peggy Holmes
36-year resident of Moreno Valley

Warning: External Email – Watch for Email Red Flags!

Please Vote Yes for the Moreno Valley Trader Center project!

I am a Moreno Valley resident who supports the Moreno Valley Trade Center!

Additionally, I support the project because it:

- Creates 1,500 NEW jobs
- Creates a 18-acre sports and kids park
- Contributes $6.5 million for community services
- Creates new traffic signals, resort-caliber landscaping, and noise reducing barriers

I want this to be read into the record at the city council meeting regarding this matter.

Subject: Warehouse approval
Date: Saturday, November 19, 2022 6:15:53 PM

Warning: External Email – Watch for Email Red Flags!

I have been a resident of Moreno Valley for over 36 years. The mushrooming of warehouses and insidious increase in semi traffic and resulting traffic congestion is disturbing to me. This has caused me to seriously consider moving out of the city.
Warehouses and their high semi traffic and resulting air pollution do not belong in or near houses or schools.
The city needs more employers and more than minimum wage or manual labor employment.
We don't need to have a reputation of one of the largest warehouse centers in the US but that's what it appears to me to be the mission of the city government this century.

Subject: No More Warehouses
Date: Monday, November 28, 2022 11:19:21 AM

Warning: External Email – Watch for Email Red Flags!

Good morning,
I'm writing this email to stand up for the families that will be affected from the two new warehouses that are planned to be constructed. We have enough warehouses. These families will have to live through the noise, the traffic, and diesel pollution/smell 23/7/365 days a year! I ask that you be considerate of these families. These people moved into a neighborhood they fell in love with and that could be taken from them. We want our Moreno Valley residents to feel comfortable when they're at home, to have their peace and quiet and to be able to simply enjoy the comfort of their home which will be taken from them if the warehouses are built.
My name is Crystal Jimenez, I hope you can really take this email to heart and consider why it wouldn't be a good idea to build warehouses.
Thank you,

Warning: External Email – Watch for Email Red Flags!

Honorable Mayor and Councilmembers;

I am resending my previous statement with some additional information.

Please include these comments as part of the record for the above-mentioned public hearing. I am a resident of the Heritage Ranch community, the southern border of this proposed project. **We again ask you to uphold the Planning Commission's denial of entitlements for this project** for the same reasons that were voiced on December 7, 2021, during the applicant's appeal of their decision. While it is true that the developer has reached out to me with some proposed changes that will eliminate the traffic exiting onto Encelia Ave., **the environmental impact has not changed**. There will still be the **same amount of pollution in our neighborhood** as described in the FEIR, the **same truck and employee traffic congestion at the roundabout of Redlands and Eucalyptus**, and the **same property devaluation** to our homes if this project is approved.

I believe that the people in the affected community should have the most credibility because we also represent the children to be affected by the decisions of people and interests that do not hold or care about the well-being of our community. The objective fact that we have to sit through 50+ paid shills of this MVTC political theatre is disappointing. There are always paid workers that claim to live amongst us or live in Moreno Valley at large to lobby for destructive and irreversible policy prescriptions for our neighborhood in the name of revenue and personal gain or greed. It is frustrating to listen to and deal with knowing those people who are for projects in our community do not live here. If the same questionable projects were dropped in their community they would disapprove. It is shocking to us that some of the things that people believe are "Good for Moreno Valley". Really? Good for who? These outside interests wanting and praising this project as a net positive for Moreno Valley do not live in this community. This is not a good project... If you approved this project then you will want to approve the Pilot Truck stop next... I would like to not assume that you care more about city revenue than the health and well-being of the people in your community.

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

Mr. Marquez, Cabrera, and Delgado, you were ready to vote no on December 7th after listening to us. The June 21, 2022 vote was conveniently postponed till Nov 15th right after the current elections. Again, please revisit the project's location and **visualize the magnitude of a 1.3 million sq. ft. building** and what it will do to our neighborhood.

The same sentiments are shared for the MVBC.

If these developers are offering $500,000 to the city to develop in areas that will cause irreparable harm to the community then there must be something that is innately wrong with the project. **It does not fit in with this community and my children will pay the price for greed and power**. You ran as Democrats that are supposed to care about the community and environment over corporate greed. But again objectively you are considering large warehouses that **will not have many six-figure jobs and tons of low-wage jobs** that are not making a liveable wage. **Then you are going to consider a Pilot Truck stop dispensing "Gas" when it does not align with our all-electric future,** besides the fact that we already have **four gas stations in a two-square-mile area**. I already own two electric vehicles. This behavior that is being tolerated does not fit in with our progressive agenda and typifies the corporate monster that is allowed to propagate itself in retrospect to what you ran on as politicians and supposed protectors of the community.

Reiterating the sad part is that we will rehash the sideshow of union workers claiming to be a part of our community that somehow we never see at our local meetings tell us how good this project is for Moreno Valley, to say nothing of how it will affect the immediate local residents. These actors are not in fact a part of our local community. They never talk about family, kids, traffic, noise, or air quality in the local community. They only talk about jobs. Low-paying warehouse jobs. Why is that? Because they do not live here off of Redlands. They have no interest in our concerns about why this project's location and proximity to our community is a net negative.

At the end of the day, I like business and growth... Just not at the expense of my home, children, and the overall well-being of our community. This project can exist... They just need to move it into the area that was already zoned for this... Move it off Theodore...

Attachment: City Council - Public Comments Packet 2 of 3 [Revision 4] (6209 : Moreno Valley Trade Center/Park)

From: Jeff Sims
To: Sean P. Kelleher; City Clerk; Manuel A. Mancha
Subject: MVTC
Date: Wednesday, November 30, 2022 2:58:42 PM
Attachments: 11 30 22 (MVTC Letter).pdf

Warning: External Email – Watch for Email Red Flags!

Hi,

I respectfully ask this letter and attachments be included with the agenda packet for the upcoming MVTC appeal anticipated for the December 6, 2022 Council Meeting.

Thanks,

Jeff Sims

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

November 30, 2022

To: Honorable Mayor and City Council Members
City of Moreno Valley

From: Jeff Sims
Area Resident
City of Moreno Valley Planning Commissioner

RE: Moreno Valley Trade Center
Appeal PAA21-0001

On October 28, 2021, the Moreno Valley Trade Center ("MVTC or Project") was considered by your appointed Planning Commission and unanimously denied entitlement approvals based on its lack of consistency with the recently updated City of Moreno Valley General Plan – 2040. On December 7, 2021, the Developer appealed this unanimous decision of the Planning Commission to the City Council. After considerable input by interested stakeholders, Council Members deliberated. Deliberation comments by Council Members Delgado, Cabrera, and Marquez suggested a potential majority vote to uphold the Planning Commission's decision. Mayor Gutierrez acknowledged this with his statement "it doesn't appear there is support for the project." Instead of calling for the vote, Gutierrez motioned for a continuance, which was seconded and approved. Apparently, the continuance was to give the Developer time to address concerns and objections stated at the Planning Commission, and City Council appeal.

Of note the Developer heard the concerns and objections regarding the project at the October 28, 2021 Planning Commission Hearing where it was unanimously denied but cavalierly five weeks later at the City Council Appeal Hearing addressed none of the concerns. A person could go down many paths on why none of the concerns were addressed. But an obvious reason is Hillwood's motivation is profit driven with little to no concern of the impacts on the City, and especially for the existing residential neighborhood directly adjacent to the proposed MVTC. Hillwood wants the Project entitled to achieve their goal of maximizing profit.

The continued appeal was scheduled for June 21, 2022. The Developer at the last minute pulled the item from the agenda. It is understood the Developer between December 7, 2021, and June 21, 2022, offered additional "City Benefits" including a proposed Developer funded park near Ironwood and Redlands Blvd., and a $500,000 cash contribution to the Moreno Valley Community Fund (of which I understand the Council Members control the allocation and disposition of the funds). The MVTC appeal was most recently pulled from the November 15, 2022 Council Meeting due to lack of quorum.

Although at the time of writing this letter the Project Conditions and Agenda Packet for the December 6, 2022, meeting was not available it is my understanding after speaking with City Planning staff these additional "City Benefits" are still on the table, and the plans and conditions for the Project are essentially the same as those proposed in June. The question I ask each of you is – is the offering by the

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Developer to influence approval of their Project adequate consideration for the actual harm and damage it will impose on your citizens who live in the existing residential neighborhood directly next to this proposed project?

As one of your appointed Planning Commissioners I find the project is a nice logistics/warehouse project, but in the wrong location. Its location simply is not compatible with the existing land uses adjacent to it. Below are some of the concerns I had and still do about the MVTC:

1. Incompatible Land Use - The proposed MVTC land use is not consistent with the City of Moreno Valley General Plan Update. The General Plan Update indicates R-2 zoning for the property where the MVTC is proposed. The General Plan Update process and the entitlement review process for the proposed MVTC was happening concurrently over a two-year time frame. It is hard to believe city planning staff, city leadership, including the Council was not aware of the proposed MVTC during the General Plan Update process. The General Plan process considered the need to retain compatible land uses adjacent one another and appropriately retained a residential land use adjacent the existing half and third acre residential lots directly adjacent to the property where the MVTC is proposed. Your Planning Commission recognized the incompatibility of land uses and denied the MVTC entitlements due to its lack of consistency with the City's General Plan as approved by this Council. Why go through the years of effort to develop and approve a General Plan update and then not honor it?

2. Traffic – The original MVTC design proposed for maximum utility of a warehouse a design where thousands of daily employee passenger car trips would be dumped onto Encelia Avenue. Encelia Avenue is a one lane in each direction residential street and one of the two main access points into the adjacent existing rural residential neighborhood. The Developer indicated at the Planning Commission Hearing "they tried everything they could to mitigate impacts on the adjacent neighborhood, but the design as proposed was necessary so truck traffic in and out of their proposed project would not interface with their employee ingress and egress." Their proposed solution to the problem they are creating is to make a forever problem for the existing neighborhood. Now Hillwood has modified the MVTC to not allow MVTC traffic onto Encelia Avenue by building a 40 ft. wide private street parallel to Encelia Avenue. This close to half mile long private street will be "masked" from sight behind a 35 ft. tall berm, but the adjacent neighborhood will undoubtedly be subjected to significant increases in noise and forced to breath the air pollution as this proposed private circulation road is only 250 feet away from existing homes along Encelia Avenue. Since this is a proposed logistics/warehouse operation (or e-commerce fulfillment operation) with no time limits on operation, the noise and air pollution will be imposed on the existing neighborhood 24/7 – 365.

3. Air Pollution – Although I am a registered civil engineer, I am not technically versed in the details of air pollution. But it does not take an engineering degree to know regardless of what study says what, when thousands of new daily car and truck trips are introduced into an area where they previously were not, there will be a significant and immediate increase in air pollution in the vicinity. Hillwood in hopes to placate nearest residents offers band aid mitigation. Ask yourself, would I want my family to breathe in diesel soot 24/7 – 365 for as long we continued to live there? Who wants to live where you need air filtration for your home and to have the

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

exterior of the house power washed due to ongoing pollution? Is it fair to the citizens who invested in this neighborhood to be polluted on for the benefit of a profit driven developer who won't live next to the mess they have created?

4. Noise Pollution – Like with air pollution, it does not take an engineering degree to know regardless of what study says what, when thousands of new daily car and truck trips are introduced into an area where they previously were not, there will be a significant and immediate increase in noise pollution in the vicinity. Hillwood in hopes to placate nearest residents again offers some band aid mitigation. Ask yourself, would I want that right next to my house? Councilmember Cabrera during the appeal hearing stated his first-hand experience about noise impacts from the logistic/warehouse use near his home and indicated it was noticeable. There will be increased noise pollution happening all hours of every day. The revised and current MVTC site plan shows a private truck circulation road where trucks will be driving parallel along Encelia only 230 ft. away from homes 24/7 – 365. The 40 ft. wide private road is on the neighborhood side of the proposed 14 ft. screen wall and appears to be at an elevation where the exhaust pipes of the diesel trucks will be only a few feet below the top of berm. The proposed 14 ft. screen wall only screens the southerly loading dock area and does nothing to mitigate sounds from the trucks using the private circulation road. Essentially the Developer eliminated the traffic problem on Encelia Avenue from the Project but did so at the expense of increased noise and air pollution – both of which are clearly incompatible with the existing residential neighborhood.

5. No boundary/perimeter fencing along Encelia Avenue – As mentioned above under #2 "Traffic", the project proposes installing a massive 35 ft. high landscaped berm along Encelia Avenue with a goal to mask the project from the existing residential neighborhood. The berm will obliterate existing northerly viewsheds currently enjoyed by the existing neighborhood (35 ft. high graded berm relative to existing Encelia street elevations and then topped with trees). The Developers own plans show cross sections of this berm to scale (attached). When looking at the cross section, notice the relationship of the person to the height of the berm and trees. The area of open space on the south side of the MVTC property, including the landscaped berm totals around 7.5 acres with no perimeter fencing along Encelia Avenue. If the Project is approved and built as proposed, going toward the Project from the northerly right of way of Encelia Avenue there will be a 35 ft. high landscaped berm (relative to existing centerline elevation of Encelia Avenue), then a landscaped open space between the berm and a 40 ft. wide private truck circulation road, and then a 14 ft. high screen wall. Attached are cross-sections showing all of this from the Developers plans. Concern about this include:

    a. The 14 ft. screen wall will do nothing to constrain any of the noise from the truck traffic using the 40 ft. private truck circulation road as the private truck circulation road is on the neighborhood side of the screen wall. The private truck circulation road is being proposed to enable trucks to access loading dock on the north and south side of the proposed 1,200,000+ sf warehouse/logistic building 24/7 – 365 days per year from Eucalyptus only. Looking at the Developer provided cross-sections, the private truck circulation road elevation is such where the exhausts stacks of the trucks will be very

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

close in elevation to the top of the 35' graded berm. The noise and pollution from the truck traffic on this private truck circulation road will directly impact the neighborhood as it is only 230 ft away from the existing homes.

b. As proposed, there is no perimeter fencing for the Project along Encelia Avenue to deter unwanted loitering, camping, or trespassing on the privately owned 7.5 acres of landscaped open space. With Encelia Avenue kept as a quiet, low traffic residential street directly adjacent a large unfenced open space, one can reasonably anticipate this unfenced, unsecured open space area will become attractive to homeless along with the problems associated therewith. This would be further exacerbated if the Pilot Travel Center is approved on appeal to Council. The residents living in this neighborhood while at work to pay for their homes they invested in will have to worry about increased property theft, and other crimes potentially carried out by those occupying the unfenced, unsecured open space.

When deliberating on this project, I ask you to think about these five above compatibility issues. Would you want this next to your home? But beyond straight compatibility issues there are other concerns.

For those who drive Redlands Blvd. on a routine basis to access the 60 Freeway know the roundabout at Eucalyptus is challenging now during peak periods caused by existing traffic. You don't have to be a traffic engineer to know this will be exacerbated with the addition of the proposed MVTC. This problem will likely remain for decades until the Redlands/60 interchange is upgraded. I say decades because as a resident of the City of Moreno Valley living in the east end since 1994, I've seen how long the Moreno Beach interchange has taken to be improved, and it's still not done. The City is getting the cart in front of the horse approving major truck and traffic producing projects where supporting road infrastructure is obviously deficient. The Redlands Blvd/60 interchange is deficient now and addition of the proposed MVTC will further degrade the quality of life of area resident's dependent on this interchange. The daily drive in and out of Moreno Valley is already miserable during morning and evening commute times due to existing freeway congestion on the 60 between the 60/215 interchange and 60/91 interchange. Absent an improved Redlands/60 interchange the MVTC will add more time lost to sitting and slogging through added traffic congestion trying to get off 60 at Redlands Blvd. and navigating through the roundabout. I am sure most, if not all, of the area residents who use the 60 to get to work agree the proposed MVTC will exacerbate an already miserable daily commute.

The Moreno Valley portion of the draft LAFCO Municipal Services Report is attached. As you know LAFCO is an unbiased governmental entity to monitor services provided by various municipalities within Riverside County. There are some interesting findings in this unbiased report you as elected leaders of this City should be mindful of:

1. The median household income in Moreno Valley is lower than the rest of the County of Riverside
2. Moreno Valley's population grew slowly during the last decade at just 0.77%
3. Population growth over the next 15-25 years is not expected to keep up with county-wide growth rates
4. The City's land use profile "is disproportionately skewed towards industrial development with almost 75% of the City's commercial square footage designed for industrial users"
5. Largest employers are distribution centers

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

6. The City will not meet its Regional Housing Needs Assessment 6th cycle (RHNA) in all income categories.
7. Major sources of income:
    a. Property tax
    b. Sales tax
    c. Property tax in lieu of vehicle licensing fee
    d. Utility tax

Supporters of large box distribution/logistic facilities tout benefits of job creation, increased ability to work near home, and living wages. If this is true, why is the median income in Moreno Valley lower than the rest of the County of Riverside? Why is the City's population growth slow and expected to stay slow? Perhaps it is because most logistic/distribution jobs don't pay living wages sufficient to own and buy a home. How many of these jobs are full-time, benefited jobs? Or are the job creation numbers inflated due to part-time and seasonal worker turnover? Perhaps the word on the street is Moreno Valley is becoming a less attractive place to live and raise a family because of its disproportionately skewed land use of industrial development which creates traffic congestion, difficulty to get in and out of Moreno Valley, low paying jobs, and added air and noise pollution.

This Council recently approved an update to the City's General Plan with this property planned for residential development consistent with the existing residential directly adjacent. If you can somehow find a way to justify approval of the proposed MVTC from the "city benefits" over the irreparable harm to the adjacent residential residents, this land use change approval (GPA and zoning) from residential to industrial shows a continued disregard by the City in meeting its state of California Regional Housing Needs Assessment (RHNA) metrics. A more appropriate General Plan Amendment to consider for these 80 acres would perhaps be a transitional residential use. For example, the property could transition from R-2 along Encelia Avenue (for consistency with existing homes) to higher density residential along Eucalyptus (for compatibility with existing warehouse uses). At least there would be a buffer for the existing residential use with similar and compatible uses. Under this scenario, people moving there would do so acknowledging/accepting the surrounding existing land uses. And with transitional higher density residential, the City could indicate progress towards meeting RHNA metrics by providing more opportunity for affordable housing consistent with Moreno Valley incomes.

We all know the City needs increasing tax increment revenues from development to meet ever growing expenses. If the MVTC is built on this property, the property tax increment received by the City will see an initial large increase (over current) then see only small incremental increases due to Prop 13 legislation. In contrast if developed as residential land use consistent with the recently updated General Plan, the City would receive an initial large increase in property taxes, plus receive ongoing increased sales tax, and utility taxes as the added residential population will live, shop, and spend in Moreno Valley. Also, as part of a residential development the residential developer would be required to pay development impact fees such as park fees to fund a park.

Saying no is hard especially on union supported projects. Labor unions focus on keeping their dues paying members employed. But how many of those dues paying union members live in Moreno Valley or anywhere near where this project is proposed? The reality is not many, if any, do. After a union supported project is approved those same union representatives will be at the next Planning Commission and Council Meeting in whatever town the next project is proposed. It's understood it is quite an undertaking to get elected and re-elected. It takes backing and money to get exposure. Hats off to all of you seeking elected office. Maybe it's a bit naïve on my part, but it would be nice to believe

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

those seeking elected office remember the people who live, shop, and spend in Moreno Valley are the ones who are most impacted by the consequences of the decisions. Out-of-towners and special interest campaign contributors who participate to influence local city elections won't live with the negative, harmful impacts of the projects they support. In the recent special election in April, the council seat win was not by significant margin which may be indicia people are beginning to take note of the policies and stances of people seeking elected office here in Moreno Valley. As traffic in and out of Moreno Valley gets worse and neighborhoods are impacted by traffic, noise, and air pollution from warehouse projects it is likely there will be less support for leadership who supports approving them.

Many cities are pushing back on warehouse/logistics project approvals. There is an awareness of the incompatibility of these land uses adjacent to or near existing residential land uses. With the already approved World Logistics Center comprising approximately 2,800 acres, perhaps tapping the brakes a bit would not be a bad decision.

In the event the Council makes findings and justifications indicating the proposed MVTC has more benefit to the City than harm despite Planning Commission denial and significant area opposition, it is requested the Council condition the MVTC with the following added improvements:

1. **Addition of perimeter fencing along the entire length of Encelia Avenue such 6 – 8 ft. high metal fencing with masonry pilasters. Common sense should make this an obvious requirement.**

2. **Record an irrevocable deed restriction or some other legally sufficient mechanism on the property forever disallowing any project traffic onto Encelia Avenue. The only exceptions would be access for emergency by Fire or Police, and if the property in the distant future was redeveloped into residential.**

3. **Addition of a traffic signal at the intersection of Redlands and Dracaea or Encelia.**

4. **Full improvement of the west side of Redlands Blvd. between Encelia and Dracaea. It is anticipated the proposed MVTC is already conditioned to fully improve Redlands Blvd. along its frontage between Eucalyptus and Encelia and provide for adequate transition from full improvement on Redlands for southbound traffic to the existing two-lane roadway on Redlands between Encelia and Dracaea. This would complete Redlands Blvd. between Eucalyptus and Cottonwood and be an incremental add to the project conditions.**

Items 3 & 4 are needed to provide area residents with safe access to Redlands Blvd. and ability to leave the area via Cottonwood to Moreno Beach or Alessandro to avoid congestion at the roundabout and the unimproved 60/Redlands interchange. To provide some equity to the MVTC Developer, the Developer and the City could enter into a reimbursement agreement where MVTC would be reimbursed some proportionate amount from other developers within an identified Benefit Area who benefit from Redlands Blvd. street improvements. For example, there is undeveloped property along the west side of Redlands Blvd. between Encelia and Dracaea. The developer of that property would likely be conditioned to build out this improvement if not already built. It would seem reasonable this developer would be required to contribute a proportionate share of the expense paid by MVTC for making the improvement.

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

As a Planning Commissioner for close to 10 years I have participated in the approval of most warehouse/logistic projects in this City. This includes voting yes for the World Logistics Center (WLC) despite living close to it. What WLC has going for it is a plan for buffering the impacts of its project from the existing residential and eliminated truck and employee traffic from Redlands Blvd. by having access from Theodore now WLC Parkway. Most other warehouse/logistic approvals in the City have been in areas where the existing underlying land use zoning allows for warehouse/logistic use, or the projects are located where there are existing non-residential land uses, and existing city approved truck routes. This project on two sides (Encelia and Redlands) is not located next to city approved truck routes. Rather, next to small residential single lane in each direction streets.

The proposed MVTC even as modified to eliminate traffic on and off Encelia Avenue, will create irreparable harm to the existing residential neighborhood. Residents bought homes in this area with a reasonable expectation City elected would respect and protect their investments by rejecting entitlement requests for incompatible land uses on adjacent property. Prior Planning Commissions and City Councils have done this in the past. For example, when Pro-Logis was developing warehouses along Eucalyptus east of the auto center, Pro-Logis responsibly agreed with area resident and city leadership to maintain a buffer of their proposed industrial/warehouse use to the existing residential and eliminated two buildings from their project.

Saying no is hard but sometimes needs to be done. This is one of those times. The harm the proposed MVTC creates far outweighs the tax revenue increase this project will generate, a proposed park, and $500,000 cash contribution. There are approximately 2,800 acres of property already approved for warehouse/logistics for the World Logistics Center nearby and the existing neighborhood does not deserve having this incompatible use built right on top of it. A yes vote on the proposed MVTC benefits out-of-town developers who will enjoy profits at the expense of city residents.

Please do right by the approximate 1,000 citizens who have invested and live in the 250 +/- homes between Encelia and Cottonwood who pay taxes, shop, spend, and vote in Moreno Valley. Don't ruin a nice neighborhood. **VOTE NO UPHOLDING YOUR RECENTLY APPROVED GENERAL PLAN UPDATE AND YOUR PLANNING COMMISSIONS FINDING THE PROJECT IS NOT CONSISTENT WITH THE GENERAL PLAN.**

I apologize for the long letter but thank you for your time to read it as part of your considerations in coming to a decision. If you have any questions or would like to discuss, please feel free to contact me.

CITY OF MORENO VALLEY

The City of Moreno Valley incorporated in 1984 as a general law city in the County's Western Region.[110] The City's northern, eastern, and the majority of the southern boundary is shared with unincorporated Riverside County territory. Most of the City's southern boundary is adjacent to the Lake Perris State Recreation Area. The City of Perris boundary is immediately south of a portion of Moreno Valley. The City's western edge is bound by the March Air Reserve Base, City of Riverside corporate boundary, and unincorporated territory. The City's incorporated boundary covers an area of 51.3 square miles and the City's SOI extends northwest and southeast to encompass an additional 15.5 square miles, for a combined 66.8 square miles.[111]

The City's demographic profile is presented in Figure 84.

Figure 84: Demographic Profile - Moreno Valley

Moreno Valley	City	SOI	County
Population as of 2020	208,838	150	2,442,304
Population as of 2010	193,365	105	2,189,641
Annual Pop. Growth Since 2010	0.77%	3.63%	1.10%
Housing Units	57,523	55	867,637
Persons / Housing Unit	3.63	2.73	2.81
Land Area (sq mi)	51.3	15.5	7,206.0
Persons / Square Mile	4,071	10	339
Median Household Income	$64,073	$93,293	$67,369
Projected Population in 2035	246,068		2,995,509
Annual Proj. Growth 2020-2035	1.10%		1.37%
Projected Population in 2045	266,814		3,251,705

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Moreno Valley's population grew slowly during the last decade, increasing at just a 0.77 percent annual growth rate to a total population of almost 209,000. Moreno Valley is the second-largest city in the County of Riverside. Moreno Valley has large households (3.63 persons per household) and a high population density (4,071 persons per square mile) when compared to the County averages (2.81 persons per household and 339 persons per square mile). The population projections over the next 15 to 25 years indicate that population growth will increase, but growth is not expected to keep pace with County-wide growth rates.

The City's SOI contains a population of just 150, spread across 55 households. The City's median household income is slightly lower than the County-wide average, while the median household income in the SOI is about 38 percent higher than the County-wide average.

The City's land use profile is disproportionately skewed towards industrial development, with almost 75 percent of the City's commercial square footage designed for industrial users. During the last decade, the City added over 9.3 million square feet of industrial space, representing about half of the City's commercial development. While this is a significant increase in square footage, a lot of the City's development can be attributed to retail projects. The City's housing inventory is concentrated in single-family housing, representing more than 80 percent of the City's units.

Aligned with the City's land use profile, several of the City's largest employers are distribution centers, including Amazon (7,500 employees), Ross Dress for Less/DD's (2,400 employees), Sketchers USA (1,200 employees), Harbor Freight Tools (788 employees), and Deckers Outdoor (700 employees). The remaining top ten employers include March Air Reserve Base (9,600

F.2.y

employees), Riverside University Health Systems Medical Center (3,400 employees), Moreno Valley Mall (1,500 employees), and Kaiser Permanent Community Hospital (1,457 employees).[112]

Moreno Valley's land use summary is presented in Figure 85.

Figure 85: Land Use Summary - Moreno Valley

Moreno Valley			County
Residential Units	Units	%	%
Single Family	46,378	80.6%	54.8%
Multifamily	9,781	17.0%	43.6%

CURRENT SPHERE OF INFLUENCE, ISLANDS/POCKETS, AND DUCS

The City of Moreno Valley's SOI consists of three (3) noncontiguous areas, illustrated in Exhibit 12. The City's eastern SOI is the largest of the three (3) areas, stretching eastward into the hills along State Route 60 and southward along Gilman Springs to encompass the area known as Mystic Lake, which is a seasonal body of water. The City's northwestern SOI extends west to the City of Riverside's existing SOI in the hills north of State Route 60, in an area that is largely overlapping the Box Springs Mountain Reserve Park. The City's third and smallest SOI area

[112] Source: City of Moreno Valley, 2018-19 Comprehensive Annual Financial Report

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

extends south from the City's southern boundary adjacent to Lake Perris State Recreation Area, east of Davis Road.

The SOI does not contain LAFCO-identified DUCs or unincorporated islands and pockets.

Moreno Valley's boundary was previously reconfirmed in the September 2006 Central Valleys, The Pass Area and Southwestern Riverside County MSR (LAFCO 2005-49-3&5; LAFCO 2005-48-5; LAFCO 2005-47-1&3) (the "2006 MSR").

City of Moreno Valley
City Municipal Service Review and Sphere of Influence Update
Riverside County

Public Review Draft – March 29, 2022

FORM OF GOVERNMENT AND STAFFING

The City of Moreno Valley is a "Council – Manager" form of government, with a City Council that includes five (5) members, including one Mayor elected at-large, and four (4) Councilmembers elected according to district boundaries. The Mayor serves a two (2) year term while Councilmembers serve four (4) year terms. The City Council appoints a City Manager, who serves as the head of the administrative branch of the City government.[113]

The City Council also serves as the Housing Authority, Successor Agency, Moreno Valley Community Services District, Public Financing Authority, and Public Facilities Financing Corporation. Several boards, commissions, committees, and councils carry out assignments as directed by the City Council, including the Accessibility Appeals Board, Environmental and Historical Preservation Board, Senior Citizens Advisory Board, Arts Commission, Library Commission, Planning Commission, Traffic Safety Commission, Utilities Commission, Moreno Valley Citizens Public Safety Committee, Parks Community Services and Trails Committee, and the Emerging Leaders Council.[114]

The City Manager reports directly to the City Council and oversees a staff of 375 full-time equivalent personnel.[115] The City's annual operating expenditures ranged from $118 to $150.3 million between 2016-17 2018-19.[116]

SERVICES PROVIDED

City staff provide the community with building and planning, housing, code enforcement, animal control, parks and recreation, landscape maintenance, streets and road maintenance, lighting, utilities, stormwater drainage, and innovation and technology services. The following section describes municipal services provided within Moreno Valley and identifies the service provider.

Government Services

General government services in the City of Moreno Valley are provided by the elected City Council, and appointed staff like the City Manager and City Clerk. The City Manager serves as the Chief Executive of the City and is responsible to the City Council for the efficient management of all City business including implementation of Council policies and programs, providing direction to departments that administer City programs and services, coordinating intergovernmental relations and legislative advocacy efforts, and administering the outsourcing agreements through which Public Safety services are provided. The City Clerk is responsible for the administration of all municipal elections, access to and management of City records, preparation of agendas, recording and maintenance of all Council actions, maintenance of the Municipal Code, and serves as the official custodian of the City seal.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

Law Enforcement

Moreno Valley receives law enforcement services from the Riverside County Sheriff Department. The Sheriff provides general policing services including, investigations, special enforcement, school resources, traffic enforcement and patrols, community services, crime prevention, and the administration of the volunteer program and the Explorer youth program.

The 2006 MSR presented the following determination:

- Law enforcement services were being provided at a level below the City's standard of 1 sworn officer per 1,000 people.

According to City staff, the recently adopted General Plan identifies City policies for providing responsive, efficient, and effective law enforcement services that promote a high level of public safety. Furthermore, City staff noted that the City no longer has a policy specifying a number of sworn officers per 1,000 residents.

Fire Protection

Fire Protection services are provided by Riverside County Fire Department/CalFire in Moreno Valley. Since 1921, the Riverside County Fire Department has been in a contractual relationship with CalFire to provide wildland fire protection services. In 1946, the contract between CalFire and Riverside County Fire Department was expanded to include fire protection services. Services provided by Riverside County Fire Department/CalFire include fire protection and prevention, medical response, review of planning cases, review and inspections of construction and developments, fire and life safety inspections of state-regulated occupancies, information on ordinances and standards for construction, and information bulletins and standards for fire protection. Fire Stations 2, 6, 48, 58, 65, 91, and 99 are in the City.

The Riverside County Fire Department/CalFire provides fire protection services to 20 cities in Riverside County and the Rubidoux community services district. The Riverside County Fire Department/CalFire also responds to calls for service in seven (7) additional Riverside County cities and the Idyllwild Fire Protection District through mutual and automatic aid agreements.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

Emergency Medical

Emergency medical services are provided by the Riverside County Fire Department/CalFire. Please refer to the previous section for more information on the Department.

Building/Planning and Housing (Community Development)

Building, planning, and housing services are provided by the City's Community Development Department through the Planning and Building and Safety Divisions. The Planning Division informs the planning commission, ensures new developments fulfill the City's strategic priorities, and ensures new development is in line with CEQA. The Building and Safety Division conducts plan reviews, issues permits, conducts field inspections, and coordinates permit approvals with City departments and outside agencies.

Code Enforcement

Code enforcement services are provided by the Community Development Department's Code and Neighborhood Services Division. The Division responds to citizen complaints, proactively enforces the municipal code, provides parking control services, and runs the abandoned vehicle abatement program.

Animal Control

Animal control is provided by the Animal Services Division of the Community Development Department. The Division provides humane animal services, sheltering, rabies control, stray animal control, licensing, and public education. A shelter operated by the Division is located in the City at 14041 Elsworth Street.

Parks and Recreation

Parks and recreation services are provided by three (3) entities: The City's Parks and Community Services Department, the Community Services District- Zone A, Community Facilities District No. 1, and the Riverside County Regional Parks and Open Space District. The Department provides

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

maintenance and development of parks, trails and recreational facilities, maintains open space, administers an array of recreational programs, and enforces park rules and regulations. The Community Services District, known also as Zone A, services parks in the City with the Parks and Community Services Department. The District primarily provides funding to the Department for parks and recreation services. The Community Facilities District No. 1 also provides funding to the Department, but funding is reserved for maintenance of facilities. The Riverside County Regional Parks and Open Space District operates the Box Spring Mountain Reserve in the City. The Reserve is located on 3,400 acres of land that overlooks the cities of Riverside and Moreno Valley. The entrance is located at 9699 Box Springs Mountain Road in Moreno Valley.

The 2006 MSR identified the following determinations:

- The City was providing parkland at a ratio that was below the City's standard and noted financing constraints that led to an increase in fee related recreational activities and a degradation of service provision.

According to City staff, the recently adopted General Plan identifies 671 acres of existing and planned parkland which could meet the parkland ratio within a 20-year period. City staff noted that the City also plans to evaluate parkland dedication fees and in-lieu parkland dedication fees to ensure that the City is adequately addressing the community need while maintaining regional competitiveness.

Library

The Moreno Valley Public Library provides library services to the City. The Library is owned and operated by the City. It has two (2) satellite locations in the Moreno Valley Mall and Iris Plaza. The Library provides users of all ages with reading materials in electronic and traditional formats, educational support for students, and literacy programs. The City's Community Services District provides funding for the operations of the Library.

The 2006 MSR presented the following determinations:

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

- The City's Library was too small to hold the City's entire inventory and the City had plans at the time to develop a larger facility.

The City has expanded library facilities to address this finding, adding two satellite libraries that provide library services throughout Moreno Valley. Museum

There is no museum in the City of Moreno Valley.

Landscape Maintenance

Landscape maintenance is provided by the City's Public Works Department through funding from the Community Services District, Landscape Maintenance District 2014-2, and several other special funding districts in the City. The Department provides general landscape maintenance services to public property and oversees any landscape maintenance contracts.

Streets/Road Maintenance

Streets and roads maintenance is provided by the Public Works Department. The Department's responsibilities include the coordination, maintenance, and operation of traffic facilities and roadways, sidewalk and street maintenance, and the management of City capital improvements.

The 2006 MSR identified the following determinations:

- The City's roads and intersections operating below the City's level of service standard.

City staff indicated that streets and roads were in fair to good shape.

Streetlights

The Moreno Valley Community Services District, Zone C Arterial Streetlights, the Lighting Maintenance District 2014-01, the Community Facilities District 2014-01, and the Edgemont Community Services District all provide funding for streetlight maintenance in various parts of the City. The Edgemont Community Services District provides streetlight maintenance services to several neighborhoods in the western part of the City. The District was formed in 1957 to cover

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

the Edgemont area of Riverside County which straddles both the cities of Riverside and Moreno Valley. The other districts provide funding that is used by the Moreno Valley Public Works Department to service the rest of the City.

Utilities (Gas, Electric)

Utilities are provided by the Moreno Valley Electric Utility ("MVU"), Southern California Edison ("SCE"), and the Southern California Gas Company ("SoCal Gas"). The MVU is the primary public electric utility in the City and is run by the Public Works Department. Created in 2001, the utility now serves around 6,600 residents. The traditional regional utilities SCE and Socal Gas both still serve some residents in the City. In Fiscal Year 2018-19 the MVU entered into a financing agreement through Bank of America to acquire the City's streetlights from SCE. According to City staff, the streetlights then underwent an LED retrofit.

Solid Waste

The City has a franchise agreement in place with Waste Management for solid waste collection services. Waste Management is a private solid waste disposal company provides solid waste disposal and recycling services to Moreno Valley residences. Waste Management is one of the largest solid waste companies in North America with more than 45,000 employees serving over 20 million residential, industrial, municipal, and commercial customers.

The 2006 MSR presented the following determinations:

- The City was not disposing of the required amount of solid waste.

City staff indicated that the City has implemented a number of innovative source reductions, recycling, composting, and reuse programs to help meet State diversion goals. The City's current diversion rate is 65 percent, which exceeds the current standard diversion rate of 50 percent. Furthermore, City staff noted that an amendment to the City's municipal code will require a diversion rate of 75 percent by 2025 as required by State law.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

Storm Drainage

Storm drainage services are provided by the Public Works Department. The Department is responsible for engineering, designing, and overseeing the construction of capital improvements for flood and storm-water management, and the operation and maintenance of City storm drains.

County Service Area 152 provides funding for the management of the City's NPDES permit program, which is aimed at reducing pollution to underground water tables.

The 2006 MSR presented the following determinations:

- The City's storm water drainage is inadequate.

City staff did not indicate that storm water drainage was inadequate in the City.

Innovation and Technology

Innovation and technology services are provided by the Financial and Management Services Department. The Department manages the City's technology assets, improves hardware, software, and telecommunications, and provides IT support.

Airport

There is no public or private airport in the City of Moreno Valley.

Extraterritorial Services Provided

The City of Moreno Valley does not provide services outside of the City's boundaries. Government Code Section 56133 requires LAFCO approval for extension of services outside a sphere of influence in response to an existing or impending threat to public health or safety.

RECENT AND PLANNED MAJOR CAPITAL IMPROVEMENTS

The City prepares a Capital Improvement Plan that serves as a comprehensive planning document inclusive of revenues and expenditures for capital improvements within the City. The

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

City's CIP is adopted every other year and coordinates with the City's two-year budget cycle. The City plans to make improvements in regard to pavement rehabilitation, street and road improvements, interchange construction, bridge maintenance and construction, drainage improvements, lighting improvements, and community center renovation.

According to City staff, all projects identified above, except for the March Community Center Renovation, are moving forward and funded.

HOUSING NEEDS AND HOUSING ELEMENT REPORTING

The City of Moreno Valley submitted its 6th Cycle Draft Housing element to HCD on February 19, 2021. As of the date on this MSR, HCD had not completed the review of the City's Housing Element.[117] During the 5th Cycle, the City submitted Annual Progress Reports between 2014 and 2019, but failed to submit an Annual Progress Report in 2013.[118]

The City's 5th Cycle housing needs are presented in Figure 87.

Figure 87: 5th Cycle Housing Element Summary - Moreno Valley

Moreno Valley 5th Cycle Housing Needs	Very Low Income	Low Income	Moderate Income	Above Moderate Income
RHNA Allocation	1,500	993	1,112	2,564
Permitted Units	0	0	457	1,354
Allocation Surplus/(Shortage)	(1,500)	(993)	(655)	(1,210)

Source: HCD Annual Progress Report Permit Summary, October 6, 2020

The City permitted 457 moderate income housing units and 1,354 above-moderate income units during the 5th Cycle. The City did not permit any very low- or low-income housing units during the 5th Cycle, and the City fell short of meeting its RHNA allocation in all income categories. With a

F.2.y

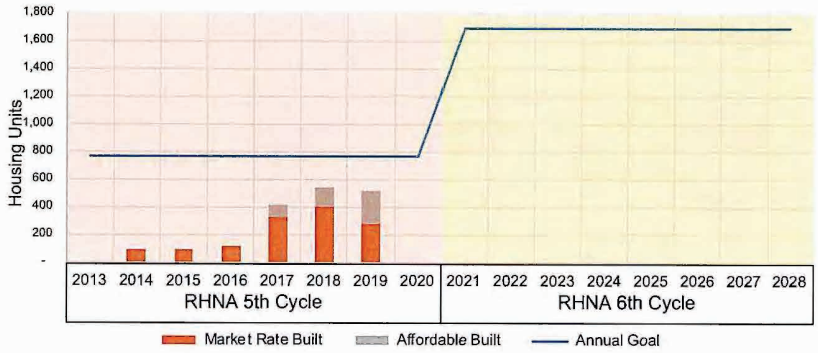
Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

shortage of 4,358 housing units, the City is not expected to meet its RHNA allocation in any income category.

The City's RHNA allocation increases by about 120 percent, or 7,427 units, to a total of 13,596 housing units for the 6th Cycle. In order to accomplish this, the City will need to permit 1,700 units every year during the eight (8) year cycle.

The City's 5th and 6th Cycle production goals and unit production is presented in Figure 88.

Figure 88: 5th and 6th Cycle RHNA Allocation and Production - Moreno Valley



Moreno Valley is one of 289 California jurisdictions that have not made sufficient progress toward either moderate-income RHNA unit production or failed to submit the latest (2019) Annual Progress Report. As a result, the City is subject to streamlined ministerial approval process for proposed housing developments with at least 10 percent affordable units. The streamlined ministerial approval process was introduced as part of Senate Bill 35 (Chapter 366, Statutes of 2017) in 2017.[119]

FISCAL HEALTH

The City of Moreno Valley's fiscal health evaluation, including audit findings, revenue sources, expenditure categories, long-term obligations, reserves, and California State Auditor assessment is presented in the sections that follow. The City's net position is presented as annual revenues less expenditures for fiscal years 2016-17 through 2018-19 in Figure 89. The City recorded surpluses in each year between 2016-17 and 2018-19.

Figure 89: Net Position - Moreno Valley

Source: California State Controller's Office

The City's general tax revenues, which were $101.6 million in 2018-19, account for 59.4 percent of the City's total revenues. The City has a diverse revenue base, with sales tax ($25.9 million), property tax ($20.8 million), property tax in-lieu of VLF (19.6 million), and utility user tax ($15.5 million) representing the largest revenue sources and collectively representing 80.5 percent of total general tax revenues.

When compared to all other Riverside County and California cities, the City's tax revenues are proportionate, except for utility user tax, which not all communities have adopted. Although sales tax is the City's largest general tax revenue source, accounting for 25.5 percent of the City's general tax revenues, it is proportionally lower than the average sales tax revenue for all

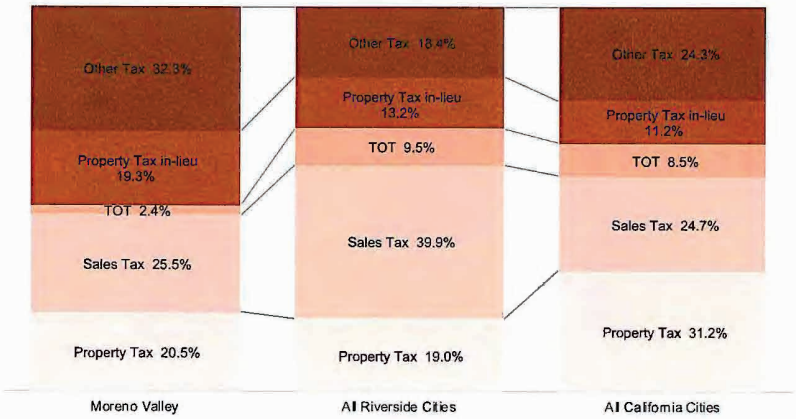
F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Riverside County cities (39.9 percent), and more aligned with the average sales tax revenue for all California cities (24.7 percent). Because sales tax can be susceptible to economic shifts, such as the results of the COVID-19 pandemic, it may be advantageous for the City to rely less on sales tax revenues.

The City's general tax revenues are compared to all Riverside County and California cities in Figure 91.

Figure 91: General Tax Revenue Comparison - Moreno Valley



Aside from tax revenues, City's largest non-tax revenue sources are miscellaneous revenues ($22.9 million) and intergovernmental revenues ($21.5 million). The City's major revenue sources are described in greater detail in the sections that follow.

Sales Tax

Sales tax revenues are the City's single-largest tax revenue, accounting for 25.5 percent of general tax revenues or $25.9 million in 2018-19. Sales tax revenues are derived from one percent of gross receipts from the sale of tangible personal property sold in Moreno Valley. Sales tax revenues increased by 7.1 percent annually between 2016-17 and 2018-19.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

Property Tax and Property Tax in-lieu of Motor Vehicle License Fees

Property tax and property tax in-lieu of VLF were the City's second and third largest tax revenues in 2018-19, accounting for 20.5 and 19.3 percent of general tax revenues respectively.

In 2018-19, the City collected almost $20.8 million in property tax. Property tax is assessed on land, improvements, and personal property, which amounted to about $15.6 billion in 2018-19. Approximately $4.1 billion in assessed value was derived from land value and $11.8 billion from improvements.[120] The City's property tax collections were approximately 15.6 percent of all property tax collected in Moreno Valley, which is one of the highest tax rates for a city in Riverside County.

The City's property tax revenues increased from about $13.5 million in 2016-17 to $20.8 million in 2018-19, 23.8 percent annual growth rate. While property assessed valuations can only increase by a maximum of 2 percent annually, property tax revenues can grow at a much faster pace as a result of new development adding new taxable value to the tax roll.

The City of Moreno Valley and County of Riverside have a mutually adopted Master Property Tax Exchange Agreement in place, which was adopted in 1985.[121]

Property tax in-lieu of VLF accounted for 19.3 percent of the City's general tax revenue in 2018-19, equivalent to $19.6 million. Property tax in-lieu of VLF replaced vehicle license fees as a revenue source for cities in 2004, and increases based on assessed valuation growth in the jurisdiction.

Utility User Tax

A fourth significant revenue source for the City is utility user tax revenues. The City assesses utility user taxes on telephone use at a rate of 5.75 percent, inclusive of intrastate residential and

[120] Source: California City Finance, "Assessed Valuation of Property by City"

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

commercial calls, interstate residential and commercial calls, international residential and commercial calls, and all wireless residential and commercial calls. Additionally, the City taxes business and residential electricity, business and residential natural gas, business and residential cable television, business and residential water, and business and residential sewer fees at a rate of 6 percent.[122] In 2018-19, utility user tax revenues amounted to $15.5 million, or about 15.2 percent of general tax revenues. Over the three (3) year period from 2016-17 to 2018-19, the City's utility user tax revenues were relatively flat, decreasing by a little more than $100,000 over that period.

Miscellaneous Revenues

The City's largest non-tax revenue source is classified as miscellaneous revenues. Miscellaneous revenues amounted to $22.9 million in 2018-19, or about 13.4 percent of all revenues. For the City, the primary sources of miscellaneous revenues includes development impact fees ($9.6 million in 2018-19), contributions from nongovernmental sources ($1.9 million), and other unclassified miscellaneous revenues ($11.3 million). According to City staff, the City is expected to begin preparation of a development impact fee study in 2021.

Intergovernmental Revenues

Intergovernmental revenues are collected from County, State, and Federal sources and amounted to $21.5 million in 2018-19 for the City. The City's intergovernmental revenues are comprised of gas tax revenues ($8.0 million), community development block grants ($1.8 million) and several other State ($8.0 million) and Federal ($3.3 million) government sources. Intergovernmental revenues increased from about $14.6 million in 2016-17 to $21.5 million in 2018-19, a 21.2 percent annual growth rate.

F.2.y

Operating Expenditures

The City's operating expenditures ranged from $117.9 to $150.3 million between 2016-17 and 2018-19. The City's annual operating expenditures, categorized by use, are presented in Figure 92.

Figure 92: Operating Expenditures - Moreno Valley

Moreno Valley	2016-17	2017-18	2018-19

Source: California State Controller's Office

Because the City contracts with the County of Riverside for law enforcement and fire protection services, it is not surprising that the City's largest expenditure category is contract services, amounting to $83.3 million in 2018-19. Between 2016-17 and 2018-19, the City's contract services expenditures increased by 21.6 percent annually – over the same time frame all other operating expenditures increased by just 2.9 percent. In 2018-19, the City's contract service expenditures amounted to 56 percent of total expenditures.

The City's largest current expenditure category is associated with public safety, amounting to $63.3 million in 2018-19. Public safety expenditures grew at just 3.5 percent annually between 2016-17 and 2018-19 while total current expenditures increased by 12.3 percent annually. Most of the growth occurred in transportation, community development, and culture and leisure expenditure categories. The City's current expenditures by function between 2016-17 and 2018-19 are presented in Figure 93.

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Figure 93: Current Expenditures - Moreno Valley

Moreno Valley	2016-17	2017-18	2018-19
General Government	$17,323,318	$18,982,549	$19,669,398
Public Safety	59,152,472	63,992,529	63,305,321
Transportation	10,976,980	18,441,708	19,286,980
Community Development	6,843,958	12,717,384	11,128,467
Health	-	-	-
Culture and Leisure	8,307,489	18,474,670	18,953,452
Public Utilities	-	-	-
Debt Service	4,326,445	4,319,000	4,309,456
Capital Outlay	11,013,480	13,418,628	12,203,689
Total Current Expenditures	**$117,944,142**	**$150,346,468**	**$148,856,763**

Source: California State Controller's Office

In most contract cities around Riverside County, the public safety costs are rapidly increasing at unsustainable paces – that is not the case in Moreno Valley. The fastest growing expenditure categories for the City were culture and leisure (51 percent annual increase between 2016-17), transportation (32.6 percent annual growth), and community development ($27.5 percent annual growth). These three (3) categories represented $23.2 million in expenditure increases between 2016-17 and 2018-19.

Culture and leisure expenditures are entirely associated with parks and recreation costs (almost $19.0 million in 2018-19) while transportation expenditures include costs for streets, highways and storm drains ($18.1 million), and trees and landscaping ($1.1 million). Community development expenditures are associated with planning ($3.2 million), construction and engineering regulation ($373,000), and other unclassified community development expenditures ($7.5 million). Some of these costs are recovered via charges for services, and according to City staff, the City's fees are balanced and consistent with all fee studies. City staff also indicated that the City planned to prepare a new development impact fee study in 2021 because the previous fee study was prepared nine (9) years ago.

Reserve Fund Balance

The City has several reserve fund policies. The City's cash flow reserve aims to preserve 17 to 35 percent of General Fund expenditures. The Emergency fund policy requires 12 percent of

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

General Fund expenditures and the Rainy Day Reserve policy requires an additional 10 percent of General Fund expenditures to be retained. The City's 2020-21 budget indicates that the City will retain $39.9 million in reserves and is in compliance with the City's reserve policies.[123]

Pension and OPEB Obligations

The City of Moreno Valley's pension and OPEB obligations are outlined in Figure 94.

Figure 94: Pension and OPEB Obligations - Moreno Valley

Moreno Valley	2017-18	2018-19	2019-20
Net Pension Liability/(Surplus)	$72,410,028	$68,092,267	$72,896,273
Total OPEB Liability/(Surplus)	7,099,335	6,453,487	8,175,011
Total Benefit Liability/(Surplus)	$79,509,363	$74,545,754	$81,071,284

Source: 2017-18, 2018-19 and 2019-20 ACFR

Qualifying employees are eligible to participate in the City's Miscellaneous Pension Plan. The City does not have public safety employees and therefore does not offer a Safety Plan. The City also provides OPEB policies, which are defined benefit postemployment healthcare plans for retired persons, and benefits are extended to surviving spouses. As illustrated in Figure 94, the City has about $81.1 million in combined pension and OPEB liabilities.

The City established an irrevocable trust fund in June 2009 to begin prefunding the City's unfunded OPEB liability.

The City's pension indicators, which include the City's employer contribution compared to the actuarially determined contribution, the City's total covered payroll, and the contribution rate as a percent of covered payroll, are presented in Figure 95.

[123] Source: City of Moreno Valley, 2019-20 Budget

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

Figure 95: Pension indicators - Moreno Valley

Moreno Valley	2017-18	2018-19	2019-20
Actuarially Determined Contribution	$6,385,610	$7,094,031	$7,972,616
Employer Contribution	6,385,610	7,094,031	7,972,616
Covered Payroll	$20,860,026	$21,783,847	$24,175,227
Employer Contribution Rate	30.6%	32.6%	33.0%

Source: 2017-18, 2018-19 and 2019-20 ACFR

The City made employer contributions equivalent to the actuarially determined contribution between 2016-17 and 2019-20. During this time frame, the City's covered payroll increased at an annual rate of about 7.7 percent. The City's employer contribution rate, which ranged from 30.6 to 33.0 percent between 2016-17 and 2019-20, is about average for the County of Riverside, which ranged from 26 to 32 percent over the same period.

Annual Audit Findings

RSG reviewed the City's Annual Audits from 2017-18 through 2019-20. The Annual Audits did not present any findings and the auditor stated that the financial statements present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City. Additionally, the City's Annual Audits between 2017-18 and 2019-20 were awarded Certificates of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association.

California State Auditor Fiscal Health Evaluation

The City of Moreno Valley ranked 281 out of 471 jurisdictions and received an overall risk rating of low. The City is considered higher risk than 190 peer cities in California, or about 40 percent of cities. The City received low risk ratings on six (6) indicators, including liquidity, general fund reserves, pension obligations, pension costs, future pension costs, and OPEB obligations. Two

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

(2) indicators were given moderate risk ratings, including debt burden and revenue trends. Two (2) indicators scored high risk ratings, including pension funding and OPEB funding.[124]

MSR DETERMINATIONS

Requisite CKH determinations for the City of Moreno Valley are presented by topic below:

1. **Population, Growth, and Housing**

   Moreno Valley grew at a slower rate over the last decade, when compared to the County and most other incorporated jurisdictions in the Western Riverside Region. The Moreno Valley population is expected to grow at a rate that is slightly lower than the County-wide growth rate over the next 15 to 25 years. The City did not build sufficient housing units to meet its 5th Cycle RHNA allocation of 6,169 units, falling short by 4,358 units, and the City's 6th Cycle RHNA allocation increased by 120 percent to a total of 13,596 housing units.

2. **Disadvantaged Unincorporated Communities in SOI**

   The City's SOI does not contain any DUCs.

3. **Present and Planned Capacity of Facilities**

   Many of the City's deficiencies identified in the 2006 MSR did not resurface during RSG's research, data collection, and city interview stages.

4. **Financial Ability to Provide Services**

   The City's general tax revenue sources have increased to more than $101.6 million in 2018-19. The City has identified issues with its pension and OPEB liabilities and began to take

[124] Source: California State Auditor, Financial Data for Fiscal Year 2019-20

F.2.y

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

corrective action as early as 2008 with the introduction of an irrevocable trust fund. The City has maintained healthy reserve funds.

5. **Opportunities for Shared Facilities**

   No opportunities for shared facilities were identified.

6. **Accountability for Community Service Needs**

   The City Council is elected according to district boundaries. The City's plethora of boards, committees, and commissions indicates that the City residents are engaged with City government. The City is active across at least five (5) social media platforms and maintains an email list. The City also operates a television channel and has a dedicated media team.

7. **Any Other Matter Related to Effective or Efficient Service Delivery as Required by Commission Policy.**

   The City did not identify any other matters related to effective or efficient service delivery as required by Commission Policy.

SOI RECOMMENDATIONS

RSG's recommendations related to the Moreno Valley SOI are presented by topic below. RSG is not recommending any changes to Moreno Valley's SOI.

1. **Present and Planned Land Uses**

   Large portions of Moreno Valley's SOI overlaps difficult-to-develop and protected land and are unlikely to be developed in the foreseeable future. The southern and southeastern portions of the unincorporated Moreno Valley SOI present the best opportunities for future growth and development.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

F.2.y

2. **Present and Probable Need for Public Facility and Services**

   City staff indicated that the Moreno Valley SOI has adequate public facilities and services.

3. **Present Capacity of Public Facilities**

   City staff indicated that public facilities in the Moreno Valley SOI are sufficient to meet the community's needs.

4. **Social or Economic Communities of Interest**

   The City did not identify any social or economic communities of interest in the Moreno Valley SOI.

5. **Disadvantaged Unincorporated Community Present and Planned Need for Facilities and Services**

   The Moreno Valley SOI does not contain any DUCs.

Subject: Polluted Air Impacts on Young Kids - PEN19-0191 & PEN21-0079
Date: Thursday, December 1, 2022 7:54:36 AM

Warning: External Email – Watch for Email Red Flags!

Dear Council Members,

Tuesday evening, December 6th, you will be considering two warehouse projects that are being proposed in poor locations because of their proximity to homes and the residents in them. The youngest of these residents can be irreputable harmed by the air pollution generated by diesel truck exhaust. The article below, from the Washing Post titled Young kids who breathe polluted air can fall behind in school, discusses the correlation between air pollution and reduced learning and the disproportionate impact on those in poor areas. There have been so many studies documenting the health impacts form the proximity of warehouse activities next to people (sensitive receptors) one would expect elected officials and planning staff would insist on avoiding the potential for this impact.

Both the **Moreno Valley Trade Center** and the **Moreno Valley Business Center** are abutting residential neighborhood. The Moreno Valley Business Center is especially close, being directly connected to the backyards of an existing Edgemont neighborhood - one of the poorest in the city. As elected officials it is your responsibility to do all that can be done to protect the residents (your constituents) from all development impacts that could burden their lives. The land where these projects are proposed could be used for less harmful development and denying these projects is the right thing to do so this can occur. It is the right thing to do and it will gain you greater community respect.

Thanks for the consideration,
Tom Thornsley

The Washington Post

Young kids who breathe polluted air can fall behind in school, study finds

Story by Amudalat Ajasa • Nov 30, 2022 11:00 AM

Young children living in neighborhoods with high rates of poverty are more likely to be exposed to many different air pollutants, and that can harm their development during early childhood, according to a study published Wednesday. The children's increased exposure to air toxins during infancy can reduce reading and math abilities and cause them to fall behind — for some, the effect is equivalent to losing an entire month of elementary school.

While there are other issues that can affect school preparedness for early-age children, the study found that exposure to air pollutants, when isolated, accounted for a third of the impact when compared with other concerns.

It has long been known that poorer communities are disproportionately exposed to air pollution than more-affluent communities, but the study, published in Science Advances, dives deeper into some impacts, exploring the intersections of neighborhoods' socioeconomic status and the effects on early-childhood cognitive development, while looking at disparities in air quality.

In the study, researchers show the ways cognitive gaps are formed as early as 6 months and are entrenched by age 2, before children even start school, said lead researcher Geoffrey Wodtke, associate director of the University of Chicago's Stone Center for Research on Wealth Inequality and Mobility.

"The study is showing that children born into high-poverty neighborhoods are more likely to be exposed to many neurotoxic air pollutants, and that those differences in turn are linked with inequalities in early-childhood development, specifically reading and math abilities measured around the time of school entry," Wodtke told The Washington Post.

Researchers used data from the U.S. Department of Education's early-childhood longitudinal study birth cohorts, which assessed 10,000 children born in or around 2001, tracking them through the time they entered kindergarten. The children were from across the United States.

Researchers analyzed the socioeconomic status and air pollution concentrations of the children's neighborhoods. Scientists then followed the children until they were about 4 years old, when they were assessed for early reading and math skills.

"What's important is we provide some initial and relatively strong evidence that being born into a poor neighborhood harms early cognitive development, and this is at least partly due to exposure to neurotoxic air pollution," Wodtke said in a statement.

Some pediatric environmental health scientists were not surprised by these findings, pointing to

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

previous literature and research on early exposure to air pollutants and the relationship with lower cognitive test scores. But the study provides a steppingstone to understanding how air pollution affects other factors that may influence children's healthy neurodevelopment, said one pediatrician and professor who has studied intersections.

"This is really important because we have significant health inequities of all kinds for children in the U.S. that tracks with poverty," said Catherine Karr, an environmental epidemiologist and pediatric environmental medicine specialist at the University of Washington.

"Clean air is part of the prescription for every child to meet their full health potential, including cognitive health," added Karr, who was not involved in the study.

In the study, scientists differentiate between the types of exposures. Poorer communities were more exposed to particulate matter and traffic-related pollution like nitrogen dioxide and carbon monoxide — exposures that appeared to have more of an impact on reading and math abilities during early-childhood development. But more-affluent communities were more likely to be exposed to ozone air pollutants.

Wodtke said the study does not pinpoint any leading air pollutants that are associated with high-poverty neighborhoods and lower test scores. Instead, it finds many air toxins have a weak association with both.

Experts pointed to mounting evidence that indicates that postnatal exposure to air pollution is associated with deficiencies in cognitive test scores. It has also been linked to attention-deficit/hyperactivity disorder (ADHD) symptoms and externalizing behavior problems in pediatric populations.

Emerging evidence also finds that exposure to fine particulate matter is correlated with reduced cortical thickness and thinner gray matter in the brain, which may influence information processing, learning and memory. Previous research has found that exposure to higher concentrations of small-particle air pollution is associated with poorer child behavioral functioning and cognitive performance.

Anjum Hajat, an associate professor in the department of epidemiology at the University of Washington, said the study "provides further evidence of the links between poverty, air pollution and health."

"We have known for some time that living in high-poverty neighborhoods can be bad for your health, so being able to understand why that is allows us to better consider ways to intervene," said Hajat, who was not part of the study.

Recent research has continued to show that children exposed to elevated levels of air pollution may be more likely to have poor academic skills in early adolescence, including in spelling, reading comprehension and math, according to studies conducted by Columbia University.

Hajat said while the link between air pollution and poverty is "pretty well established," as are links between neighborhood poverty and other health effects, "this study links these different strands of research to give us one possible solution to improving child development."

Dear Gabriel
Please no more warehouse in the Alessander and Day st.
This big Bldg are ugly to the city and is only going to bring more graffiti for the citizens to look at or big concrete view instead of Mnt view. This big warehouse are ruining the view that once we had especially as we drive thru the 60Fwy.
One more thing NO on the Truck Stop and Sport Field Park on Redland Blv.
Thank you so much.

Warning: External Email – Watch for Email Red Flags!

Hello,

My family and myself are concerned citizens of Moreno Valley, As long time residences, since 1999, we are very worried about the proposed warehouse projects for the East end of our city. We moved here from Riverside to get away from all the traffic and congestion and to enjoy the living in a rural area with houses and animals. The proposed project off of Redlands and Eucalyptus will destroy our way of life and make everyday chores difficult, not to mention the side affects of all the 18 wheelers in the area. I realize that most if not all of the people associated with this proposal do not live anywhere near the area and are only looking at "revenue" for the City. This is no reason to change the landscape of our Eastern portion of this city.

Moreno Valley doesn't need anymore warehouses near family homes. What we do need are more large parcel homes to attract good solid residences that actually care for our community. There are much better locations that already have the infrastructure to handle the massive amounts of trucks.

Respectfully submitted,
Lloyd Allen Young

Hello,
I'm writing to request and plead for no more warehouses to be built on Redlands Blvd in Moreno Valley 92555 zip code. I've lived in this zip code since 1989 when this area was beautiful, filled with wildlife and much better air quality. I purchased my current home in 2013 which is right next to Adam Halls Nursery on a half acre lot. I have children who I worry about growing up in this area now because of how much growth and pollution there has been. We enjoy going on walks in nearby fields and appreciating what little space is left that hasn't been developed.
Please move these projects to places where families and homes do not exist. Enough is enough
Thank you for your time in reading this and I hope it makes some kind of difference.
Stefanie Stokes

Subject: Moreno Valley Trade Center

The Honorable Ulises Cabrera
Mayor, City of Moreno Valley, CA.
03 March 2023

Dear Mayor Cabrera,

I am writing regarding the proposed Moreno Valley Trade Center. I live in the relatively new housing tract at the corner of Cactus Ave. and Redlands Blvd. I am aware of the Moreno Valley's ambitions to become a logistics center for the Inland Empire, similar to what the city of Perris is trying to do.

In the case of Perris, I see a complete failure. Perris has become a nightmare of trucks, warehouses, and random new neighborhoods. The roads are being destroyed by the weight and number of vehicles using them. Traffic is horrible as a result of these monsters. These trucks are being driven through housing as if they were the family Camry. I lived in Perris, and now I avoid it at all costs.

In Moreno Valley I see a similar situation arising. A mishmash of new housing construction with no apparent coordination or oversight as far as design language or master planning. There are three now housing sites within one mile of my neighborhood alone. All from different builders and none have anything in common with each other. I also see a monster logistics center arising the opposite direction around the Sketchers warehouse. There is no way I want hundreds or trucks spewing diesel exhaust and breaking down the surrounding roads. The 60 freeway is already massively overloaded,

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

and the 60-215 interchange is now in a 24 hour a day rush hour. What will happen when you add more trucks?

More warehouses are not panacea for creating jobs. I would stipulate that by creating hundreds of minimum wage warehouse jobs you are actually doing the city a disservice by removing the incentive for higher-paying jobs to come to Moreno Valley. Karma/B-ON is a good start, but that is the tip of the iceberg. You need medical device manufacturers (Johnson & Johnson is in Irvine, Abbott is in Temecula, Cardinal Health is in San Diego), software companies (Google, Apple). Incentivize start-ups to make MoVal their homes. Think outside the box. A warehouse wasteland lacking qualified employees will not accomplish this.

I urge you, and all Council Members and Planners, to rethink this strategy and change direction. All cities must evolve, but don't become a dinosaur.

Sincerely,

John Blackburn

Warning: External Email – Watch for Email Red Flags!

Good Morning Ms. Descoteaux,

I have been a resident of Moreno Valley in the 92555 and 92553 area for over 20 years now. We have seen a myriad of changes, most for the better.

It is too much to ask of us to live next door to a giant warehouse. We have children and we just want to feel safe in our homes. Living directly adjacent to a warehouse, be it the Moreno Trade Center or a Pilot truck stop or some other warehouse, does not induce a feeling of safety. Each of us just wants to feel safe and secure in our homes.

I had planned to live out the rest of my life in my lovely home and now I'm not so sure I want to now.

There was a reason why the city planners had originally designated areas as residential. To change them to commercial to accommodate warehouses is egregious.

A park as a proposed trade-off is not really a trade-off considering that it will require tax payers to maintain it. So the warehouse builds us a park so we can pay taxes on it for the rest of our lives.

I wonder how many people would buy a home in Moreno Valley if the city put that in their welcome to Moreno Valley video. "Buy a $500,000 home and pay $11,000 every year in property tax and you too could live across the street from a mega warehouse!"

Not my vision of a beautiful, well-planned out city, but I'm left to assume it's yours and my only recourse is to move.

Always hopeful,
Cryscynthia Tom

Team

The proliferation of warehouses in Moreno Valley has reached the tipping point where the health and quality of life of your constituents are being negatively impacted. Multiple Southern California cities are placing moratoriums on warehouse activity and we should be doing the same. I took this picture from my car at 11:30 am on the eastbound 60 coming into Moreno Valley on a Wednesday. Mr. Delgado, I personally spoke to you during your campaign and you stated you didn't take a penny from Iddo Benzeevi and you would not let the Northeast side lose its rural density or become another Ontario or Fontana.

I have concerns for my children and grandchildren and all families in this area the will take the brunt of this irresponsible management of our city who seems to continually ignore the planning commission and resident concerns. I don't want a "tradeoff" sports park built where families will not be able to breath to enjoy it with major warehouses and full truck stops being built just feet away from residential homes.

I fervently oppose industrial zoning and warehouses next to residential communities and in general the over-saturation of warehouses in our East end of the city and hope you would support and defend the people you represent.

Thanks for your attention to this matter

Respectfully

Ron Alguire

Warning: External Email – Watch for Email Red Flags!

Hello,

My family and myself are concerned citizens of Moreno Valley, As long time residences, since 1999, we are very worried about the proposed warehouse projects for the East end of our city. We moved here from Riverside to get away from all the traffic and congestion and to enjoy the living in a rural area with houses and animals. The proposed project off of Redlands and Eucalyptus will destroy our way of life and make everyday chores difficult, not to mention the side affects of all the 18 wheelers in the area. I realize that most if not all of the people associated with this proposal do not live anywhere near the area and are only looking at "revenue" for the City. This is no reason to change the landscape of our Eastern portion of this city.

Moreno Valley doesn't need anymore warehouses near family homes. What we do need are more large parcel homes to attract good solid residences that actually care for our community. There are much better locations that already have the infrastructure to handle the massive amounts of trucks.

Respectfully submitted,
Lloyd Allen Young

Hello,
I'm writing to request and plead for no more warehouses to be built on Redlands Blvd in Moreno Valley 92555 zip code. I've lived in this zip code since 1989 when this area was beautiful, filled with wildlife and much better air quality. I purchased my current home in 2013 which is right next to Adam Halls Nursery on a half acre lot. I have children who I worry about growing up in this area now because of how much growth and pollution there has been. We enjoy going on walks in nearby fields and appreciating what little space is left that hasn't been developed.
Please move these projects to places where families and homes do not exist. Enough is enough
Thank you for your time in reading this and I hope it makes some kind of difference.
Stefanie Stokes

Good morning,

My heartfelt thank you for your service to our city.

However I have to say, I am not thrilled with the council's decision to put a distribution center so close to my house in my nice quiet neighborhood.

Zone 92555 is your highest income bracket with big beautiful homes on large lots. I love my house. I can't imagine someone paying $700,000 for my house and $9000 in property tax to live next door to a warehouse. I know I wouldn't.

Crys Tom,
resident 92555, Valley Springs Homes

Mayor Ulises Cabrera,

I am a resident and employee of Riverside County; I live on the March JPA and I work as an ICU nurse at Riverside University Health System. My wife and I are raising three young children aged 4, 2, and 1 years old here in Moreno Valley. As a father and a healthcare professional, I am concerned about the impact of the rapid expansion of logistics centers in the area. I am writing to you specifically about the proposed Moreno Valley Trade Center between Quincy St. and Redlands boulevard.

The Moreno Valley Trade Center (MVTC) is just another development in the unending destruction to the people, land, and air of this area. The MVTC project will cause more pollution and decrease air quality. The environmental plan itself says that long term decrease in air quality from NOx and greenhouse gas emission cannot be fully mitigated. These emissions are linked to pulmonary, cardiovascular, and oncological disorders. As an ICU nurse I have seen first hand the devastation that pulmonary diseases such as asthma, lung cancer, and COPD can cause. I have been witness to the aftermath of young people who suffer anoxic brain injuries from these conditions. As a father of young children I have fear and anxiety of the health effects caused by air pollution and traffic caused by these logistics centers. I must weigh staying in the community and raising my children here or leaving for areas with cleaner air and water.

Choosing to allow projects like this to move forward may create new short term jobs and economic growth. However, these jobs are often low paying and subject to replacement through automation. The economic growth is limited by physical warehouse space. The detriment to the communities' health is not limited, and will affect generations of residents. Please consider alternatives to these warehouses. As elected officials, please serve and protect the health of the community.

Regards,
William Landa

Warning: External Email – Watch for Email Red Flags!

Good afternoon City Council members, April 10, 2023

The 1,26 million sq ft Moreno Valley Trade Center (MVTC) significant impacts that cannot be mitigated to a level below thresholds of significance consist of the following:

o **Aesthetics: Implementation of the Project would mostly or completely block views** of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Also, implementation of the Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site. This would be a significant and unavoidable direct impact.

o **Air Quality (Air Quality Management Plan Conflict):** The Project would emit air pollutants (NOX) that would contribute to a delay in the attainment of federal and State ozone standards in the SCAB. Because the Project requires a General Plan Amendment, it also would exceed the growth projections contained in SCAQMD's *2016 AQMP*. As such, the Project would conflict with and could obstruct implementation of the *AQMP*. Project impacts due to a conflict with the SCAQMD *2016 AQMP* **would be significant and unavoidable on both a direct and cumulatively-considerable basis.**

o **Air Quality (Criteria Pollutant Emissions):** After the application of Project design features, mandatory regulatory requirements, and feasible mitigation measures, Project-related NOX emissions during long-term operation of the Project would remain above the applicable SCAQMD regional thresholds. Accordingly, Project-related emissions would not meet SCAQMD air quality standards and contribute to the non-attainment of ozone standards in the SCAB. Therefore, Project operational-related impacts due to **NOX emissions would be significant and unavoidable on a direct and cumulatively-considerable basis.**

o **Greenhouse Gas Emissions (GHG Emissions Generation):** Project-related **GHG emissions would exceed** the applicable SCAQMD significance threshold for GHG emissions and **would result in a cumulatively-considerable impact to the environment**." (page 5-1 in MVTC Final EIR)

The above awful health impacting pollution near family homes could not be eliminated by the MVTC and so they are telling you to hold your nose and accept a sports park that is next to Redlands Blvd north of SR-60 which is a

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

diesel truck route — again impacting the health of children breathing in diesel pollution deeply during the playing of sports.

Sincerey,

George Hague
P.S. The 40 million sq ft World Logistic Center warehouse project with its 13,000 daily diesel truck trips is beginning its grading later this year. We do not need more warehouses and the unions will have plenty of work for years to come.

I am writing as I am NOT in support of the Moreno Valley Trade Center.

This project will bring the residents of Moreno Valley more smog from trucks/cars and make the roads worse and freeways horrible. It already takes way to long to use the freeways going though Moreno Valley.

Please Join me in NOT continuing support for the Moreno Valley Trade Center.

Thank you

Hi Everyone,

Please find the attached letter regarding the Moreno Valley Warehouse Project.

RAMV is in opposition to this massive warehouse directly next to homes. Not only is this a health hazard to the community, it is a safety risk to the entire neighborhood.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

April 11, 2023

Rural Association of Mead Valley (RAMV)
PO Box 2244
Perris, CA 92572

Moreno Valley City Council
Attn: Gabriel Diaz, Associate Planner
Community Development Department
14177 Frederick Street
Moreno Valley, CA 92553

RE: Moreno Valley Trade Center Project including Final Environmental Impact Report (SCH No 20210039038), GPA PEN19-0191, Change of Zone PEN19-0192, Plot Plan PEN19-0193, and Tentative parcel Map 37836.

Honorable Council Members:

The General Mills Warehouse in Perris had a very large explosion on July 6, 2021 from their commercial sized propane tanks. A recently built warehouse and yet serious safety violations occurred. If this explosion took place inside the building there would have been serious consequences. The explosion could be felt and heard for over 5 miles away waking up residents past Nuevo Ave. Three large propane tanks exploded and caught fire.

PERRIS (LLN) - On Tuesday night, July 06, 2021, Cal Fire / Riverside County Fire along with AMR and the Riverside County Sheriff's Department responded to reports of an explosion at a large warehouse. The explosion was reported around 10:00pm in the 4100 block of Indian

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Avenue at the General Mills warehouse. According to Cal Fire / Riverside County Fire, firefighters responded to numerous reports of an explosion at a distribution center. Upon arrival, three propane tanks were off gassing and involved with fire. One person suffered moderate burn injuries and was transported by ground to a local hospital.

This massive warehouse over 1.5 million sq. ft. is directly next to homes and is an example of why warehouses "must" have a 1000 foot buffer between homes and warehouses. A buffer "must" be provided between property lines of the home and warehouse not measured from dock doors to residential structures.

New warehouses are not as safe as most people think and when they catch fire it is very difficult to put them out. Equipment from a number of agencies need to be brought in. How many ladder trucks does the City of Moreno Valley have to put out a massive warehouse fire? How long will it take to acquire additional ladder trucks?

Another example is the Redlands Amazon Warehouse along the I-215 Freeway is a Prime example of why this warehouse SHOULD NOT BE APPROVED.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

A massive fire broke out Friday morning, June 5 at a distribution center on West Lugonia Avenue in Redlands which shuttered part of the 10 Freeway. (Photo courtesy of the Redlands Fire Department)

This recently built state of the art Redlands warehouse burned to the ground just two years ago. It was 600,000 square feet along the I-10 freeway. Operated by Amazon, this recently built warehouse caught on fire and burned to the ground quickly. Those driving along the freeway could feel the heat from the fire.

The Redlands warehouse was 600,000 sq. ft. and 45 feet in height. The Proposed warehouse is 1,328,853 sq. ft. in size and at least 100 feet in height.

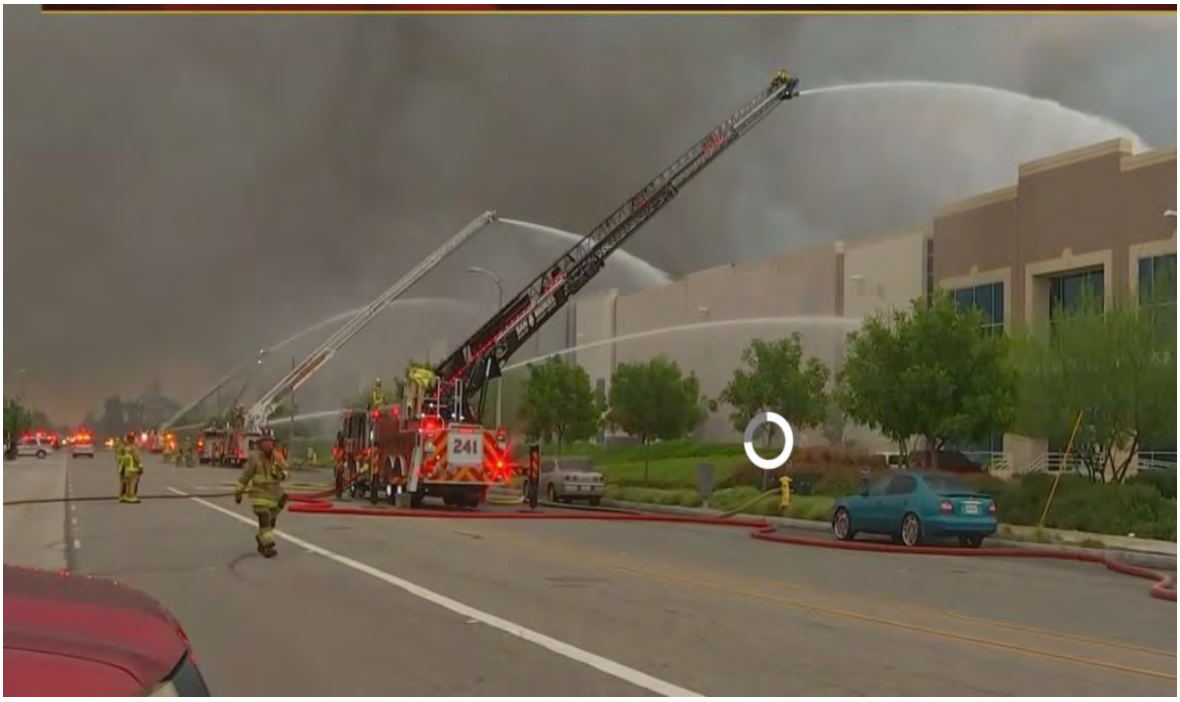
Even though this recently constructed warehouse had the state of the art sprinkler system, it went up in flames quickly and was completely destroyed according to the Redlands Daily news.

There were about 100 people working inside when the fire was reported about 5:30 a.m., and they all got out safely, city spokesman Carl Baker said.

"It went up really fast, and the whole building was involved," Baker said. He described the damage as a total loss. The damage was estimated at "hundreds of millions of dollars," Baker said.

One focus of the investigation will be why what Baker called "a state-of-the-art" sprinkler system failed to limit the fire's spread. "Obviously, the suppression system didn't work as intended," he said.
Redlands Daily News Article

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)



Redlands City does not have the equipment necessary to fight this type of warehouse. A large number of agencies from other cities and counties were brought in with ladder trucks to fight this Redlands City fire.

Will the fire trucks be tall enough to put water on top of a building 100 feet or more? That is much taller than the 45-foot warehouse that burned down in Redlands. Will there be enough ladder trucks to fight this type of fire with a building 100 feet tall or more? Will there be enough of a setback from the residential neighborhoods if the walls over 100 feet tall collapse during a fire?

How does the City of Moreno Valley plan to fight a fire if one were to break out if this massive warehouse were to be built? The project is located just 118 feet away the nearest family homes.

The Rural Association of Mead Valley is opposed to the Moreno Valley Trade Center Project for this and the following reasons. This Project is for a proposed 1,328,853 square foot Industrial warehouse building up to 100 feet in height on a 72.5-acre site and adjacent to existing single-family homes within a rural animal keeping overlay. The change in the Project Site's Land Use Designation would result in a total increase of approximately 80.04-acres of the Business Park (BP) General Plan Land Use Designation and a corresponding reduction of approximately 80.04-acres of the Residential 2 (R2) General Plan Land Use Designation.

1) a General Plan Amendment (PEN19-0191) to amend the General Plan Land Use Designation of the Project Site from Residential 2 (R2) to Business Park (BP); 2) a Change of Zone (PEN19-0192) to amend the City's Zoning Atlas to rezone the Project Site from Residential Agriculture 2 (RA2) to Light Industrial (LI) and remove the Primary Animal Keeping Overlay (PAKO) district; 3) Tentative Parcel Map

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

(PEN19-0234) to merge 11 parcels into 1 parcel; and 4) a Plot Plan (PEN19-0193) for an approximately 1,328,853 square foot Warehouse/Distribution Building. The Project Site is located south of Eucalyptus Avenue, north of Encelia Avenue, west of Quincy Street and west or Redlands Boulevard comprising Assessor Parcel Nos. 488-340-002 through 012.

The Project requires a General Plan Amendment and Change of Zone from Single Family Residential land with animal keeping, a rural land use, to Industrial Zoning. This massive Industrial Project is not compatible with the surrounding residential neighborhood. The General Plan that was just updated includes the Project site as Residential housing. No indications were made during the General Plan update that this area would be changed in the near future from residential to industrial land uses. The MVTC is inconsistent with the recently approved 2040 General Plan which points out that industrial is incompatible with residential zoned areas. Policy LCC.3-2 directs the City to use "development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another". The 2040 General Plan approved in June also requires the city to screen and buffer nonresidential projects to protect adjacent residential property when necessary to mitigate noise, glare and other adverse effects on adjacent lands.

The World Logistics Center and numerous other massive logistics warehouses are set to open nearby this Project location. This Project will add to the tens of thousands of additional truck trips approved on the already gridlocked I-60 Freeway. The unrealistic analysis of job creation assumes that there is a need for additional warehouse workers. The facts are that the current logistics and e-commerce warehouses cannot fill their positions. Where will these tens of thousands of additional workers come from? The best use of this land will be for single-family homes.

If the Project is constructed and used as an e-commerce fulfillment center the amount of vehicle trips is projected to be more than 5,000 vehicles per day. The MVTC's plan as a warehouse is to allow the southern entrance of the project to allow 1,000's of vehicles to access Encelia Street.

The project is located 118 feet away the nearest family homes. Building height 100 feet or more. It is very difficult to put out a fire for warehouses 44' tall. What equipment is available to put out a fire for a 100' warehouse structure?

This Project is for a proposed 1,328,853 square foot Industrial warehouse **building up to 100 feet** in height on a 72.5-acre site and adjacent to existing single-family homes within a rural animal keeping overlay.

Moreno Valley Municipal Code
9.05.040 Industrial site development standards.

A. General Requirements.

B. Special Site Development Standards.
1. When any industrial district abuts a property in any residential district, a

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

minimum building setback equal to the building height, but not less than twenty (20) feet shall be required from such residential district. Further, the then (10) feet of such setback nearest the district boundary line shall be landscaped.

9. In the LI district, industrial and warehouse, structures greater than fifty thousand (50,000) square feet in building area shall be separated from any residential district as determined by an air quality and noise impact analysis. The minimum separation distance for such uses shall be two hundred fifty (250) feet between the residential district and the truck court or loading area.

The developer does not have a tenant for the building.
The Project is proposed to be built under speculation.
The developer has the option of developing this Project as a fulfillment/e-commerce center or logistics warehouse.

The following significant and unavoidable environmental impacts have been identified in the Final EIR and will require mitigation but cannot be mitigated to a level of insignificance: 1) Aesthetics: Substantial Adverse Effect on a Scenic Vista; 2) Air 2 Quality: Air Quality Management Plan Conflict; 3) Air Quality: Criteria Pollutant Emissions; and 4) Greenhouse Gas Emissions: GHG Emissions Generation. Details of these significant unavoidable adverse impacts are discussed in the Final EIR and are summarized, or were otherwise provided in Section 5.3, *Environmental Effects Which Remain Significant and Unavoidable After Mitigation and Findings*, in the Statement of Facts and Findings. (Page 11).

Moreno Valley is one of the areas designates as a Disadvantage Community under SB 535. Adding thousands of additional logistics trucks to this community will greatly impact the health of over 200,000 residents living in your community.

The Environmental Justice Element is now required by the State to be a part of all General Plans. The City must “minimize any potential health risks” of new development on adjacent sensitive receptors and “designated truck routes that avoid sensitive land uses” (Policies EJ.1-3 and EJ. 1-9). The City must create a substantial buffer between homes and the warehouse. Screening must be installed along the southern and western boundaries of the Project. All truck parking and docks must be located on the north side and east side of the Project away from residential neighborhoods.

Although the Project has a number of entrances most warehouses use just one driveway for trucks to enter and exit, thereby reducing staffing to one gate. The Project does not have sufficient room at any of the entrances to prevent trucks from backing up onto Eucalyptus Ave.

The Project must include a substantial amount of solar power, especially if used as an e-commerce business. The current power grid is not sufficient to produce enough electricity for the current customers. The drain on the power grid during summer months produces frequent brown outs throughout Southern California.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

A large warehouse in the City of Perris recently had a large explosion from a large propane tank. This warehouse is next to residential homes. The blast from the explosion could be seen and heard from miles away. No propane tanks should be installed and used on warehouse sites. All forklifts, Goats, and equipment should be electric powered.

The Project is located in an area with the worst smog in the nation.

This Project will increase greenhouse gas levels that are already impacting Communities in Western Riverside County. Mead Valley is also a disadvantaged community. The impacts warehouses in Moreno Valley and Perris are having negatively impacts to the entire region. The I-215 Freeway is congested for most of the day. The I-60 Freeway is congested with thousands of trucks. This backs up traffic throughout the region. Trucks are now using residential streets to avoid the congested freeways. Cajalco Road is backed up bumper to bumper during the day. Trucks are using Van Buren, Alessandro and Cajalco to get to the I-91 to get to the Ports. Our freeways cannot add tens of thousands of additional trucks and cars from any new warehouses without severe gridlock to our freeways.

5.1 SIGNIFICANT ENVIRONMENTAL EFFECTS THAT CANNOT BE AVOIDED IF THE PROJECT IS IMPLEMENTED

The CEQA Guidelines require that an EIR disclose the significant environmental effects of a project which cannot be avoided if the proposed project is implemented (CEQA Guidelines Section 15126(b)). As described in detail in Section 4.0, *Environmental Analysis*, of this EIR, the proposed Project is anticipated to result in impacts to the environment that cannot be reduced to below a level of significance after the consideration of Project design features, compliance with applicable federal, State and local regulations, and the application of the feasible mitigation measures identified in this EIR. The significant impacts that cannot be mitigated to a level below thresholds of significance consist of the following:

• **Aesthetics: Implementation of the Project would mostly or completely block views** of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Also, implementation of the Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site. This would be a significant and unavoidable direct impact.

• **Air Quality (Air Quality Management Plan Conflict):** The Project would emit air pollutants (NOX) that would contribute to a delay in the attainment of federal and State ozone standards in the SCAB. Because the Project requires a General Plan Amendment, it also would exceed the growth projections contained in SCAQMD's *2016 AQMP*. As such, the Project would conflict with and could obstruct implementation of the *AQMP*. Project impacts due to a conflict with the SCAQMD *2016 AQMP* would be significant and unavoidable on both a direct and cumulatively-considerable basis.

•**Air Quality (Criteria Pollutant Emissions):** After the application of Project design features, mandatory regulatory requirements, and feasible mitigation measures, Project-related NOX emissions during long-term operation of the Project would remain above the applicable

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

SCAQMD regional thresholds. Accordingly, Project-related emissions would not meet SCAQMD air quality standards and contribute to the non-attainment of ozone standards in the SCAB. Therefore, Project operational-related impacts due to NOX emissions would be significant and unavoidable on a direct and cumulatively-considerable basis.

• **Greenhouse Gas Emissions (GHG Emissions Generation):** Project-related GHG emissions would exceed the applicable SCAQMD significance threshold for GHG emissions and would result in a cumulatively-considerable impact to the environment." (page 5-1 in MVTC Final EIR)

RAMV is opposed to the **Moreno Valley Trade Center Project** that will impact the entire region. We cannot afford to turn anymore of our residential zoned areas into Industrial zoned areas. Our freeways are already at capacity, our air quality is already the worse in the nation, and our local roads are already being destroyed by truck traffic. Please consider all of the impacts that this Project will bring to not only Moreno Valley, but the entire region.

I urge the City Council to follow the Planning Commission's recommendation and deny this Project.

Sincerely,

Debbie Walsh

The Moreno Valley Trade Center (MVTC) is just another development in the unending destruction to the people, land, and air of this area. The MVTC project will cause more pollution and decrease air quality. The environmental plan itself says that long term decrease in air quality from NOx and greenhouse gas emission cannot be fully mitigated. These emissions are linked to pulmonary, cardiovascular, and oncological disorders. As an ICU nurse I have seen first hand the devastation that pulmonary diseases such as asthma, lung cancer, and COPD can cause. I have been witness to the aftermath of young people who suffer anoxic brain injuries from these conditions. As a father of young children I have fear and anxiety of the health effects caused by air pollution and traffic caused by these logistics centers. I must weigh staying in the community and raising my children here or leaving for areas with cleaner air and water.

Choosing to allow projects like this to move forward may create new short term jobs and economic growth. However, these jobs are often low paying and subject to replacement through automation. The economic growth is limited by physical warehouse space. The detriment to the communities' health is not limited, and will affect generations of residents. Please consider alternatives to these warehouses. As elected officials, please serve and protect the health of the community.

Regards,
William Landa

Dear Cheylynda Barnard,

I am a resident and employee of Riverside County; I live on the March JPA and I work as an ICU nurse at Riverside University Health System. My wife and I are raising three young children aged 4, 2, and 1 years old here in Moreno Valley. As a father and a healthcare professional, I am concerned about the impact of the rapid expansion of logistics centers in the area. I am writing to you specifically about the proposed Moreno Valley Trade Center between Quincy St. and Redlands boulevard.

The Moreno Valley Trade Center (MVTC) is just another development in the unending destruction to the people, land, and air of this area. The MVTC project will cause more pollution and decrease air quality. The environmental plan itself says that long term decrease in air quality from NOx and greenhouse gas emission cannot be fully mitigated. These emissions are linked to pulmonary, cardiovascular, and oncological disorders. As an ICU nurse I have seen first hand the devastation that pulmonary diseases such as asthma, lung cancer, and COPD can cause. I have been witness to the aftermath of young people who suffer anoxic brain injuries from these conditions. As a father of young children I have fear and anxiety of the health effects caused by air pollution and traffic caused by these logistics centers. I must weigh staying in the community and raising my children here or leaving for areas with cleaner air and water.

Choosing to allow projects like this to move forward may create new short term jobs and economic growth. However, these jobs are often low paying and subject to replacement through automation. The economic growth is limited by physical warehouse space. The detriment to the communities' health is not limited, and will affect generations of residents. Please consider alternatives to these warehouses. As elected officials, please serve and protect the health of the community.

Subject: Reject Moreno Valley Trade Center Appeal

Dear Moreno Valley Councilmembers,

You are once again about to consider the Moreno Valley Trade Center, a project that was denied by the Planning Commission for good cause. Since that denial the developer has done a lot to sway your vote by first offering to improve a section of Alessandro Boulevard that has nothing to do with their project. Now the developer is offering you the chance to get a Sports Park if you agree to approve their project. That is a blatant, out in the open, bribe for your vote and not how the voters of this Moreno Valley expect you govern our city. . Think about the precedence this sets for others seeking project approval. Are City Council Members' votes for sale?

In the year and a half since this appeal was first continued, just before a vote (likely to deny) would have taken place. Since then there is no doubt the developer and even city staff encourage you to approve this project over the objections of the community. I expect each Council Member to disclose all their conversation regarding this development prior to the start of the public hearing for this project.

This project site is intended for homes which are necessary for the city to stay on track with offering a diversity of housing types and to meet their State housing requirements. If you know the Municipal Code at all, you would know that Light Industrial Districts (for warehouse develop) must be buffered from Residential Districts by other uses such a Business Park. Here is what the Municipal Code say:

9.05.010 Purpose and intent.

2. To protect residential, commercial and nuisance-free nonhazardous industrial uses from noise, odor, dust, smoke, truck traffic and other objectionable influences and from fire, explosion, radiation and other hazards potentially related to certain industrial uses;

9.05.020 Industrial districts.

A. **Business Park District** (BP). The primary purpose of the business park (BP) district is to provide for light industrial, research and development, office-based firms and limited supportive commercial in an attractive and pleasant working environment and a prestigious location**. This district is intended to provide a transition between residential and other sensitive uses and more intense industrial and warehousing uses.**

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Is it appropriate to only provide one narrow range of employment opportunities over an entire city? In the past decade, the city has processed land use changes to permit in excess of 53,000,000 square feet of large warehousing opportunities with 40,000,000 more on the cusp of development. During this time the city has done away with available land for housing, commercial, and business park opportunities, all in conflict with the intents of the old and new General Plans intent. Now it seems little value is being placed on the city's newly adopted general plan which intended to establish a stable, balance of growth for the foreseeable future.

Good planning policy has always advocated keeping industrial uses away from residential. However, past and present city leaders and planning staff have failed to maintain this policy for the protection of the existing and potential residential areas. Nor have they embraced their General Plan's objectives. Environment impacts from industrial uses such as warehousing impose significant harm to residential areas. In many instances you will be lead to believe that air, noise, traffic, and lighting impacts are minimal. Playing up impacts as minimal detracts from the ultimate reality of putting a warehouse adjacent to existing homes. The complexities of these impacts will way heavy on adjacent residents and degrade their standard of living. This also devalues their homes and will hinder development of adjacent and nearby vacant residential land, further limiting the City's ability to reach its required housing count.

So what should be done? Compliance with the City's General Plan should be maintained, not only here but throughout the Moreno Valley. At this time the city has reached its saturation point for mega-warehouses and should be looking to establish higher goals for employment diversity and opportunities while achieving the needs for residential development. Just east of this project site is an approved specific plan that will develop the equivalent of 40 one-million square foot mega-warehouses. This alone should be enough for us to just say **NO** to any other mega-warehouses, including **NO to the Moreno Valley Trade Center**.

Sincerely,

Tom Thornsley

Tom Thornsley

Attachment: Moreno Valley Warehouse Approvals 2009-2022

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Moreno Valley Warehouse Approvals 2009-2021

Since 2009, Moreno Valley has approved, or is reviewing, at least the following industrial warehouse projects that serve as “distribution” or “logistics” centers for consumer goods, and as such, they are part of the “goods movement” network 53,070,835 square feet:

- March Business Center (2009) – General Plan Amendment to allow 1,484,407 square
- feet of industrial warehouse space on 66.9-acres.
- Master Plot Plan PA07-0035 (2010) - 409,598 square foot industrial warehouse
- West Ridge Commerce Center (2011) - 937,260 square foot warehouse distribution
- building
- VIP Moreno Valley Project (2012) - 1,616,133 square foot warehouse space
- First Inland Logistics Center II Project (2013) - 400,130 square feet warehouse space
- First Nandina Logistics Center Project (2014) - 1,450,000 square feet warehouse space
- Prologis Eucalyptus Industrial Park Project (2015) - 2,244,419 square feet of warehouse uses including a General Plan Amendment from residential to Light Industrial
- World Logistics Center (2015) - 40.6 million square feet of warehouse logistics development on 3,918 acres in eastern Moreno Valley
- Indian Street Commerce Center Project (2016) - 446,350 square feet of warehouse space
- Moreno Valley Logistics Center (2016) - 1,736,180 total square feet of warehouse space
- Brodiaea Commerce Center (2017) - 262,398 square foot warehouse including a rezone from Business Park-Mixed Use to “Light Industrial”
- Moreno Valley Business Park (2021) - 220,390 square feet of warehouse logistics development including a General Plan Amendment to from commercial to light industrial
- Heacock Commerce Center (2021) – application for a General Plan Amendment and Change of Zone for two high cube industrial buildings totaling 873,967 square feet
- Compass Danbe Center Point (2021) – application for a General Plan Amendment to allow for the development of two light industrial buildings of 389,603 square feet

Cc: Sean P. Kelleher; City Clerk
Subject: Comments on Moreno Valley Trade Center (MVTC).... "Moreno Valley warehouse — larger than city's mall "

Warning: External Email – Watch for Email Red Flags!

Good morning City Council members, April 11, 2023

The 1.26 million sq ft Moreno Valley Trade Center's (MVTC) has done almost nothing to reduce its significant Diesel pollution impacting the health of nearby residents — especially of children and the elderly.— since the Planning Commission voted unanimously to deny the project. **Even their 18 acre sports park mentioned in the June 2022 article found below is adjacent to Redlands Blvd which north of SR-60 is a city designated diesel truck route for the MVTC and other warehouse projects like the World Logistic Center (WLC) that will again impact the health of children using the park.**

BOTH THE MVTC AND SPORTS PARK ARE IN THE WRONG LOCATION BECAUSE OF TOXIC DIESEL POLLUTION AND HOW THEY WILL RESULT IN THE HEALTH IMPACTS TO CHILDREN.

The 40 million sq ft World Logistic Center (WLC) with its 13,000 Daily Diesel Truck Trips impacting SR-60/local roads will begin grading this year and will construct at least 26 warehouses about the size of the MVTC. Moreno Valley doesn't need to approve any more warehouses and unions will have work for many years to come on the WLC.

Sincerely,

George Hague

Moreno Valley warehouse — larger than city's mall — is back for consideration

PUBLISHED: June 19, 2022 at 7:00 a.m. | UPDATED: June 19, 2022 at 7:01 a.m.

A plan to build a warehouse larger than the Moreno Valley Mall across the street from houses on half-acre lots is returning to the Moreno Valley City Council.

The council is set to decide Tuesday, June 21, whether to greenlight a 1.26-million-square-foot logistics project called the Moreno Valley Trade Center, on 80 acres south of the 60 Freeway.

The developer, Dallas-based Hillwood Investment Properties, has said the warehouse would stand 48 feet tall.

The project's final environmental impact reportstates that the building could reach 100 feet if occupied by a fulfillment center filling the orders of online shoppers.

In advance of Tuesday's meeting, letters from people on both sides of the issue have poured in to the city.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Walter Fus, saying he has been a Moreno Valley resident since 1977 and is a retired Air Force pilot, wrote Saturday, June 11, that approving the project "would be the most egregious decision this council could ever make."

Cristina Rivera, in a Wednesday, June 15, email, urged approval in praising an amenity the developer promised, if allowed to build. The project "will bring a new desperately needed sports park to the City of Moreno Valley," Rivera wrote.

Union carpenters submitted letters of support, saying the project would create construction jobs.

A decision was postponed

In October, the Moreno Valley Planning Commission rejected the project on a 4-0 vote, with one commissioner not participating due to a potential conflict of interest, concluding the center was incompatible with a neighborhood to the south. Hillwood Investment Properties appealed the decision to the council, which discussed the project in December but postponed a decision.
Now the project is back.

City planners are recommending the council approve it, by certifying the environmental impact report, approving a general plan amendment, changing the zone and making a determination that the project won't "result in a net loss in residential capacity."
In changing the property designation, the city would eliminate the potential for 145 single-family houses to be built, according to an environmental report.

Project proponents are seeking approval at a time when some Inland Empire communities are pushing back against warehouses.
For example, the Redlands City Council recently enacted a moratorium on industrial projects on the city's west side. Earlier, Jurupa Valley limited warehouses to its Mira Loma and Agua Mansa areas, and adopted rules for other types of businesses that generate heavy truck traffic. And Pomona is considering a 45-day moratorium on new warehouses.
At the same time, online shopping is soaring and continues to drive a regional explosion in the logistics industry.
The Moreno Valley Trade Center arrived on the dais of the Planning Commission in fall, a few months after the city completed an overhaul of its general plan, a guide for future growth.

That document designated the 80-acre project site, west of Redlands Boulevard between Eucalyptus and Encelia avenues and mostly empty except for an 8.5-acre plant nursery, as a place for houses on half-acre lots.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Hillwood is seeking permission to deviate from that new growth guide. In part because of that, Planning Commission member Jeff Sims called on the council to kill the project in a Saturday, June 11, letter.

"Why have an approved General Plan and not honor it?" Sims wrote.

Two other projects in pipeline

There are two other warehouse projects in the early stages.

One is called Edgemont Commerce Center, a proposed 142,345-square-foot warehouse distribution building on approximately 7 acres southwest of Bay Avenue and Day Street.
The other is Heacock Commerce Center, a pair of industrial buildings totaling 874,000 square feet on 46 acres southeast of Gentian Avenue and Heacock Street.
City spokesperson Matthew Bramlett said in email Thursday that environmental reports are being prepared for both projects and it's not known when they will be completed.

Like Moreno Valley Trade Center, the Heacock project can't be built unless the city lets the developer deviate from the general plan. Warehouses are allowed at the Edgemont site, though a zone change is required to build one bigger than 50,000 square feet.

George Hague, conservation chair for the Moreno Valley Group of the Sierra Club, said those projects are also in the wrong place because they are near homes and schools.

The California Air Resources Board submitted letters to the city warning that each project has the potential to "expose nearby communities to elevated levels of air pollution."

In separate letters, Robert Krieger, chief of the California Air Resources Board's Risk Reduction Branch, wrote that both projects are "in census tracts that score within the top 1 percent of State's most impacted from air pollution from an environmental hazard and socioeconomic standpoint."

Truck traffic, air pollution concerns

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

As for the Moreno Valley Trade Center, since the December hearing Hillwood has made changes.

The warehouse footprint has been reduced by 65,582 square feet to approximately 1,263,271 square feet, a city report states. A 35-foot-tall earthen berm, landscaped with trees and shrubs is to be built along Encelia Avenue. Truck access is to be limited to Eucalyptus Avenue. The number of loading docks is to be reduced by four, to 117, on the south side of the building, and by seven, to 97, on the north side.

Also, Hillwood has offered to build an 18-acre park at Redlands Boulevard and Ironwood Avenue that features two lighted soccer fields, a lighted baseball field, a playground, concession stand and exercise equipment.

Manuel and Arminda Del Alto, who live near Encelia Avenue, said improvements such as the berm don't alleviate concerns. They moved to Moreno Valley 14 years ago from Ontario because they wanted to escape the warehouses going up there.

"My main concern is what the trucks and cars will put in the air," said Manuel Del Alto, who has had a lung transplant.

Arminda Del Alto said they enjoy hearing birds and coyotes in the distance, and worry they will disappear.

Silvia Flores, who lives nearby with her husband, Joe, and two children ages 13 and 11, said she worries about pollution and traffic.

"It's going to be terrible to have all these trucks," Flores said.

The environmental report states that the logistics center would generate about 2,320 vehicle trips per day, including 1,436 by passenger vehicles and 885 by trucks. Under the fulfillment center scenario, the total would be 6,607 daily vehicle trips, including 5,750 passenger vehicles and 857 trucks.

Hillwood made several proposals earlier to soften the project's impact on the neighborhood, including setting aside:

- $125,000 to establish an account to purchase of at least five electric-powered heavy trucks that drive the 60 Freeway corridor through Moreno Valley
- $64,000 to create an account for defraying up to 90% of neighbors' costs of purchasing and installing noise-insulation equipment, with a per-home limit of $8,000. Eleven homes on Galino Court, Essen Lane, Gershwin Way, Mozart Way, Strauss Lane and Shubert Street would be eligible for the payments.
- $40,000 to establish an account to pay up to 90% of a homeowner's cost of purchasing and installing air filtration systems, with a per-home limit of $5,000. The same 11 households would be eligible for such payments.

Despite the offers, Sims, the planning commissioner, said, "you can't negate the smog, the traffic and the noise."

The warehouse building also would eclipse neighbors' views, he said.

On most days, they can see foothills.

"On a clear day you can see the mountains looking up toward the Big Bear area," Sims said. If the project goes in, he said, "all we will be able to see is a big wall looking to the north."

Date: Tuesday, April 11, 2023 2:25:57 PM

Warning: External Email – Watch for Email Red Flags!

Honorable Mayor and Councilmembers;

The MVTC is case where the proximity to current affected residents is a major problem.

I believe that the people in the affected community should have the most credibility because we also represent the children to be affected by the decisions of people and interests that do not hold or care about the well-being of our community. The objective fact that we have to sit through 50+ paid shills of this MVBC political theatre is disappointing. There are always paid workers that claim to live amongst us or live in Moreno Valley at large to lobby for destructive and irreversible policy prescriptions for our neighborhood in the name of revenue and personal gain or greed. It is frustrating to listen to and deal with knowing those people who are for projects in our community do not live here. If the same questionable projects were dropped in their community they would disapprove. It is shocking to us that some things people believe are "Good for Moreno Valley". Really? Good for who? These outside interests wanting and praising this project as a net positive for Moreno Valley do not live in this community. This is not a good project in the current location... If you approve this project then you will want to approve the other adverse project because the ball is rolling... I would like not to assume that you care more about city revenue than the health and well-being of the people in your community.

If these developers are offering $500,000 to the city to develop in areas that will cause irreparable harm to the community then there must be something that is innately wrong with the project. **It does not fit in with this community and my children will pay the price for greed and power**. **You ran as Democrats that are supposed to care about the community and environment over corporate greed**. Your constant disregard for being consistent about neglecting the need and forsaking the public trust is disturbing. But again objectively you are considering large warehouses that **will not have many six-figure jobs and tons of low-wage jobs** that are not making a liveable wage. This behavior that is being tolerated does not fit in with our progressive agenda and typifies the corporate monster that is allowed to propagate itself in retrospect to what you ran on as politicians and supposed protectors of the community.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Our AG Rob Bonta has also filed a lawsuit accusing Moreno Valley of violating environmental law. I cease to understand why the proponents of these actions fail to see the eminent devastation of an otherwise good family neighborhood being shuttered to usher in "TAX DOLLARS" instead of maintaining a good quality of living for the affected residents.

Reiterating the sad part is that we will rehash the sideshow of union workers claiming to be a part of our community that somehow we never see at our local meetings tell us how good this project is for Moreno Valley, to say nothing of how it will affect the immediate local residents. These actors are not in fact a part of our local community. They never talk about family, kids, traffic, noise, or air quality in the local community. They only talk about jobs. Low-paying warehouse jobs. Why is that? Because they do not live here off of Redlands. They have no interest in our concerns about why this project's location and proximity to our community is a net negative.

We are very disappointed that the developer in the 11th hour wishes to gain an audience with our community to attempt to tell the council that we agree with this project. Rest assured this is not the case. The developer has stood up a website www.moreformv.com which does not address pollution, noise, and traffic and does not directly address our concerns legitimately. They framed their solutions to somehow be a net benefit to us considering their proximity. It is disinformation/misinformation at best in the same vein as CNN and/or Fox News anchors stating their opinion as facts. They are gaslighting our community by continuing along with this comedy of errors. We have made our concerns known and have not received any satisfactory resolutions to those concerns.

1. Traffic in our neighborhood

2. Noise abatement from offending businesses

3. Traffic mitigation where that disaster area called a roundabout on Redlands located Redlands Blvd., especially if more trucks are going to be on it

4. Why do we need another warehouse in MV when other cities have placed moratoriums on them?

5. Jobs they claim to create are all low-wage jobs. We do not need those kinds of jobs.

6. Why are you offering to build a park (Not near us, I might add) if this project is a net positive for Moreno Valley?

At the end of the day, I like business and growth. Just not at the expense of my home, children, and the overall well-being of our community. This project cannot exist in its current plan. All involved need to go back to the drawing board and create a community master plan that does not infringe on residents or develop businesses that the residents will use. Not all

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

business is good business. I expect that the city council maintains its rejection of this project. There are other opportunities for business without the downsides of what we are currently present with.

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

Our AG Rob Bonta has also filed a lawsuit accusing Moreno Valley of violating environmental law. I cease to understand why the proponents of these actions fail to see the eminent devastation of an otherwise good family neighborhood being shuttered to usher in "TAX DOLLARS" instead of maintaining a good quality of living for the affected residents.

Reiterating the sad part is that we will rehash the sideshow of union workers claiming to be a part of our community that somehow we never see at our local meetings tell us how good this project is for Moreno Valley, to say nothing of how it will affect the immediate local residents. These actors are not in fact a part of our local community. They never talk about family, kids, traffic, noise, or air quality in the local community. They only talk about jobs. Low-paying warehouse jobs. Why is that? Because they do not live here off of Redlands. They have no interest in our concerns about why this project's location and proximity to our community is a net negative.

We are very disappointed that the developer in the 11th hour wishes to gain an audience with our community to attempt to tell the council that we agree with this project. Rest assured this is not the case. The developer has stood up a website www.moreformv.com which does not address pollution, noise, and traffic and does not directly address our concerns legitimately. They framed their solutions to somehow be a net benefit to us considering their proximity. It is disinformation/misinformation at best in the same vein as CNN and/or Fox News anchors stating their opinion as facts. They are gaslighting our community by continuing along with this comedy of errors. We have made our concerns known and have not received any satisfactory resolutions to those concerns.

1. Traffic in our neighborhood

2. Noise abatement from offending businesses

3. Traffic mitigation where that disaster area called a roundabout on Redlands located Redlands Blvd., especially if more trucks are going to be on it

4. Why do we need another warehouse in MV when other cities have placed moratoriums on them?

5. Jobs they claim to create are all low-wage jobs. We do not need those kinds of jobs.

6. Why are you offering to build a park (Not near us, I might add) if this project is a net positive for Moreno Valley?

At the end of the day, I like business and growth. Just not at the expense of my home, children, and the overall well-being of our community. This project cannot exist in its current plan. All involved need to go back to the drawing board and create a community master plan that does not infringe on residents or develop businesses that the residents will use. Not all

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

business is good business. I expect that the city council maintains its rejection of this project. There are other opportunities for business without the downsides of what we are currently present with.

The objective fact that we have to sit through 50+ paid shills of this MVBC political theatre is disappointing. There are always paid workers that claim to live amongst us or live in Moreno Valley at large to lobby for destructive and irreversible policy prescriptions for our neighborhood in the name of revenue and personal gain or greed. It is frustrating to listen to and deal with knowing those people who are for projects in our community do not live here. If the same questionable projects were dropped in their community they would disapprove. It is shocking to us that some things people believe are "Good for Moreno Valley". Really? Good for who? These outside interests wanting and praising this project as a net positive for Moreno Valley do not live in this community. This is not a good project in the current location... If you approve this project then you will want to approve the other adverse project because the ball is rolling... I would like not to assume that you care more about city revenue than the health and well-being of the people in your community.
>
> If these developers are offering $500,000 to the city to develop in areas that will cause irreparable harm to the community then there must be something that is innately wrong with the project. **It does not fit in with this community and my children will pay the price for greed and power**. **You ran as Democrats that are supposed to care about the community and environment over corporate greed**. Your constant disregard for being consistent about neglecting the need and forsaking the public trust is disturbing. But again objectively you are considering large warehouses that **will not have many six-figure jobs and tons of low-wage jobs** that are not making a liveable wage. This behavior that is being tolerated does not fit in with our progressive agenda and typifies the corporate monster that is allowed to propagate itself in retrospect to what you ran on as politicians and supposed protectors of the community.

Subject:	Re: April 18th Council Hearing on Moreno Valley Trade Center (MVTC) & city council email addresses
Date:	Wednesday, April 12, 2023 12:47:32 PM

Warning: External Email – Watch for Email Red Flags!

Honorable Mayor and Councilpersons,

April 18 the Moreno Valley Trade Center ("MVTC") is again on your agenda to consider overturning your Planning Commissions October 28, 2021 unanimous denial of the project.

At the December 7, 2021 Council appeal hearing after hearing significant public comments, the public hearing formally closed, and after council deliberation, then Mayor Gutierrez indicated "it didn't seem as if there was support for the project." Instead of taking the vote, he suggested a continuance to a date uncertain. This was motioned and approved 3-1. Here we are close to a year and half later and now the matter is back.

During the council deliberation on December 7, 2021 Councilpersons Delgado, Cabrera, and Marquez made the following comments:

Councilperson Marquez: "praised the project but asked when the city would cease approving warehouses in residential areas."

Councilperson Cabrera: "he explained the decision was difficult. He agreed that good paying jobs are necessary. He added that the issue lies in determining whether the economic benefits outweigh all of the negative impacts.....He acknowledged the extensive work performed by Hillwood to mitigate a lot of the negative issues, but explained the location is the crux of the issue. He expressed his desire that there were no docks or truck parking on the south side of the building."

Councilperson Delgado: "stated Hillwood's proposal has exceeded expectations. He indicated the project would be better suited in a different area.....He expressed he would fully support the project if were located elsewhere."

To read the minutes in whole, refer to the City's website.

As on December 7, 2021 the Hillwood's MVTC project continues to propose:

1. Putting a massive 1.3 MSF logistics warehouse with associated traffic and pollution (noise and air) on R-2 zoned property directly adjacent to existing R-2 and R-3

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

homes. To put into perspective, the MVTC building size is in area is larger than the Moreno Valley Mall.

2. A project that continues to fail to adequately mitigate significant environmental impacts. The email from George Hauge below provides information about that.

3. A project layout that has not changed. It continues to propose a 1.3 million SF warehouse with truck docks on both the south (neighborhood side) and north side. Directly ignoring then Councilperson, now Mayor Cabrera's comments during December 7, 2021 deliberations.

4. A project that will build a 40-foot-wide private truck roadway parallel to Encelia (around 250 ft. from existing homes along Encelia) for truck traffic to circulate between the truck docks on the north and south side of the building and to access outlets onto Eucalyptus. Based on the plans if you were standing at the intersection of Mozart and Encelia, there will be a 35' +/- landscaped berm and around 15 ft. below the top of berm on the MVTC side of the berm will be the private truck road. From the road going north towards the proposed warehouse will be a 14 ft. tall wall, then truck/trailer parking and loading docks, then the 40 ft. (or 100 ft.) building. Of note the exhaust stacks of the trucks on the private road will be at approximately the same height of the top of the berm. This berm will be used 24/7 and generate noise and air pollution for the neighborhood to put up with.

5. The proposed 35 ft. berm and building will blot out existing north looking view sheds from the neighborhood.

6. The Developer has made no additional mitigation offers for the affected neighborhood such as widening Redlands between Encelia and Dracaea, or putting in traffic signal at either Dracaea or Encelia/Redlands. The only direct mitigating offer to the adjacent neighborhood is for addition at the developer's expense of air filtration units, and sound proofing on some of the existing homes on the south side of Encelia, and power washing of the exterior of some of the homes. The later apparently only during construction. On its face the obvious question is - why would air filtration and sound proofing be needed? We all know why - direct impacts of diesel soot and noise from the added traffic the MVTC places on the community.

7. A project necessitating an amendment of the City's approved General Plan (2040). The recently approved City General Plan (2040) shows the 80 acres where MVTC is proposed as R-2, consistent with the existing neighborhood. Approval of the project by the Council will require overturning the unanimous denial of the project by Planning Commission and approving a General Plan Amendment to change the zoning of the 80 acres from R-2 to business park/industrial. These actions differ from the recently approved warehouses in the Edgemont area, where 1) the buildings were smaller, and 2) the existing land use zoning already allowed this type of projects. Approval of projects whereby their anticipated use knowingly creates noise, traffic, and air pollution from diesel trucks servicing the project should not be approved by residential zoned or existing residential areas. There should be some minimum buffer distance. The state of CA is attempting to create a 1,000 ft. buffer distance, but that has yet to be passed. Other area cities in the inland empire have put the brakes on warehouses due to traffic and environmental issues. With the World Logistics Center (WLC) about to commence construction, it would seem Moreno Valley has more than enough warehouse land use for decades to come and don't need to add more with the MVTC. This council should respect its approved General Plan and not amend it

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

with putting incompatible land uses directly next to one another. There is 2,800 acres of WLC to build and supply all the supposed living wage jobs touted with logistic careers.

8. A project that exacerbates traffic congestion and lowering of the quality of life of all Moreno Valley citizens. Traffic getting in and out of MV is tough now. The 2,800-acre WLC and its impacts on traffic have yet to be absorbed. MVTC will be additive to the massive cumulative traffic impacts this community has to deal with. As a note, the elevation difference between the 60/215 interchange and 60/91 interchange plays a significant role in the congestion and travel time delays currently experienced. The state of CA recently improved the 60 through the badlands, but that stretch of 60 between WLC Parkway and 60/10 interchange is plagued with the same problem as the stretch between Moreno Valley and Riverside.....grade difference. Trucks cannot go as fast as cars going up and down grades when loaded. This we all know as fact. The traffic studies fail miserably to account for this. We Moreno Valley citizens will experience increased traffic going west and east on 60 just to get around in MV with the WLC and MVTC (if approved). There will also be increased air pollution due to the additional truck traffic attracted to the area by the MVTC. An 18-acre park doesn't fix this when your commute time increases substantially. When will you or your children have time to run around on a sports park after spending hours of your life on a weekly basis sitting on the freeway breathing diesel soot?

So, what is different now than what Hillwood has proposed over the last year and a half? The project and its impacts remain the same. The difference now is Hillwood has put on the table an offer of a $500,000 cash contribution to the Moreno Valley Community Fund, and a contribution of an 18-acre sports park. Hillwood has witnessed the controversy and opposition of its project at the Planning Commission, where it was unanimously denied. Hillwood also witnessed the lack of support during council deliberations at the December 7, 2021 appeal. The bottom line is Hillwood can't mitigate the significant impacts of the MVTC and now seek your support of its approval in other ways. Their way is to put these offers/incentives on the table as "mitigating public benefits". There are various terms for what Hillwood is doing to curry favorable results, but I guess the acceptable term nowadays in politics is "influencing."

At the end of the day if approved, the council will be provided hard hat wearing, gold shovel holding, yellow ribbon cutting photo ops as a reward for a yes vote. Maybe people living in other areas of the City may think getting these incentives is a good thing and will indicate their support of you.....but remember they won't have to live with this project literally directly next to them.

Approval of the MVTC comes at the direct cost of one of the existing nicer large lot neighborhoods in Moreno Valley. You can deny the MVTC entitlements and easily point to the coming new jobs and economic benefits the WLC will provide as news indicates it is soon to begin construction. Let the 80-acres where MVTC is proposed be built as residential and let the property taxes and development fees from that support funding of a park. Perhaps transitional density of residential on the 80-acres rather than all R-2 would enable this. The City benefits from higher property taxes and people shopping in Moreno Valley. Added residential rather than more warehouse does that.

You were elected to protect and enhance the quality of life for all Moreno Valley

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

residents. The MVTC is not located in an appropriate location, and it will have direct harm on the existing citizens living in homes adjacent to where the MVTC is proposed. In the past the council denied approval of the Prologis Project adjacent this same existing residential neighborhood. This was responsible and the City continued to move forward despite the loss of the denied Prologis logistic/warehouse square footage. On December 7, 2021 three of the four council appeared to have real concerns about the location of the MVTC and the impacts if would have on the same existing residential, similar to the council when the Prologis project was considered. Hillwood though continues to push forward. MVTC location is in a residential area, there will be a quarter mile or so of loading docks proposed on the south side of the building, and the existing residential will be directly harmed by air and noise pollution, loss of views, and traffic. The rest of the City residents not living next to the MVTC will get the negative harm by more truck traffic, air and noise pollution, and added commute time.....all negatively impacting the quality of life you were elected to protect and enhance. Let Moreno Valley absorb what it already has approved in warehouse/logistic uses.....when is enough, enough?

With the December 7, 2021 council meeting hearing the appeal the public hearing was formally closed. Will this Council reopen the public hearing?

Last - would you want a council to vote to approve the MVTC if your home was directly next to it?

Uphold your Planning Commissions unanimous denial of the MVTC Project.

Jeff Sims
Moreno Valley Resident

Subject: April 18th Council Hearing on Moreno Valley Trade Center (MVTC) & city council email addresses

Good morning/afternoon Neighbors,

This is your neighborhood = Speak Up and Show Up!!!

The 1.26 million sq ft Moreno Valley Trade Center massive warehouse which could be at least 100 feet high is again scheduled before the city council = Tuesday November 15th at 6 pm. It would be located at SW Redlands Blvd & Eucalyptus Ave. This is where Hall Nursery is/was located and where the roundabout is on Redlands Blvd. **You can help make a difference = Please Do!**

It is proposed on land zoned for homes on half acre lots and across Encelia Street from family homes to the south.

When the project couldn't protect the neighborhood and the environment, they decided a park at the SE corner of Ironwood Ave/Redlands Blvd could be offered to "INFLUENCE" the council to get at least three votes, **but they fail to explain the park will be next to a city designated diesel truck route with all its harmful pollution impacting the children using the sports park** — active use of the sports park will result in children breathing in deeply the health impacting diesel pollution. The 40 million sq ft World Logistics Center warehouse project has just begun moving forward with its project and will be using Redlands Blvd for some of its 13,000 daily diesel truck trips as will the MVTC. The sports park's tall lights will light up much of NE Moreno Valley with its nighttime glow many days of the week.

If the project is approved, you can expect the Pilot Travel Center/Truck Stop with its many hundreds of daily diesel trucks will be approved directly across Eucalyptus Ave from the MVTC.

If some of the above is approved, you will experience the roundabout trying to handle **several large diesel trucks every minute** throughout most of the day and the out-of-date Redlands Blvd interchange will become a nightmare.

You and each of our neighbors need to email Each council member at least once and ideally more using their email addresses found below before the Tuesday April 18th council hearing. It is usually better to send it to each one individually, but the main thing is to send something.

Moreno Valley City Council Members Email Addresses

Mayor Ulises Cabrera (Mayor@moval.org)

District 1 -Elena Baca Santa Cruz (elenab@moval.org)

District 2 -Edward A. Delgado (edd@moval.org)

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

District 3 -David Marquez (davidma@moval.org)

District 4 - Cheylynda Barnard - Cheylyndab@moval.org

If you also email both planner Gabriel Diaz (Gabrield@moval.org) and planner Sean P. Kelleher (seanke@moval.org) **before this Wednesday April 12th** to the City Council members, **it should get into the agenda packet for the council and public to read**

Just make sure they know it is for the City Council members concerning the Moreno Valley Trade Center it should get to them. I would also cc the City Clerk (cityclerk@moval.org) to make sure it is in the public record.

EVEN THOUGH THEY ARE TRYING TO FIT THEIR VERY LARGE WAREHOUSE ON LAND ZONED FOR HOMES AND ACROSS THE STREET FROM HOMES THE FOLLOWING ARE IMPORTANT AREAS THEY HAVE **NEVER** BEEN ABLE TO COMES CLOSE TO MITIGATING ACCORDING TO THE FOLLOWING FROM THEIR OWN FINAL Environmental Impact Report (EIR):

"5.1 Significant Environmental Effects that Cannot be Avoided if the Project is Implemented

The CEQA Guidelines require that an EIR disclose the significant environmental effects of a project which cannot be avoided if the proposed project is implemented (CEQA Guidelines Section 15126(b)). As described in detail in Section 4.0, *Environmental Analysis*, of this EIR, the proposed Project is anticipated to result in impacts to the environment that cannot be reduced to below a level of significance after the consideration of Project design features, compliance with applicable federal, State and local regulations, and the application of the feasible mitigation measures identified in this EIR. The significant impacts that cannot be mitigated to a level below thresholds of significance consist of the following:

- **Aesthetics: Implementation of the Project would mostly or completely block views** of Reche Canyon and the Badlands (and the San Bernardino Mountains beyond) from the segment of Encelia Avenue that abuts the Project site on the south (west of Shubert Street). Also, implementation of the Project would mostly or completely block scenic views of Mount Russell and its foothills from the segment of Eucalyptus Avenue that abuts the Project site. This would be a significant and unavoidable direct impact.
- **Air Quality (Air Quality Management Plan Conflict):** The Project would emit air pollutants (NOx) that would contribute to a delay in the attainment of federal and State ozone standards in the SCAB. Because the Project requires a General Plan Amendment, it also would exceed the growth projections contained in SCAQMD's *2016 AQMP*. As such, the Project would conflict with and could obstruct implementation of the *AQMP*. Project impacts due to a conflict with the SCAQMD *2016 AQMP* would be significant and unavoidable on both a direct and cumulatively-considerable basis.
- **Air Quality (Criteria Pollutant Emissions):** After the application of Project design features, mandatory regulatory requirements, and feasible mitigation measures, Project-related NOx emissions during long-term operation of the Project would remain above the applicable SCAQMD regional thresholds. Accordingly, Project-related emissions would not meet SCAQMD air quality standards and contribute to the non-attainment of ozone standards in the

Attachment: City Council - Public Comments Packet 3 of 3 (6209 : Moreno Valley Trade Center/Park)

SCAB. Therefore, Project operational-related impacts due to NOx emissions would be significant and unavoidable on a direct and cumulatively-considerable basis.

- **Greenhouse Gas Emissions (GHG Emissions Generation):** Project-related GHG emissions would exceed the applicable SCAQMD significance threshold for GHG emissions and would result in a cumulatively-considerable impact to the environment." (page 5-1 in MVTC Final EIR)

Neighbors Helping Neighbors,

George Hague

Subject: Re: Public Hearing April 18, 2023

Mayor Cabrera,

I have the same concerns as Mr. Thornsley. A project of the magnitude of the MVTC needs to be fully vetted in a transparent manner. Hillwood has their website and pro-MVTC advocacy going in full force to gather up support. They have pulled out the stops offering "community benefits" - $500K in cash and a park to somehow mask the significant environmental impacts it can't mitigate.

I ask you to go back and watch the video of you and your fellow council members during the December 7, 2021 deliberations. MVTC has addressed none of the actual concerns you, Delgado, and Marquez brought up. The project may have been denied that night had there been a vote, but Guiterrez threw out a lifeline by closing the hearing and then continuing the matter.

The project hasn't changed. The harm it will cause to the neighborhood directly next to it hasn't changed. Only the cash and park.

Your advisory Planning Commission unanimously denied MVTC in October 2021. It upheld the recently approved General Plan (2040) to not approve an amendment to allow incompatible land uses directly next to each other.

The public should not be confused, and the vote should be made transparently. The Public Hearing for this matter should be reopened.

Jeff Sims

Subject: Public Hearing April 18, 2023

Mayor Cabrera,

I, and many others, worried that you will not permit further public comments on the Moreno Valley Trade Center Appeal hearing on April 18. It is my understanding that when the City Council last heard the appeal of the Moreno Valley Trade Center the public comment portion of the hearing was closed then Council discussion was continued just before a vote would have occurred. That might technically mean that the Council only has to reconvene and vote on this project. However, that last hearing was almost a year and a half ago and a lot has changed since then, including the addition of a new Council Member not involved with this issue. Additionally, the developer has put forth new incentives for garnering approval, a new development agreement has been prepared, and likely some other changes to the project plan.

After all tht time, memories have faded and the developer has had and extensive amount of time to privately persuade each Council Member. I expect each Council Member to be forthcoming about how much contact they have had with the developer over the past 17 months. In all fairness to everyone involved, next Tuesday's appeal hear should be a reboot, starting over from the beginning and all community members should be permitted to speak on this project, prior to any Council consideration and voting.

Respectively,

Tom Thornsley

Good afternoon City council members

I hope you will read each of the city adopted goals found below and think of how they apply to the Moreno Valley Trade Center (MVTC) — ensuring things like a smooth transition and sensitive to surrounding context as well as others are never addressed when placing warehousing so close to sensitive receptors like family homes. These Goals should not be applied only when it is convenient and avoided when they are not.

City Goals Not Being addressed on warehouse project reviews = Please read each one found below.

Noise (N)
Goal N-1 Design for pleasant healthy sound environment conducive to living and working

Goal N-2 Ensure that noise does not have a substantial, adverse effect on quality of life in the community.

Environmental Justice (EJ)
Goal EJ-1 Reduce pollution exposure and improve community health.

Land Use and Community Character (LCC)
Goal LCC-3: Build a distinctive sense of place and pride in Moreno Valley.

LCC.3-1 Insist on high-quality development that is sensitive to surrounding context throughout the city and particularly in centers and corridors.

LCC.3-2 Use development standards to ensure smooth transitions for areas that border one another so that neighborhoods and districts maintain their unique qualities while being compatible with one another.

LCC.3-17 Screen and buffer nonresidential projects to protect adjacent

residential property and other sensitive land uses when necessary to mitigate noise, glare and other adverse effects on adjacent uses.

The planning Department needs to prove all of these have been met by all warehouse projects and that includes the Moreno Valley Trade Center.

Sincerely,

George Hague

Gentlemen,

I am the attorney for Moreno Valley Trade Center, LLC, the proponent of the Moreno Valley Trade Center Project. Moreno Valley Trade Center, LLC hereby requests that you agendize the following actions for consideration by the City Council on April 18, 2023:

1. Adopt a Resolution approving and adopting the Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations and certifying the Final Environmental Impact Report for the Moreno Valley Trade Center Project;
2. Adopt a Resolution approving General Plan Amendment (PEN 19-091), Tentative Parcel map (PEN 19-0234), and Plot Plan (PEN 19-0193) and the respective conditions of approval, based on the recitals, evidence and findings contained in the administrative record of the proceedings;
3. Introduce an Ordinance approving Change of Zone (PEN 19-0192) and corresponding amendment to the City's Zoning Atlas and the related conditions of approval, based on the recitals, evidence and findings contained in the administrative record of the proceedings;
4. Adopt a Resolution finding and determining pursuant to senate Bill 330, that approval of the Moreno Valley Trade Center project will not result in a net loss of residential capacity; and
5. Adopt a Resolution accepting Community Benefits and a Community Park on behalf of the City of Moreno Valley, as offered by the Moreno Valley Trade Center, LLC and set forth in a Community Park Acquisition and Improvement Agreement and authorize the City Manager to sign the Agreement and approve any subsequent amendments, subject to the consent of the City Attorney consistent with the intent and purposes of the Agreement.

We look forward to discussing the details of this request with you.

Thank you, Mark Ostoich
